The Engineer advised that the Commission did not select the projects for the Federal Aid Secondary Highway System until it had consulted with all of the county courts, and the Commission thought that it was doing pretty well by Klamath County when it allocated \$61,000 to the roads of that county. He explained the Federal Government's requirements for the expenditure of the funds under discussion, which precludes their being used to finance roads on the Federal Aid Primary Highway System, but does not prohibit the expenditure of such funds on other roads in the state, whether they are on the state highway system or not. The Klamath Falls-Lakeview Highway, he said, is a primary state highway but it is not a Federal Aid highway, hence is qualified for the Federal Secondary Road Funds, as are the county roads, and the Commission decided to allocate some of the funds to this road in view of its importance as a farm-to-market route, and because no other funds were available for its improvement.

Chairman Cabell confirmed the remarks of the Engineer and advised that the Commission thought it was doing just what the people of Klamath County wanted done, as expressed by delegations from that county at previous highway meetings. He added that it is now too late to change the adopted program.

Messrs. Chase and Taber then reiterated their objections to the expenditure of these funds on primary state highways at the sacrifice of farm-to-market roads, and asked that the Commission's record show that they want this money spent either on county roads or on roads that are in the state secondary highway system. They filed with the Commission a resolution adopted by the Klamath County Court on May 25, 1938, in support of their oral remarks and outlining the stand that the County Court takes in regard thereto.

After further discussion the Commission decided definitely to proceed with the present plans for the improvement of the Klamath Falls-Lakeview Highway in the Federal Aid Secondary Highway Program.

A delegation from Umatilla County, consisting of County Commissioner Wm. R. Meiners, F. T. Jackson, and W. L. Rayburn, of Weston, came before the Commission and asked for the oiling of a 14-mile section of the Weston-Elgin Secondary State Highway from Weston toward a place known as Tollgate. Mr. Jackson stated that this is a dangerous road to travel because of its

dusty condition, and that numerous accidents have occurred. He gave as his thought that the Commission is obligated morally and legally to improve the road because the county several years ago built a 4-mile section thereof at the upper end at a cost of some \$20,000, in accordance with a previous understanding and agreement with a former highway commission, but the state was precluded from proceeding with its share of the work because of a change in the secondary highway law.

The Engineer doubted that the road has sufficient rock base to hold an oil treatment. Commissioner Aldrich gave as his understanding that the upper 4 miles of this section is in satisfactory condition to receive a light oil treatment but that the balance needs rock stabilization. After further discussion the Commission referred the matter to the Engineer for investigation and report as to whether or not the upper 4-mile section is in suitable condition to receive an oil treatment, such report to be rendered at the next meeting of the Commission on June 15. The Commission advised the delegation that the investigation is not to be construed in the least as a commitment of funds to oil the road at this time, because there is a shortage of funds to finance the work, but is simply to determine the feasibility of the job.

Mr. Meiners then brought up for discussion the matter of the state abandoning the state highway between Cold Springs and the Cold Springs Landing as an aid to the Pendleton Grain Growers' Association in the construction of a grain elevator and dock on the end of this road to facilitate the movement of wheat on Columbia River barges. He said that the road is not improved but that the county is willing to assume responsibility for the same and is also willing to turn over to the state jurisdiction over the oiled county road extending from Cold Springs to the warehouse at the Cold Springs siding of the O.W.R. & N. Company. The matter was discussed briefly but the Commission took no action thereon due to the question of the Commission's legal ability to abandon the highway, this being a primary state highway which cannot be removed from the state highway system except by legislative action.

Mr. Meiners then asked the Commission to construct fireguards along the secondary state highways between Echo and Butter Creek where, he said, costly fires have heretofore occurred. The Commission denied the request because of the expense involved; however, instructed the Engineer to erect signs at particularly hazardous points cautioning the traveling public about throwing lighted matches, cigarettes, et cetera, from automobiles, while traveling.

A delegation from Deschutes County, consisting of County Commissioner Wm. Baer and County Commissioner Millard T. Triplett, and also the Secretary of the Bend Chamber of Commerce, Mr. Don Peoples, came before the Commission in regard to rerouting Century Drive Secondary State Highway along Riverside Boulevard, in Bend, from Franklin Avenue to the junction of the present routing at Tumalo Avenue, so as to eliminate the right-angle turn in the present route at the intersection of Franklin Avenue and Broadway. In this connection the Secretary presented a letter from the Deschutes County Court requesting such change in routing because of its value from the scenic standpoint, being located along the south side of the city park, which is situated on the banks of the Deschutes River.

JUN 2 1936

Mr. Baer suggested the improvement of Riverside Boulevard and Century Drive easterly from the Deschutes River Crossing as a satisfactory project for the state secondary funds that have accumulated to the credit of Deschutes County, together with the \$3,000 that the county owes the state and which the county is willing to pay the state if the Commission will spend it on a suitable project in Deschutes County, making a total of approximately \$8,000. After considerable discussion the Commission decided not to reroute the secondary highway in Bend at the present time; however, approved the oiling of Century Drive Secondary Highway westerly from the Deschutes River Bridge as far as the funds available will permit. The Engineer was instructed by the Commission to prepare this project for contracting in July, if possible.

Mr. Peoples then asked the Commission for the oiling of the Santiam Highway from the junction with the North Santiam Highway easterly to the end of the present oiled surface near Suttle Lake. Chairman Cabell agreed that this would be a good oiling project to include in the construction program but the Commission cannot do it this year because funds are not available to finance the same.

The Commission discussed a letter from Mr. W. H. Lynch, District Engineer, Bureau of Public Roads, answering the Engineer's inquiry as to whether or not the proposed illumination project on the Interstate Avenue Section of the Pacific Highway West, Portland, will be eligible for federal participation. Mr. Lynch advised that the Chief of the Bureau of Public Roads holds that the use of the motor vehicle revenue for illumination of highways within cities will constitute a diversion of such funds, inasmuch as illumination within cities is not primarily for the safety of vehicular traffic but is for other major purposes, hence it does not appear that such installation within cities would be eligible for participation with Federal Aid. The Engineer gave as his thought that there is still a possibility that the Government can be prevailed upon to reverse its decision; and, in view thereof, suggested that the Commission proceed with its plans for the installation of this lighting system, but that the work be done under separate contract from the road contract. The Commission approved the suggestion by unanimous vote and instructed the Engineer to contact the federal authorities again in an endeavor to secure a change in the attitude taken relative to federal participation.

The Attorney reported satisfactory conclusion of negotiations with officials of the State of Washington concerning appropriation by the Oregon Highway Department of gravel and materials from the bed of the Columbia River to be used in the construction of a roadbed or grade for a new highway up the Columbia River Gorge. He said that an agreement has been executed by the Commissioner of Public Lands for the State of Washington, and the Board of Control of the State of Oregon, covering the matter. The Commission approved the report.

The Engineer reported satisfactory conclusion of negotiations with the Douglas County Court and the American Legion Auxiliary of Roseburg, for the placing of a marker for the memorial drive leading from the Pacific Highway to the Veterans' Home just north of Roseburg. He said that the committee

in charge of this matter appreciates the fact that the erection of their marker on the highway right of way, which is only 60 feet wide at this point, would create a traffic hazard, so they have secured permission from the owner of adjacent property to erect the marker on his land, which is entirely satisfactory from all standpoints. The Commission approved the report.

Consideration was given by the Commission to the Engineer's report on the complaint of Mr. Frank Ott that the reconstruction of the Fremont Highway in front of his premises near Paisley, Lake County, has caused him loss in revenue from his property by reason of the fact that certain lands which he has heretofore irrigated cannot now be irrigated because of the lowering of a certain siphon across the highway. The Engineer advised that the irrigation system has been reconstructed and is now working very satisfactorily, and efficiently irrigating all of Mr. Ott's land previously under irrigation, with the exception of about .7 of an acre. He recommended that settlement be now made with Mr. Ott in accordance with the mutual understanding and agreement that was had with Mr. Ott at a previous meeting. The Commission approved the recommendation by unanimous vote.

The Engineer reported on the cost to construct a non-skid wearing surface on Farmington Secondary Highway No. 142, for a distance of about one-half mile in the town of Beaverton, as has been requested by the District School Board of the Beaverton Public Schools. He estimated that such improvement would cost about \$600, and recommended approval of the project for construction during the 1938 season inasmuch as the present pavement is very smooth and dangerous to travel during wet weather. The Commission approved the recommendation by unanimous vote, the project to be paid for from the Emergency Fund in view of the fact that no provision has been made in the 1938 budget for the same.

The Commission had under consideration the opinion of the Attorney General as to whether employees of the State Highway Department who are to be covered by the schedule fidelity bond that the Commission is contemplating purchasing, are to be deemed employees or public officials. The Commission's Attorney advised that he contacted the Attorney General in regard to this matter and was referred to the Attorney General's opinion dated April 13, 1923, on this subject, in which opinion the Attorney General advises as follows:

"The answer to your question depends upon whether or not the discharge of the duties of clerks, officers and assistants to be employed by the commission pursuant to said Section 44-109, involves the exercise of any of the governmental functions delegated to the Oregon State Highway Commission. If the duties of such employees are to act in a clerical or advisory capacity they are not in my opinion public officers, but if they or any of them have power to decide questions of governmental policy for the commission they are public officers. It would appear, however, that such employees are not appointed nor do they hold office for a definite time, their relation to the commission being created by contract which is subject to termination at the will of the commission or as

JUN 2 1938

provided by the terms of the contract. Unless there is a clear delegation of authority to exercise governmental functions, such employees are not public officers."

The Commission's Attorney gave as his personal opinion, based upon the law as construed and declared by the Attorney General, that these employees are employees only and not public officials, because he is quite certain that it cannot be held or shown that the Highway Commission has delegated to these employees the right to exercise governmental functions or discretions vested in the Highway Commission. He suggested that, if the Commission approves this opinion, the company to whom the Commission awards the contract for furnishing the schedule fidelity bond be furnished with a copy of the Attorney General's opinion together with a certificate from the State Highway Commission to the effect that its employees merely carry out orders and instructions and that there is not delegated to them any of the governmental functions which have been delegated by the legislature to the State Highway Commission. The Commission indicated approval of the opinion as rendered but deferred action on the purchase of the bond until the following day. The Secretary was instructed to discuss the matter further with the representative of the bonding company in the meantime. (The contract was awarded to the Ohio Casualty Insurance Company the following day.)

The Engineer reported on the cost to reconstruct the Umpqua Highway on permanent alignment through the town of Reedsport to a connection with the existing highway east of that town. He estimated that such project would cost approximately \$47,400. The Commission ordered the report filed for future consideration, due to the fact that there are no funds available to finance the project at this time.

The Commission considered the claim of Mr. Chester Mace, Burns, Oregon, for reimbursement for losses that he alleges he sustained by reason of improper culverts and bridges on the John Day-Burns Highway approximately one mile north of Burns. Mr. Mace alleges that on account of such improper culverts and bridges high water from the Silvies River overflowed his alfalfa field, ruining approximately 25 acres thereof and damaging him to the extent of \$3,000. The Engineer advised that inspection of the field reveals that some 15 or 20 acres appear to be dead, although it is yet too early to determine definitely whether or not the root system of the alfalfa has been killed by the high water. He further advised that, while the present bridge structures are adequate to carry the normal flow of water, they are inadequate to take care of flood waters such as occurred last winter, consequently, the water backed up over Mr. Mace's property, the highway grade acting as a dyke. He recommended, in order to alleviate this condition, that the Silvies River Bridge be extended one 19-foot span on the east side and that a 17-foot span bridge be constructed on the highway approximately one thousand feet north-east of the Silvies River Bridge, and that such work be done some time during the present construction season, at an estimated cost of \$1,000. He also recommended that no action be taken on Mr. Mace's claim until it is known definitely whether or not his alfalfa has actually been killed by reason of this high water. The Commission approved the Engineer's recommendation by unanimous vote and decided to stand suit in the event that Mr. Mace is not satisfied

with such disposition of his claim. The expense of the bridge construction work is to be paid out of the emergency fund because no provision for the same has been made in the 1938 budget.

The Engineer discussed with the Commission the matter of reconstructing Sandy Boulevard in Portland. He said that to do this job properly would require resurfacing of the street throughout its entire length and would cost approximately \$225,000, which amount, in his estimation, is more than the Commission can spare for the purpose at the present time, particularly in view of the fact that the Portland Traction Company, which is to pay for part of the work, will not contribute more than \$25,000 of the cost of the same. He suggested that it might be advisable to do about one-half of the project at this time, from 15th Avenue to 45th Avenue, which would include the congested district in Hollywood; which, he estimated, would cost about \$130,000, provided the street-car company would agree to the covering up of its rails beyond these limits; and, provided further that the Bureau of Public Roads would approve the project on such basis, it being proposed to finance the work as a Federal Aid project and to charge the cost against the Portland district's share of the 1939 allocation of federal funds. After discussion, the Commission by unanimous vote approved the Engineer's suggestion subject to satisfactory solution of the rail matter and a decision as to the completion of the balance of the project. The Engineer was instructed to contact the street-car company officials and the Bureau of Public Roads engineers in regard thereto and to report the same to Chairman Cabell.

Claire Parker, right of way buyer, brought up for discussion the matter of the sale of a water meter from a house purchased in connection with right of way negotiations in Northeast Portland. Mr. Parker advised that since the Commission purchased this house someone entered it and removed the water meter, but the thief was found and the meter has been returned. Also, that he has an offer from Mr. Porter Yett, Portland, to purchase the meter for the sum of \$15. He recommended acceptance of Mr. Yett's offer. The Commission approved the recommendation unanimously.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room, with all Commissioners, the Attorney, and the Secretary present.

A delegation from Cottage Grove, consisting of County Judge N. E. Glass, and Messrs. S. L. Godard, L. C. Schroeder, Frank Heck, V. T. Randall and John Durr, Secretary of the Eugene Chamber of Commerce, was present in the interests of the reconstruction of the Pacific Highway along the newly-adopted route through the town of Cottage Grove. Judge Glass was spokesman for the group. He urged the Commission to construct the new route immediately so that contemplated business development can proceed and as an aid in relieving the unemployment situation that exists in the Cottage Grove district. He recalled that when the Commission conducted its hearing in Cottage Grove to ascertain the sentiment of the people with respect to rerouting the highway, such sentiment was divided, about 50 per cent of the people being in favor of the new route and the others desiring no change. However, since then, he said, the businessmen have agreed to the new routing; so, as far as he is

JUN 2 1938

able to ascertain, there is now no objection thereto. He presented three petitions urging the Commission to construct this project immediately, one of which petitions was signed by 47 people representing contractors and material men; the second by 43 persons representing businessmen of Cottage Grove; and the third by 190 citizens representing the public in general.

Others speaking in behalf of this project and endorsing the remarks of Judge Glass were Mr. Schroeder, in behalf of the Cottage Grove Chamber of Commerce; Mr. Godard, Mr. Randall, and Mr. Heck. Mr. Randall inquired when the Commission proposes to construct this project. He was informed by Chairman Cabell that the Commission cannot give any assurance that the job will be started at any particular time, it being a matter dependent entirely upon the Commission's finances. In any event, he said, it cannot be considered until the Eugene-Junction City project is completed. He advised that the Commission would consider the project in the formulation of next year's construction program but cannot make a definite promise in regard thereto at the present time.

Mr. Heck inquired, if the Commission set right of way stakes now along the new alignment, would these be changed later? He was informed by Chairman Cabell that it is not mandatory upon a new Commission to follow the plans outlined by its predecessor and such new highway commission could change the plans if it so desired. Mr. Durr thanked the Commission for the progress that is being made on the construction of the Junction City-Eugene Section of the Pacific Highway and for the work that is being accomplished on the Willamette Highway.

County Judge Nelson B. Higgs, of Harney County, and Mr. Archie McGowan, of Burns, came before the Commission in the interests of the Central Oregon Highway. They particularly asked that the contract for the oiling of the Brothers-Lake County Line Section be advanced so that the work can be completed this year. The Engineer advised that it would be impossible to award this contract before September and in any event no advantage would result from contracting the work sooner, because the oiling could not possibly be done until next year. By contracting the work in September, he said, the grading and surfacing can be accomplished before spring and the oiling work just as soon as weather conditions will permit so that the road will be ready for the next tourist season.

Judge Higgs asked the Commission to hasten the oiling of the Central Oregon Highway between Burns and Buchanan and between Juntura and Harper.

A delegation headed by Mr. James L. Conley, attorney, Portland, and including a Mr. Taylor, representing the Gearhart Park Company; Robert S. Ferril, Jr.; T. D. Honeyman; U. S. Badger, all of Portland; and Mayor J. L. Burgess of Gearhart, came before the Commission in regard to the tidelands at Gearhart. Mr. Conley advised that the Gearhart Park Company owns 300 acres of tidelands and ocean beach at Gearhart, extending from the Necanicum River northerly to a point about 1/4 mile north of Gearhart; that it has good title to this property except for delinquent taxes amounting to about \$50,609.16, which he believes Clatsop County will cancel upon the payment of the sum of \$10,000. The taxes on the beach area proper, he said, are paid in full but

what is troubling the owners is the taxes on the balance of their property. He mentioned that difficulty has been experienced in controlling traffic along the beach and they feel that if the beach were owned and controlled by the state the solution of traffic problems would be much simpler, hence their desire for state ownership. He offered, on behalf of the owners, to sell the beach area to the state for the sum of \$10,000, which amount they propose to pay to Clatsop County in order to clear the tax burden on the balance of their land. He also said that the owners will donate a 20-foot strip of land fronting on the beach for roadway purposes.

Others speaking on behalf of this proposition were Messrs. Taylor, Ferril, and Honeyman.

Chairman Cabell advised that the Commission has only a limited amount of funds budgeted for the purchase of park and recreational areas and for the maintenance of the same and that it is the policy of the Commission to spend this money for outstanding properties desirable from the scenic standpoint. He further explained that the State of Oregon now owns practically all of the ocean beach, in view of which, in his opinion, the general public would not support the Commission in spending public funds to acquire the beach at Gearhart, particularly in view of the fact that this area is privately owned and most of the benefits would accrue to private parties. He expressed regrets that the Commission cannot help out in this matter but feels definitely that it cannot do so.

Commissioner Aldrich concurred in the remarks of Chairman Cabell and added that it would be a fine display of public spirit if the ocean beach were presented to the state as a gift, but he did not think that the Commission would be justified in expending \$10,000 to acquire the same when there are so many other places in the state where the money is needed and could be used to better advantage from the general public standpoint.

Messrs. W. F. Case, Inspector for the United States Post Office Department, and Percy C. Caulfield, Postmaster at Oregon City, were present and inquired as to the Commission's plans for the improvement of Fifth Street in Oregon City, requiring the narrowing of the sidewalk in front of the post-office building and the prohibiting of the parking of cars on Fifth Street in front of the post office. Mr. Case advised that he has an inquiry from his superiors in Washington, D. C., in regard to this matter and they have asked him for a report on the same at once.

The Engineer explained the plans of the Commission for this project necessitating cutting back the sidewalk and the prohibition of parking of cars for about 100 feet on Fifth Street, west of Main Street, so as to provide for four lanes of moving traffic. He also said the plan includes the installation of an automatic traffic signal.

Mr. Case informed the Commission that he was not present to criticize the Commission's plans but simply to secure information for transmittal to officials in Washington. He said he doubted, however, that such officials would approve the plan because it would bring the highway just that much

closer to the post-office building and because the street-car tracks on Main Street make it impossible for automobiles to turn around on that street. The Commission instructed the Engineer to furnish Mr. Case with maps at once showing the plans for the improvement at this location.

At 3:00 o'clock p. m. Chairman Cabell announced the following awards of contracts, sale of buildings, scrap steel, et cetera, for which bids were taken at the morning session:

"Sheeley Bridge Section of the Upper Nehalem County Road, in Columbia County. 3.22 miles surfacing and oiling. The low bid received for this project was that of Warren Northwest, Inc., Portland, at \$12,573.00, based on the use of tar. This company did not submit a bid based on the use of road oil. The next low bid was that submitted by Babler Bros., Portland, at \$13,538.00, based on the use of tar. They also did not submit a bid based on the use of road oil. There were 2 higher bids received. The Commission rejected all bids received for this project and ordered it readvertised.

"St. Helens-Warren Section of the Columbia River Highway, in Columbia County. 3.95 miles grading and asphaltic concrete paving. Newport Construction Co. & Kern & Kibbe, Portland, submitted the low bid for this project at \$87,614.70. E. C. Hall and Warren Northwest, Inc., Eugene, submitted the next low bid at \$90,752.00. There were 2 higher bidders. The Commission has awarded this contract to Newport Construction Co. and Kern & Kibbe at their low bid of \$87,614.70.

"Bear Creek-Ashland Section of the Pacific Highway, in Jackson County. 0.41 mile roadside improvement. There were 2 bids received for this project, the low one being that of M. C. Lininger & Son, Ashland, at \$3,655.50. The other bid was submitted by the River Bend Sand & Gravel Company, Salem, at \$6,504.00. The Commission has awarded this contract to M. C. Lininger & Son at their low bid of \$3,655.50.

"Williamson River Bridge Section of The Dalles-California Highway, in Klamath County. Construct 342 lin. ft. reinforced concrete bridge. The low bid for this project was submitted by Mountain States Construction Company, Eugene, at \$31,790.00. The next low bid was submitted by Clifford A. Dunn, Klamath Falls, at \$32,855.00. There were 7 higher bidders. The Commission awards this contract to Mountain States Construction Company at its low bid of \$31,790.00.

"Cottonwood Creek-Maddock Corner Section of the Klamath Falls-Lakeview Highway, in Lake County. 2.0 miles grading and talus rock roadbed topping. McNutt Bros., Eugene, submitted the low bid for this project at \$23,834.50. E. L. Rigdon, Paisley, submitted the next low bid at \$26,014.50. There were 6 higher bids. The Commission awards this contract to McNutt Bros. at their low bid of \$23,834.50.

"Peoria-Harrisburg Section of the Corvallis-Harrisburg County

Road, in Linn County. 6.0 miles surfacing and 12.94 miles oiling. The low bid submitted for this project was that of Clifford A. Dunn, Klamath Falls, at \$38,461.00, based on the use of road oil. He did not submit a bid based on the use of tar. The next low bid was submitted by Edwin C. Gerber, Oregon City, at \$39,352.20, based on the use of road oil. He did not submit a bid based on the use of tar. There were 8 higher bidders. The Commission awards this contract to Clifford A. Dunn at his low bid of \$38,461.00, using road oil.

"Roberts-Orville Section of the Halls Ferry County Road, in Marion County. 3.33 miles surfacing and oiling. McNutt Bros., Eugene, submitted the low bid for this project at \$13,805.00, using road oil, and \$14,037.00 based on the use of tar. Harold Blake, Portland, submitted the next low bid at \$16,649.50, based on the use of tar. He did not submit a bid based on the use of road oil. Edwin C. Gerber, Oregon City, submitted the third low bid at \$16,852.00, based on the use of road oil. He did not submit a bid based on the use of tar. There were 5 higher bidders. The Commission has referred all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Washington County Line-Skyline Boulevard Section of the Northwest Thompson County Road, in Multnomah County. 1.73 miles grading, surfacing and oiling. The low bid submitted for this project was that of Saxton, Looney & Risley, Oak Grove, at \$32,669.00. The next low bid was submitted by Harold Blake, Portland, at \$33,301.50. There were 2 higher bidders. The Commission has referred all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Airport Road Overcrossing on Northeast 42nd Avenue over the O.W.R.R. & N. tracks at Northeast Portland Highway, in Multnomah County. Barham Bros., Salem, submitted the low bid for this project at \$41,537.50. Shattuck & Neland, Portland, were the next low bidders with a bid of \$42,003.50. There were 10 higher bidders. The Commission has awarded this contract to Barham Bros. at their bid price of \$41,537.50.

"Chenoweth Creek-The Dalles Section of the Chenoweth County Road, in Wasco County. 0.70 mile grading and 1.19 miles surfacing and oiling. The Commission received two bids for this project, the low one being that of H. L. Rice, Portland, at \$12,884.50. The other bid was submitted by Babler Bros., Portland, at \$16,943.00. The Commission has rejected both of these bids and has ordered the project readvertised."

Buildings in Albany:

"Building No. 5178, formerly owned by Augusta Otto. The Commission received one bid for this building, being that of C. R. Wendel, Albany, at \$102.00. The Commission considers this offer

JUN 2 1938

satisfactory and has sold the building to Mr. Wendel at his bid price of \$102.00.

"Building No. 4968, formerly owned by the World War Veterans' State Aid Commission. No bids were received by the Commission for the purchase of this building.

"Building No. 4957, formerly owned by Barbara Kinney. No bids were received by the Commission for the purchase of this building."

Buildings in Northeast Portland:

"Building No. 5408, formerly owned by H. C. Rath. Sullivan Wrecking Company, Portland, submitted the only bid for this building at \$1.00. The Commission considers this offer satisfactory and has sold the building to the Sullivan Wrecking Company for \$1.00.

"Building No. 5412, formerly owned by William Habernicht. The only bid submitted for this building was that of Sullivan Wrecking Company, Portland, at \$23.56. The Commission referred the offer to the Engineer with power to sell the building to the Sullivan Wrecking Company.

"Building No. 5413-2, formerly owned by the O.W.R.R. & N. Company. The only bid submitted for this building was that of Sullivan Wrecking Company, Portland, at \$11.00. The Commission considers this offer satisfactory and accordingly has sold the building to the Sullivan Wrecking Company for \$11.00.

"Building No. 5416, formerly owned by Philip Buebke. Sullivan Wrecking Company, Portland, submitted the only bid for this building at \$13.56. The Commission referred this offer to the Engineer with power to make the sale.

"Building No. 5255, formerly owned by Chas. L. Schneller. Only one bid was received for this building, being that of Sullivan Wrecking Company, Portland, at \$56.56. The Commission referred this offer to the Engineer with power to make the sale.

"Building No. 5566, formerly owned by Maude Tanner. The only bid received for this building was that of Sullivan Wrecking Company, Portland, at \$5.56. The Commission accepted the offer of the Sullivan Wrecking Company and accordingly sold the building to it for \$5.56."

Buildings in West Portland:

"Building No. 4589, formerly owned by John G. Maycock. F. A. Graddy, Portland, submitted the only bid for this building at \$1.00. The Commission rejected the offer.

"Building No. 5037, formerly owned by John T. Paulson. Only one bid was received for this building, being that of F. A. Graddy, Portland, at \$42.00. The Commission rejected this offer."

Building at Warren:

"Building known as 'Vasa Hall', formerly owner by Einer Carlson. Sullivan Wrecking Company, Portland, submitted the only bid for this job at \$31.79. The Commission accepted this offer and sold the building to Sullivan Wrecking Company for \$31.79."

Scrap Bridge Steel:

"Sale of scrap bridge steel from Little Nestucca River Bridge on the Oregon Coast Highway. The Commission received two bids for the purchase of this steel, the high one being that of the Alaska Junk Company, Portland, at \$378.04. The Commission considers this offer satisfactory and has sold the material to the Alaska Junk Company at its bid price."

Vacant Tracts:

"Sale of 3 vacant tracts in Albany, Linn County. The Commission received one offer for these tracts, being that of H. D. and Barbara Rohde, for \$1,000.00. The Commission considers this offer satisfactory and has sold the tracts to Mr. and Mrs Rohde for \$1,000.00."

A delegation representing businessmen from the Alberta District, Portland, headed by Mr. G. H. Kendrick, came before the Commission in regard to the designation of Alberta Street as a state highway route. Others in the delegation were Messrs. G. B. Washtok, T. G. Sullivan, Otis Valentine, C. H. Morton, H. A. Walker, H. J. Casey, P. M. Sherlund, A. J. Eckelman, Foster and Dodd. They gave as their thought that Alberta Street would make a much better connection between the Northeast Portland Secondary Highway and the Columbia River Highway than Killingsworth Street because it would make a direct connection with the Columbia River Highway at the Columbia Boulevard intersection; whereas, Killingsworth Street does not make such direct connection; furthermore, Alberta Street practically divides the district lying between Columbia Boulevard and Sandy Boulevard and is favored by the Board of County Commissioners of Multnomah County and the Portland City Commissioners as an arterial traffic route.

Chairman Cabell advised that Alberta Street has certain advantages and no doubt deserves serious consideration as an arterial route, but the Commission has obligations at the present time with respect to Sandy Boulevard leading into the center of Portland, and Lombard Street, which is a bypass route for the Columbia River Highway through the St. Johns District; and until these obligations are fulfilled the Commission cannot think of assuming new ones. This concluded the conference.

Mr. E. A. Geary, Klamath Falls, representing the Klamath County Chamber of Commerce, and Mr. Forrest Cooper, Lakeview, representing the Lakeview Chamber of Commerce, were present in regard to the improvement of the Klamath Falls-Lakeview Highway. They gave as their understanding that the Commission budgeted \$100,000 for the improvement of this road and urged that the contract for the same be awarded as soon as possible so as to eliminate any possibility of a repetition of the bad conditions which obtained

JUN 2 1934

on this road during the past winter. They were informed that the Commission is ready to proceed with this work as soon as it receives technical approval of the project by the Bureau of Public Roads, and that it looks now as if the contract will be awarded some time in July. They were also informed that the rocking work is about all that can be done this year because weather conditions will probably not permit the oiling until next spring.

Mr. Cooper gave as his understanding that the Bureau of Public Roads proposes in the near future to contract a construction project in the Crooked River Canyon Section of the Fremont Highway, in Lake County. He asked the Commission to suggest to the Bureau that it include in this contract provision for certain cleanup work, as was done last year on a project at the north end of this highway. The Commission approved the request and instructed the Engineer to take care of it.

Mr. Cooper also asked for the grading of a site for a "General Fremont" memorial to be located adjacent to the Fremont Highway in the vicinity of Summer Lake. He suggested that this could be done in connection with the contract for oiling which he understood the Commission intends to award this summer. He asked for just enough grading work at this location to permit the parking of cars so that tourists could read the wording on the marker. The Commission instructed the Engineer to bear this in mind in the contract for this work.

Mr. Cooper brought up for discussion the matter of providing a water supply for Booth State Park, adjacent to the Klamath Falls-Lakeview Highway. He said that the reservoir has been constructed at a certain spring about $3/4$ mile from the park and that the proposition now is to pipe the water from the reservoir to the park; also, that the United States Forest Service has indicated a willingness to cooperate in the construction of the pipe line to the extent of digging a ditch for the same, but the state would have to furnish the pipe. He was instructed to contact the State Parks Superintendent, Mr. S. H. Boardman, in regard thereto.

Mr. L. H. Dobry, Tacoma, Washington, came before the Commission in regard to securing a permit granting him the privilege of operating over Oregon highways a vehicle designed for the carrying of new automobiles. It appears that this equipment, when loaded, will exceed the height and length limits prescribed by the Oregon statutes. The Commission denied the request, it appearing to the Commissioners that no emergency exists and that the Commission is without legal authority to grant special permits except for emergency movements.

Mr. Leonard Ferguson, Tillamook, was present and requested authority to transport alder logs, 8' to 10' in length, over state highways in the vicinity of Tillamook during hours of darkness, which privilege is now prohibited under the Commission's ruling that logs shall not be transported over state highways during such period. He gave as his thought that the hauling of logs at night would create no more dangerous condition than the movement of large freight trucks and trailers. The State Highway Engineer explained that the present policy of the Commission with respect to the transportation

of logs is of long standing and was adopted by a former commission to control the transportation of large logs involving the use of trailers. He gave as his thought that the transportation of short-length logs, properly tied to the truck, would not create an undue hazard, and suggested that a study of the matter be made to ascertain whether or not there would be any objection. The Commission approved the suggestion and referred the matter to the Engineer for such investigation and report.

The Engineer reported on the matter of oiling the Cape Arago Secondary State Highway in the vicinity of Charleston, for which work the Commission previously authorized an expenditure of \$2,500; also, on the cost to oil the shoulders of this highway through the town of Empire, and the cost of flattening a curve in Empire. He advised that it would take the entire amount of \$2,500 to oil the uncoiled portion of this road from a point 2.2 miles north of Charleston to and through the town of Charleston; so, if the Commission desires to oil the shoulders through Empire, which would cost about \$750, and flatten the curve in this town, which would cost about \$500, an additional authorization would have to be made in the amount of approximately \$1,250. He recommended the additional work. The Commission approved the recommendation unanimously.

The Commission considered and approved the site selected by the Landscape Engineer and the State Parks Superintendent for the proposed "Guy W. Talbot" memorial marker in Talbot State Park adjacent to the Upper Columbia River Highway at Latourell. The site selected is on the northerly side of the highway at the west end of the bridge over Latourell Creek.

The Engineer reported on the complaint of Andes Rajala, Nehalem, Oregon, arising out of the reconstruction of the Oregon Coast Highway in front of his premises near Nehalem. Mr. Rajala alleges that the highway was lowered 19 feet in front of his premises, and it is now practically impossible for him to properly care for his stock, and a dangerous condition has been created for his grandchildren. He asks the Commission to construct a bridge over the highway cut for his private use. The Engineer advised that the highway extends between Mr. Rajala's house and barn through a 19-foot cut, creating an undesirable condition. In fact, a rather dangerous condition exists where Mr. Rajala's private road leading to his house has been constructed on the edge of the bank. He further advised that Mr. Rajala indicated that he would be satisfied if the state would construct a fence between the highway cut and the approach road, and accordingly 60 cedar posts were furnished for the purpose; but it now appears that the posts alone are not satisfactory, and Mr. Rajala wants the state to furnish some lumber to be used as fence rails to keep the children from falling into the cut. He recommended that the request be approved. The Commission approved his recommendation.

The Commission had under consideration the claim of the Peninsula Golf Club, Portland, for reimbursement in the amount of \$265 for expense incurred by the club in connection with the investigations that were conducted by the state for a traffic separation structure at the intersection of Union and Denver Avenues, Portland. The State Highway Engineer gave as his thought that the claim should not be allowed. The Assistant Attorney recommended

JUN 2 1938

payment of the claim because, had it not been for the fact that the Commission had it in mind to actually proceed with this project, the Peninsula Golf Club would not have been put to expense. The Commission, after discussion deferred action on the matter until its next meeting. The matter was referred to the Commission's Attorney, Mr. J. M. Devers, for study in the meantime, and for advice to the Commission as to its legal responsibility for the payment of the claim.

The Commission considered and signed the following agreements, et cetera:

Agreement with Douglas County providing for the county to acquire right of way needed for the construction of the North Umpqua County Road project, and to maintain such project after completion by the state.

Agreement with the Soil Conservation Service of the U. S. Department of Agriculture, renewing previous agreement relative to conducting demonstrations of methods of erosion control along state highways.

Permit authorizing J. B. Patterson to construct and maintain a private bridge over a highway borrow pit on the Siuslaw Highway at Mile Post 7.03.

Permit authorizing Olaf Rice to construct a private bridge over a highway borrow pit on the Siuslaw Highway at Mile Post 13.5.

Agreement with Multnomah County providing for maintenance by the county of the Airport Road Overcrossing Section in Northeast Portland.

Agreement with Multnomah County providing for maintenance by the county of Northwest Thompson County Road upon completion of construction by the state.

Agreement with Polk County providing for maintenance by the county of the Independence-Buena Vista County Road upon completion by the state.

Agreement with Polk County providing for construction of the Independence-Buena Vista County Road as a Federal Aid Secondary Highway Project.

Agreement with Linn County providing for maintenance by the county of the Corvallis-Harrisburg County Road upon completion of the construction of the same by the state.

Agreement with Linn County providing for payment of the county's indebtedness to the state, amounting to \$34,206.69, arising out of the construction of the Santiam Highway, in Linn County.

Agreement with Marion County providing for construction of the Salem-Independence Ferry Road as a Federal Aid Secondary Highway.

Agreement with Marion County providing for maintenance by the county of the Salem-Independence Ferry Road (River Road) after completion of construction of the same by the state.

Agreement with Columbia County providing for maintenance by the county of the Upper Nehalem County Road when the construction of the same has been completed by the state.

Agreement with Wasco County providing for maintenance by the county of the Chenoweth Creek County Road after construction of the same by the state.

Agreement with Washington County providing for maintenance by the county of the Hillsboro-Cornelius Pass Road upon completion of the same by the state.

Agreement with Clackamas County providing for maintenance of the Carver-Redland County Road upon completion of construction of the same by the state.

Agreement with Miles Earl Ollivant providing for the renewal of a lease of a certain gravel bar owned by Mr. Ollivant, situate in Section 34, T. 28 S., R. 7 W., W. M., Douglas County.

The Commission adjourned at 5:00 o'clock p. m., to reconvene on the following day in the same room.

Portland, Oregon, June 3, 1938

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Auditorium of the Public Service Building, with all members present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Bids as follows for the construction of state highway projects were opened and read in conformance with previously published notice:

CARVER-REDLAND COUNTY ROAD

At the request of the Commission the Secretary made the following announcement: "The Commission wishes bidders to know that the bids received today for the construction of the Tone Bridge over the Trask River, on Market Road No. 15, in Tillamook County, were received on behalf of Tillamook County Court, to which the bids are being referred for disposal. The Commission also requests that hereafter bidders who submit bids for county road projects advertised by the State Highway Commission, submit bonds in connection with such bids on the regular county form which is provided for such purpose and is included in the proposal form. The Commission does not want the state's bond form used in connection with county road projects."

Chairman Cabell announced that the Commission would make the award of contracts at 2:00 o'clock p. m. in the same room.

County Judge Huron W. Clough, of Douglas County, was present and discussed with the Commission matters pertaining to the right of way for the Dixonville Section of the North Umpqua Highway, bids for which were received by the Commission at this meeting. It appears that the County Court is encountering difficulties in acquiring right of way for this road.

Chairman Cabell advised that, if an investigation of the bids received for this job reveals the low one to be satisfactory, the Commission would probably refer the bids to the Engineer with power to award the contract to the low bidder when legal and right of way matters have been satisfactorily disposed of. This was agreeable with Judge Clough.

A delegation from Tillamook and Clatsop Counties, headed by County

JUN 3 1938

Commissioner E. H. Lindsey of Tillamook County, came before the Commission and urged the early completion of the Neahkahnie Mountain Section of the Oregon Coast Highway. Others in the delegation were County Commissioner E. G. Anderson, and W. S. Coates, County Engineer of Tillamook County; County Judge Guy Boyington and County Commissioners James Elliott and William Larsen of Clatsop County; Walter Nichols, Secretary of the North Tillamook County Chamber of Commerce; John Asham and Tom Dolan, representing the Tillamook Chamber of Commerce; Claude Myers and Samuel Reed, Nehalem; Tom Cuning, Secretary of the Astoria Chamber of Commerce; and Ed Miller, Manager of the Oregon Coast Highway Association.

Speaking in behalf of this project were Messrs. Lindsey, Boyington, Miller, Reed, Elliott, Nichols, Asham, Dolan, and Cuning. They urged the Commission to at least complete the grading work involved this summer and particularly the earth work, leaving the rock work for next winter, and suggested the contracting of the grading work in July so as to insure its completion this year. Chairman Cabell recited briefly the history of the Neahkahnie Mountain project and pointed out that there are other roads in the state that are in the same category of delay. He said that he didn't know very much about the project before he was appointed a member of the Commission, but since he became a member the matter has been discussed thoroughly, and the Commission decided to proceed with the improvement, three allocations having been made for the same, each for a substantial amount. He further advised that the estimated cost to complete this job is \$200,000, half of which the Commission proposes to contract as soon as possible, but the Commission at present cannot see its way clear to finance the entire project this year unless savings accrue from the contracting of other work. He suggested that it would be proper to delay the contracting of the entire project until fall when the entire job can be contracted if contemplated savings accrue. Whether or not the entire project can be contracted this fall, he said, depends entirely upon the amount of savings, but the Commission has it in mind to complete this gap as soon as possible. He pointed out that the Commission is short of funds and indications are that the gasoline tax revenues will be less this year than last year, so it does not appear now that the Commission will be financially able to award many big jobs until September.

The State Highway Engineer advised that the Commission is borrowing \$750,000 on June 15 to help tide over a low period in the Commission's finances, and if the gasoline tax revenues do not increase the possibilities are that the Commission will have to sell additional bonds this fall. He also brought up the matter of lining the Arch Cape Tunnel which was recently constructed. He said that conditions in this tunnel are hazardous and there is danger of accidents occurring by reason of falling rocks; so the Commission does not want to open this tunnel to traffic until it has been properly lined to prevent the falling of rocks and until sidewalks have been constructed through it for pedestrian use. He pointed out that there are two main projects to be undertaken to open this highway: first, construction of the gap south of Arch Cape Tunnel; and, second, the lining of the tunnel, the latter project to be financed with fiscal year 1940 funds that will probably be available about January 1939.

Chairman Cabell stated that it is reasonable to assume that any highway commission will advance the completion of this project so as to make the road usable. He assured the delegation that the present Commission has no feelings whatsoever against this road, as is evidenced by the fact that the Commission, since he has been a member, has allocated substantial sums at three different times to the same, and the present Commission intends to continue allocating funds to the project until it is completed. Commissioners Aldrich and Tou Velle concurred in the Chairman's statements.

The delegation then urged the Commission to award a contract for the grading work only this summer, so as to advance that part of the construction. Chairman Cabell replied that the Commission can make no promises but will look into the matter within the next couple of weeks and ascertain whether or not funds can be spared for the purpose.

Judge Boyington brought up the matter of Clatsop County's indebtedness to the state, amounting to about \$7,000. He said that the County Court has this money available to turn over to the state as soon as it has disposed of the right of way negotiations for the Neahkahnie Mountain project, some of which are still pending. He inquired whether or not it would be satisfactory to continue to hold this money until such time. He was assured by the Commission that such arrangement would be satisfactory.

Judge Boyington then asked the Commission, in behalf of the Board of Trustees of the Astoria Bridge Committee, of which he is a member, whether or not the Commission has any understanding or agreement with the State of Washington in regard to the establishment of free ferry service across the Columbia River at Astoria. He explained that the Board of Trustees anticipates that it will be asked shortly to endorse an application for P.W.A. funds to finance a bridge at this location and they would like to have information available in regard to the free ferry, for use at that time. He was informed by Chairman Cabell that the Commission has no definite agreement covering this ferry matter; that Oregon is ready and willing to install a free ferry but the State of Washington is not in a position to act, and the probabilities are that the matter will have to rest in status quo until the Washington legislature meets.

A delegation from Nelscott, consisting of A. M. Williams, C. D. Hughes, Henry Hostettler, Raymond Shannon, and Ray Edelson, came before the Commission in regard to a proposed state park lying between the Oregon Coast Highway and the Pacific Ocean a short distance north of Nelscott, in Lincoln County. Mr. Williams headed the group. They urged the Commission to acquire this tract, which contains considerable virgin timber, and particularly asked the Commission to inspect the premises the next time it is in that vicinity.

Chairman Cabell advised that the Commission has only a limited amount of funds to spend for the purchase and development of state parks and must be very careful to spend this money in the most beneficial manner possible, considering the state as a whole. He said that personally he has never viewed the tract under discussion, but, from reports, believes that the state can spend its money to better advantage than for the purchase of the

same. He agreed to inspect the tract the following morning enroute over the Oregon Coast Highway to Medford.

Mr. Forrest Cooper, Secretary of the Lakeview Chamber of Commerce, again came before the Commission and advised that the Lakeview Chamber of Commerce wishes to go on record with the Commission as being in favor of and endorsing the objectives of the Oregon Roadside Council in its campaign to educate the people with respect to the beautification of Oregon roadsides. He inquired as to whether or not it would be possible for the Commission to contribute state funds to this cause and was informed by Chairman Cabell that the Commission is precluded from doing so on account of legal barriers, although the Commission is heartily sympathetic with the project.

County Judge A. R. Bowman, of Crook County, was present and invited the Commission to attend a meeting of the Prineville-Crook County Chamber of Commerce which is to be held in Prineville on Monday evening, June 13. The Commission accepted the invitation with thanks.

Mr. Charles Reynolds, President of the Oregon Trail Association, was present and filed with the Commission numerous petitions urging the reconstruction of the Columbia River Highway between Portland and The Dalles.

The County Court of Benton County, represented by County Commissioners W. H. Malone and T. A. Logsdon, was present in regard to the Willamette River Bridge at Corvallis. They asked the Commission to extend the Corvallis-Eastside Secondary Highway, which now terminates at the east end of this bridge, westerly across the bridge to a connection with the Albany-Corvallis Primary State Highway, a distance of 3 or 4 city blocks. Mr. Malone stated that the county owns some of the land at the east end of this bridge, a portion of which might be needed for right of way, and that the county is selling 1 acre of this land to a local party subject to the condition that the state may have the part that it needs for the highway improvement.

The Engineer advised that the bridge is in fairly good condition, although it needs a new deck and painting, and the approaches to the bridge need to be reconstructed. The Commission appeared to be favorably inclined to assume responsibility for this bridge but deferred action thereon until the next meeting. The Engineer was instructed to render a full report at that time as to the cost to make the bridge repairs and to rebuild the approaches, including a report on the right of way situation.

Mr. William L. Gray, Portland, conferred with the Commission in regard to property that is needed by the Commission for right of way for the Northeast Portland Secondary Highway between 13th Street and 15th Street, Portland. It appears that the Commission's right of way agent offered Mr. Gray 6 cents per square foot for land taken from him, which is the price that the Commission is paying for other land in the same vicinity; but Mr. Gray has refused the offer because he has paid taxes and assessments on this property for many years and the amount offered by the state will not nearly recompense him for the amounts expended for such purposes.

He was informed by Chairman Cabell that the Commission cannot pay him more for his property than is being paid for other properties in this vicinity, so it is necessary to deny his request for additional compensation. Mr. Gray then signified his willingness to accept the Commission's offer of 6 cents per square foot.

The Commission discussed a letter from Mr. C. C. Hockley, Regional Director for the Federal Emergency Administration of Public Works, relative to the filing of applications for grants or loans and grants from the Public Works Administration to finance construction projects. The Commission by unanimous vote adopted the following resolution authorizing Mr. R. H. Baldock as State Highway Engineer to file applications with the United States of America, through the Federal Emergency Administration of Public Works, for grants to aid in financing certain state secondary highway projects and the purchase of right of way necessary for the same:

A RESOLUTION authorizing R. H. Baldock, as State Highway Engineer, to file applications with the United States of America through the Federal Emergency Administration of Public Works for grants to aid in financing the construction of certain Secondary State Highway projects; and, the purchase of right of way necessary to such construction.

BE IT RESOLVED BY THE OREGON STATE HIGHWAY COMMISSION:

1. That R. H. Baldock as State Highway Engineer, be and he is hereby authorized to execute and file applications on behalf of the Oregon State Highway Commission with the United States of America for grants to aid in financing the construction of the following Secondary State Highway Projects.

County	Highway	Section	Type of Work
Deschutes & Harney		Brothers & Sunter	Buildings
Clackamas	Woodburn-Mt. Hood Loop	Molalla	Paving
Linn	Walsey-Sweet Home	Brownsville	Grading, Sur- facing & Oiling

2. That the said R. H. Baldock is hereby authorized and directed to furnish such information as the United States of America through the Federal Emergency Administration of Public Works may reasonably request in connection with the applications which are herein authorized to be filed.

The Commission had under discussion a certified copy of a resolution adopted by the California Highway Commission at its meeting on May 6, 1938, wherein that Commission committed itself to include in its budget for

JUN 3 1938

the next biennium sufficient funds to reconstruct portions of Road II-Sis-3-C (Pacific Highway) to provide an adequate connection with the proposed relocation of the Pacific Highway in Oregon. The Commission also considered a letter from Mr. C. H. Purcell, State Highway Engineer of California, transmitting such resolution, in which he advised that the biennium referred to in the resolution is the coming biennium beginning July 1, 1939, and ending June 30, 1941; also, in which he advises that the preparation of the California State Highway Department budget will be made some time this fall and will include an appropriation based on the estimated cost to construct this highway.

After a full discussion of this matter, the Commission accepted the commitment as made by the California Highway Commission and thereupon, by unanimous vote, adopted the following resolution committing the State of Oregon to promote and complete the construction of the Pacific Highway in Oregon from Siskiyou Summit to the California-Oregon State Line on or before the 30th day of June, 1941:

WHEREAS, this Commission has heretofore approved and adopted a new route and alignment for the Pacific Highway between Ashland and the Oregon-California State line, over a portion of which new route the highway has already been constructed and is now in use, and over the remainder of said new route it is the purpose of the Commission to construct the Pacific Highway and have the same ready for public use not later than June 30, 1941; and

WHEREAS, as a result of conferences between representatives of the California Highway Commission and representatives of the Highway Commission of the State of Oregon, a mutual agreement and understanding has been reached, by which it is agreed that the Pacific Highway shall cross the boundary line between the State of California and the State of Oregon at a point where the elevation does not exceed 3,320 feet, which location is likewise approximately 850 feet westerly from where the present Pacific Highway crosses the California-Oregon state line; and

WHEREAS, the California Highway Commission has by official action taken on May 6, 1938, committed itself "to include in the budget for the next biennium sufficient funds to reconstruct portions of road II-Sis-3-C from the Oregon State Line southerly to provide an adequate connection with the proposed relocation of the Oregon Highway.", and said California Highway Commission has officially advised the Oregon State Highway Commission of such action and commitment;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the certified copy of the resolution passed by the California Highway Commission at its meeting held on the sixth day of May, 1938, and delivered to this Commission by C. H. Purcell,

State Highway Engineer, be accepted as a declaration or commitment of the California Highway Commission with respect to the relocation and reconstruction of the Pacific Highway where the same crosses the California-Oregon State line.

2. That this Commission does hereby commit the State of Oregon to promote and on or before the 30th day of June, 1941, complete the construction of the Pacific Highway in Oregon from Siskiyou Summit to the California-Oregon State line along the route heretofore adopted and mutually agreed upon, said highway to cross the said state line at a point where the elevation does not exceed 3,320 feet, which location is likewise approximately 850 feet westerly from the point where the present highway crosses the said state line.

3. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof mailed to the California State Highway Commission.

The Engineer asked the Commission to confirm the award of the following contracts as made by him pursuant to authority previously granted him by the Commission:

Baker-Flagstaff Hill Section of the Baker-Homestead Highway, in Baker County. 5.68 miles grading and oiling and furnishing crushed gravel in stock pile. Contract awarded May 14 to E. H. Itschner, who submitted the low bid for the same on April 29, 1938;

Otis-Boyer Section of the Salmon River Highway, in Lincoln and Tillamook Counties. Furnish 5,000 cu. yds, crushed rock in stock piles. Awarded May 13 to O. C. Yocom, who submitted the low bid therefor on April 29, 1938;

Spaulding Ranch Section of the Salem-Dayton Secondary Highway, in Yamhill County. 1.66 miles grading, surfacing, and oiling. Awarded on May 23 to Mountain States Construction Company at their low bid submitted on April 29, 1938.

The Commission by unanimous vote approved the award of the contracts as reported by the Engineer.

The Commission had under consideration the award of the contract for the drilling of a well for the Brothers Oasis, adjacent to the Central Oregon Highway, in Deschutes County, for which work A. M. Jannsen Drilling Company, Portland, submitted the low bid on April 28, 1938. The Secretary presented a letter from the A. M. Jannsen Drilling Company stating their willingness to accept the award of this contract notwithstanding that the 30-day period for the making of such award has expired. The Engineer advised receipt of a communication from the Federal Government to the effect that federal funds cannot be used to finance this project, although such funds can be used for the construction of a pipe line in connection therewith and also

JUN 3. 1938

for the purchase of trees and the planting of same. He recommended the award of this contract as a state contract to be paid with state funds, and requested that, if the Commission approves the recommendation, he be authorized to designate the location for this well in view of the fact that there is a possibility that it would be desirable to have it on the opposite side of the road from the location originally contemplated. After discussion, the Commission approved the Engineer's recommendation and authorized him to award the contract to the A. M. Janssen Drilling Company on such basis if the company consents to the change in location.

Reconsideration was given by the Commission to the matter of the adoption of a set of rules and regulations for the control of advertising signs on or adjacent to state highways in unincorporated towns and villages, and particularly the matter of charging the owners of such signs a fee to maintain them on the highway, and a requirement that the owners of the signs furnish the state a bond to indemnify the Commission in the event an accident occurs by reason thereof. The Attorney advised that the Commission cannot charge a fee for the maintenance of a sign on the highway but it can require the owner to furnish a bond for the Commission's protection. The Commission decided that an attempt should be made to secure such a bond from the owner of a sign when a permit authorizing such sign to occupy space on the highway right of way is granted.

The Commission had under consideration the application of the California-Oregon Power Company for permission to construct its pole line on the Pacific Highway between Mile Posts 325.12 and 325.84, south of Ashland, in a location 5 feet from the easterly right of way line of said highway, which location is 4 feet nearer the traveled portion of the highway than the standard location. The Commission decided to adhere to its present policy in this matter and to require the placement of the poles a distance of only 1 foot from the right of way line.

The Commission had under consideration the matter of cooperating in the construction and maintenance of a sewer system to serve the State Forestry Department, the State Highway Shops, and, to some extent, the State Penitentiary, at Salem. The Engineer explained that the State Forestry Department constructed its buildings adjacent to the Highway Department shops and proposes to install a sewer from its headquarters to a connection with the State Penitentiary sewer located about 1,610 feet easterly from the forestry buildings; further, that said sewer can be used to good advantage in serving the State Highway Department shops and to some extent the penitentiary grounds; so, it was tentatively agreed by all parties that the sewer should be constructed as a cooperative project, the State Highway Department to pay one-third of the cost of materials between the Penitentiary sewer connection and the Forestry Department's premises, and to pay the entire cost of all of the materials from said point to the State Highway Shops, a distance of about 605 feet, the State Forestry Department to do the constructing work free of cost to the Highway Department. He estimated that the Highway Department's share of the cost would amount to not more than \$1,000 besides furnishing a trenching machine for the use of the State Forester. He recommended that the Commission approve the expenditure. After discussion, the Commission

approved the recommendation by unanimous vote and ordered that the matter be covered by joint agreement among the parties concerned.

The Engineer reported that it is no longer necessary to maintain the reduced load limits on the Little Nestucca Secondary Highway, the McKenzie Highway, the Willamette Highway, the John Day Highway, and the Klamath Falls-Lakeview Highway, and recommended the lifting of such reduced load limits heretofore in effect. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 22nd day of October, 1937, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway:

LITTLE NESTUCCA SECONDARY HIGHWAY from its junction with the McMinville-Tillamook Highway at Dolph to a point two miles westerly thereof, in Tillamook County; and

WHEREAS, on the 30th day of November, 1937, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway:

McKENZIE HIGHWAY from the McKenzie Bridge to the east city limits of Springfield, in Lane County; and

WHEREAS, on the 6th day of January, 1938, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway:

WILLAMETTE HIGHWAY from its junction with the Pacific Highway at Goshen to Oakridge, in Lane County; and

WHEREAS, on the 16th day of February, 1938, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highways:

JOHN DAY HIGHWAY between Prairie City, in Grant County, and Unity, in Baker County;

KLAMATH FALLS-LAKEVIEW HIGHWAY from its junction with The Dalles-California Highway near Klamath Falls, in Klamath County, to Lakeview, in Lake County; and

WHEREAS, subsequent to the passage of said resolutions, conditions have changed so that it is now no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limits set out in said resolutions on the said state highways;

JUN 3 1938

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

LITTLE NESTUCCA SECONDARY HIGHWAY from its junction with the McMinnville-Tillamook Highway at Dolph to a point two miles westerly thereof, in Tillamook County;

McKENZIE HIGHWAY from the McKenzie Bridge to the east city limits of Springfield, in Lane County;

WILLAMETTE HIGHWAY from its junction with the Pacific Highway at Goshen to Oakridge, in Lane County;

JOHN DAY HIGHWAY between Prairie City, in Grant County, and Unity, in Baker County;

KLAMATH FALLS-LAKEVIEW HIGHWAY from its junction with The Dalles-California Highway near Klamath Falls, in Klamath County, to Lakeview, in Lake County;

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said sections of the said highways hereafter shall be the maximum load limit provided by law; and it is further ordered that a certified copy of this resolution be furnished to the county clerk of each county in which said highways are located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Commission considered and ordered filed the report of the Traffic Engineering Department tabulating the traffic density on various primary and secondary state highways and county roads during the period from August 19 to December 16, 1937.

The Engineer requested authority for the Assistant State Highway Engineer, Mr. C. B. McCullough, to attend, at state expense, the Annual Convention of the American Society of Civil Engineers which is to be held in Salt Lake City, Utah, July 20 to 23, 1938. The Commission approved the request subject to the further approval by Governor Martin.

The Commission considered and ordered filed a letter from Arthur B. Keyser, Bandon, relative to the construction of the Oregon Coast Highway along the coast line between Marshfield and Bandon, and suggesting that the present route through Coquille be designated as an alternate route.

The Commission ordered filed correspondence with the Willamette Valley Lumbermen's Association in regard to the use of timber in bridge construction. The Engineer was instructed to use his discretion in the matter of sending copies of such correspondence to the individual members of the Commission.

JUN 3 1938

The Commission considered and denied the request of The Dalles Mill and Lumber Company to truck logs over the Columbia River Highway from Mosier to The Dalles, it being contrary to the established policy of the Commission to grant permits for special use of this highway between Portland and The Dalles.

The Secretary presented a petition signed by 54 businessmen of the town of Lebanon requesting permission to close Main Street between 9th and Maple Streets in that town during the 29th Annual Strawberry Festival on June 3 and 4, 1938. The Commission confirmed oral authority given several days previously granting the city permission to close this street during the period requested. The Commission also authorized the closing of this street during the Lebanon Strawberry Festival each year until the construction of the Santiam Highway has been completed over the mountains, when, because of the anticipated increase in traffic, such permission will no longer be granted.

A letter was presented from L. Heasbach, Kernville, asking for the construction of a parking space for automobiles in front of his place of business on the Oregon Coast Highway. The Commission denied the request as a matter of policy.

A letter was presented from Mr. F. H. Brundage, Acting Regional Forester, Portland, suggesting a conference between Mr. C. J. Buck, Regional Forester, and the State Highway Commission, relative to the State Highway Department taking over the snow-removal work on the road extending from the Mount Hood Highway to Timberline Lodge. The Commission approved such conference but decided not to hold it until Chairman Cabell returns from his contemplated vacation trip to Europe, which will be about the first of October.

The Engineer brought up for discussion the matter of the improvement of Court Street, Salem, in front of the new state capitol, with particular reference to the type of pavement to be constructed on this street, and the rounding off of the curbs at the intersection of Chemeketa and Summer Streets. He said that the Capitol Reconstruction Commission is acquiring two parcels of property north of Chemeketa Street on Summer Street, presumably with the idea in mind that this property will be needed in connection with the landscaping of the Capitol grounds. He advised that the landscaping plan provides for the rounding of the curb lines at this point to a 35-foot radius, but all of the work is within the limits of located streets, and therefore no additional right of way is required. He requested authority of the Commission to bring this to the attention of the Capitol Reconstruction Commission. The Commission approved the request unanimously.

In connection with the proposed pavement on Court Street, the Engineer suggested the use of concrete between the outer limits of the two driveways leading north from Court Street, which said driveways are to replace the present Summer Street, and that beyond these limits the existing black pavement be continued with improvements. He said that the present black pavement is in very good condition and it would be an extravagance to tear it up and replace it with concrete. He opposed tearing up any portion of the present street that can be avoided. After discussion, the Commission approved the

JUN 3 1938

Engineer's recommendation in this regard and authorized him to convey such information to the Capitol Reconstruction Commission.

The Engineer reported that, in his estimation, it would be advisable to designate the Wilson River Highway a through highway from the east city limits of the town of Tillamook to the Tillamook-Washington County line, and he so recommended. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the Wilson River Highway from the City of Tillamook, in Tillamook County along the Wilson River to a point near Glenwood, in Washington County has been duly designated and adopted as a state highway and said highway is now under construction; and

WHEREAS, that portion of said highway extending from the east city limits of the City of Tillamook in Tillamook County to the Tillamook-Washington County line has been improved and is now being used by the traveling public; and

WHEREAS, said section of said highway carries a large volume of traffic and in the judgment and opinion of the Commission said section of said highway at this time should be designated as a main or through highway, and all roads intersecting or entering said highway should have erected at the point of entrance a sign or marker notifying drivers of vehicles to stop before entering or crossing the said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting, as follows:

1. The section of the Wilson River Highway beginning at the east city limits of the City of Tillamook in Tillamook County and extending to the Tillamook-Washington County line be and the same hereby is declared to be and is designated as a main or through highway.
2. The State Highway Engineer be and he hereby is instructed and directed to erect and maintain at all places where highways enter or intersect the said section of the Wilson River Highway appropriate signs and/or markers notifying drivers of vehicles to stop before entering or crossing the said highway.
3. This resolution shall be entered in the minutes and records of the Commission as of the 3rd day of June, 1938.

Reconsideration was given by the Commission to the matter of purchasing the schedule fidelity bond from the Ohio Casualty Insurance Company which submitted the low bid at the meeting held on April 28. The Secretary reported the results of the conference with representatives of the insurance

company on the previous evening, and, it appearing to the Commission that the bond which the Ohio Casualty Insurance Company proposes to furnish meets the Commission's requirements, the Commission thereupon authorized the purchase of such bond from the said company.

The Commission considered dates for its next two regular meetings for the receiving of bids for highway construction projects, and decided to hold such meetings on Thursday, June 30, and on Thursday, July 21, 1938. The Secretary was instructed to make the usual arrangements to hold these meetings in the Auditorium of the Public Service Building, Portland.

The Commission adjourned at 12:30 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room, with Chairman Cabell and Commissioner Tou Velle present and participating. Commissioner Aldrich was excused from attending the remainder of the session because of other important business. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Chairman Cabell announced the following awards of contracts for which bids were taken at the morning session, the Commission having previously approved such awards by unanimous vote:

"Carver-Redland Store Section of the Carver-Redland County Road, in Clackamas County. 3.32 miles grading, surfacing, and oiling. Fisher Bros., Oregon City, submitted the low bid at \$30,145.50, based on the use of road oil. They did not submit a bid based on the use of tar. Babler Bros., Portland, submitted the next low bid at \$31,722.00, based on the use of tar, but did not submit a bid based on the use of road oil. (The third low bid was submitted by Edwin C. Gerber, Oregon City, at \$31,825.00, based on the use of road oil, with no bid based on the use of tar.) There were 3 higher bidders. The Commission awards the contract to Fisher Bros., at their low bid of \$30,145.50, based on the use of road oil.

"Bridge over South Fork Rock Creek west of Sunset Camp on the Wolf Creek Highway, in Clatsop County. The low bid for this project was submitted by Snook Bros., Eugene, at \$8,290.00. The next low bid was submitted by J. F. Johnston, Newberg, at \$8,700.00. There were 2 higher bidders. The Commission awards the contract to Snook Bros. at their low bid of \$8,290.00.

"Dixonville Section of the North Umpqua County Road, in Douglas County. 2.20 miles grading and surfacing. Harold Blake, Portland, submitted the low bid for this project at \$29,426.00. Leonard & Slate, Multnomah, submitted the second low bid at \$32,475.00. 5 higher bids were submitted. The Commission has referred all bids received to the Engineer, with power to award the contract to the low bidder when certain conditions have been satisfied.

"Lombard Steeet-Killingsworth Street Section of the Northeast Portland Secondary Highway, in Multnomah County. 3.9 miles grading and 0.4 mile surfacing and oiling. The low bid for this project was

JUN 3 1938

submitted by Roy L. Houck, Salem, at \$31,532.50. The next low bid was submitted by Harold Blake, Portland, at \$32,812.00. There were 9 higher bids received. The Commission awards this contract to Roy L. Houck at his low bid of \$31,532.50.

"Reconstruction of Northeast 33rd Avenue Overcrossing at Columbia-Boulevard, Portland, in Multnomah County. Birkemeier & Saremal, Milwaukie, submitted the low bid at \$17,665.00. George Isaackson, Portland, submitted the next low bid at \$17,895.00. There were 5 higher bidders. The Commission has awarded this contract to Birkemeier & Saremal, the low bidders, at their bid of \$17,665.00.

"Wigrich-Buena Vista Section of the Independence-Buena Vista County Road, in Polk County. 3.31 miles surfacing and oiling. The low bid submitted for this project was that of J. C. Compton, McMinnville, at \$13,211.60, based on the use of tar. Mr. Compton did not submit a bid based on the use of road oil. The next low bidders were McNutt Bros., Eugene, at \$13,578.00, based on the use of oil, and \$13,741.20, based on the use of tar. There were 2 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder.

"Tone Bridge over Trask River on Market Road No. 15, in Tillamook County. Construct 110-foot steel span and 180-lin. ft. pile trestle approaches. Dolan Construction Company, Tillamook, submitted the low bid at \$19,777.00. Sig Ash, Portland, submitted the next low bid at \$20,195.00. There were 5 higher bidders. These bids were received for and on behalf of Tillamook County and will be referred to the County Court for action.

"Hillsboro-Airport Road Section of Hillsboro-Cornelius Pass County Road, in Washington County. 1.17 miles surfacing and oiling. The Commission received 2 bids on this project, that of Saxton, Looney & Risley, Oak Grove, being low at \$12,131.50, based on the use of tar. The other bid received was that of Warren Northwest, Inc., Portland, at \$13,672.00, also based on the use of tar. These bidders did not submit a price based on the use of road oil. The Commission awards this contract to Saxton, Looney & Risley at their low bid of \$12,131.50, using tar."

A letter was presented from the Seaside Chamber of Commerce requesting the installation of a marker at the intersection of the Oregon Coast Highway with the Wolf Creek Highway, containing information as to the mileage and direction to Seaside, Cannon Beach, Gearhart, and Astoria. The Commission referred this matter to the Engineer with authority to erect a standard Highway Department sign at such location, in the event there are no objections.

The Commission considered and accepted with thanks the invitation of the Jackson County Chamber of Commerce to meet with the Chamber on Saturday evening, June 4, for a discussion of highway matters of mutual interest.

A letter was presented from F. W. Scheffel, City Superintendent, Medford, requesting a landscaping project on the Pacific Highway at the north approach to Medford in order to clean up an unsightly condition that exists at such location. The Commission instructed the Engineer to keep this project in mind for consideration in the formulation of the landscaping program for 1939 Federal Aid Funds.

The Commission considered a petition signed by 40 property owners of Marion County requesting the resurfacing and oiling of the North Santiam Highway from Mill City to Gates. The Commission denied the request due to lack of funds with which to finance the project.

A letter was presented from Miss C. L. Gavin, City Attorney, The Dalles, requesting, on behalf of the City Council, permission to erect a monument on state-owned land adjacent to the west city limits of The Dalles. She explained that the city is sponsoring a W.P.A. project to erect this monument, which is in commemoration of the Lewis & Clarke Expedition, and that the site selected is, in their estimation, the most suitable location, but they need permission from the State Highway Commission to use the state property before they can obtain the W.P.A. funds. The Commission approved the request and ordered that the matter be covered by appropriate agreement.

A letter was presented from the Sportsmen's Association of Eugene, requesting authority to use one of the borrow pit pools adjacent to the Pacific Highway, near the railroad overcrossing structure at the west city limits of Eugene, in connection with a casting tournament which they propose to hold within the next few weeks. The Commission granted the request subject to the condition that the association will enter into an agreement with the Commission providing for the use of the pool and for the cleaning up of the premises at the close of the tournament.

The Commission considered and ordered filed a number of communications requesting a contribution of state highway funds to assist in financing the Oregon Roadside Council's proposed educational campaign, the Commission being without legal authority to expend state highway funds for such purpose.

A letter was presented from the Oregon Automobile Dealers' Association urging the proper state authorities to prohibit the building of high-power tension lines along state highway rights of way because of the interference that they cause to radio reception in automobiles, it being their contention that in the not far distant future practically all automobiles will be equipped with radios. The Commission ordered that the association be informed that the pole line companies now have legal authority to place their poles on the public roads of this state subject to designation of location by the State Highway Commission, in the case of state highways, and by the county courts in the case of county roads, and that it appears to the Commission that the matter of prohibiting such pole line installation on highway rights of way is one for the legislature to decide.

The Engineer reported the receipt of a request from the Bonneville Power Company for permission to erect its pole line along the Columbia River

JUN 3 1938

Highway between Bonneville and Cascade Locks. The Commission referred this matter to the Engineer to select a location for the poles. He was instructed to tell the company to place the poles entirely off the highway right of way, if possible, in locations where they could not be seen from the traveled roadway, to the end that the beauty of the Columbia Gorge will not be marred by unsightly pole line construction.

A letter was presented from the Clatskanie Kiwanis Club, requesting the construction of an oil surface on the Mist-Clatskanie Secondary Highway, to alleviate the dust condition that prevails during the dry season of the year. The Commission denied the request because of lack of funds to finance the work.

A letter was presented from R. E. Stiff, Jr., Baker, Oregon, requesting the privilege of trucking logs over certain secondary highways in Baker County during the time that the North Powder-Haines Section of the Old Oregon Trail is being reconstructed. The Engineer advised that the surfacing on the secondary highways in question is very light and will not stand concentrated logging traffic. He suggested, however, that the logging trucks be allowed to operate over them subject to the condition that the Commission will order a reduced load limit in the event that damage is being done to the roads by such traffic. The Commission approved the recommendation.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm such surveys and the amounts authorized for each. After due consideration motion was made by Commissioner Tou Velle that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized for survey expenditures are as follows:

Reconn. Survey - 102-2813 - Junct. Pacific Highway West-Junct. Corvallis-Newport Highway, Kings Valley Secondary Highway.	1st authorization - \$1,285.00
Location - - - 102-2814 - Pedee-Wren Section, Kings Valley Secondary Highway	1st authorization - \$1,800.00
Location - - - - 7-2803 - Ochoco Dam-Marks Creek Section, Ochoco Highway	7th authorization - \$ 250.00
Total to date \$7,650.00	
Soil Test - - - - 7-2803 - Ochoco Dam-Marks Creek Section, Ochoco Highway	8th authorization - \$ 280.00
Total to date \$7,930.00	
Geophysical - - - 8-2810 - Arizona Inn Slide Section, Oregon Coast Highway	3rd authorization - \$ 500.00
Total to date \$1,100.00	

JUN 5 1938

Right of Way - 9-2812 - Brothers-Gap Ranch Section, Central Oregon Hwy.
 3rd authorization - \$ 900.00
 Total to date \$5,350.00

Right of Way - 9-2804 - Redmond-Bend Section, The Dalles-California Hwy.
 1st authorization - \$ 150.00

Plans - - - - - 210-2820 - Dixonville-Mud Hollow Section, N.Umpqua County Rd.
 1st authorization - \$ 150.00

Plans - - - - - 10-2819 - Rice Hill-Turkey Hill Section, Pacific Highway.
 2nd authorization - \$ 500.00
 Total to date \$1,050.00

Plans - - - - - 210-2820 - Dixonville-Mud Hollow Section, N.Umpqua County Rd.
 2nd authorization \$ 350.00
 Total to date \$500.00

Plans - - - - - 10-2818 - Reedsport Section, Umpqua Highway.
 2nd authorization - \$ 200.00
 Total to date \$500.00

Relocation - - 14-2810 - Hood River-Mosier Section Columbia River Highway.
 3rd authorization - \$1,200.00
 Total to date \$11,700.00

Plans - - - - - 218-2825 - Poe Valley Section - Bonanza Malin County Road.
 1st authorization - \$1,500.00

Quarry - - - - - 18-2826 - Dairy Rock Quarry, Klamath Falls-Lakeview Highway
 1st authorization - \$ 100.00

Plans - - - - - 218-2827 - The Dalles-California Highway - California State
 Line Section, Whitney County Road.
 1st authorization - \$ 180.00

Right of Way - 21-2816 - Burnt Woods-Eddyville-Nashville Section, Corvallis-
 Newport and Eddyville-Blodgett Highways.
 2nd authorization - \$ 85.00
 Total to date \$335.00

Right of Way - 21-2820 - Toledo - Nashville Section, Corvallis-Newport Hwy.
 2nd authorization - \$ 43.00
 Total to date \$143.00

Right of Way - 121-2821 - Siletz Section, Siletz Secondary Highway.
 2nd authorization - \$ 50.00
 Total to date \$225.00

Recon. Survey - 124-2819 - Salem-Mehama Section, North Santiam Highway
 1st authorization - \$1,250.00

(Continued on next page)

JUN 5 1938

Location - 26-2802 - Fairview-Cascade Locks Section, Columbia River Hwy.
7th authorization - \$3,250.00
Total to date \$70,000.00

Reconn. Survey - 26-2834 - Junct. Slavens Road and Barbur Blvd., Pacific Hwy.
1st authorization - \$ 500.00

Reconn. Survey - 127-2811 - Dallas-Junct. Kings Valley Section, Dallas-Kings
Valley Secondary Highway.
1st authorization - \$ 535.00

Right of Way - 29-2801 - Manzanita-Fisher Point Section, Oregon Coast Hwy.
5th authorization - \$ 215.00
Total to date \$2,090.00

Location - - - 34-2818 - Multnomah County Line-South Section - Pacific West.
3rd authorization - \$ 900.00
Total to date \$3,400.00

The motion was seconded and declared by Chairman Cabell to have passed by the affirmative vote of the Commissioners present.

The Engineer reported that Contracts Nos. 2050 and 2056, for furnishing crushed rock on state highway projects, have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commissioners present:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts or modifications thereof and said jobs are now ready for acceptance:

Contract No. 2050, with Eugene Sand and Gravel Company, for furnishing crushed rock for the Drain Rock Production Project on the Pacific and Umpqua Highways, in Douglas County. Completed April 15, 1938.

Contract No. 2056, with A. S. Wallace, for furnishing crushed rock for the Gold Hill Rock Production Project on the Pacific Highway and Sams Valley Secondary Highway, in Jackson County. Completed May 5, 1938.

THEREFORE, BE IT RESOLVED, that the work covered by said highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

There being no further business to come before the Commission at this time, the meeting was adjourned at 3:30 o'clock p. m.

R. H. Baldock
State Highway Engineer
H. B. Glaisyer
Secretary

Henry F. Cabell
Chairman
E. B. Aldrich
Commissioner
F. L. Tou Velle
Commissioner

Prineville, Oregon, June 13, 1938

The State Highway Commission met in special session at 9:00 o'clock p. m. in the Drawing Room of Ochoco Inn for a conference with members of the Roads Committee of the Prineville-Crook County Chamber of Commerce and others. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Dr. R. R. Hunter, Prineville, Chairman of the Roads Committee, presided on behalf of the Chamber of Commerce. The meeting was also attended by 15 local citizens and representatives of near-by communities.

Mr. Yocom, of John Day, urged the Commission to construct additional improvements on the Ochoco Highway. He said that this highway is of vital importance to the people of John Day district because it is one of the best routes over which to transport the products of the John Day Valley to Portland.

Mr. Charles R. Jackson, County Commissioner of Wheeler County, stated that the people of his district are satisfied with the action taken by the Commission in refusing to construct the proposed highway between Mitchell and Antelope, but they are now particularly interested in the improvement of the Ochoco Highway over which, he said, approximately 6,000,000 board feet of lumber was transported during 1937 and over which he estimates there will be moved, in 1938, 10,000,000 feet of lumber, besides much stock, grain, hay, et cetera.

JUN 13 1938

Mr. Irving, of Madras, urged the Commission to construct to modern standards, at the earliest possible time, the state secondary highway from Prineville to Madras as a link in the Warm Springs Highway. He suggested that this road be located so as to connect with the new route of The Dalles-California Highway near the south city limits of Madras. He expressed appreciation for the funds heretofore allocated by the Commission to the Ochoco and the Warm Springs Highways and urged continuance of allocations to these highways in the future.

Mr. Thomas, Madras, endorsed the remarks of Mr. Irving. He urged the Commission to authorize a location survey to determine definitely the route of the secondary highway between Madras and Prineville, particularly the northerly end of the same so as to permit property owners to plan improvements.

County Judge A. R. Bowman, of Crook County, inquired as to the Commission's plans for the reconstruction of the Ochoco Highway over the Ochoco Mountain easterly from a place known as Marks Creek. He also inquired as to the plans of the Commission for the routing of the secondary highway between Prineville and Madras.

Chairman Cabell advised that there are two sources of funds for financing the Ochoco Highway project; namely, Federal Aid funds, which could be used to finance the work between Prineville and Marks Creek; and Forest Highway funds for the financing of the work within the forest boundary east from Marks Creek. He pointed out that there are several important forest highways now in an uncompleted state across the Cascade Mountains and gave as his thought that the Forest Highway funds available should be expended for the completion of these roads before new projects are undertaken, which would postpone for a period the allocation of funds for the forest road work on the Ochoco Highway. When these roads are completed, he said, the Commission will then give consideration to the allocation of forest funds for the further improvement of the Ochoco Highway, provided the Federal Government continues to make such funds available.

The State Highway Engineer advised, in reply to Judge Bowman's inquiry regarding the location survey for the Prineville-Madras Highway, that this road is eligible only for state secondary funds and federal aid secondary funds, of which there are none available from either source at the present time. He further advised that the Commission has adopted a policy not to make location surveys very far in advance of construction because of the possibilities that changes would be made in the location by some future commission. He pointed out that a reconnaissance survey of this road has already been made which should determine approximately where the road will eventually go.

Judge Bowman suggested the use of Federal Public Lands Funds to finance construction of a portion of this road. He advised that there are some of such lands between Madras and Prineville. Mr. Irving confirmed Judge Bowman's remark in this regard and added that there are revested Taylor Act lands in this locality which are under the jurisdiction of the United States Forest Service, the same as are the national forest lands.

Chairman Cabell then advised that the Federal Government is committed to the expenditure of the Public Lands Funds for the completion of the I.O.N. Highway, so it is not likely that the Government would approve the expenditure of such funds on the road between Madras and Prineville until the I.O.N. Highway has been completed. Judge Bowman asked particularly for a definite location survey of the Prineville-Madras road from Prineville northerly a distance of about 2½ miles past the Pine Products Mill. He said that this particular section is of vital importance to their community and is their first choice for improvement as a Federal Aid Secondary Highway. He said that the Crook County Court is undecided whether to ask the Commission to improve this road as a Federal Aid Secondary Highway or as a part of the Prineville-Madras state secondary highway and urged the Commission to inspect the road on the following day. Chairman Cabell questioned the advisability of spending funds for a survey in view of the Commission's policy not to locate a road until there are funds in sight to finance construction of the same. He agreed, however, to inspect the road on the following day without making any commitment thereto.

Judge Bowman then advised the Commission that a new railroad spur is planned to serve Lamms Mill, located east of Prineville, which will introduce another railroad crossing on the Prineville-Madras road. He gave this as another reason for locating the highway immediately, before the mill company's plans have been formulated. Chairman Cabell agreed to inspect this also on the following day.

Commissioner Aldrich made the suggestion that Crook County Court ask the Commission to give first consideration to the Madras-Prineville road in the formulation of the Federal Aid Secondary Highway program for 1939 construction, particularly the section from Prineville past the Pine Products Mill. It was his thought that the Commission would give this project first consideration in the allocation of such funds to Crook County because no allotment of Federal Aid Secondary Highway Funds was made to this county this year. However, he added, the action of the Commission must be based entirely on the amount of funds that the Government apportions to the State of Oregon for such purposes.

Commissioner Aldrich then brought up the matter of the rerouting of the Prineville-Madras road in the town of Prineville, as was heretofore suggested by the County Court. The Engineer advised that a survey has been made of this section, about one-half mile in length, and cost estimates prepared which reveal that the right of way costs are so high that the project cannot be undertaken, and accordingly the Commission ordered the report filed for future consideration.

The conference was concluded at 9:45 o'clock p. m..

JUN 13 1938

Enroute Prineville to Heppner, June 14, 1938

The State Highway Commission considered and disposed of routine matters with all Commissioners present and participating. Also present were the State Highway Engineer and the Secretary.

The Commission approved the oiling of the gravel sidewalk recently constructed along the John Day-Burns Highway between the towns of John Day and Canyon City, reports indicating that the sidewalk in its present condition is rough and is of no benefit to school children, who still walk on the pavement on account of such rough condition.

The Commission considered the matter of oiling the John Day Highway full width through the towns of John Day and Prairie City. The Commission by unanimous vote approved such oiling work in conjunction with the contract for the oiling of the John Day-Prairie City Section of this highway, when that work is undertaken. The Engineer was authorized by the Commission to make investigations and surveys as may be necessary for the oiling of the highway through the towns of John Day and Prairie City, and also for the oiling of the highway full width through the town of Prineville.

The Engineer brought up for discussion the matter of construction of the Ochoco Dan-Marks Creek Section of the Ochoco Highway. He pointed out that the Commission has included in its 1938 and 1939 Federal Aid Program an item of \$173,000 for grading and surfacing this section but he now believes that such amount is not sufficient to complete the entire section, and the probabilities are that it will cost about \$20,000 more than the amount set up for the same. He gave as his thought that the entire project should be contracted notwithstanding that it may overrun the amount heretofore budgeted for such purpose, and he so recommended. The Commission approved the recommendation by unanimous vote.

The Engineer reported briefly on the proposed crossing of the Slavin Road under Barbur Boulevard, Portland. The Commission took no action on this matter but instructed the Engineer to keep the project in mind for consideration at some future date.

A letter was presented from Gilbert E. Cable, Mayor of Port Orford, requesting the oiling of the shoulders adjacent to the highway pavement through the town of Port Orford, particularly from Knapp Tavern to the Port Orford grade school, a distance of about 6 blocks. The Engineer advised that investigation has been made of this matter and it has been found that the shoulders are unsurfaced and that grass is growing up to practically the traveled portion of the road; furthermore, drainage facilities are not good. He recommended denial of the request until such time as the shoulders have been stabilized and surfaced and the drainage has been taken care of. The Commission decided not to do this work now but to give it consideration in next year's budget.

The Engineer reported on the cost to construct a grade separation structure at Sandy Boulevard and 39th Avenue, Portland. He said that, according to an estimate that has been prepared by the City Engineer of

JUN 14 1938

Portland, this job will cost approximately \$465,000, of which \$175,000 is the estimated cost of right of way and \$290,000 is for construction. The Commission decided not to undertake this project now because funds are not available to finance the same; however, the Engineer was instructed to keep the project in mind for future consideration and to notify the sponsors of the project of the action taken and the estimated cost of the project.

Reconsideration was given by the Commission to the request of Leonard Ferguson, Tillamook, to haul logs 8 to 10 feet in length over state highways during the hours of darkness, which operation has heretofore been prohibited during such periods. The Engineer gave as his thought that the transportation of logs of this length over state highways at night time would cause no more hazard to traffic than freight trucks and trailers. He recommended that Mr. Ferguson and other operators who desire to transport logs of such length over state highways at night be permitted to do so provided the logs are transported on trucks only, without trailers, and that the length of the logs is limited to the normal bed-length of the truck. The Commission approved the recommendation by unanimous vote and adopted the action as a policy to be followed hereafter.

The Commission also reconsidered the matter of sponsoring a W.P.A. project for the salvaging of the brick in an old brewery building at Albany, which building was acquired in connection with the acquisition of right of way for the Albany railroad grade separation project. The Engineer advised that it will cost the state about \$500 to salvage the brick under a W.P.A. project, but the salvaged brick would be worth approximately \$1,200 at the current price for used brick. He further advised that a maintenance building is needed at Albany and that the brick could be used to good advantage in the construction of the end walls and back walls of the same, making it possible to secure a semi-fireproof building cheaper than a frame building, if new lumber has to be purchased for the same. He recommended approval of the project. The Commission approved the recommendation by unanimous vote.

In this connection the Engineer reported that to construct this maintenance building as a W.P.A. project, using the salvaged brick, would cost about \$8,259, of which amount the state's share would be \$5,042 and the W.P.A.'s share would be \$3,217. The question arose whether to construct the project as a W.P.A. project or as a P.W.A. project. A decision was deferred until the next meeting, at which time the Engineer was instructed to render a report on the cost to construct the building as a P.W.A. project.

Reconsideration was given by the Commission to the matter of extending the Corvallis East Secondary State Highway across the Willamette River Bridge at Corvallis to a connection with the Albany-Corvallis Primary State Highway, as requested by the Benton County Court, which wants to be relieved of the maintenance of the bridge structure. The Engineer advised that it would cost approximately \$16,000 to repair the bridge and to improve the alignment at the Linn County end, but if the alignment were not revised the bridge work could be done for about \$10,500. All of the repair work, he said, need not be done at the present time because there are several years' life left in the bridge decking; but to do the necessary work and change the line at the east end of the bridge would call for an immediate expenditure of

JUN 14 1938

\$10,000, whereas to make repairs that are necessary now would cost about \$2,200. The Commission indicated that it was in favor of taking over this structure and extending the secondary highway as requested; however, decided, on account of the present shortage of funds, to postpone the necessary action until next fall or until funds can be spared to finance the project.

The Engineer requested authority to purchase 13 trailer-type tool-houses for use by extra gang bridge crews. He said that these crews now have trailer houses of various designs, some of them being two-wheeled trailers and others being four-wheeled trailers; and, while they are licensed and covered by liability insurance, they are not safe pieces of equipment to have on the road. Furthermore, they were built by the bridge department maintenance crews years ago. He suggested that, if the Commission sees fit to approve this request, trailers built by reliable manufacturers be purchased under highway department design and specifications. He estimated that they would cost about \$400 each and that it would cost an additional \$150 each to construct and install the compartments for tools, et cetera, making a total estimated cost of \$550 each. He further stated that, while he is requesting authority to purchase 13 of these trailer houses, it would be his intention to purchase only 6 at the present time, replacing the remainder next year, which would entail a total outlay of only \$3,300 at the present time. The Commission approved the request by unanimous vote.

The Engineer reported that it is no longer necessary to maintain the reduced load limit on the Crater Lake Highway from its junction with the Pacific Highway to its junction with the West Diamond Lake Secondary Highway, which reduced load limit has been in effect since December 21, 1937. Accordingly, he recommended the lifting of this reduced load limit. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 21st day of December, 1937, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway:

CRATER LAKE HIGHWAY from its junction with the Pacific Highway to its junction with the West Diamond Lake Secondary Highway, in Jackson County

and

WHEREAS, subsequent to the passage of said resolution conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said state highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

JUN 14 1938

CRATER LAKE HIGHWAY from its junction with the Pacific Highway to its junction with the West Diamond Lake Secondary Highway, in Jackson County

be and the same is hereby rescinded and cancelled as of this date; and the maximum load limit permissible on the said section of the said highway hereafter shall be the maximum load limit provided by law; and it is further ordered that a certified copy of this resolution be furnished to the county clerk of each county in which said highway is located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Commission by unanimous vote confirmed the Engineer's award of the contract for drilling a well for the Brothers oasis on the Central Oregon Highway, in Deschutes County, to A. M. Jannsen Drilling Company, Portland, which company submitted the low bid for such work on April 28, 1938. The Engineer advised that the contract was awarded on June 8, the conditions of the award having been satisfied.

The Commission by unanimous vote confirmed the sale by the Engineer of the following buildings located on the right of way of the Lombard-Killingsworth Section of the Northeast Portland Secondary Highway, the Engineer having sold these buildings on June 8, 1938, to the Sullivan Wrecking Company, which submitted the high bids therefor on June 2, 1938:

Building No. 5412, formerly owned by Wm. Habernicht, sold for \$23.56.

Building No. 5416, formerly owned by Philip F. Buebke, sold for \$13.56.

Building No. 5255, formerly owned by Chas. L. Schmeller, sold for \$56.56.

The Commission had under consideration the matter of completing the construction of the Neahkahnie Mountain Section of the Oregon Coast Highway. The Engineer advised that it would cost approximately \$200,000 to complete this section, of which amount \$120,000 has been included in the 1938 budget. He suggested that it would be advisable to contract the entire section this fall if accumulated savings in the contracting of other work are sufficient to finance the portion for which no provision has been made. After some discussion the Commission by unanimous vote approved the Engineer's suggestion and so ordered.

A letter was presented from the Silverton Safety Council requesting the construction of a sidewalk along the Silverton-Marquam Road from the end of Oak Street to the junction with the Monitor Road, in Silverton. The Commission referred this matter to the Engineer for investigation and report at the next meeting.

JUN 14 1938

A petition was presented, signed by 43 persons residing in the vicinity of the Crater Lake Highway and Eagle Point, in which the Commission was requested to take action to prohibit the grazing of livestock on both state and county highways because they are a menace to farmers and automobile traffic. The Secretary was instructed to inform the petitioners that this is a matter entirely out of the jurisdiction of the State Highway Commission and to suggest that they present the same to the legislature for disposal.

The Engineer reported that Contracts Nos. 1994, 2025, and 2049, for construction of state highway projects, have been completed according to the requirements of the contracts, or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 1994, with Harold Blake, for construction of Southern Pacific Overcrossing on the West Portland-Hubbard Highway, near Cook Station, in Washington County. Completed June 11, 1938.

Contract No. 2025, with Mountain States Construction Company, for construction of Sardine Creek Bridge, on the Pacific Highway, in Jackson County. Completed May 26, 1938.

Contract No. 2049, with Rogers Construction Company, for furnishing crushed rock in stock piles on the Baker-Durkee Section of the Old Oregon Trail, in Baker County. Completed May 10, 1938.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

At 3:00 o'clock p. m. the Commission conferred with Mr. James Hill, Jr., Manager of the Pendleton Grain Growers Association, in the Heyner Hotel, regarding the use of the state highway right of way at Cold Springs Landing, as a site for a grain elevator to facilitate the movement of grain from this place to Portland, via Columbia River barge. It was explained to Mr. Hill that the Cold Springs Highway is a primary state highway and its status as such cannot be changed except by action of the legislature. Furthermore, the Commission is reluctant to permit the use of state-owned property by private parties and does not want to be placed in the position of having sold to private parties state-owned property that is valuable for public use; hence, it

is necessary to deny his request. This matter was discussed at considerable length from various angles, but the Commission adhered to its original decision.

The conference was concluded at 4:00 o'clock p. m.

<p><u><i>[Signature]</i></u> State Highway Engineer</p> <p><u><i>[Signature]</i></u> Secretary</p>	<p><u><i>Henry F. Cabell</i></u> Chairman</p> <p><u><i>E. B. Aldrich</i></u> Commissioner</p> <p><u><i>F. L. Tou Velle</i></u> Commissioner</p>
--	---

Portland, Oregon, June 15, 1938

The State Highway Commission met in regular session at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects were opened and read in conformance with previously published notice:

OREGON COAST HIGHWAY
COQUILLE-CLAUSEN SECTION - GRADING, SURFACING, OILING

Berke Bros.	\$136,314.00
A. C. Greenwood Company, Inc.	142,119.00
E. C. Hall Company	165,575.50
McNutt Bros.	167,447.00
Leonard & Slate	173,254.00
Roy L. Houck	200,108.50
Kern & Kibbe	216,641.00

PACIFIC HIGHWAY WEST (INTERSTATE AVENUE)
COLUMBIA BOULEVARD-HARDING AVENUE SECTION - PAVING

Harold Blake	\$139,114.50
Oregon Contracting Company	142,638.50
Warren Northwest, Inc.	147,219.50
Edlefsen-Weygandt Company	151,947.50
Parker-Schram Company	159,293.00
Jacobsen-Jensen Company	174,187.50

JUN 15 1938

HURRICANE CREEK COUNTY ROAD
ENTERPRISE-SCOTCH CREEK SECTION - GRADING, SURFACING, OILING

Rogers Construction Company	\$23,365.30
Babler Bros.	25,625.50
Hart Construction Company	27,086.00
H. L. Rice	31,107.50

UPPER NEHALEM COUNTY ROAD
SHEELEY BRIDGE SECTION - SURFACING AND OILING

	<u>Using Road Oil</u>	<u>Using Tar</u>
Edwin C. Gerber	\$12,272.40	\$12,272.40
Warren Northwest, Inc.		12,573.00
O. C. Yocom		12,975.00

CHENOWETH COUNTY ROAD
CHENOWETH CREEK-THE DALLES SECTION
GRADING, SURFACING, OILING

H. L. Rice	\$12,744.50
------------	-------------

Chairman Cabell announced that the awards would be made at 2:30 o'clock p.m. in the same room.

The Engineer reported that a recent inspection of four tunnels in the vicinity of Homestead, Baker County, two of which are located on the Robinette-Homestead Secondary Highway, and two on the Baker-Homestead primary state highway, reveals that emergency maintenance of the same will be necessary this year. He estimated that such maintenance work would cost approximately \$4,080, of which amount \$1,480 is for the replacement of the timber lining at the west end of tunnel No. 1 on the Robinette-Homestead Secondary Highway, and \$2,600 for the replacement of the timber lining at both ends of tunnel No. 1 on the Baker-Homestead highway. He requested authority to do this work and to pay for the same with emergency funds, in view of the fact that no provision has been made for this work in the approved maintenance budget for 1938. The Commission approved the request by unanimous vote.

Mr. Frank Shull, Chairman of the Board of County Commissioners of Multnomah County, was present and offered, on behalf of the Board, to convey to the state the property known as the Vista House located at Crown Point on the Upper Columbia River Highway. After some discussion, the Commission indicated that it would accept this gift but deferred definite action thereon pending a recommendation from the Engineer, to whom the matter was referred for report at the next meeting of the Commission.

The Engineer reported that the North Fork Nehalem River Bridge, on the Oregon Coast Highway, in Clatsop County, and the Deer Creek Bridge, on the Bellevue-Hopewell Secondary Highway, in Yamhill County, have been reconstructed so that the reduced load limits heretofore in effect on such bridges are no longer necessary. He also reported that the bridge over the Yamhill

River, on the Three Mile Lane Secondary Highway, in Yamhill County, on which a reduced load limit of 7 tons has been in effect since 1932, has been repaired so that loads weighing up to 12 tons may now be transported over this bridge with safety. He recommended that the reduced load limits on the North Fork Nehalem River Bridge and the Deer Creek Bridge be lifted entirely and that the reduced load limit on the Yamhill River Bridge be raised from 7 tons to 12 tons. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 25th day of September, 1928, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain primary state highway bridges, including the following bridge, to wit:

9-40.8 North Nehalem River Bridge on the Roosevelt Coast Highway, in Clatsop County, - - - - 8 tons

and

WHEREAS, on the 27th day of September, 1932, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain secondary highway bridges, including the following bridges, to wit:

153-0.85 Deer Creek Bridge on the Bellevue-Hopewell Secondary Highway, in Yamhill County, - 6 tons

152-0.40 Yamhill River Bridge on the Three Mile Lane Secondary Highway, in Yamhill County, - 7 tons

and

WHEREAS, subsequent to the passage of said resolutions the said North Nehalem River Bridge, now known as bridge No. 9-40.94 North Fork Nehalem River Bridge, and the said Deer Creek Bridge have been reconstructed so that it is no longer necessary or desirable to maintain the reduced load limits set out in said resolutions; and

WHEREAS, the said Yamhill River Bridge has been repaired so that it is no longer necessary or desirable to maintain thereon the reduced load limit provided in the said resolution dated September 27, 1932;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the following bridges, to wit:

JUN 15 1938

9-40.94 North Fork Nehalem River Bridge on the Oregon Coast Highway, in Clatsop County

153-0.85 Deer Creek Bridge on the Bellevue-Hopewell Secondary Highway, in Yamhill County

be and the same hereby is rescinded and cancelled as of this date and the maximum load limit permissible on the said bridges hereafter shall be the maximum load limit provided by law; and

BE IT FURTHER RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the following bridge, to wit:

152-0.40 Yamhill River Bridge on the Three Mile Lane Secondary Highway, in Yamhill County,

be modified so as to permit a total gross weight of combined load and vehicle not exceeding twelve (12) tons upon any portion of the entire length of said bridge. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle.

IT IS FURTHER ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which said bridges are located; and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The matter of revising the viaduct on the Pacific Highway West, Newberg, being structure No. 3-24.07, had the attention of the Commission. The Engineer advised that it would cost about \$109,000 to widen this structure for a 50-foot roadway and to change the grade line to take out the excessive camber in the present structure, but it would cost only about \$28,400 to widen the roadway to 26 feet with a 3½-foot sidewalk on either side, without changing the grade line. He pointed out that \$100,000 has been budgeted in the 1939 program for Federal Aid Funds for grading and paving the Newberg-Dundee Section of the Pacific Highway West, and he suggested that it might be advisable to reallocate these funds for the reconstruction of the Newberg viaduct, because, in his estimation, if anything is done at all with this viaduct, an adequate structure should be provided. He declared his opposition to building any more two-lane structures on important highways within or adjacent to cities or towns. He also suggested that the improvement proposed for the town of Dundee, which it was planned to undertake in connection with the Newberg-Dundee grading and paving project, be undertaken regardless of whether or not the \$100,000 set up for the Newberg-Dundee Section is transferred to finance the improvements on the Newberg viaduct. He estimated the Dundee improvement at \$20,000. After considerable discussion the Commission indicated approval of the Engineer's suggestion but deferred definite action thereon for the time being.

JUN 15 1938

The Secretary reported receipt of a communication from the Department of State Police relative to the proposed operations of the Buzzard-Burkhart Lumber Company on public roads in the vicinity of Lakeview. It appears that this company is proposing to transport logs from a timber tract situated about 16 miles north of Lakeview into Lakeview over a route that will require them to cross state highways at several points, and to operate along county roads at other points. Further, that the company proposes to haul loads containing from 6,000 to 7,000 feet, B.M., and weighing from 60,000 to 68,000 pounds, and being from 8 to 10 feet in width. It also appears that the company is of the belief that it will not have to obtain a special carrier permit from the Public Utilities Commissioner, alleging that it is transporting its own logs, which are the product of the soil, and that it is entitled to exempt P.U.C. plates covering such operation and to a refund for gasoline tax paid for gasoline used in the trucks operated in this service, because, it alleges, the county roads over which the operations are to be carried on are now or will shortly be abandoned by the county court.

In the discussion of this matter the Commission indicated that it would not object to the transporting of logs across state highways if the company will comply with the statutory requirements, and provided that the operation will not create an undue hazard to other traffic. The matter was referred to the Engineer for investigation and to determine whether or not the operation will create a hazard, and to ascertain the status of the county roads over which the company proposes to transport the said logs, with a view in mind that, if these roads are still in the category of county road, then the company should be required to secure special carrier permits from the Public Utilities Commissioner and to pay the required fees. The Engineer was also instructed to consult with the Public Utilities Commissioner with respect to the transportation of logs across state highways or other public roads under P.U.C. exempt plates.

The Commission discussed the matter of improving the northerly entrance of the Pacific Highway West into Corvallis, particularly the section from the north city limits to Harrison Street. The Engineer estimated that this improvement, consisting of the widening of pavement, construction of curbs, et cetera, would cost about \$27,000. It was the opinion of the Commissioners that this project should be undertaken as soon as possible and accordingly the Engineer was instructed to prepare this project for contracting this year in the event that sufficient savings accrue in the contracting of other work in Divisions Nos. 1 and 2 to finance the same. If such savings do not accrue, then this project is to be included in the program for 1940 Federal Aid Funds.

The matter of revising the Oregon Coast Highway in the town of Gold Beach was brought up for discussion. The Engineer advised that additional investigations have been made which reveal that there is a possibility that the highway could be relocated a short distance west of the present road, between the ocean and the business district of the town, which would obviate the necessity of widening the main street, which is a costly proposition because of the business buildings that would have to be moved. The Commission appeared favorably inclined toward adopting such routing but deferred a decision thereon.

JUN 15 1938

until it is ready to construct the project. In this connection the question arose whether or not it would be necessary to hold a public hearing in Gold Beach in the event the suggested rerouting is approved, inasmuch as Gold Beach is an unincorporated town. The Commission decided that it would be proper to hold such hearing notwithstanding that the law requires that hearings be held only when a highway routing into or through an incorporated city or town is changed.

The Attorney reported with respect to the portion of the Seeley property which is needed for the Union Avenue Viaduct project, in Portland, which property lies between the portion already acquired and the right of way of the Portland Electric Power Company along the Willamette River. He said that the owners of the property will convey this particular area to the state if the state will pay the taxes due against the balance of the Seeley property. The Attorney stated that, in his opinion, the amount of the unpaid taxes is out of proportion to the real value of the property. The Commission instructed the Attorney to carry on further negotiations and see if a better offer cannot be obtained.

At 11:00 o'clock a. m. bids for the purchase of \$750,000 Oregon State Highway bonds were opened and read in conformance with previously published notice, which bids are as follows:

Bid of The United States National Bank of Portland (Oregon):

For Seven Hundred Fifty Thousand (\$750,000) par value, all or any part thereof, Oregon State Highway short-term bonds, bearing date of July 1st, 1938, to mature March 1st, 1939, but to be subject to optional redemption on January 2nd, 1939, or on any date thereafter on thirty days notice, bearing interest at the rate of .37% per annum, we will pay you the par value thereof and accrued interest to date of delivery.

Bid of The First National Bank of Portland, Oregon:

For \$750,000. State of Oregon Highway Bonds to be dated July 1, 1938 and to mature March 1, 1939, but subject to redemption on January 2, 1939 or on any date thereafter, on thirty days' published notice, to be in denominations of \$10,000.00 each, and to bear interest at the rate of thirty eight hundredths of one per cent (.38%);

WE WILL PAY \$100.00 FOR EACH \$100.00 PAR VALUE THEREOF PLUS ACCRUED INTEREST FROM THE DATE OF THE BONDS TO THE DATE OF DELIVERY TO US IN PORTLAND, OREGON.

Bid of State Bond Commission:

For \$250,000 par value of the \$750,000 Oregon State Highway short-term negotiable coupon bonds to be dated July 1, 1938 and to mature March 1, 1939, but to be subject to optional redemption on January 2, 1939, or on any date thereafter, on thirty days published

notice, the said bonds to be in denominations of \$10,000 each, to bear interest at a rate of $1\frac{1}{2}$ of 1% per annum payable on October 1, 1938 and March 1, 1939 or, as to the second interest installment, at the time of redemption, if the bonds are called for payment before final maturity date, we offer \$100.01 for each \$100 par value and accrued interest to date of delivery.

Chairman Cabell announced that the Commission would take these matters under advisement and would announce its decision relative thereto at 4:00 o'clock p. m. in the same room.

The Attorney requested authority to expend approximately \$100 of state highway funds to secure aerial photographs of certain property situate between Corbett and Dodson, in Multnomah County, which property is now under water. He said that the property is needed for right of way for the proposed water grade highway up the Columbia Gorge, and, no doubt, will have to be acquired by condemnation; further, that the pictures, if taken while the land is inundated, will be valuable when the condemnation cases are tried, and will take the place of costly witnesses. The Commission approved the request by unanimous vote.

The Commission had under consideration the matter of the adoption of a new route for the Pacific Highway just south of Grants Pass in order to eliminate excessive curvature in the present route, and, in this connection, considered the report of the Attorney on the cost of right of way between Engineer's Stations 99+00 and 114+36 where there is controversy with certain property owners in regard to the alignment. The Attorney advised that the right of way on the "L" line, which is the nearest line to the Rogue River, is estimated to cost \$5,111.73, whereas, the estimated cost of right of way on the "L-2" line is \$3,633.05, a difference in favor of the "L-2" line of \$1,478.68. The Engineer advised that both lines lie close together and are of equal length and that it would cost as much to construct one as the other, the only difference between the two being that the "L" line will take right of way from one property owner who will be very badly damaged, whereas the "L-2" line will take right of way from a property owner whose holdings will not be adversely affected. After discussion the Commission decided, in view of the circumstances, to adopt the route which will require the least expenditure for right of way and will be least harmful to the property owners, which route, it appears, is that designated as "L-2".

Commissioner Tou Velle offered the following resolution designating such route, and moved its adoption. The motion was duly seconded by Commissioner Aldrich and was declared by Chairman Cabell to have received the unanimous vote of the Commission:

WHEREAS, for the purpose of accomplishing a better alignment, the elimination of unsafe and excessive curvature, and otherwise improving the Pacific Highway, the Commission directed the Engineer to make a survey of the section of the Pacific Highway between a point approximately 100 feet south of the south end of the bridge over the Rogue River at Grants Pass and a point southerly

JUN 15 1938

therefrom on the Pacific Highway in the Southeast Quarter of Section 21, Township 36 South, Range 5 West, W. M., in Josephine County; and

WHEREAS, said survey has been completed and a map thereof made and the field notes and other engineering data have been filed in the office of the State Highway Commission in Salem, Oregon; and

WHEREAS, after due consideration of said map and records it is the judgment of the Commission that said map, survey, field notes and other engineering data should be approved and adopted by the Commission and the location and route between said termini be made the location and route of the Pacific Highway between said points;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the survey, field notes, map and other engineering data with respect to the Pacific Highway between the above-designated termini be and the same in their entirety are hereby approved and adopted as the survey, field notes, map and engineering data supporting and disclosing the route of the highway between the said termini, and the Engineer hereby is directed to file all of said data and information and to preserve the same in the records and files of the State Highway Commission at Salem, Oregon.

2. That the route of the Pacific Highway in Josephine County between the above-designated termini hereby is changed and modified and said highway between said termini hereby is located as follows, to wit:

Beginning at a point on the present Pacific Highway, said point being approximately 100 feet south of the southerly end of the bridge over the Rogue River at the southerly entrance to the city of Grants Pass, and thence running in a southeasterly and easterly direction through Sections 19, 20, and 21, T. 36 S., R. 5 W., W. M., to a connection with present located Pacific Highway in the S.E. $\frac{1}{4}$ of Section 21, T. 36 S., R. 5 W., W. M.

3. That said map for identification bears thereon the signature of R. H. Baldock, State Highway Engineer, and is dated the 15th day of June, 1938, the original of which said map has been placed in the files and records of the Highway Commission at Salem, Oregon, and a copy of which is attached hereto. *

* Map filed in Adoption of New Highway Routes File - No. 2.

JUN 15 1938

4. That the State Highway Engineer hereby is instructed and directed to physically locate and mark with proper monuments or markers on the ground the said route and highway between said termini, and the Engineer is further instructed to prepare the said section of said highway for proper and adequate improvement as a part of the section of the Pacific Highway in Josephine County between said termini.

5. That this resolution be entered in the records and minutes of the State Highway Commission and that a duly certified copy thereof be mailed to the County Court of Josephine County and the United States Bureau of Public Roads at Portland, Oregon.

The Commission considered a report from the Landscape Engineer on the request of the city of Medford for the landscaping of the north entrance of the Pacific Highway into Medford. The report indicated that this is a favorable roadside improvement project provided water can be supplied for irrigation purposes after construction is completed, and provided, further, that the Owen-Oregon Lumber Company, which owns adjacent property, will permit the planting of a screen of trees on its property to hide its storage yard, which presents an unsightly appearance from the highway. He recommended an allocation of \$6,500 of 1939 roadside improvement funds for this project if a suitable easement can be secured from the Owen-Oregon Lumber Company and if water can be obtained for irrigation purposes. The Commission deferred action on this matter pending additional information as to whether or not the easement and water can be obtained. The Engineer was instructed to investigate such matter and report later.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. with Commissioner Aldrich and Commissioner Tou Velle present. There were also present the State Highway Engineer, the Attorney, and the Secretary.

In the absence of Chairman Cabell Commissioner Aldrich acted as chairman pro tem.

Reconsideration was given by the Commission to the matter of reconstructing the viaduct on the Pacific Highway West at Newberg. The Engineer suggested that, if the Commission does not care to go to the expense of constructing a 4-lane structure at this time, costing \$109,000, it would be possible to construct half of it now and the balance later when there are sufficient funds to finance it. The eventual cost of the entire structure, he said, would be slightly more than if a 4-lane structure were constructed at the present time; but the immediate cash outlay would be considerably less, and the improvement would meet the requirements for a number of years. The Commission appeared favorably inclined toward the suggestion but deferred action thereon pending further study. The Engineer was instructed to investigate the matter thoroughly from this new standpoint and to report later.

The Engineer brought up for discussion the matter of contracting the

JUN 15 1938

surfacing and oiling of the Malone-California Line Section of the Whitney County Road, in Klamath County, which work is to be done as a Federal Aid Secondary Highway Project. It appears that the Bureau of Public Roads has refused to approve this project, due to the fact that the Lost River Bridge, located thereon, is in an unsafe condition and provision for the reconstruction of the same must be made before said Bureau's approval can be obtained. The Engineer advised that he has received information from the Klamath County Court to the effect that the county will rebuild the bridge when the road project is completed.

Mr. Tom Davis, Highway Engineer of the Bureau of Public Roads, was present and advised, if the Commission will include such bridge project in next year's Federal Aid Secondary Highway Program, or, if the county will agree, in writing, to construct the bridge within a year, the Bureau will then approve the contracting of the Whitney Road project. The Commission decided to defer the contracting of the road project until it is known whether or not the county will reconstruct the bridge next year. The Engineer was instructed to ascertain the attitude of the county court in regard thereto, and, if the county cannot finance the bridge work next year, whether or not it will assign to the State Highway Commission a sufficient amount of the gas tax revenue due Klamath County to reimburse the Commission for advancing the cost of such work.

The Commission discussed a similar situation existing on the Enterprise-Scotch Creek Section of the Hurricane Creek County Road, in Wallowa County, for which bids were received at this meeting. It appears that the Bureau of Public Roads will not approve this project because no provision has been made for the improvement of a certain timber culvert located thereon. The Engineer suggested that the state might assume the expense of reconstructing this culvert if that could be done legally; otherwise, that Wallowa County be asked to sign an agreement that it will widen the structure. On account of the uncertainty of the Commission's legal authority to expend state money on projects of this kind, the Commission ordered that the matter be covered by an agreement with Wallowa County in the event that the cost of the culvert work exceeds the extra amount allowed by the Federal Government for contingencies.

A delegation from Newberg and McMinnville, headed by Mr. Eugene Marsh, of McMinnville, came before the Commission in regard to the reconstruction of the viaduct on the Pacific Highway West at Newberg. Others in the delegation were Dr. H. L. Toney and James Smith, both of McMinnville; and the following from Newberg: Messrs. S. L. Parrett, George Larkin, Dr. T. W. Hester, C. A. Morris, George H. Layman, and E. H. C. Bennett.

Mr. Marsh gave as their understanding that the Highway Commission has budgeted \$110,000 for the improvement of the Pacific Highway West between Newberg and McMinnville, more particularly for the paving of the section between Dundee and Lafayette. He said that, while they would like very much to see this project proceed to completion, they believe that the Newberg Bridge project is of more importance and would rather the Commission spend its money for such project than for the paving work, except that the improvement planned

through the town of Dundee should be given preference over both and should be constructed regardless of the other two.

Chairman Cabell advised that the Commission has given this matter considerable thought, and, in his estimation, it is reasonable to say that the Commission will give the bridge project priority over the other; but the Commission is not ready at the present time to state just what kind of improvement will be made.

Mr. Marsh also asked for the reconstruction of the highway at the St. Joseph underpass, north of McMinnville, right of way for which, he said, has already been acquired; and also for the improvement of the approach of the secondary highway to the Newberg viaduct, in Newberg. He inquired as to the plans of the Commission with respect to the routing of the Pacific Highway West through McMinnville, and advised that rumors are to the effect that the Commission now proposes to build the highway around the city and is taking options for right of way on such basis, which is contrary to the impression that they gathered at the time of the Commission's hearing in McMinnville.

Chairman Cabell advised that, so far as the present Highway Commission is concerned, the route selected by this Commission is the proper one, but such selection does not necessarily bind future commissions, so there is nothing that can be said to guarantee the permanency of the route. He added that this Commission has no intention of changing its previous decision and has given no one authority to take options for right of way along any other route.

Mr. Marsh then asked for the improvement of Baker Street, in McMinnville, the route of the Pacific Highway West, from the end of the present improvement to the bridge, near the city hospital, and for the improvement of the Bellevue-McMinnville Section of the McMinnville-Tillamook Highway which, he said, is now in bad condition because of heavy logging traffic. The Engineer advised that the Commission's plans call for extending the Baker Street improvement southerly and the rebuilding of the bridge near the city hospital, and reconstruction of the McMinnville-Tillamook Highway as far as Valley Junction, when funds become available to finance the work.

The Engineer reported that an investigation by Maintenance Engineer J. N. Bishop of the condition of the unoiled section of the Weston-Elgin Secondary State Highway, near the summit, the oiling of which section has been requested by the people of this district, reveals that the present surfacing is entirely too weak to oil, and to place it in suitable condition would require considerable expense. In view of this report, the Commission decided not to oil this section this year but to give it consideration in next year's oiling program.

At 3:00 o'clock p. m. announcement was made of the following award of contracts for which bids were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

JUN 15 1938

"Coquille-Clausen Section of the Oregon Coast Highway, in Coos County. 2.95 miles grading, surfacing, and oiling. The low bid received for this project was that submitted by Berke Bros., Inc., Portland, at \$136,314.00. The next low bid was that of A. C. Greenwood Company, Inc., Portland, at \$142,119.00. There were 5 higher bidders. The Commission has awarded this job to Berke Bros., Inc., at their low bid of \$136,314.00.

"Columbia Boulevard-Harding Avenue Section of the Pacific Highway West (Interstate Avenue), in Multnomah County. 3.3 miles paving. Harold Blake, Portland, submitted the low bid on this project, at \$139,114.50. The Oregon Contracting Company, Portland, submitted the next low bid at \$142,638.50. There were 4 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Enterprise-Scotch Creek Section of Hurricane Creek County Road, in Wallowa County. 3.4 miles grading, surfacing, and oiling. The low bid submitted on this job was that of Rogers Construction Company, Dayton, Washington, at \$23,365.30. Babler Bros., Portland, submitted the next low bid at \$25,625.50. There were 2 higher bidders. These bids have been referred to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Sheelsy Bridge Section of the Upper Nehalem County Road, in Columbia County. 3.22 miles surfacing and oiling. Edwin C. Gerber, Oregon City, submitted the low bid on this project, at \$12,272.40, based on the use of either tar or road oil. Warren Northwest, Inc., Portland, submitted the next low bid at \$12,573.00, based on the use of tar. They did not submit a bid based on the use of road oil. There was one higher bidder. Inasmuch as the low bidder, Edwin C. Gerber, submitted identical bids based on either tar or road oil, and the Commission did not care to choose which should be used, selection was made by lot and tar was drawn. The Commission therefore awards this contract to Edwin C. Gerber at his low bid of \$12,272.40, using tar.

"Chenoweth Creek-The Dalles Section of the Chenoweth County Road, in Wasco County. 0.70 mile grading, and 1.19 miles surfacing and oiling. The only bid received for this project was that of H. L. Rice, Portland, at \$12,744.50. The Commission considers this bid satisfactory and has awarded the job to Mr. Rice at this price."

The Engineer brought up for discussion the matter of condemning right of way that has not already been acquired for the projects for which bids were received at this meeting. He requested authority for the Attorney to commence condemnation proceedings to secure such parcels. The Commission authorized and instructed the Attorney to acquire such properties by condemnation, if necessary.

G. E. Manchester, Mayor of Cascade Locks, and Teunis J. Wyers, City Attorney, came before the Commission in regard to the construction of a city-owned power transmission pole line along the right of way of the Columbia River Highway through their city. Mayor Manchester advised that the city is now being served by the West Coast Power Company, but the city wants service from Bonneville and has decided to install its own system, which will include the lighting of the highway, so it will be the best lighted town in the state. He further stated that the West Coast Power Company, which now has a pole line along the south side of the highway, will agree to the joint use of their poles in so far as the street lighting is concerned but will not agree to such joint use for other purposes, although the city is willing to enter into a joint-use agreement with the company at the customary rate.

In view of the policy of the Commission which permits the construction of only one pole line on each side of the highway and also requires the joint use of poles, suggestion was made that representatives of the city meet with representatives of the West Coast Power Company and endeavor to make satisfactory arrangements for the joint use of the poles. The city officials agreed to do this and report later. This matter was discussed further at 4:30 o'clock p. m. after Chairman Cabell returned to the meeting. Mayor Manchester reported at that time that he consulted with the attorney for the West Coast Power Company in regard to the joint use of their poles and this attorney refused emphatically to enter into any discussion of the matter whatsoever.

In the further discussion of this matter it was brought out that the West Coast Power Company is occupying space on the highway right of way without permit from the State Highway Commission, and considers that the State Highway Commission does not have the authority to force them to use poles jointly with the city. In view of the circumstances, the Commission decided unanimously to permit the city of Cascade Locks to construct its pole line along the south side of the highway through the town, overbuilding the facilities of the West Coast Power Company. The Secretary was authorized and instructed to prepare the customary form of permit covering the matter. The Attorney was instructed to take steps as may be necessary to cause the removal of the poles of the West Coast Power Company from the highway right of way.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with prices that he recommended be paid for each. After careful consideration, the Commission approved the Engineer's request and by affirmative action of the members present adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as herein-after more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which

JUN 15 1938

options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

At 4:00 o'clock p. m. the Commission had under consideration the bid of The First National Bank of Portland, Oregon, and the bid of The United States National Bank of Portland (Oregon) for the purchase of \$750,000 Oregon State Highway bonds, and the bid of the State Bond Commission for the purchase of \$250,000 par value of said bonds, the bid of The United States National Bank of Portland (Oregon) being for the purchase of the entire issue at a rate of interest of thirty-seven hundredths of one per cent (.37%) per annum, the bid of The First National Bank of Portland, Oregon, being for the purchase of the entire issue at a rate of interest of thirty-eight hundredths of one per cent (.38%) per annum, and the bid of the State Bond Commission being for the purchase of \$250,000 of said bonds at a rate of 1/2 of 1 per cent per annum, and the Commission being of the opinion that the bid of The United States National Bank of Portland (Oregon) was the best bid submitted accordingly accepted said bid and sold the said bonds to The United States National Bank of Portland, (Oregon).

The said Commission thereupon by the affirmative vote of the two commissioners present adopted the following resolution with respect to the sale of said \$750,000 Oregon State Highway bonds:

WHEREAS, in response to a call for bids duly issued and published by the Highway Commission for the sale of \$750,000 par value Oregon State Highway bonds, there were received by the Commission the following bids, to wit:

Bid of The United States National Bank of Portland (Oregon):

For Seven Hundred Fifty Thousand (\$750,000) par value, all or any part thereof, Oregon State Highway short-term bonds, bearing date of July 1st, 1938, to mature March 1st, 1939, but to be subject to optional redemption on January 2nd, 1939, or on any date thereafter on thirty days notice, bearing interest at the rate of .37% per annum, we will pay you the par value thereof and accrued interest to date of delivery.

Bid of The First National Bank of Portland, Oregon:

For \$750,000. State of Oregon Highway Bonds to be dated July 1, 1938 and to mature March 1, 1939, but subject to redemption on January 2, 1939 or on any date thereafter, on thirty days' published notice, to be in denominations of \$10,000.00 each, and to bear interest at the rate of thirty-eight hundredths of one per cent (.38%);

WE WILL PAY \$100.00 FOR EACH \$100.00 PAR VALUE THEREOF PLUS ACCRUED INTEREST FROM THE DATE OF THE BONDS TO THE DATE OF DELIVERY TO US IN PORTLAND, OREGON.

Bid of the State Bond Commission:

For \$250,000 par value of the \$750,000 Oregon State Highway short-term negotiable coupon bonds to be dated July 1, 1938 and to mature March 1, 1939, but to be subject to optional redemption on January 2, 1939, or on any date thereafter, on thirty days published notice, the said bonds to be in denominations of \$10,000 each, to bear interest at a rate of 1/2 of 1% per annum payable on October 1, 1938 and March 1, 1939 or, as to the second interest installment, at the time of redemption, if the bonds are called for payment before final maturity date, we offer \$100.01 for each \$100 par value and accrued interest to date of delivery.

WHEREAS, in the judgment of the Commission the bid of The United States National Bank of Portland (Oregon) is the best bid of the bids offered and submitted, and it is the further judgment of the Commission that the said bid of The United States National Bank of Portland (Oregon) should be accepted and the sale of the bonds made to the said The United States National Bank of Portland (Oregon).

NOW, THEREFORE, a majority of the members of the Commission being present and affirmatively voting, it hereby is resolved as follows:

1. That the bid of The United States National Bank of Portland (Oregon) be and the same hereby is accepted.

2. That the said bonds when prepared and when executed by the Governor, the Secretary of State, and the State Treasurer be delivered to the said The United States National Bank of Portland (Oregon) on the first day of July, 1938, on payment of the purchase price thereof.

3. That this resolution be entered in the minutes and records of the Highway Commission.

Mr. Jack Joyce, of the United States Forest Service, was present .

JUN 15 1938

and requested authority to transport 2 portable buildings, 14 feet wide, 32 feet long, and 18 feet in height, over state highways from Camp Sherman, in Jefferson County, to Fort Rock, in Lake County. He said that he previously requested a permit to move these buildings on the highway but the application was denied because it was considered that the buildings were too large, so he investigated further the matter of cutting the buildings in half and the possibilities of moving them over county roads part of the way, and he finds that that can be done satisfactorily. Accordingly, he is now requesting a permit to move four buildings, 14 feet wide, 16 feet long, and 18 feet in height, over three sections of state highway between Camp Sherman and Fort Rock, being a 4-mile section of the Santiam Highway, near the Jefferson-Deschutes County line, a 7-mile section of the Bend-Sisters Highway near Tumalo, and a 4-mile section of the Central Oregon Highway east of Bend. The balance of the distance, he said, would be over county roads, for which he has already secured county permits. He estimated that it would take about two hours for each trip and that the combined weight of load and vehicle would not exceed the statutory limits.

After considerable discussion, the Commission authorized the transporting of one of the buildings as a trial proposition, subject to the condition that the movement be properly flagged and that the United States Forest Service assume all liability in the event that an accident occurs. The Engineer was instructed to have Division Engineer Wm. E. Chandler personally accompany such trial movement along with Mr. Joyce and render a report thereon. The Commission authorized the granting of a permit for the transportation of the remaining buildings if the report is favorable.

Chairman Cabell returned to the meeting at 4:30 o'clock p. m.

The Engineer requested authority for Harold B. Say, Manager of the Travel and Information Department, to make a trip into Washington and Idaho to contact various newspaper officials relative to publicity matters. He estimated that it would take Mr. Say about two or three days to make this trip and that it would cost about \$25.00. The Commission approved the request by unanimous vote, subject to the further approval of Governor Martin.

The Attorney reported an estimate of cost to secure right of way for the proposed revision of the Oregon-Washington Highway between Pendleton and Adams, including cost of land, severance, fencing, general damage, et cetera. After considerable discussion the Commission approved the report and authorized the Attorney to proceed with the taking of options for right of way that may be needed for a project that can be financed with the funds that have been budgeted for this particular work. The Commission left it with the Engineer to determine the limits of such project.

The Engineer reported receipt of information from Mr. Franklin T. Griffith, President of the Portland General Electric Company, to the effect that the company will contribute a sum of \$25,000 toward the cost of reconstructing the Sandy Boulevard project, between 15th Avenue and 45th Avenue, Portland. In view of this information, the Commission authorized the Engineer

to advertise this project for bids to be received on Thursday, July 21, 1938. He was instructed to convey this information to Mr. Griffith and to tell him, further, that the Commission proposes to construct the remaining section of this project as soon as funds are available to finance the same.

Reconsideration was given by the Commission to the claim of the Peninsula Golf Club, in the amount of \$265.00, same being in the nature of reimbursement to the club for expense incurred in connection with studies and investigations pertaining to the proposed traffic separation structure at the intersection of Denver and Union Avenues, Portland. After considerable discussion of this matter, the Commission concluded that the representations made to the club by the Commission's agents carried no obligation on the part of the Commission to reimburse the club for its expense. In view of this conclusion, and for the further reason that the assumption and payment of this claim would establish an undesirable precedent, the Commission decided unanimously to deny the same.

A letter was presented from Mr. Rey B. Early, Portland, urging that the Arch Cape Tunnel, on the Oregon Coast Highway, south of Cannon Beach, be opened for public use notwithstanding that the highway at the south end of the tunnel has not been completed. The Engineer recommended against the opening of the tunnel because of the danger of accidents occurring by reason of falling rocks. It was his thought that the tunnel should be barricaded at each end until it has been lined and the danger of falling rocks averted. The Commission approved the recommendation and so ordered. The Engineer was instructed to convey such information to Mr. Early.

The Attorney reported results of negotiations with Mrs. Alvina H. Borland for the acquisition of right of way for a revision of the Pacific Highway and a connection with the Redwood Highway at the junction of such highways south of Grants Pass. He said that he consulted with Mrs. Borland's husband, who finally stated that they would take \$15,000 for the property, claiming that it would take that much money to purchase another suitable site for his mill and move his machinery and equipment to the same, in addition to allowing him something for his present site and business location. The Attorney gave as his thought that the price demanded by the Borlands is exorbitant and suggested that they be offered a sum not to exceed \$8,000 covering items as follows: 1.75 acres of land at \$2,000 per acre; moving of storage shed, \$400; spur track, \$800; slab burner, \$600; conveyor, \$200; moving of planer, et cetera, \$1,200; and \$1,000 compensation for a feed and seed warehouse which is now under lease for a period of 5 years at \$35 per month.

The Engineer gave as his thought that a permanent location survey should be made and right of way acquired at once, before Mr. Borland reconstructs his mill on this site. After discussion, the Commission authorized the Engineer to make such location survey. The Attorney was instructed to negotiate further with Mr. Borland, and, if necessary, to offer him as much as \$8,000 for his property. He was further instructed to condemn the right of way across Mr. Borland's land if he refuses the offer.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following matters:

JUN 15 1938

Acquisition of the Armitage property adjacent to the Coburg County Road and the McKensie River, about 5 miles north of Eugene:- The Commission decided unanimously to accept Mr. Armitage's gift of this 30-acre tract as a result of an inspection of the property on June 5.

Proposed park site between the Oregon Coast Highway and the Pacific Ocean a short distance north of Nelscott, Lincoln County:- The Commission decided unanimously not to purchase this 90-acre tract, for which the owners demand the sum of \$13,500, inasmuch as inspection of the property reveals that it does not meet the state parks requirements.

Easement for pipe line across property owned by Southern Oregon Lumber Company adjacent to Umpqua Lighthouse State Park, in Douglas County:- The Commission authorized the State Parks Superintendent to pay as much as \$250 for the acquisition of this easement in order to provide a water supply for the state park.

Acquisition of 200 acres from Messrs. Damatio and Huntley, Aberdeen, Washington, as an addition to the state park at Arch Cape, in northern Tillamook County:- The Parks Superintendent advised that this property would make a fine addition to the state park and can be purchased for \$60 an acre, or a total of \$12,000. He strongly recommended acquisition of the same. After discussion, the Commission approved the recommendation by unanimous vote.

Purchase of narrow wayside strips of land lying between the Oregon Coast Highway and the Pacific Ocean, between Newport and Waldport and between Waldport and Yachats:- The Parks Superintendent advised that there is a total of about 100 acres included in these strips, valued at about \$500 an acre, which should be acquired by the state in order to prevent them from being built up and the view of the ocean obstructed. He suggested that, if the Commission does not have funds available to finance the project, a holding company be formed for the acquisition of the same, with the idea in mind that the state would purchase the strips from the holding company at a later date when funds can be spared for that purpose. It was the thought of the Commissioners that such arrangement would not be advisable because of the possibility of a change in the personnel of the Commission in the meantime, which might lead to considerable embarrassment, if an obligation of this kind were incurred. Accordingly, the Commission refused to sponsor such holding company, but authorized the Parks Superintendent to solicit the aid of private individuals to secure these tracts for the state in some other manner.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Berke Bros., Inc., providing for the settlement of their claim for extra compensation arising out of their contract with the Commission for the construction of the Tunnel Section of the Old Oregon Trail, Baker County, State Highway Contract No. 1906.

Agreement with the State Board of Forestry and the Oregon State Penitentiary providing for the construction of a joint sewer

JUN 15 1938

pipe line on state-owned property situate near the State Highway Department Shops in Salem.

Agreement with Viola Lee Pratt and Henry G. Pratt relative to the purchase by the state, for park purposes, of certain property situate adjacent to the Oregon Coast Highway south of Cape Perpetua, in Lincoln and Lane Counties; also, escrow agreement providing for the depositing of the deed to such property in the First National Bank of Portland pending final payment for the property by the state.

Agreement with the United States Bureau of Public Roads providing for the financing of The Dalles Roadside Improvement Project on the Columbia River Highway with 1937 Federal Aid Funds, being designated as Oregon F.A.P. 36-C.

Agreement with Klamath County providing for maintenance by the County of the Whitney Bridge County Road, between The Dalles-California Highway and the California state line, after construction of the same by the state as a Federal Aid Secondary Highway project.

Agreement with Wallowa County providing for maintenance by the county of the Enterprise-Hurricane Creek County Road between Enterprise and Scotch Creek after construction of the same by the state as a Federal Aid Secondary Highway project.

Bargain and sale deed conveying unto Lee Ragan two parcels of land containing 931 sq.ft. and 2,923 sq.ft., respectively, situate adjacent to the right of way of the Oregon Coast Highway near the north end of the bridge over the Siuslaw River, at Florence, consideration \$207.70.

Bargain and sale deed conveying unto Al Leonard Krause, trustee, 3.28 acres of land situate adjacent to the Oregon Coast Highway, in Government Lots 4 and 5 of Section 20, Township 10 South, Range 11 West, W. M., Lincoln County.

Bargain and sale deed conveying unto A. J. Hodges Lots 1 and 2 of Block 98, Monteith's Southern Addition to the city of Albany, lying outside of the highway right of way.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:45 o'clock p. m.

JUN 15 1938

Portland, Oregon, June 29, 1938

The State Highway Commission met in regular session at 7:30 o'clock p. m. in Room 204, Benson Hotel. Present were:

E. B. Aldrich, Commissioner and Acting Chairman
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Chairman Henry F. Cabell was absent on a vacation trip in Europe.

The Commission discussed matters pertaining to the expenditure of state highway funds which the Commission has heretofore appropriated for financing a portion of the cost of maintaining an exhibit at the San Francisco World's Fair in 1939 and suggestions made by Mr. Harold B. Say, Manager of the Travel and Information Department, which include the use of models and dioramas of sections of Oregon highways that are appealing and would be attractive to potential tourists, and the use of motion pictures with sound synchronization, pleasing music, and explanatory material. The Commission indicated a favorable attitude toward these suggestions but deferred a definite decision pending a conference with the state committee in charge of the World's Fair exhibits. The Engineer was instructed to arrange for a conference with this committee during the luncheon hour on the following day.

The Commission also had under consideration the appointment of a committee as recommended by the Advisory Committee on Publicity Matters to study conditions affecting tourist travel in Oregon. Several names were mentioned in this connection but the Commission deferred action, pending the return of Chairman Cabell in October.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state and submitted a list of such properties together with prices that he recommended be paid for each. After careful study the Commission approved the Engineer's request. The following resolution in regard thereto was adopted by affirmative action of all members present:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said

JUN 29 1938

options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Toledo-Olalla Creek Section - Corvallis-Newport Highway</u>				
6091- Lybargar, Charles W.	R/W	0.74	Land \$100, plus \$300	McCallister
<u>Deschutes County - Central Oregon Highway</u>				
5180- Settelmeyer, Jacob	Oasis and Maintenance Site	26.42	\$4.00 per acre	McChesney
<u>Salem-12th Street Junction Section - Pacific Highway East</u>				
5772- Nixon, H. M.	R/W	32583 sq.ft.	2 1/2 sq.ft. plus \$280 plus moving buildings (estimated at \$375) and construction concrete spring box	McCallister
5919- Hoffman, Otto Paul	"	6621 sq.ft.	2 1/2 sq.ft. plus \$80	"
5769- Anderson, Martha	"	87 sq.ft.	Lump Sum- \$2.50	"
5762- Allison, Sarah Lansing	"	7710 sq.ft.	1 1/2 sq.ft. plus \$3.00	"
<u>Grants Pass-Green Creek Section - Pacific Highway</u>				
6103- Borland, Alvena H.	R/W	1.00	\$2000 per acre (Land \$3600) plus \$4150 and subject to condition that Mr. Borland will enter into a written agreement to vacate the premises within one year, if necessary	McCallister
<u>Valley Falls-White Rock Section - Fremont Highway</u>				
6092- State Land Board	Quarry Site and Park Site	40.0	\$3 per acre	McCallister
<u>Forest Boundary-Elgin Section - Weston-Elgin Secondary Highway</u>				
6102- Hill, Wm. C.	Borrow Pit	0.76	Lump sum- \$25.00	Williams
<u>Douglas County Line-Trail Section - Tiller-Trail Highway</u>				
6095- Swingle, H. F.	Quarry Site	4.43	\$15 per acre	McCallister
<u>Baker County Section - Old Oregon Trail Highway</u>				
6060- Zeller, A. R.	Patrol Hdqtrs	0.59	\$254.24 per acre	Wells

JUN 29 1938

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Mystic Creek-Powers Road Section - Coos Bay-Roseburg Highway</u>				
4500- Scofield, Fred	Stock Pile	1.05	Land \$100, plus \$10	McChesney
<u>Klamath County Section - Klamath Falls-Lakeview Highway</u>				
6046- Bord (Rex)	Park, Quarry and Stock Pile Site	29.63	Lump Sum- \$300	Gardiner
<u>Astoria Section - Oregon Coast Highway</u>				
5924- Clatsop County	Maintenance Site	8325 sq.ft.	Gratis	Collins
<u>Albany Section - Pacific Highway East</u>				
5509- Burkhart, Robt. L.	R/W and Main- tenance Site	4.2	\$365 per acre, plus \$465 (Lump Sum \$2000)	Gardiner
5162- Gray, Nancy	R/W	13993 sq.ft.	5 1/2 sq.ft., plus \$4800	"
5129- Eagles, Amy E.	"	52 sq.ft.	10 1/2 sq.ft., plus \$1194.80	"
4974- Steen, O. A.	"	1540 sq.ft.	\$500, plus conveyance of 2 parcels of land ly- ing outside right of way	"
5507- Vandran, Chris A.	"	800 sq.ft.	Lump sum- \$5500	"
4976a-Forney, C. F.	"	8160 sq.ft.	3 1/2 sq.ft.	"
5738- Umphrey, Linnie M.	R/W and Gravel pit	27.369 A.	\$100 per acre	"
<u>Columbia Boulevard-Harding Avenue Section - Pacific Highway West</u>				
5385- Gray, John H.	R/W	712 sq.ft.	In exchange for Lot 16, Blk. 3, Overlook Addition, plus low bid for moving and re-establishing house thereon, plus \$100 for land- scaping (Moving estimated at \$1000)	Benson
5385A- Drewfs, Henry F.	"	5000 sq.ft.	Lump Sum- \$600	"
<u>West Portland-Cook Overcrossing Section - West Portland-Hubbard Highway</u>				
3631- Hogue, Fred E.	R/W	0.294	\$1500 per a., plus \$59	Parker
<u>Jordan Creek Section - Wilson River Highway</u>				
5857- Tillamook County	Quarry Site	3.45	Gratis	McChesney
<u>Tidewater Section - Alsea Highway</u>				
5940- Barclay, G. N.	R/W	0.61	Land \$65, plus \$140, plus construction of bulkhead	McCallister
<u>Nye-Pilot Rock Section - Oregon-Washington Highway</u>				
5859- Cunningham Sheep Co.	R/W and (CORRECTION)	Gravel Pit	14.27	11.06 a. at \$10 per a. 3.21 a. at \$31 per a. Williams

JUN 29 1938

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Coquille-Clausen Section - Oregon Coast Highway</u>				
6084- Tuttle, H. M.	R/W	0.15	\$100 per acre, plus fencing	McChesney
<u>Tillamook County-McNamer's Section - Wilson River Highway</u>				
5856- Tillamook County	Stock Pile	2.21	Lump sum - \$300	McChesney
5858- Tillamook County	Quarry Site	5.36	Lump sum - \$450	"
<u>Jamieson-Lancaster Section - John Day Highway</u>				
5973- Turner, Basal A.	Gravel Pit	1.35	Lump sum - \$75	McChesney

The Attorney brought up for discussion matters pertaining to the acquisition of right of way for the proposed revision of the Oregon-Washington Highway between Pendleton and Adams, in Umatilla County. He said that he has received a communication from the Attorney representing the land owners stating that such land owners are not particularly anxious for the state to condemn right of way; also that they have secured the services of a Mr. McEwen, Appraiser of the Federal Land Bank of Spokane, to appraise their respective properties but Mr. McEwen will not be able to commence such appraisal until about the middle of July. It was the thought of the Commission that the state should have an appraisal made by competent appraisers to compare with that made by Mr. McEwen and accordingly the Attorney was instructed to arrange for the services of two or three men, who are competent to act in this capacity. Such appraisal is to be completed and ready for study by the Commission at the same time that consideration is given to the appraisal made by Mr. McEwen.

The Attorney also brought up for discussion the matter of acquiring right of way needed for the Interstate Avenue improvement across the property of Mr. & Mrs. Roskoski located at 8434 North Denver Avenue, Portland, and in this connection introduced Mr. Oscar Kaufer who has been employed by the Commission to appraise this property. Mr. Kaufer said that the owners are demanding the sum of \$19,000 for their property as a compromise settlement, they to remove buildings and fixtures located thereon, whereas he has appraised the property at \$18,000 of which amount \$8,000 represents the value of the entire holdings of Mr. Roskoski and \$10,000 represents the cost of moving the buildings and fixtures therefrom. The Commission considered that the price demanded is exorbitant and decided to limit its purchase to right of way only. The Attorney was authorized and instructed to offer Mr. Roskoski \$11,000 for such right of way and to condemn the property in the event the offer is refused. (The Attorney reported on the following day that Mr. Roskoski refused the offer. The State Highway Commission thereupon instructed him to acquire the property by condemnation.)

The matter of acquiring a 20-acre tract of land at Albany for use as a gravel pit and quarry site had the attention of the Commission. The Attorney advised that this property is owned jointly by the State Bank of Albany, D. E. Nebergall, Linnie N. Umphrey, Ruth Gould, and Veldora A. McKnight, and that they are asking the sum of \$100 per acre for the same. The Commission

JUN 29 1938

approved the price of \$100 per acre for the land but questioned the necessity of acquiring such a large tract. The matter was referred to the Engineer for investigation.

The State Parks Superintendent was present and reported on the following matters:

Acquisition of addition to Yaquina Bay State Park at Newport:- The Parks Superintendent advised that some time ago the state acquired from the United States Government a 32-acre park located at Yaquina Bay State Park but it so happens that the park did not include all of the land bordering the bay and there still remains in government ownership 3.41 acres which fronts on the park and extends to the bay. He said that this is necessary to complete the present park and requested authority to negotiate with the government for the acquisition of the same. The Commission approved the request.

Park site located adjacent to the Alsea Highway, in Benton County, particularly in Section 10, T. 13 S., R. 7 W., W.M.:-- The Parks Superintendent advised that as previously instructed by the Commission he has inspected this tract which contains 10 acres, and is of the opinion that it would be a desirable addition to the state park system. He recommended acceptance of Benton County's offer to convey the tract to the state as a gift. The Commission approved the recommendation.

Proposed addition to Golden Falls State Park on the Coos River Secondary Highway, in Coos County:- The State Parks Superintendent advised that the present park, which contains what is known as Golden Falls, will not be complete until it has been enlarged to include a portion of the Silver Creek area and what is known as Silver Falls. He advised that the property is owned by Coos County and that the county court has signified its willingness to convey it to the state as a gift. The Commission indicated a willingness to accept the county's deed to the tract if the county will convey it to the state without cost and without the assumption of obligation.

Acquisition of the areas included in the wye connection of the McKenzie Highway with the Santiam Highway and with the Bend-Sisters Highway in the town of Sisters, in Deschutes County:- The Parks Superintendent advised that for a number of years the State Highway Department has attempted to purchase these two triangular tracts, one of which contains 20 acres and is located at the west end of the town of Sisters, and the other contains 40 acres at the east end of the town of Sisters, from the owner, Mr. Louis F. Hill, but letters to Mr. Hill regarding the property have not been answered. He further advised that both tracts are very desirable from the state's standpoint and should be state-owned. It was his thought, in view of the fact that previous attempts to acquire the property by negotiation have failed, that the state should acquire them by condemnation and he so recommended. The Commission concurred in the viewpoint of the Parks Superintendent and thereupon authorized and instructed the Attorney to acquire the properties by condemnation, as recommended.

Addition to Cape Lookout State Park, in Tillamook County:- The Parks Superintendent advised that the Commission now owns a one-thousand acre

park overlooking the ocean at Cape Lookout, which park was obtained from the federal government and is inaccessible by road. Furthermore, the tract is isolated and in order to enter it one must cross a tract containing 31.72 acres owned by the Crown Willamette Company. This 31.72-acre tract, he said, fronts on the ocean and would make a valuable addition to the present state park and the acquisition of the same by the state would permit the building of trails across state land from the end of the present road to the present park and would also permit the development of the area with CCC forces. He advised that the tract, which is described as Lot 2, Section 36, T. 2 S., R. 11 W., W.M., can be acquired from the Crown Willamette Company for the sum of \$3,250 and strongly recommended purchase at such price. After discussion, the Commission approved the acquisition of this tract as recommended.

Acquisition of a 10-acre timber tract located adjacent to the Nehalem Secondary Highway four miles east of Mist, in Columbia County:- The Parks Superintendent advised that this tract is owned by the Clark-Wilson Lumber Company which is demanding the sum of \$6,000 for the same, basing such price on the value of the timber located thereon. He said that he has had the timber cruised and that the tract contains 678,000 board feet of red fir for which the top price today is \$4.00 per thousand and on that basis the Commission should not pay more than \$2,712 for the entire tract. He recommended that the tract be not acquired unless the company will reduce its demand to a reasonable figure and suggested that it might be advisable for further negotiations to be conducted by the people who are asking the state to secure the tract for recreational purposes. The Commission approved the recommendation and ordered that the matter be referred to the Columbia County Granges to carry on such additional negotiations.

Acquisition of the Crown Point property on the Columbia River Highway in Multnomah County:- The Parks Superintendent advised that in accordance with previous instructions from the Commission he has endeavored to contact the Board of County Commissioners of Multnomah County in regard to this matter but nothing definite has come of these attempts to date but he hopes within a few days to secure sufficient information to render a complete report thereon.

The Engineer reported on the cost to construct a sidewalk on the Silverton-Marquam Secondary Highway from the end of Oak Street in Silverton to the junction with the Monitor Road, which construction has been requested by the Silverton Safety Council. He said that inspection was made of this project in company with Dr. Smith, Secretary of the Safety Council, and a representative of the City Council, which revealed that the project is 2,800 feet in length, half of which is located within the city limits of Silverton. He estimated that to construct the 1,400-foot section outside of the city limits and within the highway right of way would cost about \$1,500. The Commission indicated a willingness to construct this sidewalk when funds can be spared to finance the same but denied the request for immediate construction.

The Engineer also reported on the cost to oil the shoulders adjacent to the highway pavement in the town of West Linn, which work has been requested by Mr. M. A. Wilson of that town. He said that this project is about 1.5 miles in length and to oil the shoulders, including the placement of stabiliz-

ing rock, would cost about \$10,000. The Commission decided not to do this work now but instructed the Engineer to bear the project in mind for consideration in next year's budget.

The Commission considered and ordered filed the Attorney's opinion as to the legal authority of the Commission to spend state highway funds to match federal funds in the construction and maintenance of county roads as federal aid secondary highway projects. The written opinion is dated June 28, 1937, and contains a supplement dated June 20, 1938, and briefly is to the effect that "if the state can obligate highway funds for the construction of county roads under the conditions and controlled by the rulings and regulations of the Secretary of Agriculture as outlined in the foregoing opinion, (June 28, 1937) then manifestly the Highway Commission can obligate highway funds for the maintenance of such roads if the federal government requires such obligation as a requirement and condition precedent to the procurement of the federal funds."

The Commission had under discussion matters pertaining to the Court Street improvement in Salem for which bids are to be received on the following day. It appears that the new streets that are to be constructed as substitutes for Summer Street have not yet been dedicated and until that has been done the Federal Bureau of Public Roads will not contribute federal funds to assist in financing the Court Street improvement. The Commission decided, under the circumstances, to proceed with the taking of bids for the Court Street project as advertised but to defer the award of the contract, if necessary, until the street situation has been satisfactorily clarified.

A letter was presented from Mr. Frank Forth, Ashland, requesting compensation in the amount of \$258 for loss incurred by him on account of alleged delays and carelessness on the part of the State Highway Department in making repairs to the Pacific Highway (new route) in front of his premises south of Ashland. The Engineer advised that the Highway Department has done everything that reasonably should be done from an engineering standpoint to take care of Mr. Forth and that evidently he is a very hard man to satisfy. Further, that reports indicate that the main thing that he now wants the state to do for him is to construct an approach road to his tourist camp. The Engineer read aloud Division Engineer K. D. Lytle's report on the subject dated June 27, 1938, recommending that Mr. Forth's claim be denied and that he be informed that the Highway Department has done everything that it thinks should be done for him and considers the matter closed. The Commission approved the recommendation and instructed the Attorney to write such letter to Mr. Forth.

The Attorney reported results of appraisals made by the special committee of appraisers, Mr. Henry Reed, Mr. J. B. Leber, and Mr. N. C. Soule regarding the value of the Security and Investment Company's property at Oregon City which is needed for right of way for the East Portland-Oregon City Highway in that town. He said that this board of appraisers has set a value of \$18,000 on the land and \$4,000 on the improvement, or a total of \$22,000, but they also report that the owners claim special moorage right value which they allege is worth \$12,000, same being predicated on a lease

with the Hawley Pulp and Paper Company which gives the paper company permission to moor and break up log rafts in the Willamette River in front of the property in question, for which lease the paper company pays \$1,800 annually. The Attorney advised that there is a question in his mind whether or not the lease is bona fide inasmuch as it was entered into during January 1937 while negotiations for the right of way were pending. He recommended that an offer of settlement with the owners be made on the basis of payment of \$22,000 for the land and improvements, ignoring the moorage value, such offer to be contingent on the determination of title to certain street ends which are in controversy. He further advised that a telegram was sent to Chairman Henry F. Cabell in New York on June 23 explaining the above facts and requesting his reaction and decision and that Mr. Cabell replied by wire approving settlement on the basis of payment of \$22,000 which is \$2,000 more than a previous offer. After discussion Commissioners Aldrich and Tou Velle concurred in Chairman Cabell's telegraphic decision and instructed the Attorney to proceed in accordance therewith.

The Engineer reported on the cost to construct a bypass route for a connection of the Tualatin Valley Highway with the Gales Creek County Road in Forest Grove as has been proposed by people of that town. He estimated that such bypass construction on a direct line from 7th Street to a connection with the Gales Creek Road, about one-half mile north of Forest Grove, would cost about \$29,000 for construction, \$13,000 additional for right of way, and \$30,000 additional for the purchase or moving of 15 houses, making a grand total of \$72,000. To construct the bypass on a route following certain city streets, he said, would cost about \$10,600 and to purchase right of way for such route would cost an additional \$9,000 or a total of \$19,600. The Commission approved the report but took no action thereon. The Engineer was instructed to bear this project in mind for consideration in next year's program.

The Commission considered a report from the Engineer on the cost to grade and oil the unoiled portion of the Silver Creek Falls Secondary Highway in the vicinity of Shaw, which work has been requested by 24 petitioners from this district. He said that the unoiled section is 1.9 miles in length and to grade and oil the same would cost approximately \$14,300. The Commission approved the report and ordered it filed. The Engineer was instructed to bear this project in mind for consideration in next year's program.

Reconsideration was given by the Commission to the matter of oiling the Oregon Coast Highway full width between 9th Street and the Knapp Hotel in Port Orford. The Engineer estimated that it would cost about \$1,700 to construct an oiled surface on a strip 6 feet wide on each side of the existing pavement; that it would cost about \$4,900 to oil the full width of the highway where same can be done without excessive grading costs and that it would cost about \$18,000 to reconstruct the entire street, including catch basins, curbs, et cetera. The Commission ordered the report filed for consideration in next year's budget.

The Engineer reported on the cost to construct a proposed maintenance building in Albany as a P.W.A. project as compared with the construction of the same as a W.P.A. project, which report was ordered by the Commission at

the previous meeting. He estimated that to construct this building as a W.P.A. project would cost \$9,320 of which amount the state would have to pay \$5,555. As a P.W.A. project, he said, the total cost would amount to about \$8,850 of which amount the state would have to pay \$5,367. He recommended construction of the building as a P.W.A. project. The Commission approved the recommendation and by affirmative vote of the Commissioners present adopted the following resolution authorizing the Engineer to file an application for a grant of P.W.A. funds to finance the work:

A RESOLUTION authorizing R. H. Baldock, as State Highway Engineer, to file an application with the United States of America through the Federal Emergency Administration of Public Works for a grant to aid in financing the construction of a maintenance building to be located at Albany, Oregon, and the purchase of right of way necessary to such construction.

BE IT RESOLVED BY THE OREGON STATE HIGHWAY COMMISSION:

1. That R. H. Baldock as State Highway Engineer, be and he is hereby authorized to execute and file an application on behalf of the Oregon State Highway Commission with the United States of America for a grant to aid in financing the construction of a maintenance building to be located at Albany, Oregon.

2. That the said R. H. Baldock is hereby authorized and directed to furnish such information as the United States of America through the Federal Emergency Administration of Public Works may reasonably request in connection with the application which is herein authorized to be filed.

The Engineer reported the award of the following contracts in accordance with authority previously granted him by the Commission:

Contract for surfacing and oiling the Roberts-Orville Section of the Halls Ferry County Road, in Marion County. Bids taken June 2, 1938, contract awarded on June 17, 1938, to McNutt Bros., Eugene, who submitted the low bid therefor;

Contract for grading, surfacing and oiling the Washington County Line-Skyline Blvd. Section of the Northwest Thompson County Road, in Multnomah County. Bids taken June 2, 1938, contract awarded on June 17, 1938, to Saxton, Looney & Risley, Oak Grove, who submitted the low bid therefor;

Contract for surfacing and oiling the Wigrich-Buena Vista Section of the Independence-Buena Vista County Road, in Polk County. Bids taken June 3, 1938, contract awarded June 21, 1938, to J. C. Compton, McMinnville, who submitted the low bid therefor;

Contract for grading and surfacing the Dixonville Section of the North Umpqua County Road, in Douglas County. Bids taken June 3, 1938, contract awarded June 23, 1938, to Harold Blake, Portland, who submitted the low bid therefor;

Contract for paving the Columbia Boulevard-Harding Avenue Section of the Pacific Highway West (Interstate Avenue), in Multnomah County. Bids taken June 15, 1938, contract awarded June 22, 1938, to Harold Blake, Portland, who submitted the low bid therefor;

Contract for grading, surfacing and oiling the Enterprise-Scotch Creek Section of the Hurricane Creek County Road, in Wallowa County. Bids taken June 15, 1938, contract awarded June 20, 1938, to Rogers Construction Company, Dayton, Washington, who submitted the low bid therefor.

The Commission approved the awards as reported.

The Commission considered and ordered filed a copy of the Federal Aid Highway Act of 1938 as submitted to the President by Congress, June 1, 1938.

The Engineer brought up for discussion the matter of advancing the construction of the Arch Cape Tunnel-Short Sand Beach Creek Section of the Oregon Coast Highway which is now scheduled for contracting this fall. He suggested that this project be advertised for bids to be received in August. The Commission approved the suggestion and so ordered.

The Commission considered and approved the following code of regulations relating to the maintenance of advertising signs on or adjacent to state highways in unincorporated towns and villages, same having been tentatively approved previously at the meeting held on May 12, 1938:

Signs may be erected on state highway rights of way within a business district only for the purpose of advertising services or commodities for sale or hire on the adjacent premises. Likewise, marquees and awnings may be erected. The erection and maintenance of signs, marquees and awnings are to be governed by the following conditions:

1. When there is a group of not less than three separate business establishments within a distance of 300 feet on one side of the highway in front of and abutting the right of way line along which there has been constructed a concrete or an oil macadam sidewalk.

2. Such signs, marquees or awnings must be affixed to the buildings and supported entirely from the buildings. Signs will be permitted to encroach upon the highway rights of way provided they are of a height sufficient to give a clearance of not

JUN 29 1938

less than ten feet above the level of the sidewalk and provided further that they do not, under any condition, extend beyond a point one foot back of the curb line. Awnings must have a clearance of at least seven feet above the sidewalk and marquees a clearance of at least eight feet above the sidewalk. Neither awnings nor marquees may extend farther from the building than a point two feet back of the curb line.

3. No display of merchandise or goods offered for display or sale will be permitted on sidewalks or other places within the right of way.

4. No signs nor appurtenances of any kind other than those described above will be permitted within the right of way. This includes portable signs as well as signs erected on posts or standards.

5. All such signs, marquees and awnings must be approved as to structural stability by the State Highway Commission, and plans for their erection must be attached to the permit forms when considered by the State Highway Commission.

6. Written permits from the State Highway Commission must be obtained by each property owner or lease holder for the erection and maintenance of any and all signs, marquees or awnings. Such permits will be subject to revocation on ten days' written notice. Permits will be issued without charge to the permittee.

7. Each application for permit to construct and/or maintain an overhead or hanging sign and/or for each marquee or awning must be accompanied by a surety bond protecting the State of Oregon, the State Highway Commission, its officers or agents from all damage claims arising from injury to persons or damage to property chargeable to the presence of the said signs, awnings or marquees. In the case of signs maintained by sign companies and covered by blanket insurance policies, an endorsement in the blanket policy protecting the State of Oregon, the State Highway Commission, its officers or agents, will be accepted in lieu of separate surety bonds.

8. Signs, marquees or awnings which are not properly maintained and/or which have been abandoned and/or which are in disuse must be removed by the owner or lessee within thirty days after receipt of written notice from the Highway Commission so to do. Signs not removed within the above period will be taken down by the Highway Commission and the cost of such removal collected from the permittee before cancellation of bond.

9. All signs, marquees or awnings now erected in any business district coming within the purview of these regulations must be covered by a proper permit. At the earliest possible date, the

Highway Commission will cause an inspection to be made covering the structural stability of all signs, marquees or awnings now in place, and, if such signs, marquees or awnings are found satisfactory, permits will be issued. In case the signs, marquees or awnings thus examined are found to be structurally imperfect, correction must be made before permit will be granted. If such correction is not made within thirty days after written notice, and if said signs, marquees or awnings have not been removed, they will be removed by the agents of the State Highway Commission.

10. It is the intention of these regulations to permit the erection and display of advertising signs within the limits of the highway right of way by business establishments located in unincorporated towns and villages, and located with respect to each other and to the highway right of way so as to make it difficult or impossible to display such signs within the limits of their own property. It is not the intention to permit the erection or display of such signs within the right of way at isolated places where conditions permit the satisfactory display of signs on private property.

The matter of permitting the Yakima, Washington, Chamber of Commerce to maintain signs adjacent to the Old Oregon Trail just east of Pendleton and at the junction with the road leading to Paterson Ferry across the Columbia River, directing traffic to the Paterson Ferry had the attention of the Commission. The Commission denied the request for the approval of such signs and ordered that the Chamber of Commerce be so informed and that it also be advised that the Commission is opposed to the maintenance of all signs upon or adjacent to state highway rights of way as a matter of established policy.

The Commission had under consideration the purchase of equipment needed in connection with the testing of the eyesight of highway department employees who are required in the course of their duties to operate motor vehicles. In this connection the Engineer suggested that it would be advisable to secure the services of several oculists and several optometrists to advise what tests should be made and what equipment should be purchased for use in connection with the making of such tests so as to insure that no mistakes will be made and also to avoid criticism that might arise. He pointed out that, if the Commission approved the suggestion, it would be necessary to pay these doctors for their services. After discussion, the Commission authorized the Engineer to secure the services of three oculists and three optometrists and to purchase equipment recommended by them. However, he was instructed to consult with Dr. R. B. Dillehunt of the University of Oregon Medical School, before selecting the members of this board.

The Engineer reported that the WPA fiscal year ends July 1 and that the WPA officials anticipate a delay of two or three weeks in securing their new orders which, it now appears, is going to cause some congestion on the Wolf Creek Highway WPA work unless the state will assume the payment of rental of some of the big equipment used on this project. He requested authority from

JUN 29 1938

the Commission to rent one Lima shovel with 1½-yard capacity and one Loraine shovel with 1½-yard capacity for this project for approximately three weeks, from July 1 to July 21, at an estimated cost of \$1,500 if developments indicate that is necessary to insure the progress of the work. He said unless the state will assume this expense it might be necessary to discontinue the use of these shovels which are now working at their maximum efficiency and cannot be spared at this time of the year. The Commission approved the renting of these shovels at state expense in order to keep the work going if that is absolutely necessary.

The Secretary presented a letter from Mr. Hugh Earle, State Insurance Commissioner, advising that the fidelity schedule bond issued by the Ohio Casualty Insurance Company covering certain State Highway Commission employees has not been properly executed because the company has failed to use the rates on file in his office as is required by Oregon law. The Commission considered that this is a matter for the State Insurance Commissioner to adjust in view of the fact that the Commission advertised for bids for the furnishing of such fidelity schedule bond and accepted the bid of the Ohio Casualty Insurance Company after study disclosed that it complied with the requirements and was the lowest bid received. Accordingly, the Commission instructed the Secretary to proceed with the filing of applications with the company in accordance with its requirements.

The Commission considered and approved the Engineer's letter dated July 25, 1938, and directed to Mr. Franklin T. Griffith, President of the Portland Electric Power Company, in regard to the proposed improvement of Sandy Boulevard, Portland, between 15th Avenue and 45th Avenue, wherein the Engineer advises Mr. Griffith that the Highway Commission will award a contract on July 21 for this improvement with the understanding that the company will pay to the Commission on or before the date of the award the sum of \$25,000 as the company's contribution for this construction work. Also, in which the Engineer gives as his understanding that the present rails of the company are to be left in place and that the company will maintain the remainder of the street occupied by its rails until such time as the Highway Commission can finance the construction of the remainder of the street. Further, that the company will not be required to cooperate in the additional expense of widening or repaving Sandy Boulevard but the company will be required to move its power lines as may be required now and in the future at its own cost and expense.

The Commission considered and signed a letter directed to the Chase National Bank of New York authorizing release of the bond that the United States National Bank of Portland, Oregon, has deposited with the Chase National Bank of New York in connection with its designation as the depository for funds deposited by the Commission under P.W.A. Docket 982 covering Oregon Coast Highway bridge construction. The Attorney explained that the bridge transaction has been closed and that no funds are now deposited under the said project with the United States National Bank, therefore the bond deposited by the United States National Bank with the Chase National Bank, amounting to some \$500,000 of government bonds, should be released. The Commission approved the explanation and thereupon signed the letter and authorized delivery of the

same to the United States National Bank of Portland, Oregon, for transmittal to the Chase National Bank of New York.

The Commission confirmed the oral authority previously given the Engineer on June 14 in Prineville to make a survey for the permanent location of the Warm Springs Secondary Highway No. 360 between Prineville and the Jefferson-Crook County Line so as to determine the proper location for the highway between Prineville and the Pine Products Mill, about 2½ miles north of Prineville.

The Commission adjourned at 10:00 o'clock p. m. to reconvene the following morning in the auditorium of the Public Service Building.

Portland, Oregon, June 30, 1938

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were:

E. B. Aldrich, Commissioner and Acting Chairman
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Dovers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects were opened and read in conformance with previously published notice:

KLAMATH FALLS-LAKEVIEW HIGHWAY
ELY MOUNTAIN-BEATTY SECTION - GRADING, SURFACING AND OILING

McNutt Bros	\$105,440.00
Fisher Bros	109,869.00
E. C. Hall Co.	113,427.30
Clifford A. Dunn	114,305.60
Babler Bros.	117,688.00
Edwin C. Gerber	122,888.60
A. Milne	125,461.00

PACIFIC HIGHWAY EAST
COURT STREET SECTION, SALEM, - PAVING

Oregon Contracting Co.	\$20,684.00
Edlefsen-Weygandt Co.	22,041.00
The United Contracting Co.	22,435.50
Harold Blake	22,898.00
Ross B. Hammond Co.	27,476.50

Commissioner Aldrich announced that the award of contracts would be made at 2:30 o'clock p. m. in the same room.

JUN 29 1938

The Commission also received bids for the purchase of obsolete equipment and an accumulation of scrap materials stored at the Highway Department Shops at Salem, Klamath Falls, Coquille, and LaGrande, as previously advertised. These bids were all referred by the Commission to the Engineer with power to sell the various items to the high bidder in each instance if the bids compare favorably with the appraised value of the items. Announcement to that effect was made by the Acting Chairman, Commissioner E. B. Aldrich.

Commissioner Aldrich also announced that the Commission received no bids for the purchase of old lumber and piling in pile trestle bridges on the Oregon Coast Highway, in Lincoln County, the sale of which was also advertised for this meeting.

The Commission had under consideration the request of the Pioneers' Association of Gilliam, Wheeler, and adjacent counties for the erection of a historical marker on the John Day Highway at the point where this highway crosses the original Oregon Trail Wagon Road a few miles south of Arlington. The Commission referred this matter to the Engineer for discussion with Mr. Lewis A. McArthur, President of the Oregon Geographic Board, who is an authority on such matters, with instructions to render a report at the next meeting.

The Commission had under consideration the acceptance of the offers of the United States of America to aid in financing the following state highway projects by making grants of federal funds in the amount of 45 per cent of the cost of such projects, including the acquisition of lands and rights of way needed therefor, upon completion:

1. Construction of Catching Slough Bridge and approach roads thereto on Coos River Secondary State Highway, in Coos County;
2. Construction of the Fleming Ranch-Schindler Bridge Section of the Albany-Lyons Secondary State Highway, in Linn County;
3. Construction of the Sunnyside-Umapine Section of the Sunnyside-Umapine Secondary State Highway, in Umatilla County;
4. Construction of a storage and office building and a storage shed near Klamath Falls, in Klamath County.

After discussion the Commission approved the said offers and, by affirmative vote of each of the Commissioners present, adopted the following resolutions accepting such offers:

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE CATCHING SLOUGH BRIDGE AND APPROACH ROADS THERETO ON THE COOS RIVER SECONDARY HIGHWAY IN COOS

COUNTY, AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the Catching Slough Bridge and approach roads thereto on the Coos River Secondary Highway in Coos County and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 80749-127

"FEDERAL EMERGENCY ADMINISTRATION

OF PUBLIC WORKS

Washington D. C.

Dated: Jun 24 1938

Docket No. Oreg. 1172-F.

"State Highway Commission of
the State of Oregon,

Salem, Oregon.

1. Subject to the Terms and Conditions (PWA Form No. 230, as amended to the date of this Offer) which are made a part hereof, the United States of America hereby offers to aid in financing the demolition of existing structures and the construction of a bridge over Catching Slough, including the grading and surfacing of approaches thereto and the acquisition of necessary land and rights-of-way therefor (herein called the "Project"), by making a grant to the State Highway Commission of the State of Oregon (Herein called the "Applicant") in the amount of 45 per cent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works, but not to exceed, in any event, the sum of \$41,171.

"2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later than 8 weeks from the date of this Offer and to complete such Project with all practicable dispatch, and in any event within 8 months from the commencement of construction.

"UNITED STATES OF AMERICA

Federal Emergency Administrator
of Public Works

By (Sgd.) H. A. Gray

Assistant Administrator"

be and the same is hereby in all respects accepted.

JUN 30 1938

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all rules and regulations relating to such grant a copy of which rules and regulations were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than eight weeks from the date of this offer; and to complete the work with all practicable dispatch, and in any event within eight months from the commencement of construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE FLEMING RANCH-SCHINDLER BRIDGE SECTION OF THE ALBANY-LYONS SECONDARY HIGHWAY NO. 211 IN LINN COUNTY AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the Fleming Ranch-Schindler Bridge Section of the Albany-Lyons Secondary Highway No. 211 in Linn County and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 80934-14

"FEDERAL EMERGENCY ADMINISTRATION

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF A STORAGE AND OFFICE BUILDING AND STORAGE SHED NEAR KLAMATH FALLS IN KLAMATH COUNTY AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of a storage and office building and a storage shed near Klamath Falls in Klamath County and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 80915-13

"FEDERAL EMERGENCY ADMINISTRATION
OF PUBLIC WORKS

"Washington, D. C.
Dated: Jun 27 1938
Docket No. Ore. 1177-P.

"State of Oregon, by and through
the State Highway Commission,
Salem, Oregon.

1. Subject to the Terms and Conditions (PWA Form No. 230, as amended to the date of this Offer) which are made a part hereof,

JUN 30 1938

the United States of America hereby offers to aid in financing the construction of a storage and office building and storage shed near Klamath Falls, Klamath County, including acquisition of necessary land and landscaping (herein called the "Project"), by making a grant to the State of Oregon, by and through the State Highway Commission (herein called the "Applicant"), in the amount of 45 per cent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works, but not to exceed, in any event, the sum of \$9,292.

2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later than 10 weeks from the date of this Offer and to complete such Project with all practicable dispatch, and in any event within 5 months from the commencement of construction.

"UNITED STATES OF AMERICA
Federal Emergency Administrator
of Public Works

By (Sgd.) H. A. Gray
Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all rules and regulations relating to such grant, a copy of which rules and regulations were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than 10 weeks from the date of this offer; and to complete the work with all practicable dispatch, and in any event within five months from the commencement of construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

The Commission thereupon set Thursday, August 4, 1938, as the date for its regular meeting in August for receiving bids on the foregoing and other highway projects, which meeting is to be held in Portland, as usual.

The Commission considered the request of Mr. E. W. Segessenman for reinstatement of his permit authorizing the transportation of logs over certain state highways, which permit was heretofore cancelled by the Public

JUN 30 1938

Utilities Commissioner upon request of the State Highway Commission because Mr. Segessenman violated the law by hauling loads weighing in excess of the statutory limits, and when apprehended refused to voluntarily surrender his P.U.C. plates upon request of the state police officer making the arrest. In this connection the Secretary presented a letter from Mr. Segessenman dated June 28, 1938, alleging ignorance of the Highway Commission's code of regulations, which require the voluntary surrender of the P.U.C. plates for a few days or the cancellation of the permit regardless of how many trucks are operating thereunder, and further stating that because of the fact that he did not have knowledge of these regulations he consulted his attorney who ill-advised him and as a consequence the Public Utilities Commissioner revoked his permit taking all of his trucks out of service. He stated further that all of his trucks have been idle for 12 days, throwing out of employment ten men with families. He gave as his thought that he has been sufficiently penalized and that he should now be permitted to resume his operations. The Engineer recommended approval of Mr. Segessenman's request. After considerable discussion and it appearing to the Commission that Mr. Segessenman's statements are honest disclosures of facts, the Commission decided that it would be proper to reinstate Mr. Segessenman's permit and so ordered. The Secretary was instructed to convey such information to the Public Utilities Commissioner.

The Engineer requested authority for Traffic Engineer John Beakey to attend, at state expense, the National Conference on State and Highway Safety and a meeting of the Committee on Uniform Traffic Control Devices which is to be held in Washington, D. C., on July 7 to 18, 1938, inclusive. The Commission approved the request subject to concurrence by Governor Charles H. Martin.

The Commission also approved the attendance, at state expense, of the following officials of the State Highway Department at the annual meeting of the Western Association of State Highway Officials at Reno, Nevada, August 10 to 13, 1938, inclusive, subject however to approval by Governor Charles H. Martin: F. L. Tou Velle, R. H. Baldock, J. M. Devers, H. G. Smith, J. N. Bishop, G. S. Paxson, and John Beakey.

The Commission considered and ordered filed a letter from W. W. Evans, Halfway, Oregon, requesting the oiling of the Baker-Homestead Highway between Halfway and Timber Canyon Hill, there being no funds to finance such project this year.

The Commission also considered and ordered filed a letter from the Willamina Commercial Club thanking the Commission for the splendid work in resurfacing Main Street in Willamina.

A letter was presented from the Portland General Electric Company asking for the renewal of the agreement covering the installation, operation and maintenance of its 11,000-volt cable on the Interstate Bridge between Portland, Oregon, and Vancouver, Washington, and further requesting that the \$75 per month charge heretofore paid by the company for the use of this bridge be waived. The Commission authorized the renewal of the agreement but refused to waive the rental charge.

JUN 30 1938

Letters were presented from the County Court of Clatsop County and Clatsop County School District No. 26 urging the construction of a pedestrian walk on the Walluski River Bridge on the Nehalem Highway, which bridge is now being reconstructed under state highway contract. The Engineer advised that the existing structure has a 16-foot roadway but this is being widened to 26 feet which is as wide as it can be built using the girders in the old structure. Sufficient money, he said, is not available to replace the girders with new material which would permit the construction of sidewalks, in fact it would cost about \$30,000 more to replace the entire structure. Furthermore, it is doubtful whether the United States War Department would permit the construction of the sidewalk on the movable span of this structure in view of the fact that it would decrease the navigable opening by approximately four feet. In view of the circumstances he recommended that the request be denied. The Commission approved the recommendation and ordered that the county court and the school district be informed of the action and the reasons necessitating same.

In this connection the Engineer advised that the embankment work that is being constructed in connection with the rebuilding of the Walluski bridge appears to be on unstable ground and that the fill is sinking and ground adjacent thereto is rising as a result thereof. This adjacent land, he said, is owned by the State College and is being used as an experiment station site and objections have been offered by the college authorities because part of their land is being destroyed for test purposes, and their drainage facilities have been badly damaged. He said that he personally inspected the premises to ascertain the condition and as a result ordered the lowering of the grade line of the embankment so as to avoid any further damage to the adjacent property and also ordered the restoration of the experiment station property, including the drainage system. The Commission approved the action of the Engineer in this regard.

A letter was presented from the Individual Truck Owners and Operators, Portland, urging action as may be necessary to provide employment on the Wilson River, Bear Canyon, and Wolf Creek W.P.A. projects for individual truck owners of whom there are approximately 35 now on the rotational list who are able under present conditions to obtain only 140 hours of employment out of every five months' time. The Engineer pointed out that the Commission has budgeted only a certain amount for this W.P.A. work and no additional trucks can be placed in service without exceeding this budget because it would mean not only additional expense for trucks but also additional expense for the furnishing of powder, culverts, et cetera. After discussion the Commission decided not to increase the budgeted amount for these projects and accordingly denied the request.

Similar action was taken by the Commission on requests of E. Estabrook and W. C. Hughes, both of Portland, who have trucks that they wish to place in service on these projects.

The Commission considered and denied the request of Martha Roddy, Salem, to conduct a confectionery stand in the highway department shops at Salem.

A letter was presented from Mrs. Laura Hood, Newport, advising that she is contemplating the construction of a building on her property located at Newport and intends to construct said building on the edge of the right of way of the Oregon Coast Highway unless the Highway Commission acquires from her, in the meantime, a 10-foot strip across the front of her property as has been done along adjacent properties. The Engineer advised that this is one of the properties that is needed in connection with the proposed revision of the Oregon Coast Highway between Newport and the Siletz River and that the Commission at one time authorized the acquisition of the right of way for the improvement and acquired strips across the front of the properties adjacent to Mrs. Hood's property but these negotiations were ordered discontinued by the Commission before settlement was made with Mrs. Hood. After discussion and in view of the circumstances the Commission authorized negotiations with Mrs. Hood to acquire a 10-foot strip across her land.

A petition was presented signed by 41 residents of the City of Klamath Falls protesting the rerouting of The Dalles-California Highway along 11th Street in that city as has been proposed. The Commission decided to personally inspect the route in question the next time it is in the vicinity of Klamath Falls and to hold a public hearing in Klamath Falls regarding the proposed change. The Commission set Tuesday, August 9, 1938, at 9:00 o'clock a. m. as the date for such hearing and instructed the Secretary to so inform the Klamath Falls City Council of such hearing as required by statute.

A petition was presented signed by 110 users of the Deadwood Secondary Highway in Lane County urging the improvement of this road from its junction with the Siuslaw Highway to the mouth of Cougar Creek. The Engineer advised that this road has not been constructed to state highway standards but is being maintained in as good condition as is possible. Furthermore, it is not a very important road and does not carry a great amount of traffic. The Commission thereupon denied the request for the immediate improvement of the road but decided to inspect it the next time they are in that vicinity.

A petition was presented signed by 244 residents and inhabitants of Coos County requesting that the Enegren Ferry service across Coos River be extended so as to provide service 24 hours daily, 7 days a week. It was the Commission's thought that the extra expense to operate the ferry as requested is unjustified, hence the request was denied.

The Commission considered and ordered filed numerous petitions from the Mid Columbia Chamber of Commerce Water Grade Highway Committee urging the modernization of the Columbia River Highway between Troutdale and The Dalles so as to provide for a water level grade highway with four traffic lanes.

The Commission discussed the need of acquiring right of way at the south end of the Depoe Bay Bridge for a proposed revision of the Oregon Coast Highway at this point. Reports indicate that there is considerable activity in real estate transactions at this location and that it would be advisable for the Commission to acquire its right of way at this time in order to avoid further complications. In view thereof the Commission authorized the Attorney to negotiate for such right of way immediately.

A letter was presented from Honorable Earl Snell, Secretary of State, advising that the Safety Division of his Department is planning to inaugurate during the month of July a contest in the cities and towns of the state, same to continue during the balance of the year, in an endeavor to provide for greater safety on city streets and state highways. Also that as a suitable award it is proposed to present two metal plaques to each of the four winning cities, the plaques to be approximately 20 x 30 inches in dimension with the name of the city and approximate wording, designating the city as the winner of the award, appearing thereon. Mr. Snell requested permission to erect these plaques upon state highway rights of way at the entrance of the highway into the cities or towns winning the awards, upon terms and conditions as may be specified by the Highway Commission. It was the thought of the Commission that the granting of this request would be at variance with the Commission's established policy which prohibits the placing of signs of any kind on state highway rights of way, particularly at city entrances where signs erected by civic organizations have been ordered to be moved. It was also the thought of the Commission that the desired purpose would be served if the plaques were displayed in the city council chambers or some other public room of the city or town winning the award. Several other suggestions were offered. The Commission instructed the Engineer to discuss this matter with Mr. Snell in order to work out a satisfactory solution.

Reconsideration was given by the Commission to the matter of acquiring the property of Anton Roskoski at 8434 North Denver Avenue, Portland, which the Commission discussed on the previous evening. The Attorney advised that the owner of this property refuses to sell the right of way for \$11,000, the amount authorized by the Commission. The Commission thereupon instructed the Attorney to condemn the right of way across this property as previously authorized.

The matter of acquiring a gravel pit containing 12 acres from Richard Curran, Jr., for use in connection with the construction of the Fremont Highway at Paisley had the attention of the Commission. The Attorney advised that he offered Mr. Curran \$10 per acre for this property but the offer was refused and Mr. Curran stated that he does not want to sell that particular tract of land at any price. The Commission authorized the Attorney to offer Mr. Curran the sum of \$500 for the 12 acres and if he will not accept such sum to acquire it by condemnation. The following resolution authorizing the condemnation proceedings was adopted by the unanimous vote of the Commissioners present:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon and to acquire by donation, purchase, agreement, condemnation, or by the power of eminent domain title to land upon or under which there is gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment or pavement, and to declare the necessity and need for the acquisition thereof and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for the purposes of road construction, improvement, betterment, repair and maintenance, and for the purpose of the manufacture of road materials on the following section or sections of the state highway system of the State of Oregon, to-wit:

Chalk Cliff-Paisley Section of the Fremont Highway

land and property owned by or in the possession of the following parties and/or persons, to-wit:

File 5616 - Richard Curran, Jr.

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties contain gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment, or pavement, and that the said property or properties is or are necessary and needful and the acquisition thereof will be of advantage to the State of Oregon for the said purposes in order to make it possible for the State Highway Commission to construct, improve, maintain, and repair the said portion or portions of the said state highway system in accordance with the standards adopted by this Commission.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for said purposes and to prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties, or which said descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same shall be lands necessary for the purposes stated herein.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Dovers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or

JUN 30 1938

owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney presented a form of agreement between the Commission and the State Board of Forestry providing for the occupancy of a portion of the right of way of the Wilson River Highway by the State Forestry Department and the construction of a guard cabin unit thereon. The Commission tentatively approved the form but ordered that it be presented to the State Board of Forestry for acceptance before taking final action thereon.

The Attorney reported on the progress that is being made in connection with the acquisition of Mrs. Minnie T. Reed's property that is needed for right of way for the new highway up the Columbia River. He said that Mrs. Reed's attorney advises that Mrs. Reed will settle for the sum of \$11,000 cash but she wants the Commission to do certain other things, including the following: rearrange the water system, rearrange the electric light system, reconstruct her power pole line on state property, reconstruct her private road, maintain her private road against slides, and permit construction of a fishhouse and dock at the end of her private road for private purposes. In a discussion of this matter the Commission indicated that it would approve the rearrangement of the water system, the electric generating system, and the reconstruction of the power line and the reconstruction of her private road. The Commission also indicated that it would maintain the private road against slides, except those caused by washouts. In regard to the granting of a permit to Mrs. Reed to maintain a fishhouse and dock the Commission decided that it would be satisfactory to grant such permit to Mrs. Reed personally but not for commercial purposes. The Commission ordered that the entire matter should be covered by written agreement between the Commission and Mrs. Reed and authorized the Attorney to offer Mrs. Reed \$13,000 for her property on the basis that she will do the above things. If unable to acquire the property by agreement, then the property is to be condemned.

The Commission adjourned at 12:00 o'clock noon and reconvened immediately in the dining room of the Heathman Hotel for a conference with representatives of the World's Fair Committee of Oregon. Present at such conference were the following: E. B. Aldrich, Commissioner; F. L. Tou Velle,

Commissioner; R. H. Baldock, State Highway Engineer; J. M. Devers, Attorney; H. B. Glaisyer, Secretary; Harold B. Say, Director, Travel and Information Department; C. T. Haas, Chairman, World's Fair Committee; and C. C. Carlson, Executive Secretary of such committee.

The Engineer read aloud a report from Mr. Say embodying a series of suggestions for material to be exhibited at the World's Fair which is to be held in San Francisco in 1939. These included a recommendation that Oregon's San Francisco and New York World's Fair Committee consider the use of models and dioramas in setting forth in striking fashion sections of the Oregon Coast Highway, the Columbia River Highway, Crater Lake and other features attractive to potential tourists. The recommendation and suggestions were approved by Commissioners Aldrich and Tou Velle. They were also approved by Mr. Haas, in behalf of the World's Fair Committee, he stating that his committee would be glad to have the suggestions and would endeavor to carry them out.

Included in the suggestions made by Mr. Say was a recommendation that the World's Fair Committee produce a 20-minute or 30-minute moving picture, in sound, setting forth basically the same attractions that the State Highway Department features in its space copy and publicity for increasing, by means of its general campaign, motor tourist travel in Oregon. Such recommendation included proviso that the negative, or master film, should remain the property of the State Highway Commission so that, in the event the Commission desires at some future time to enter into the field of distributing motion pictures setting forth the attractions of the State, such material will be available. Following a general discussion of this matter it was mutually agreed that the film should be of the best professional caliber.

Mr. Haas expressed a wish for the State Highway Department to assume the entire responsibility for this matter, explaining that the World's Fair Committee wants to satisfy the State Highway Commission in every regard in connection with the expenditure of the funds that have been made available by this Commission to aid in financing the organization and presentation of Oregon's exhibit at the San Francisco World's Fair. Mr. Haas also expressed a wish that the matter of arranging for the moving pictures be assigned to the State Highway Engineer and Mr. Say with full power to act. Commissioners Aldrich and Tou Velle approved such suggestion and so ordered. The matter of the signing of the contract for the production of the moving picture film was also discussed and it was mutually agreed that such contract should be executed by the World's Fair Committee and the producers. This concluded the conference.

The Commission reconvened at 1:30 o'clock p. m. in the Auditorium of the Public Service Building with the same members present and participating. Also present were the State Highway Engineer, the Attorney and the Secretary.

Mr. Harley O. Youngblood and his attorney, Mr. John Logan, Portland, came before the Commission in regard to the construction of Mr. Youngblood's restaurant building on the rock point between the Oregon Coast Highway and the Pacific Ocean at the north end of the Depoe Bay Bridge, in Lincoln County. Mr. Logan was spokesman. He asked the Commission for permission to open up

JUN 30 1938

the state's rock wall at the north end of the bridge so as to give people access to Mr. Youngblood's property without going a couple of hundred feet out of their way to the present opening in the wall. He said it would cost about \$1,000 to construct a walk from the present opening to Mr. Youngblood's building, whereas it would cost only a small part of such sum to open the wall at the bridge end and construct the walk to the building. He urged favorable consideration of this request because Mr. Youngblood is not financially able to construct the walk from the present opening.

The Engineer offered objections to the granting of this request because all available space is needed for the parking of automobiles and it would be interfering with the general public use of the state's property. He pointed out that the Commission has it in mind to widen the bridge structure as a safety proposition and if Mr. Youngblood were allowed to open the wall at the end of the bridge it would have a tendency to encourage parking of cars at such location which would create a hazard and defeat the purpose of the bridge widening.

Mr. Logan suggested that the proposition be given a trial and agreed to discontinue the use of the entrance at such point upon orders from the Highway Commission so to do.

The Engineer reiterated that the parking of cars at the end of the bridge would create a hazard. He further stated that he would not approve of connecting the walk with the new bridge that is proposed for this location. He suggested that Mr. Youngblood proceed with the present plans for constructing the walk from the present opening and agreed to supply him with definite information in regard to the Commission's plans so that it would not be necessary for him to rebuild the sidewalk in the event that the plans provide for the destruction of the present wall.

Mr. Logan suggested a compromise by opening the wall about midway between the present opening and the bridge end. The Engineer said that he would look into the matter and report his findings to the Commission.

Mr. Logan then asked the Commission for authority for Mr. Youngblood to continue carrying his supplies over the wall at the bridge end to his building. The Commission granted his request.

Mr. G. N. Peck, County Commissioner of Morrow County, was present and discussed briefly with the Commission matters pertaining to the construction of the Rock Creek Grade Section and the Hoppner-Rhea Creek Section of the Wasco-Hoppner Secondary State Highway, both of which sections are scheduled for improvement in the 1940 federal aid secondary highway program and to each of which the Commission has allocated the sum of \$25,000. In the discussion it was pointed out that the Commission at one time considered improving the Rock Creek Grade Section as a P.W.A. project at a cost of \$63,000 but was precluded from proceeding with the work because of a change in the P.W.A. setup, but it now appears that the P.W.A. program is to be revived and there is a possibility of securing the funds in accordance with the original plan. The Engineer pointed out that it would not be necessary to use the \$25,000 of 1940

federal secondary funds for this project if the \$63,000 of P.W.A. funds materialize and accordingly suggested that the federal secondary funds be transferred from such project to finance an additional section of the Heppner-Rhea Creek project, making a \$50,000 project for that section, which would probably complete the entire unit from Heppner to Rhea Creek. Mr. Peck expressed approval of such arrangement. The Commission also indicated approval of the same but deferred a decision until it is known definitely whether or not the P.W.A. funds can be secured.

At 2:30 o'clock p. m. Acting Chairman Aldrich announced the following awards of contracts for which bids were received at the morning session, the awards having been previously approved by the affirmative action of all Commissioners present:

"Ely Mountain-Beatty Section of the Klamath Falls-Lakeview Highway, in Klamath County. 0.42 mile grading, 10.17 miles surfacing and oiling, and furnish 3,000 cu. yds. crushed rock in stock piles. The Commission received 7 bids for this job, the low one being that of McNutt Bros., Eugene, at \$105,440.00. The next low bid was submitted by Fisher Bros., Oregon City, at \$109,869.00. The Commission has referred all bids received to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Court Street Section of the Pacific Highway East in Salem, Marion County. 0.19 mile paving. The low bid submitted for this project was that of Oregon Contracting Co., Portland, at \$20,684.00. The next low bid was submitted by Edlefsen-Weygandt Co., Portland, at \$22,041.00. There were 3 higher bidders. The Commission has referred all bids received to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied."

The Engineer reported a conference with Mr. Freed, Attorney for the Shell Oil Company, in regard to a drainage condition along the Lower Columbia River Highway between Portland and Linnton. It appears that drainage facilities along this section are inadequate and that the Shell Company is very desirous for improvement of these conditions and has agreed to cooperate with the Commission in this work. The Engineer advised that the drainage conditions at this location are not good and should be remedied. He suggested that the Commission accept the offer of cooperation by the Shell Company to that end, in fact that the Commission also cooperate to the same extent and on the same basis with other companies who are similarly affected by the drainage conditions. He estimated that the project would cost about \$6,000 and requested authority to place the project in the federal aid program or construct it as a W.P.A. project whichever would be the best from the Highway Commission's standpoint. The Commission approved the suggestion and authorized him to proceed on that basis.

The matter of reconstructing the water pipe lines in the city of Albany required by reason of the Albany grade separation project had the attention of the Commission. The Engineer advised that the reconstruction of the

water system and the reconstruction of the Santiam Canal, both of which are affected by the grade separation project, are obligations of the state and it was originally contemplated to include this work in the contract for the construction of the grade separation structure, but it now appears that the work should be done before the contracting of the structure so as to avoid delays and inconvenience caused by bad weather, it being planned to contract the grade separation project in November. He suggested that it would be advisable, in view of the circumstances, to arrange for the pipe line and canal work under separate contract and that the Commission advertise for bids for the same at the meeting on August 4 provided that the United States Bureau of Public Roads will approve such arrangement and will authorize an expenditure of government funds to assist in financing the work, the same as if it were included in the major contract as originally contemplated. The Commission approved the Engineer's suggestion and instructed him to take the matter up with the Bureau of Public Roads officials.

The Commission discussed a letter from Mrs. Pearl S. Koble directed to Governor Charles H. Martin relative to her claim against the State Highway Commission for damages she alleges occurred to her property by reason of the construction of the Pacific Highway (new route) across her premises south of Ashland. The Commission considered that it has dealt very reasonably with Mrs. Koble in the settlement of her claim and accordingly refused to open the case. The Engineer was instructed to explain the matter in detail to Governor Martin.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm such surveys and the amounts authorized for each. After due consideration motion was made by Commissioner Tou Velle that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized for survey expenditures are as follows:

Plans - - -	106-2817	- Deadmans Curve, Cape Arago Secondary Highway. Coos County.	1st authorization - \$ 250.00
Plans - - -	6-2816	- Fat Elk Creek-Lampa Creek Section, Oregon Coast Highway. Coos County.	1st authorization - \$3,231.00
Plans - - -	6-2815	- Coquille-Fat Elk Creek Section, Oregon Coast Highway. Coos County.	2nd authorization - \$ 690.00
			Total to date - \$1,770.00
Right of Way -	9-2818	- Third Street Undercrossing, The Dalles-California Highway. Deschutes Co.	1st authorization - \$ 250.00
Plans - - -	109-2819	- Bend-Forest Boundary Section, Century Drive. Deschutes County.	1st authorization - \$ 600.00
Survey- - -	14-2806	- Warren Creek Section, Columbia River Highway. Hood River County.	4th authorization - \$ 400.00
			Total to date - \$1,500.00
Plans - - -	18-2829	- Lapine-Crescent Section, The Dalles-California Highway. Klamath Co.	1st authorization - \$3,500.00

Right of Way - 18-2828 - Crescent Section, The Dalles-California Highway.
Klamath County. 1st authorization - \$ 400.00

Right of Way - 19-1909 - Valley Falls-White Rock Section, Fremont Highway.
Lake County. 1st authorization - \$ 400.00

Right of Way - 19-1919 - Cottonwood Creek-Lakeview Section, Klamath Falls-
Lakeview Highway. 1st authorization - \$ 50.00

Right of Way - 19-1908 - Harris Creek-Paisley Section, Fremont Highway. Lake
County. 1st authorization - \$ 50.00

Prospect - - 29-2802 - Fisher Point-Mansanita Section, Oregon Coast Highway.
Tillamook County. 6th authorization - \$1,000.00
Total to date - \$3,090.00

Right of Way - 35-2808 - Mitchell-Layville Section, Ochoco Highway. Wheeler
County. 1st authorization - \$ 200.00

Right of Way - 136-1963 - Spaulding Ranch Section, Dayton-Salem Secondary
Highway. Yamhill Co. 1st authorization - \$ 50.00

The motion was seconded and was declared by Acting Chairman Aldrich to have passed by the affirmative vote of the Commissioners present.

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

Joplin & Eldon, contract No. 1963, for surfacing and oiling the Shaniko Section of the Sherman Highway, in Wasco County, requested an extension of time of 9 months, from September 15, 1937, to June 15, 1938, within which to complete this work. They gave the following reasons for their failure to complete the project within the specified time limit: labor trouble, strikes, and sabotage practices during the later part of 1937 which slowed up the work to such an extent that the oiling work could not be completed in 1937. The Engineer advised that the contractors lost only 3½ days' time due to the labor strike and so far as he has been able to learn no damage was done to the contractors' property during the time of the strike which refutes the contractors' statement that they experienced delay on account of sabotage practice. It was his thought that the contractors could have completed this work within the specified time limit if the work had been carried on properly. Accordingly, he recommended that the extension requested be granted but that the contractors be charged for all of the extra engineering expense incurred by the state subsequent to the specified date of completion of the contract except for 3½ days immediately following such date which is to allow for the loss of time due to labor strike. A letter was presented from W. H. Lynch, District Engineer, Bureau of Public Roads, concurring in such recommendation. The Commission approved the recommendation by affirmative action of both Commissioners present.

JUN 30 1938

Berke Bros., Inc., contract No. 2005, for clearing the Arch Cape-Beach Creek Section of the Oregon Coast Highway, in Clatsop and Tillamook Counties, requested an extension of time of 60 days, from May 31 to July 31, 1938, within which to complete this contract. They alleged that their failure to complete the project within the specified time limit was due to unsatisfactory labor requirements and the fact that weather conditions were unfavorable to carry on burning operations. The Engineer advised that the Commission took bids for this project on August 12, 1937, but the contract was not awarded until September 10, 1937, which would automatically give the contractor an extension of time of 20 days. He further advised that there is apparently no reason why the contractors could not have completed the work within the estimated time limit and for that reason he recommended that the extension now requested be granted but that the contractors be charged for the extra engineering expense that the state has incurred after allowing for the 20 days' delay in the award of the contract. A letter was presented from the Bureau of Public Roads concurring in such recommendation. The Commission approved the recommendation.

R. O. Dail & Warren Brothers, Inc., contract No. 2021, for furnishing crushed rock in stock piles for the Heppner Junction Rock Production project on the Columbia River and Oregon-Washington Highways, in Gilliam and Morrow Counties, requested an extension of time of 10 days, from May 31 to June 10, 1938, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to trouble experienced with their equipment and because their equipment was tied up on another state highway contract at Alsea, making it impossible for them to start this job as soon as they expected. The Engineer advised that the reason for noncompletion of this project on time was failure of the contractors to start the job within a reasonable length of time after the contract was awarded to them, their equipment being tied up on another state highway contract. He further advised that the contractors produced within the specified time limit sufficient materials for this year's use and their failure to complete the job on time in no way inconvenienced the state highway department or the general public and did not increase the cost of supervision. He recommended in view of the circumstances that the extension requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 1973, 1987, 2002, 2006, 2009, 2015, 2021, 2034, 2040, 2045, 2046, 2052, 2058, 2060, and 2071 for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commissioners present:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway

projects have been completed according to the terms and provisions of the contracts or modifications thereof and said jobs are now ready for acceptance:

Contract No. 1973, with Babler Bros., for oil mat surface treatment on the Valley Falls-Cinder Butte Section of the Lakeview-Burns and Fremont Highways, in Harney and Lake Counties. Completed June 4, 1938.

Contract No. 1987, with McNutt Bros., for regrading and oiling the Horse Ridge-Brothers Section of the Central Oregon Highway, in Deschutes County. Completed June 15, 1938.

Contract No. 2002, with Averill & Corbin, for remodeling and widening Union Avenue Bridge over Sullivan's Gulch on the Pacific Highway East in Portland, Multnomah County. Completed June 26, 1938.

Contract No. 2006, with F. C. Himber Company, for construction of a bridge over South Fork Quartz Creek about 5.5 miles east of Elsie on the Wolf Creek Highway, in Clatsop County. Completed June 24, 1938.

Contract No. 2009, with Fisher Bros., for surfacing and oiling the Bloucher Section of the Hood River Secondary Highway, in Hood River County. Completed June 22, 1938.

Contract No. 2015, with R. O. Dail & Warren Bros., Inc., for producing crushed rock for the Lincoln County Line-Alsea Mountain Section of the Alsea Highway, in Benton County. Completed May 31, 1938.

Contract No. 2021, with R. O. Dail & Warren Bros., Inc., for producing crushed rock for the Heppner Junction Rock Production Project on the Oregon-Washington and the Columbia River Highways, in Gilliam and Morrow Counties. Completed June 4, 1938.

Contract No. 2034, with Schmeer, Williams & Gentemann, for producing crushed rock for the Shuttler Flat-Condon Section of the John Day Highway, in Gilliam County. Completed May 19, 1938.

Contract No. 2040, with Warren Northwest Inc., for grading, surfacing and oiling the Grand Ronde River-Noyes Ranch Section of the Cove Secondary Highway, in Union County. Completed June 11, 1938.

Contract No. 2045, with A. Milne, for oiling the Lake County Line-Gap Ranch Section of the Central Oregon Highway, in Harney County. Completed June 8, 1938.

JUN 30 1938

Contract No. 2046, with Clifford A. Dunn, for oiling the Eagle Point-Baker Gulch Section of the Little Butte Secondary Highway, in Jackson County. Completed June 26, 1938.

Contract No. 2052, with J. C. Compton, for oiling the West Forest Boundary-Horse Ranch Section of the Fremont Highway, in Klamath and Lake Counties. Completed May 21, 1938.

Contract No. 2058, with D. L. Ashton, for producing crushed rock for the Mystic Creek-Brockway Section of the Coos Bay-Roseburg Highway, in Douglas County. Completed June 25, 1938.

Contract No. 2060, with Mountain States Construction Company, for construction of the Little Nestucca River Bridge on the Oregon Coast Highway, in Tillamook County. Completed June 24, 1938.

Contract No. 2071, with O. C. Yocom, for producing crushed rock for the Otis-Boyer Section of the Salmon River Highway, in Lincoln and Tillamook Counties. Completed June 15, 1938.

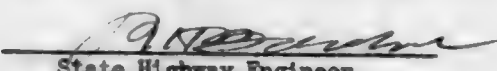

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered, approved and signed the following agreements:

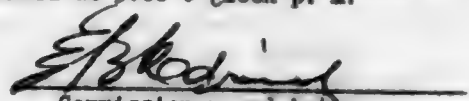

Agreement with the City of Portland covering the reconstruction of Northeast 33rd Avenue viaduct.

Agreement with A. R. Sawtell and J. C. Goldrain, Certified Public Accountants, providing for the services of this company in the installation of a new accounting system in the state highway department offices.

There being no further business to come before the Commission at this time, the meeting was declared adjourned at 3:00 o'clock p. m.

Portland, Oregon, July 20, 1938

The Oregon State Highway Commission met in regular session at 8:00 o'clock p. m. in the Rose Room of the Benson Hotel. Present were:

E. B. Aldrich, Commissioner and Acting Chairman
 F. L. Tou Velle, Commissioner
 R. H. Baldock, State Highway Engineer
 J. M. Devers, Attorney
 H. B. Glaisyer, Secretary

The Commission's Chairman, Mr. Henry F. Cabell, was absent.

The attorney brought up for discussion matters pertaining to the acquisition of right of way for the East Portland-Oregon City Highway across the property of the Security and Investment Company. He said that this matter is going to trial and that the City of Oregon City has asked him to assist in the case, which is being brought by the Security and Investment Company. After discussion, the Commission authorized the Attorney to assist the city in this matter.

In this connection the Attorney advised that it will be necessary to condemn the right of way that is needed across the property of the Oregon City Laundry Company, on Fifth Street. He requested authority to commence the condemnation proceedings. The Commission approved the request and, by the affirmative vote of the members present, adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to-wit:

Oregon City Section of the East Portland-Oregon City Highway

land and property owned by or in possession of the following parties and/or persons, to-wit:

Property commonly known as property of Oregon City Laundry Company

JUL 20 1938

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Engineer requested instructions in regard to the removal of a certain sign which encroaches upon the Columbia River Highway right of way in

JUL 20 1938

the Parkross District just east of Portland, which sign is owned by W. B. Herron. He was instructed by the Commission to notify the owner to remove this sign within 10 days and, if the sign is not removed within that time, to have it removed by State Highway Department forces and stored, pending claiming of the same by the owner.

The Engineer also requested instructions with respect to the disposal of the Harris Lumber Company matter at Drain. In this case, the Harris Lumber Company is using the Pacific Highway right of way in connection with the loading of lumber on cars at a point about one mile north of Drain and the company refuses to discontinue such use of the highway, notwithstanding that it has been requested to do so numerous times, it being contrary to the established policy of the Commission to permit the use of the highway for such purposes. The Commission instructed the Engineer to again notify the Harris Lumber Company to remove its facilities from the highway and, if it does not do so within a reasonable length of time, to take legal action as may be necessary to force the company to vacate the highway right of way.

The Engineer also brought up for discussion the matter of construction of a power transmission pole line on the Nehalem Secondary Highway by the Nehalem Valley Cooperative Electric Association. He advised that a permit was issued to this company to construct a pole line in a certain location on this highway but the company has not built the line in accordance with the provisions of the permit and, as a result, the line as constructed creates a hazard to the traveling public. Furthermore, the company has left a lot of debris lying on the highway which is not only unsightly but is a fire hazard. The Commission instructed the Attorney to write the company to the effect that it must rebuild its power line in conformance with the provisions of the permit and clean up the premises, otherwise the Commission will cancel the permit and will ask the Public Utilities Commissioner to order the de-energization of its line.

The Engineer requested instructions in regard to power transmission pole line construction along the Klamath Falls-Lakeview Highway in the vicinity of Lakeview, Lake County. He advised that the Surprise Valley Power Company of California has filed an application for permission to construct its pole line along and across this highway and has proceeded with the erection of poles and wires notwithstanding that the permit has not yet been granted and, in one particular instance, has suspended its wires across the highway in an undesirable location creating a traffic hazard.

He further advised that the West Coast Power Company has also filed a request for a permit to construct its pole line across this highway a short distance from the crossing of the Surprise Valley Power Company's line, but at a more desirable point. He said that he hesitated to approve this crossing in view of the Commission's policy to keep the number of the crossings at a minimum and to require joint pole line construction of like facilities on highway rights of way.

He recommended, in view of the fact that the application of the Surprise Valley Power Company was filed before that of the West Coast Power

JUL 20 1938

Company, that the Surprise Valley Power Company be granted a permit subject to the condition that it will rebuild its pole line so as to cross the highway in a more desirable location and will install poles of sufficient height to accommodate also the wires of the West Coast Power Company. He also recommended that the Surprise Valley Power Company be given a reasonable length of time within which to accept and carry out the Commission's order in this regard and, if the company does not comply with such order, that the permit be granted to the West Coast Power Company and that legal action as may be necessary be taken against the Surprise Valley Power Company to effect the removal of its poles from the highway right of way. After considerable discussion, the Commission approved the Engineer's recommendation and ordered that the Surprise Valley Power Company be informed accordingly.

The Secretary reported receipt of a request from the City of Ontario, through Honorable Earl Snell, Secretary of State, for permission to close two blocks of the state highway in the town of Ontario, for two or three days during the period that the Malheur County Fair is in progress, so that the highway may be used for Fair purposes. The Commission denied the request as a matter of policy.

The Attorney requested instructions in regard to the acquisition of right of way across the properties of the McGuire Construction Company and Emily A. Ricard which is needed for the Interstate Avenue improvement in Portland. He recalled that the Commission previously authorized condemnation of this right of way but he questioned the advisability of proceeding with the suit in view of the fact that there is a difference of only \$200 between the amount offered by the State and the amount demanded by the owners. He suggested a compromise settlement with the owners in order to avoid condemnation. The Commission approved the suggestion and so ordered.

Reconsideration was given by the Commission to the matter of acquiring from the First National Bank of Albany, et al, 27.369 acres of land that are needed in connection with the construction of the Albany section of the Pacific Highway. The Commission previously approved the payment of \$100 per acre for this property but questioned the necessity to acquire such a large area. The Engineer advised that a portion of this property is needed for right of way and it is also proposed to take gravel from the tract for use in connection with the construction of the Albany overhead structure, including material needed for the highway fill. He estimated that the state would need about 298,500 cu. yds. of material which would justify the acquisition of the entire tract at this time. In view of the circumstances, the Commission authorized the purchase of the entire tract at the price quoted.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with prices that he recommended be paid for each. After careful consideration, the Commission approved the Engineer's request and by affirmative action of the members present adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

A letter was presented from Mrs. Gladys F. Gunther, Lakeview, Oregon, stating that she had heard rumors to the effect that the Commission proposes to deed back to Mrs. S. B. Chandler, Lakeview, the property included in what is known as Chandler State Park adjacent to the Fremont Highway, in Lake County, which park was presented to the state as a gift on July 25, 1928, by her husband, the late Mr. S. B. Chandler. Mrs. Gunther states that she is a daughter of Mrs. Chandler and desires to know whether or not the rumors are well-founded. The Commission referred this matter to the State Parks Superintendent for reply.

The Engineer brought up for discussion matters pertaining to the proposed Sandy Boulevard improvement, in Portland, bids for which project are to be received on the following day. He advised that the plans include the improvement of 30 blocks, from 15th Avenue to 45th Avenue, by widening so that the street will be 60 feet wide between curbs, thus allowing for four lanes of moving traffic and one lane on each side for the parking of cars and a neutral strip along the center line. He further stated that, for a distance of about 3 blocks through the Hollywood business district, this will necessitate cutting the sidewalks back from a 15-foot width to a 10-foot width, to which action the local businessmen object. He requested instructions from the Commission in regard thereto and recommended retention of the present plans and the award of the contract on that basis.

W. H. Lynch, District Engineer of the Bureau of Public Roads, was present and stated that the local businessmen called upon him in regard to the cutting back of the sidewalk and apparently they are holding the Bureau of Public Roads responsible inasmuch as federal funds are to be used to finance the work. He suggested that these people be given an opportunity to discuss the matter with the Commission before the contract is awarded. After considerable

discussion the Commission decided to proceed with the taking of bids for the project, as advertised, and to award the contract on the same day, if a satisfactory bid is received. However, the Commission expressed a willingness to hear a delegation of the local businessmen regarding this subject should it appear on the following day.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Application of West Coast Power Company to construct power pole line through the state park recently acquired from the Pratt interests along the Oregon Coast Highway, in Lincoln and Lane Counties:- The Parks Superintendent stated that the West Coast Power Company wants to build its line through this newly-acquired state park and has already slashed a right of way 20 feet wide for some distance into the park but he is opposed to the desecration of the park in this manner. He suggested that the company be permitted to construct its pole line on the east side of the highway right of way overbuilding the telephone line that exists in such location. He pointed out that such construction would leave the west side of the highway free of poles, which is in line with the Commission's established policy with respect to the preservation of scenic views along this highway.

The Engineer suggested that it would be proper to bill the West Coast Power Company for the damage that it has already done to this park. He recommended the granting of the permit as suggested by the Parks Superintendent provided the company will arrange for the joint use of one line of poles with the telephone company and, provided further, that the company will pay the state for the damage that it has already done to the park. After discussion the Commission approved this solution of the problem by the unanimous vote of the members present.

Gearhart Beach property:- The Parks Superintendent advised that the Gearhart Park Company owns about a mile and a half of ocean beach frontage extending north from the Necanicum River and that at one time it valued the property at \$30,000 but is now willing to sell the property to the state for the sum of \$2,339.13 and will also deed to the state a strip of land 20 feet wide along the west side of the highway through all of the property owned by the company. It appears that the Gearhart Park Company acquired this property from the State Land Board in 1891 for \$562.62, and that the State Land Board is willing to repay such sum to the company as part payment of the purchase price, provided title to the property is conveyed to the State Land Board. This would leave the sum of \$1,776.51 to be paid by the State Highway Commission. The Engineer suggested that it would be preferable for the State Highway Commission to own this area and recommended the payment of the entire amount in order to keep the title clear. The Commission, after discussion, approved the acquisition of this property on the basis of the State Land Board paying \$562.62 provided title to the property is vested in the State Highway Commission, otherwise the Highway Commission is to pay the full amount of the purchase price in order to secure title.

JUL 20 1938

acquisition of property owned by Multnomah County at Crown Point on the Upper Columbia River Highway, in Multnomah County:- The Parks Superintendent advised that Multnomah County is ready and willing to deed this property to the state at any time that the Commission will receive it. The Engineer advised that inspection of the building on the property reveals that it will take about \$6,000 to repair it and fix up the grounds. Further, that it will cost about \$3,000 annually to maintain the building and premises. He recommended nevertheless that the County's offer be accepted in view of the fact that Crown Point is one of the scenic attractions of the state and is known throughout the world. The recommendation was approved by the unanimous vote of the Commissioners present.

The Commission reconsidered the matter of acquiring Multnomah County property located adjacent to the Columbia River Highway at Multnomah Falls and decided to complete the acquisition of this property on the basis heretofore agreed upon; viz., the state to take title to that portion of the area lying between the O.W.R.R. & N. Company's right of way and the Columbia River, the balance of the property to be deeded to the United States Forest Service. The Parks Superintendent was instructed to carry this matter to conclusion at the earliest possible time.

The Engineer brought up for discussion the matter of the Commission's claim against the Oregon State Motor Association for maps furnished. He said that he presented a bill in the amount of \$700 for the maps but the association has asked to be relieved from payment of part of this cost in view of the purpose for which the maps were used and has suggested that the state pay for the stock on which the maps were printed, leaving the balance of the expense, including printing and other items, to be paid by the association, which would divide the total expense about equally. He recommended approval of the Association's suggestion for payment of the maps already furnished and also for maps that may be furnished in the future. The Commission approved the recommendation.

The Engineer brought up for discussion matters pertaining to the proposed San Francisco World's Fair exhibit and particularly the matter of the contract for the furnishing of colored moving pictures of attractive Oregon scenes. He explained in brief that the World's Fair Commission of Oregon has contracted with the Castle Films, Inc., of New York for the production of a 22-minute Oregon scenic reel as previously recommended by the Highway Commission and that a provision in the contract calls for the employment of Charles S. Piper of Portland, motion picture photographer, as photographer and associate Producer. Under the terms of the contract, he said, the film with one 35 mm. print and one 16 mm. print will be produced for a total cost of \$8,000, \$1,000 of which is to be paid upon approval of the script, and \$500 monthly thereafter as the making of the film progresses until the sum of \$2,500 has been paid. The balance, he said, is to be paid upon delivery of the film by December 1, 1938. He added that the negative of the picture is to be the property of the Oregon State Highway Commission. The Commission approved the report and referred the matter of approving the script, dialogue, voice, music, and other factors to the Engineer with authority to act.

The Commission had under consideration the matter of approving projects to be constructed under the proposed P.W.A. program. After discussion, the Commission decided to include the following projects in such program:

Docket No.	County	Section	Kind of Work	Estimated Cost
<u>PROJECTS INCLUDED IN ORIGINAL PROGRAM</u>				
1194	Gilliam	Rock Creek-Morrow Co. Line	Grading	\$ 63,000
1198	Umatilla	Umatilla River	Bridge, G. & O.	40,500

-	Douglas	Umpqua River	Bridges (2)	120,000
-	Jefferson	Madras-Warm Springs	Surfacing	95,000
-	Baker	Baker-Homestead	Surf. & Oil	50,000
-	Linn	Albany	*Bldg. & Lands'g	14,000
				<u>\$319,000</u>

* previously approved on June 29, 1938

The following resolution authorizing the Engineer to file applications for grants to aid in the financing of the construction of such projects, and for the purchase of right of way needed in connection therewith, was adopted by the Commission by the affirmative action of the members present: (resolution authorized the filing of applications for four projects, - authority to file applications for the other projects was given the Engineer previously under the old P.W.A. program)

A RESOLUTION AUTHORIZING R. H. BALDOCK, AS STATE HIGHWAY ENGINEER, TO FILE APPLICATIONS WITH THE UNITED STATES OF AMERICA THROUGH THE FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS FOR GRANTS TO AID IN FINANCING THE CONSTRUCTION OF CERTAIN STATE HIGHWAY PROJECTS AND THE PURCHASE OF RIGHT OF WAY NECESSARY TO SUCH CONSTRUCTION.

Be it resolved by the Oregon State Highway Commission:

1. That, R. H. Baldock, as State Highway Engineer, be and he is hereby authorized to execute and file applications on behalf of the Oregon State Highway Commission with the United States of America for grants to aid in financing the construction of the following State Highway projects:

JUL 20 1938

County	Section	Type of Work
Coos	Cape Arago	Surfacing and Oiling
Douglas	Umpqua River	Bridges (Two)
Jefferson	Madras-Warna Springs	Surfacing
Baker	Baker-Homestead	Surfacing and Oiling

2. That the said R. H. Baldock is hereby authorized and directed to request the United States of America through the Federal Emergency Administration of Public Works to place the following projects in line for approval, the applications for said projects having been already filed with the Federal Emergency Administration of Public Works:

Docket No.	County	Section	Type of Work
1194	Gilliam	Rock Cr.-Morrow Co. Line	Grading
1198	Umatilla	Umatilla River	Bridge, Grading and Surfacing
1192	Lake	Klamath Falls-Lakeview	Grading, Surfacing and Oiling
1200	Washington	Barbur Blvd.-Lake Forest	Grading

3. That the said R. H. Baldock is hereby authorized and directed to furnish such information as the United States of America through the Federal Emergency Administration of Public Works may reasonably request in connection with the applications which are herein authorized to be filed.

The Commission had under consideration the matter of accepting the offer of the United States of America, through the Federal Emergency Administration of Public Works, of a grant to aid in financing the construction of maintenance buildings, three units at Brothers, in Deschutes County, and three units at Suntex, in Harney County, and the acquisition of necessary lands and rights of way therefor. Commissioner Tou Velle moved the adoption of the following resolution, entitled "A Resolution Accepting the Offer of the United States to the State Highway Commission of the State of Oregon to Aid by Way of Grant in Financing the Construction of State Highway Buildings (Three Units at Brothers in Deschutes County and Three Units at Suntex in Harney County) and the Acquisition of Necessary Lands and Rights of Way Therefor". After discussion the motion was declared by Commissioner Aldrich to have passed by the unanimous vote of the Commissioners present:

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF STATE HIGHWAY BUILDINGS (THREE UNITS AT BROTHERS IN DESCHUTES COUNTY AND THREE UNITS AT SUNTEX IN HARNEY COUNTY) AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

JUL 20 1938

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the state highway buildings (three units at Brothers in Deschutes County and three units at Suntex in Harney County) and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 81855-21

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.
Dated: Jul 19 1938
Docket No. Ore. 1245-F

"State Highway Commission of the
State of Oregon,

Salem, Oregon.

1. Subject to the Terms and Conditions (PWA Form No.230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of state highway buildings (three units at Brothers, Deschutes County, and three units at Suntex, Harney County) and the acquisition of necessary land (herein called the "Project") by making a grant to State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administration of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$14,310.

2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later than 12 weeks from the date of this Offer and to complete such Project with all practicable dispatch, and in any event within 5 months from the commencement of construction.

3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of

JUL 20 1938

America shall be under no further obligation hereunder.

"UNITED STATES OF AMERICA

Federal Emergency Adminis-
trator of Public Works

By
(Sgd.) H. A. Gray
Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all rules and regulations relating to such grant, a copy of which rules and regulations were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than twelve weeks from the date of this offer; and to complete the work with all practicable dispatch, and in any event within five months from the commencement of the construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

As Chairman

(SEAL)

E. B. Aldrich (Sgd.)
As Commissioner

F. L. Tou Velle (Sgd.)
As Commissioner

The Commission also had under consideration the matter of establishing wage rates to be paid by contractors for work on the following P.W.A. projects:

Catching Slough Bridge Section, PWA Docket Number Oregon 1172-F;
Klamath Falls Building, PWA Docket Number Oregon 1177-F;
Fleming Ranch-Schindler Bridge Section, PWA Docket Number Oregon 1184-F;
Sunnyside-Umapine Section, PWA Docket Number Oregon 1190-F.

JUL 20 1938

The following resolutions establishing minimum wage rates to be paid on such projects were adopted by the unanimous vote of the Commissioners present:

Catching Slough Bridge Section PWA Docket Number Oregon 1172-F

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Coos County, which is the locality in which the proposed project (hereinafter referred to as "Project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said Project, and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by comparison with the minimum rates of pay set up by the Bureau of Public Roads for use on federal projects, including federal aid road work and all projects under the National Recovery Act. These wage rates have been in effect for several years and have been adopted by the Oregon State Highway Commission under date of February 19, 1937, as the standard for state work.

NOW, THEREFORE, BE IT RESOLVED by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed:

Skilled Labor

Asphalt plant engineer	\$1.20
Bricklayer	1.20
Carpenter, journeyman	1.20
Crane operator	1.20
Crusher operator (400 tons per day or over)	1.20
Dredge runner	1.20
Drill dresser	1.20
Electrician	1.20
Excavator operator (types comparable to Le Tourneau)	1.20
Hoisting engineer (2 or more active drums)	1.20
Lathers	1.20
Le Tourneau operator	1.20
Master finisher (concrete work)	1.20
Mechanic	1.20
Painter, journeyman	1.20
Mixer operator (5-bag rated capacity or over)	1.20
Pile driver workmen	1.20
Plasterer	1.20
Plumber	1.20

Skilled Labor (cont'd)

Power shovel operator	\$1.20
Reinforcing steel setter (steel tyers)	1.20
Rigger	1.20
Riveter	1.20
Rivet heater	1.20
Rivet buckler	1.20
Rivet passer	1.20
Sheet metal workers	1.20
Shinglers	1.20
Structural steel workers (erectors)	1.20
Waterproofers (bridge work)	1.20

Intermediate Grade Labor

Air compressor operator	.75
Blacksmith	.75
Compressor operator	.75
Crusher operator (under 400 tons a day)	.75
Distributor driver or operator	.75
Finisher's assistant (under direction of master finisher)	.75

JUL 20 1938

Intermediate Grade Labor (cont'd)

Fireman (steam shovel or hoist) \$.75
Grader operator	.75
Hod carrier	.75
Jack hammer operator	.75
Mixer operator (machine less than 5-bag rated capacity)	.75
Mortar mixer (hand)	.75
Pile driver workmen (groundmen)	.75
Powder man	.75
Pump man	.75
Roller operator	.75
Tractor operator (20 or more H.P. mfr's rated capacity)	.75
Truck driver (over 1½-ton mfr's rated capacity)	.75

Unskilled Labor

Blacksmith's helper	.50
Carpenter's helper (hammer and saw man)	.50
Cement handler	.50
Shoveler (concrete)	.50

Unskilled Labor (cont'd)

Driver, truck (1½-ton mfr's rated capacity or less) \$.50
Electrician's helper (supplying electricians)	.50
Hod carrier	.50
Labor, miscellaneous unskilled	.50
Mechanic's helper	.50
Painter's helper (cleaning surface and supplying painters)	.50
Pitman	.50
Plumber's helper (supplying plumbers)	.50
Powder monkey (helper)	.50
Reinforcing steel laborer	.50
Sloper	.50
Spader (concrete work)	.50
Structural steel laborer (handling steel)	.50
Subgrade laborer (hand tools)	.50
Tractor operator (under 20 H.P. mfr's rated capacity)	.50
Truck Driver (1½-ton mfr's rated capacity or less)	.50
Watchman	.50

BE IT FURTHER RESOLVED that the foregoing list of trades or occupations includes, to the best of our knowledge, all the classifications of employees who will be engaged in work on said Project other than executive, supervisory, administrative, clerical or other non-manual workers as such.

Klamath Falls Building, PWA Docket No. Oregon 1177-F

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Klamath County, which is the locality in which the proposed project (hereinafter referred to as "Project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said Project, and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by comparison with the minimum rates of pay set up by the Bureau of Public Roads for use on federal projects, including federal aid road work and all projects under the National Recovery Act. These wage rates have been in effect for several years and have been adopted by the Oregon State Highway Commission under date of February 19, 1937, as the standard for state work.

NOW, THEREFORE, BE IT RESOLVED by the Oregon State Highway Commission of the State of Oregon that the following rates for the

respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed:

Skilled Labor

BE IT FURTHER RESOLVED that the foregoing list of trades or occupations includes, to the best of our knowledge, all the classifications of employees who will be engaged in work on said Project other than executive, supervisory, administrative, clerical or other non-manual workers as such.

A letter was presented from Mr. F. P. Farrell, City Attorney, Medford, relative to the proposed improvement of the Crater Lake Highway at its intersection with East Main Street in Medford, advising that Dr. I. D. Phipps, who owns the property at the northeast corner of this intersection and against whom an action is now pending for condemnation for a small part of his property which is needed in order to round off a corner of this intersection, objects strenuously to the proposed improvement because it will destroy several large shade trees and will detract considerably from his premises on which his home is located.

It appeared to the Commission that the local citizens are not all of the same mind relative to this improvement, so it was decided to defer further consideration of the project until all are agreeable to it. The Secretary was instructed to so inform the city officials.

The Engineer reported on the proposed widening of the concrete viaduct on the Pacific Highway West, in Newberg. He said that the cost to widen this structure for two lanes of traffic using the present grade line and constructing a 5-foot sidewalk on each side would be about \$28,000, and the cost to widen it for two lanes of traffic including 5-foot sidewalks on each side and constructing it on the proper grade would be about \$64,000; whereas, to rebuild the entire structure properly for four lanes of traffic would cost about \$109,000. He suggested the widening of the present roadway by eliminating the existing sidewalk on the south side of the structure and the construction of a 3½-foot wide timber sidewalk outside of the existing handrail on that side. He estimated that such improvement would cost about \$6,000, and added

JUL 20 1938

that, as a temporary expedient, such improvement meets with the approval of the local citizens. After discussion, the Commission approved the remodeling of this structure as suggested.

The Commission considered and approved the awards of the following contracts as made by the Engineer upon authority granted him by the Commission previously:

Paving Court Street Section of the Pacific Highway East in Salem. 0.19 mile paving. Bids taken June 30, 1938; contract awarded July 11, 1938, to Oregon Contracting Company, the low bidders.

Grading, surfacing, and oiling Bly Mountain-Beatty Section of Klamath Falls-Lakeview Highway, in Klamath County. Bids taken June 30, contract awarded July 14, 1938, to McNutt Brothers, the low bidders.

The Commission also confirmed the sales of obsolete equipment and scrap material stored at Salem, La Grande, Klamath Falls, and Coquille, as made by the Engineer to the bidder who submitted the high bid for the respective items on June 30, 1938, which bidders were notified of the acceptance of their bids on July 11, 1938.

The Engineer requested authority to purchase one portable, highspeed electric motor with sanding and wire brush attachments for cleaning structural steel, at an estimated cost of \$100.00. The Commission approved the purchase.

The Engineer brought up for discussion the matter of remodeling the Highway Department offices in the State Office Building, Salem. He said that arrangements have been made with the Secretary of State for additional office space to house highway department employees for whom quarters are now being rented in outside buildings; but, in order to accommodate these men, the present offices of the Highway Department will have to be rearranged. He estimated that to change the partitions, do the necessary painting, and improve the lighting system would cost approximately \$5,000, and he recommended approval of such expenditure. After discussion, and in view of the apparent necessity for the change, the Commission approved the request by the unanimous vote of the Commissioners present and authorized the Engineer to take bids for the remodeling work at the meeting of the Commission to be held on August 4.

The matter of furnishing the Ohio Casualty Insurance Company a copy of the Attorney General's opinion as to whether or not certain state highway department employees are regarded as public officials, and a certificate signed by the Commission stating that none of such employees are vested with discretionary powers or authority, had the attention of the Commission. The Secretary was instructed to send a copy of the opinion to the company but not to send the certificate unless the company demands the same. The Commission signed the certificate subject to such condition.

A letter was presented from the North Tillamook County Chamber of Commerce inviting the members of the State Highway Commission and its staff to be present at the ceremonies in connection with the dedication of the

JUL 20 1938

Samuel G. Reed bridge over Neahkahnie Creek on the Oregon Coast Highway, in northern Tillamook County, which are to be held on Sunday, August 28, 1936. The Secretary was instructed to thank the Chamber of Commerce for the invitation and to state that the Commissioners will be present if possible.

A petition was presented signed by numerous people residing in the vicinity of the Smith's Point District in Astoria, requesting that when the new highway is constructed at this place a reduced speed limit be ordered for traffic using the same, for the safety of pedestrians, particularly in view of the fact that no sidewalk exists for the use of pedestrians at such point. The Commission indicated that it would approve the request in the event there are no legal barriers. The Engineer was instructed to make such investigations as are necessary with respect thereto.

A petition was presented signed by taxpayers and residents of the Lone Pine District, near Junction City, in Lane County, proposing the name "Roosevelt Lane" for a county road which extends easterly from the Pacific Highway near Junction City. In the discussion of this matter it was brought out that other people in this district have proposed another name for this road, and in view of the apparent controversy that exists the Commission decided not to pass on the matter at this time.

The Secretary presented a letter from Lewis A. McArthur, President of the Oregon Historical Society, with respect to the request of the Pioneers Association of Gilliam, Wheeler, and adjacent counties, regarding the erection of a marker where the John Day Highway crosses the original Oregon Trail wagon road, a few miles south of Arlington. Mr. McArthur advised that he could see no reason for denying the request of the Association but he suggested that it would be better to refer to this road as the Oregon Trail rather than as the Old Oregon Trail, inasmuch as, in his opinion, this pioneer road is as much the Oregon Trail now as it ever was and it is neither new nor old in a comparative sense. The Commission approved Mr. McArthur's recommendation and ordered that the Association be so informed.

A letter was presented from County Engineer Frank Z. Howard, of Klamath County, on behalf of the Klamath County Court, relative to the Commission's claim against the county arising out of the construction of the road extending southerly from Merrill to the California state line, which claim amounts to approximately \$2,000. Mr. Howard explained that no provision was made in the county's budget to take care of this item, and if the county is required to pay it, such payment cannot be made until next year. Further, that the Court feels that, inasmuch as this road is now a state secondary highway, and because the county has already spent about \$10,000 for right of way and fencing, it would be only fair for the state to relieve the county from payment of the claim.

The Engineer advised that this was a county road project financed with federal funds that were required to be expended for county road improvements, and accordingly the county had to guarantee the payment of the costs that could not be paid with the federal moneys. He pointed out that since completion of the project the road has been designated by the Commission as a state secondary highway, and recommended, in view of the circumstances, that

JUL 20 1936

the county be relieved of the payment of the claim, including engineering expense. After discussion, the Commission approved the recommendation unanimously and ordered that the decision should apply also to other counties against which the Commission has similar claims.

A letter was presented from Vina C. Smith, Secretary, Oregon Roadside Council, stating that the Works Progress Administration in Washington, D. C., requires more specific details regarding the educational project proposed by the Oregon Roadside Council, and inquiring particularly whether or not the project has been endorsed by the Oregon State Highway Commission, and if the work will receive advisory and supervisory cooperation of the State Highway Commission; also, requesting that the Commission inform Mr. E. J. Griffith, W.P.A. Administrator of Oregon, by letter, that the Highway Commission approves this project and intends to support the proposed program. The Commission approved the request and ordered that such letter be written.

A letter was presented from the Forest Grove Chamber of Commerce urging the Commission to make a decision immediately in the matter of selecting a route for the proposed cutoff road extending from the intersection of the Tualatin Valley Highway with Seventh Street, in Forest Grove, northwesterly to a point on the Gales Creek County Road. The Commission decided, after discussion, not to make a decision in this matter at the present time, in view of the fact that there are no funds available with which to finance the project within the near future. The Secretary was instructed to so inform the Chamber of Commerce.

A letter was presented from J. F. Sweigert, Principal of Schools, Wolf Creek, Oregon, urging the construction of a sidewalk on a narrow highway bridge at Wolf Creek, for the benefit of school children and other pedestrians; also requesting the erection of appropriate signs on the highway calling the attention of highway traffic to the fact that a school zone is being approached. The Commission authorized the erection of the signs but decided not to construct the sidewalk this year in view of the fact that funds are not available to finance such work. The Engineer was instructed to keep this project in mind for next year.

The Secretary presented a letter from the Bowman Hicks Lumber Company of La Grande requesting permission to transport logs on a 2-mile section of the Wallowa Lake Highway, near the town of Wallowa, during Saturday afternoons and holidays. The Commission decided, in view of the large volume of traffic that uses this road, to deny the request for the present; however, indicated that it would authorize such hauling after Labor Day in the event an investigation of traffic conditions at that time reveals that no undue hazard would be created by such operations during such periods.

A letter was presented from R. H. C. Bennett, attorney, Newberg, in behalf of A. W. Ferrell of that place, in which permission was requested to remove from the right of way of the Pacific Highway West several shade trees which, it is alleged, interfere with the sale of Mr. Ferrell's property as a site for a service station. The Commission denied the request.

Consideration was given by the Commission to a letter from Mrs. W.H. Strayer, Secretary of the Old Oregon Trail Club, Baker, Oregon, in which the Commission was urged to acquire for park purposes a 10-acre tract of land adjacent to the Old Oregon Trail and overlooking the city of Baker, and suggesting that the name "Old Oregon Trail Park" be given to this area. It was the thought of the Commission that this tract does not meet the requirements for state parks, and, in view thereof, decided not to purchase the same. The Commission ordered that Mrs. Strayer's communication be referred to the State Parks Superintendent to convey to Mrs. Strayer the Commission's decision.

A letter was presented from the Albany Chamber of Commerce expressing appreciation for the industrious activities of the Highway Commission in its efforts to complete the South Santiam Highway. The Commission ordered that the letter be acknowledged with appropriate thanks.

The Engineer brought up for discussion the matter of rerouting the Oregon-Washington Highway in the town of Pilot Rock, so as to eliminate two right-angle turns in the present route. He said that the revision is only two blocks long and that to improve the proposed route would cost about \$20,000. He recommended approval of the project and that a public hearing be held in the town of Pilot Rock relative thereto, as is required by statute, so that the project can be constructed as a Federal Aid project as soon as funds are available to finance the same. The Commission approved the Engineer's recommendation and set Tuesday, August 23, 1938, at 10:30 o'clock a. m., as the date and hour for such public hearing. The Secretary was instructed to send formal notice of the hearing to the Pilot Rock City Council. (The hearing was later postponed one week, until August 30, 1938.)

The Engineer brought up for discussion the selection of projects for contracting during the coming fall and winter. He presented a list of projects heretofore approved by the Commission for construction, the estimated total cost of which, he said, is \$6,610,000. He estimated the amount available to finance such work at \$5,500,000, and particularly pointed out that the estimated cost of the projects exceeds the amount available by \$1,110,000. He also pointed out that the Commission has certain preferred projects for construction in 1939 aggregating a total of about \$250,000. He suggested, in view of the shortage of funds to finance current construction, that the Commission defer contracting some of the projects until the fall of 1939.

After considerable discussion, and in view of the circumstances, the Commission approved the Engineer's suggestion unanimously, and thereupon tentatively approved the following schedule of current contract lettings and list of projects to be contracted in the fall of 1939:

<u>County</u>	<u>Section</u>	<u>Kind of Work</u>	<u>Class of Project</u>	<u>Allocation</u>

JUL 20 1938

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm such surveys and the amounts authorized for each. After due consideration motion was made by Commissioner Tou Velle that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized for survey expenditures are as follows:

Location - 107-2806 - Jefferson County Line-Prineville Section, Warm Springs Highway. 1st authorization \$5,400.00

Plans - - - 7-2807 - Scale Site, E. of Prineville, Ochoco Highway. 1st authorization - \$50.00

Bridge - - - 7-2808 - Ochoco River, Ochoco Highway. 1st authorization - \$600.00

Plans - - - 9-2820 - Bend Scale Site, The Dalles-California Highway. 1st authorization - \$35.00

Reconn. - - 10-2821 - Divide-Oakland Section, Pacific Highway. 1st authorization - \$960.00

Plans - - - 12-2822 - Dillard Section, Pacific Highway. 1st authorization - \$400.00

Plans - - - 11-2807 - Blalock-Arlington Section, Columbia River Highway. 1st authorization \$1,000.00

Location - 12-2814 - Prairie City Section, John Day Highway 1st authorization - \$400.00

Plans - - - 18-2830 - Scale Site, Ft. Klamath Junction, The Dalles-California Highway. 1st authorization - \$50.00

Location - 223-2815 - S. Unit, Vale-Adrian Section, Vale-Adrian Highway. 1st authorization \$1,200.00

Location - 30-2819 - Pilot Rock Section, Oregon-Washington Highway. 1st authorization - \$500.00

The motion was seconded and was declared by Acting Chairman Aldrich to have passed by the affirmative vote of the Commissioners present.

The Commission had under consideration a letter from Smith and Company, Contractors for the furnishing of crushed rock in stock piles for the Maupin section of The Dalles-California and Wapinitia Highways, in Wasco County, Contract No. 2030, requesting an extension of time from June 30 to August 15, 1938, within which to complete this project. The Engineer advised that,

in his estimation, there is no legitimate reason why this contract was not completed within the specified time limit. He recommended, in view thereof, that the extension requested be granted but that the contractor be penalized in an amount equal to the extra engineering costs incurred by the state in connection with this job subsequent to the completion date specified in the contract. The Commission approved the recommendation by the unanimous vote of the Commissioners present.

The Engineer reported that contracts Nos. 1963, 2000, 2038, 2044, 2051, and 2053, for the construction of state highway projects, have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commissioners present:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts or modifications thereof and that said jobs are now ready for acceptance:

Contract No. 1963, with Joplin & Eldon, for surfacing, oiling, and rock production on the Shaniko Section of the Sherman Highway, in Wasco County. Completed May 27, 1938.

Contract No. 2000, with Edlefsen-Weygandt Company, for grading and topping and timber pile trestle construction on the Siuslaw Junction-Awbrey Section of the Pacific Highway, in Lane County. Completed July 6, 1938.

Contract No. 2038, with Warren Northwest, Inc., for grading, surfacing, and oiling, and bridge construction on the Mile Bridge Section of the Nehalem Secondary Highway, in Columbia County. Completed July 15, 1938.

Contract No. 2044, with Harold Blake, for light oil treatment on the Service Creek-Branson Creek Section of the John Day Highway, in Grant and Wheeler Counties. Completed July 5, 1938.

Contract No. 2051, with Babler Bros., for oiling the Wilson Ranch-Scottsburg Section of the Umpqua Highway, in Douglas County. Completed July 11, 1938.

Contract No. 2053, with J. C. Compton, for oiling the Juntura-Harper Section of the Central Oregon Highway, in Malheur County. Completed June 17, 1938.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway

JUL 20 1938

projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered the matter of setting a date for its regular meeting in September and decided to hold such meeting on Thursday, September 22, 1938, in Portland. (Later changed to September 29.) The Secretary was instructed to make the usual arrangements for the Auditorium in the Public Service Building, in which to hold this meeting.

The Commission adjourned at 11:00 o'clock p. m., to reconvene at 9:00 o'clock a. m. on the following day in the Auditorium of the Public Service Building.

Portland, Oregon, July 21, 1938

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were:

E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects and sale of buildings were opened and read in conformance with previously published notice:

CENTURY DRIVE SECONDARY HIGHWAY
BEND SECTION - SURFACING AND ROAD MIX SURFACE TREATMENT

Babler Bros.	\$ 13,714.00
Warren Northwest, Inc.	15,703.00

WHITNEY COUNTY ROAD
MALONE-CALIFORNIA LINE SECTION - ROAD MIX SURFACING

Clifford A. Dunn	\$ 8,527.00
Babler Bros.	10,641.00

COLUMBIA RIVER HIGHWAY
SANDY BOULEVARD SECTION - PAVING

Kern & Kibbe	\$104,859.50
Harold Blake	105,166.00
Parker-Schram Company	115,427.50
City Motor Trucking Company	119,185.50
Warren Northwest, Inc.	124,066.50

(Former Owner F. P. Hayes)

Beretta Leonard	\$200.00
Earl C. Goble	155.00
W. C. Flynn	25.00

Acting Chairman Aldrich announced that the awards of contracts and the sale of buildings would be made at 2:00 o'clock p. m. in the same room.

County Judge Nelson B. Higgs, of Harney County, was present and inquired whether or not it would be possible to arrange for the use of the Highway Commission's radio facilities in connection with the radio station that the county proposes to install in the southern part of Harney County. The Commission indicated its willingness to cooperate with the County Court in this matter but deferred a decision pending investigation by the Engineer. The Engineer was instructed to make such investigation at once.

The Attorney discussed with the Commission matters pertaining to the sign that is being maintained by the Marcus Whitman Hotel of Walla Walla, Washington, adjacent to the Old Oregon Trail, at Pendleton, and the sign that the Yakima Chamber of Commerce proposes to erect directing Old Oregon Trail

JUL 21 1938

traffic to the Patterson Ferry across the Columbia River. In the discussion of this matter it was brought out that the Marcus Whitman Hotel sign contains erroneous information with respect to the distance from Pendleton to Seattle and that the proposed Patterson Ferry sign will contain information which, while possibly correct, directs traffic over certain highways that cannot be recommended for travel purposes, as they are unpaved. The Attorney advised that the Commission has legal authority to control the signs in question and in view thereof the Commission instructed the Attorney to serve formal notice, by registered mail, on the owners of these signs, to the effect that, unless the signs are corrected to meet the Oregon requirements within a reasonable length of time, they will be taken down by state highway department forces.

A delegation from Portland, consisting of Messrs. Dean Vincent, Millard C. Holbrook, R. E. Brooks, A. R. Porter, A. G. Teepe, Victor Metzger, Al Dinkelstein, and G. B. Van de Water, came before the Commission in regard to the improvement that the Commission has under way on Sandy Boulevard. Mr. Vincent headed the group. He said that they appreciate very much, in general, the improvement on Sandy Boulevard, but they object to the narrowing of the sidewalks from 15 feet to 10 feet, as is proposed by the present plan, particularly between 39th Avenue and 43rd Avenue, which is through the district known as Hollywood, where there is a good shopping center. It was his thought that the narrowing of the sidewalks to such an extent would encourage Sandy Boulevard traffic to pass through this shopping district at excessive speed, which would result not only in the creation of a serious traffic hazard but would also hurt the business of the shop owners.

The Engineer explained in detail the Commission's plans for this improvement, including the provision for a 10-foot sidewalk throughout. After considerable discussion he suggested, as a compromise proposition, that the width of the sidewalk between 39th Avenue and 43rd Avenue be constructed to a 12-foot width rather than the 10-foot width, but that the plans for a 10-foot sidewalk for the remainder of this section be retained as was originally planned. The delegation conferred privately for a few minutes in an adjoining room. Upon returning, Mr. Vincent advised that they would be satisfied with a 12-foot sidewalk between 39th and 43rd Avenues and would withdraw their objections to the improvement if the Commission would change its plans accordingly. The Commission approved, and thereupon instructed the Engineer to change the plans accordingly.

A delegation from Rainier, consisting of County Judge J. B. Wilkerson, of Columbia County, W. E. Proctor and E. E. Rosebraugh, representing the Rainier Commercial Club, was present and asked for the improvement of a 4-mile section of the Lower Columbia River Highway in the vicinity of Prescott, where flood conditions prevail during certain seasons of the year. The Engineer explained that this is a costly project and that the Commission does not have funds available to finance it at the present time. He agreed to keep the project in mind and bring it to the Commission's attention next spring when the Commission formulates its 1939 construction program. Judge Wilkerson advised that the Columbia County Court endorses this project; in fact, it is the court's preferred project inasmuch as the road leading from the highway to the mill at Prescott is inundated by high water every year, and if the Commission

JUL 21 1938

will improve the highway, it will relieve the county from expending about \$15,000 for the improvement of the mill road. He urged the Commission to advance the construction of this road as much as possible.

Mr. Proctor suggested that future improvements on this highway between Rainier and St. Helens start at the Rainier end so as to relieve the situation existing at this particular point sooner than if the work progressed from the St. Helens end. The Engineer agreed to look into the feasibility of the suggestion and also suggested that the delegation come before the Commission again next spring about the time the Commission will be considering its 1939 budget.

Mr. Bob Glenn, Corvallis, appeared before the Commission on behalf of the Corvallis Chamber of Commerce and urged the Commission to undertake at the earliest possible time the construction of the proposed extension of the Territorial Secondary Highway in Lane County from its present terminus at the Lane-Douglas County line to a connection with the Pacific Highway near a place known as Anlauf. He presented a letter from W. F. Groves, Chairman of the Highway Committee of the Corvallis Chamber of Commerce, endorsing his oral request, which letter was read aloud by the Secretary. The Engineer advised that the Commission has no funds available to finance such improvement at the present time, and the earliest time that the Commission could consider the project would be in the formulation of its 1939 construction program. Commissioner Aldrich confirmed the Engineer's remarks. Mr. Glenn then stated that the delegation would appear before the Commission in the meantime to present arguments in favor of their project.

The Engineer requested authority to take two weeks vacation about the first of September. The Commission granted the request and also authorized the Secretary to take a vacation of a similar length.

The Commission adjourned at 11:30 o'clock a. m. and reconvened at 2:00 o'clock p. m. in the same room with the same members present and participating. Also present were the State Highway Engineer and the Secretary.

Commissioner Aldrich announced the following awards of contracts and sale of buildings, bids for which were received at the morning session, such awards having been previously approved by the Commission by the unanimous vote of the members present:

"Bend Section of the Century Drive Secondary Highway, in Deschutes County. 1.2 miles grading and 0.7 mile surfacing and road mix surface treatment. The Commission received 2 bids for this project, the low one being that of Babler Bros., Portland, at \$13,714.00, and the other one being that of Warren Northwest, Inc., Portland, at \$15,703.00. The Commission has rejected both bids and ordered the project readvertised.

"Malone-California Line Section of the Whitney County Road, in Klamath County. 1.51 miles road mix surfacing. Two bids were received for this project, the low one being that submitted by

Clifford A. Dunn, Klamath Falls, at \$8,527.00. The other bid was received from Babler Bros., Portland, at \$10,641.00. The Commission has referred the bids to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Sandy Boulevard Section of the Columbia River Highway, in Portland, Multnomah County. 1.79 miles paving. The Commission received 5 bids for this project, the low one being that of Kern & Kibbe, Portland, at \$104,889.50. Harold Blake, Portland, submitted the next low bid at \$105,166.00. The Commission has referred all bids to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied."

Buildings in Albany

"Building No. 4958, formerly owned by Gladys V. Holloway. No bids were received by the Commission for the purchase of this building.

"Building No. 4968, formerly owned by the World War Veterans' State Aid Commission. Only one bid was received for this building, being that of Barbara J. and H. D. Rohde, Albany, at \$76.00. The Commission considers this offer satisfactory and accordingly has sold the building to them for \$76.00.

"Building No. 4972, formerly owned by S. J. Brown. No bids were received by the Commission for the purchase of this building.

"Building No. 4975, formerly owned by Essie M. Wilcox. Barbara J. and H. D. Rohde, Albany, submitted the only bid received for the purchase of this building, at \$76.00. The Commission considers this offer satisfactory and accordingly has sold the building to them for \$76.00.

"Building No. 4980, formerly owned by Leo C. Smith. Only one bid was received for the purchase of this building, being that of J. E. Gentry, Albany, at \$306.00. The Commission accepted his offer and accordingly sold the building to him for \$306.00."

Buildings in West Portland

"Building No. 4589, formerly owned by John G. Maycock. The only bid received for the purchase of this building was submitted by F. A. Graddy, Portland, at \$1.00. The Commission rejected the offer and ordered the building readvertised.

"Building No. 5037, formerly owned by John T. Paulson. The Commission received 2 bids for the purchase of this building, the high one being that of Florence W. Ehle, Multnomah, at \$52.00, and the other being that of F. A. Graddy, Portland, at \$45.00. The Commission rejected both offers and ordered the building readvertised."

JUL 21 1938

Buildings in North Portland

"Buildings Nos. 5076, formerly owned by Mary Plouff; No. 5068, formerly owned by Earl Cole; No. 5067, formerly owned by Geo. M. Smith; No. 5065, formerly owned by F. P. Montag; No. 5064, formerly owned by F. P. Hayes; and No. 5063, formerly owned by Earl L. Sanborn. Several bids were received for the purchase of these buildings but the Commission accepted the lump sum bid of \$1,202 submitted by Lebeck & Son, Portland, for the purchase of all six buildings."

A delegation representing the Clackamas Community Club and consisting of M. J. Burke; County Commissioner B. Schoenburg; Miss Elsie Arnett, Chairman of the Child Welfare Committee, District No. 1, American Legion; R. B. Holcomb; Harry Hartnell; Haskin Tralve; Messrs. Wilson and Mathiesen, representing the Woodstock Community Club and the Southeast Portland Chamber of Commerce, respectively; L. M. Lepper, representing the Eastside Commercial Club; and Messrs. Williams and Jones, representing the Eastside Chamber of Commerce; Miss Marie Leuenberger and Mrs. J. Leuenberger, and Mrs. E. J. Patrick, came before the Commission in opposition to the rerouting of the 82nd Street Highway (Cascade Secondary Highway) in the vicinity of the town of Clackamas. Mr. Burke headed the group.

He urged the Commission to improve this highway in its present location rather than to relocate it, on account of the Clackamas school which is located about a block and a half from the present road. He said that the moving of the highway would create a hazardous condition for school children because nearly all of them would have to cross the highway in going to and from school, whereas, at the present time, very few of them are required to do so. He urged the Commission to retain the highway on the east side of their school. He also urged the retention of the present route from the standpoint of highway traffic, alleging that the proposed route is through a swampy district where foggy conditions prevail, which is not the case along the present route. Mr. Burke presented a petition signed by 950 citizens of Clackamas County urging the improvement of the 82nd Street road from the city limits of Portland to a connection with McLoughlin Boulevard in or near Oregon City and opposing any relocation of the road between what is known as Pope Hill, on the north, and Mrs. Leuenberger's corner on the south.

County Commissioner Schoenburg advised that the Clackamas County Court is in favor of the retention of the present highway route in so far as that is possible. He inquired whether or not the Commission has as yet adopted a permanent route for this road and was informed that the Commission has not yet done so but will do so when it is ready to proceed with construction; however, in the meantime, a public hearing must be held in Oregon City relative to such change, as required by law, and if the residents of Clackamas wish to present their case at that time, the Commission will be glad to hear them.

Mr. Wilson alleged that the retention of the present road will eliminate a large volume of cross-traffic, and urged the retention of the

present road in so far as possible, from that standpoint. He also urged the Commission to improve the highway as quickly as possible. Mr. Mathiesen stated that the Southeast Portland Chamber of Commerce represents a district of 50,000 people who believe that they are entitled to the reconstruction of the 82nd Street road to Oregon City at the earliest possible time, whether it be on the present route or on the revised location. They have no particular preference, he said, except that they do prefer that the connection with the Super Highway (East Portland-Oregon City Highway) be made at Oregon City rather than at Parkplace.

Mr. Jones urged the early reconstruction of the road on any location that the State Highway Commission may see fit to adopt. Miss Arnott spoke for the retention of the present road in the interests of safety to school children and other pedestrians. Mr. Lepper stated that the Eastside Portland Chamber of Commerce is not particularly concerned as to the location that the Commission may adopt for this proposed improvement but it wants this road completed at the earliest possible time.

Commissioner Aldrich thanked the delegation for its appearance and advised that the arguments presented will be given due consideration before any definite decision is made by the Commission. He further stated that the Commission does not have the funds to finance this project now and that the probabilities are that it cannot be considered earlier than in the 1940 construction program.

The question of the public hearing in Oregon City was brought up, and in this connection the Engineer advised that, while Congress has authorized an appropriation of federal funds to finance federal aid highway construction in the fiscal year 1940, the actual appropriation of such funds has not yet been made, in view of which no particular advantage would be gained by holding a public hearing in the near future. Furthermore, the Commission does not want to hold such hearings or establish routes until funds are available to finance construction. This concluded the conference.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Frank Ott disposing of his claim for damages arising out of reconstruction of the Fremont Highway near the town of Paisley, in Lake County;

Agreement with the Southern Pacific Company relative to the installation of a 12-inch sewer pipe across the railroad company's property in the vicinity of the State Highway Shops, in Salem;

Agreement with John I. Prickett disposing of his claim for damages arising out of the construction of the Davies-Banks Section of the Nehalem Secondary Highway in Washington County;

Agreement with Klamath County providing for the financing of the construction of a certain bridge over Lost River on the Whitney

JUL 21 1938

Bridge County Road, in Klamath County, whereby the county assigns to the State Highway Commission \$9,000 of its share of the gasoline tax revenues for such purpose;

Agreement with the State Board of Forestry authorizing the State Board of Forestry to construct a guard cabin unit on the right of way of the Wilson River Highway, in Tillamook County;

"Consent to Vacation of Street", providing for the vacation of a certain street adjacent to Lot 8, "Rosewood", along the West Portland-Hubbard Secondary Highway in the vicinity of Cook Overcrossing, in Washington and Clackamas Counties;

Bargain and Sale Deed conveying unto Constance I. Kantner and Laverne Kantner 0.06 acre of land situate in Lot 7, Subdivision of Tract 2 of Smith Fruit Farms, Marion County, being right of way transactions Nos. 5776 and 5777.

There being no further business to come before the Commission at this time, the meeting was adjourned at 2:30 o'clock p. m.

Raymond
State Highway Engineer

H. H. Baldock
Secretary

E. B. Aldrich
Commissioner and Acting Chairman

F. L. Tou Velle
Commissioner

Portland, Oregon, August 3, 1938

The State Highway Commission met in regular session at 7:30 o'clock p. m. in the Tyrolean Room of the Benson Hotel. Present were:

E. B. Aldrich, Commissioner and Acting Chairman
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. E. Glaisyer, Secretary

Chairman Henry F. Cabell was absent on a vacation trip in Europe.

The Commission discussed the matter of submitting to the U. S. Bureau of Public Roads a partial program for 1939 regular federal aid funds. After considerable discussion, the Commission selected the following projects for such program, and authorized the Engineer to present them to the Bureau of Public Roads for approval:

AUG 3 1938

PARTIAL PROGRAM OF 1939 REGULAR FEDERAL AID PROJECTS

Name of Highway	County	Name of Section	Termini	Miles (Net)	Kind of Work	Cost to be	
						Total Est. Cost	Paid from F.A. Funds

						\$3,459,653	\$1,992,516

Miss Maud Campbell, accompanied by her brother, Mr. Ben Campbell, came before the Commission in regard to Miss Campbell's claim for damages arising out of the construction of the Union Avenue viaduct on the East Portland-Oregon City Highway in Portland. Miss Campbell alleged that as a result of the construction of this viaduct she now has no outlet to her property, and the same is isolated, and the value thereof, as a result, has been greatly reduced. She asked the Commission to compensate her for such damage, and presented some appraisals which she said were made by competent appraisers, indicating that her property has been damaged to the extent of \$7,000. The Commission deferred discussion of this matter pending the return of Chairman Cabell from his vacation.

The Attorney reported on the status of the right of way budget. He said that a study of expenditures already made for right of way during 1938 and of the assignments that have been given him reveals that the \$550,000 budgeted for right of way purchases this year will be about \$100,000 short of meeting the requirements. After discussion, and it being apparent that it is absolutely necessary to acquire additional right of way in order to carry on contemplated construction projects, the Commission approved increasing the right of way budget in the sum of \$100,000 in order to meet the deficit.

The Engineer requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state and submitted a list of such properties, together with prices that he recommended be paid for each. After careful study the Commission approved the Engineer's request and adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is, instructed to complete the acquisition of the said properties and to take title thereto in the

AUG 3 1938

name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

A letter was presented from the County Court of Coos County stating its willingness to convey unto the State of Oregon the Silver Falls recreational area in order that it may be developed as one unit with the Golden Falls State Park. The Commission ordered that this letter be acknowledged with thanks.

The Commission had under discussion the request of Mr. Fred Caughell, Gold Beach, Oregon, to be released from an option that he gave to the state, covering certain property needed as a stock pile site adjacent to the Oregon Coast Highway in Curry County, so as to permit him to sell this property to another party. The Engineer advised that the property is needed for highway purposes and recommended that the option be not cancelled. The Commission approved the recommendation.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Proposed lease of 1150 acres of land located in the Crooked River Canyon, Jefferson County:- The Parks Superintendent advised that he has secured from the Government a 95-year lease on this tract, which is an outstanding recreational area. He recommended acceptance of the lease. The Commission approved the recommendation. (Lease was signed on the following day.)

AUG 3 1938

Acquisition of Multnomah Falls property:- The Parks Superintendent advised that the U. S. Forest Service has indicated a willingness to accept from the City of Portland, as an addition to the U. S. Forest Recreational Area, the Multnomah Falls property and all of the city's property lying south of the O.W.R. & N. railroad. In view of the report, the Commission decided to accept as a gift from the City of Portland the balance of the Multnomah Falls area, which includes what is known as Benson Park and Wahkeena Park, lying between the railroad and the Columbia River. The Commission also decided to accept from the City of Portland a 10-acre tract at a place known as Shepperd's Dell, which tract also lies between the railroad and the Columbia River. The Parks Superintendent was instructed to complete negotiations as soon as possible. The Engineer was authorized by the Commission to make a survey of the boundary lines and to set property stakes as may be required.

Consideration was given by the Commission to the Marcus Whitman Hotel sign that is being maintained adjacent to the right of way of the Old Oregon Trail just east of Pendleton, which sign bears incorrect information as to the distance from Pendleton to Seattle. The Attorney was instructed to inform the hotel that the sign must be corrected to meet the Oregon requirements, or be removed.

The Attorney was also instructed to take similar action in regard to some signs that are being maintained by the Yakima Chamber of Commerce adjacent to the Old Oregon Trail, directing traffic to the Patterson Ferry across the Columbia River.

The matter of charging contractors and material dealers for proposal forms and plans for highway construction projects had the attention of the Commission. The matter was referred to the Engineer for investigation and recommendation.

The Engineer requested authority to purchase 10 trucks of 2½- and 3-ton capacity equipped with dump bodies, and to trade in as part purchase price on the same 10 old trucks that have outlived their usefulness. He estimated that the total outlay to the state would be about \$40,000. The Commission authorized the purchase of this equipment through the State Purchasing Agent.

The Commission also authorized the purchase of certain equipment, estimated to cost about \$200, which is needed in connection with the examination of the vision of state highway department employees.

The Engineer reported that the 1939 Federal Lands Highway Program contains an allotment of \$25,000 for the Forest Boundary-East Section of the Warm Springs Highway in Wasco County. He advised that that portion of the Warm Springs Highway has not been designated as a state secondary highway, the highway now ending at the Jefferson-Wasco County line. He gave as his thought that the secondary highway should be extended from its present terminus to a connection with the Wapinitia Highway, and so recommended. The Commission concurred in the viewpoint of the Engineer and instructed him to confer with the Wasco County Court relative thereto, and to ask the Court to petition the Commission for such designation.

The Engineer reported that in accordance with authority previously granted him by the Commission he has awarded contracts as follows, bids for which were received on July 21, 1938:

Sandy Boulevard Section of the Columbia River Highway in Portland. Contract awarded July 25 to Kern & Kibbe, who submitted the low bid therefor.

Malone-California Line Section of Whitney County Road, in Klamath County. 1.51 miles road-mix surfacing. Contract awarded July 28 to Clifford A. Dunn, Klamath Falls, who submitted the low bid therefor.

The Commission approved the awards as reported by the Engineer.

The Engineer requested authority for Assistant Construction Engineer Paul VanScoy to go to Seattle at state expense for an inspection of portable well drills which are needed in connection with certain tests and investigations that are to be conducted in connection with the construction of high fills on soft ground. He estimated that this expense would not exceed \$15.00. The Commission approved the request, subject to further approval by Governor Martin.

The Commission discussed the matter of inspecting the Baker-Homestead Highway in Baker County in company with the Baker County Court. It was decided to inspect this highway immediately following the hearing that is to be held in Pilot Rock on August 23. (Date later changed to August 30.)

The Engineer brought up for discussion and read aloud a letter from the "Oregon's San Francisco and New York World's Fair Commission", in which the Highway Commission was requested to authorize the State Treasurer to transfer immediately the sum of \$20,000 from the state highway fund to the account of the World's Fair Commission in accordance with previous agreement. He also read aloud a suggested reply to such communication, dated August 3, 1938, in which he pointed out that the State Highway Commission cannot legally transfer such amount in the manner desired because the only way that the state highway funds can be used in connection with the work of the World's Fair Commission is by reimbursing that Commission for advances made for goods or services, expenditures for which have been previously approved by the State Highway Commission in accordance with the provisions of the agreement between the two commissions which has heretofore been decided upon and which is now being prepared as a result of the previous conferences on the subject. After discussion, the Commission approved the Engineer's reply unanimously, it being in conformance with the ideas of the Commission on the subject as heretofore expressed.

In this connection the Attorney presented a form of agreement between the two commissions covering the subject under discussion. This was approved by the Commission, with several slight changes.

The matter of passing on payments to the World's Fair Commission was discussed briefly. The Commission decided that the State Highway Engineer

AUG 3 1938

should be held responsible for such feature and thereupon authorized him to act as the Highway Commission's representative with respect thereto, and in all matters between the two commissions.

A letter was presented from the port of The Dalles requesting the immediate improvement of the bridge across the John Day River on the Sherars Bridge Secondary Highway, which bridge is now posted for a 5-ton load limit. The Engineer advised that it would be too costly to rebuild this structure, but he suggested that it be repaired and bolstered up with falsework so as to make it serve for 10-ton loads. The Commission approved the suggestion and so ordered.

The Commission considered and ordered filed a newspaper item from the Oregon City Banner-Courier relative to the construction of the East Portland-Oregon City Highway through Oregon City, and the suit that is under way for acquisition of right of way for the same.

The Commission also considered and ordered filed for future consideration a petition signed by numerous citizens of Depoe Bay and vicinity, urging the early construction of the proposed revision of the Oregon Coast Highway at Depoe Bay.

A letter was presented from the Timberline Lodge, Inc., requesting permission to maintain on state highway rights of way signs advertising Timberline Lodge. The Commission denied the request as a matter of policy.

A petition was presented, signed by numerous taxpayers of Monmouth and vicinity, urging the oiling of that portion of the Kings Valley Secondary Highway between Maple Grove, Oregon, and the Polk-Benton County Line. The Commission denied the request on account of lack of funds to finance the improvement. The Secretary was instructed to so inform the petitioners.

The Commission had under discussion a resolution from the City Council of Nyssa, Oregon, requesting the improvement of Main Street in their town by hard-surfacing and oiling full width from the Oregon Short Line Railroad right of way to their high school grounds. The Commission denied the improvement on account of lack of funds to finance the same.

The Engineer reported that contracts Nos. 2018, 2022, 2048, 2054, and 2059, for the construction of state highway projects, have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance. The following resolution accepting the above mentioned projects was offered and was adopted by the unanimous vote of the Commissioners present:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts or modifications thereof and said jobs are now ready for acceptance:

Contract No. 2018, with Saxton, Looney & Risley, for furnishing crushed rock for the Hebo Rock Production Project on the Oregon Coast and McMinnville-Tillamook Highways, in Tillamook County. Completed June 14, 1938.

Contract No. 2022, with McNutt Bros., for grading and topping the John Day-Oliver Ranch Section of the John Day Highway, in Grant County. Completed July 28, 1938.

Contract No. 2048, with Mountain States Construction Company, for the construction of Lake Lytle Outlet Bridge on the Oregon Coast Highway, in Tillamook County. Completed July 31, 1938.

Contract No. 2054, with Rogers Construction Company, for surfacing, oiling, and rock production on the Hermiston-Cold Springs Section of the Hermiston Secondary Highway, in Umatilla County. Completed July 6, 1938.

Contract No. 2059, with Babler Bros., for oiling the Middle Bridge-Black Bridge Section of the Baker-Homestead Highway, in Baker County. Completed June 21, 1938.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission adjourned at 10:00 o'clock p. m., to reconvene on the following morning in the Auditorium of the Public Service Building.

Portland, Oregon, August 4, 1938

The State Highway Commission reconvened at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were E. B. Aldrich, Commissioner and Acting Chairman; F. L. Tou Velle, Commissioner; R. H. Baldock, State Highway Engineer; J. M. Devers, Attorney; and H. B. Glaisyer, Secretary. Chairman Henry F. Cabell was absent.

Bids as follows for highway construction projects and for the purchase of buildings and remodeling of the Highway Department offices in Salem were opened and read in conformance with previously published notice:

OREGON COAST HIGHWAY
ARCH CAPE-BEACH CREEK SECTION — GRADING

A. C. Greenwood, Inc.
McNutt Bros.

\$128,832.50
138,972.60

(Continued on next page)

**BUILDING NO. 5059-B
(1616 N. McClellan Street)
(Former Owner McGuire Construction Co.)**

McGuire Construction Company	\$176.00
Sullivan Wrecking Company	27.92

Acting Chairman Aldrich announced that the awards of contracts and the sale of buildings would be made at 2:30 o'clock p. m. in the same room.

Mr. Dewey D. Gault, Portland, came before the Commission and asked the Commission's aid in construction of an approach to his dock, which is located in the Columbia River near the Denver Avenue-Union Avenue intersection. The Commission referred the matter to the Engineer for investigation.

The Commission discussed the matter of the encroachment of the Harry Elbon residence building on state property adjacent to the Lower Columbia River Highway, near Scappoose. It appears that Mr. Elbon owns land between the highway right of way and the abandoned right of way of the United Railways Company, which is now owned by the state; and when he built his house he thought he was locating it on his own property, but inadvertently encroached on the old railroad right of way about 12 feet, and the mistake was not noticed until the house was completed. It also appears that in order to correct the mistake and to avoid the expense of moving the house, Mr. Elbon is willing to deed to the state other property that he owns along the highway, which is much better suited for highway purposes, if the state will deed to him the state land on which his house is located. The Engineer advised that the land on which Mr. Elbon's house encroaches is not particularly valuable from the highway standpoint because it is separated from the highway by private property, whereas the tract that he wishes to deed to the state joins the highway right of way and is much better suited for highway use. He recommended acceptance of Mr. Elbon's offer. After discussion the Commission approved the Engineer's recommendation.

Mr. William Baer, County Commissioner of Deschutes County, was present and discussed the Commission's claim against the county for reimbursement for certain costs incurred by the state in connection with the construction of the Upper Tumalo Section of the Tumalo Falls-Bend County Road. The Engineer explained that this project was built as a federal feeder road project and was financed with funds made available under the Emergency Relief Appropriation Act of 1935; also, that it was anticipated that certain expense would be incurred which could not be collected from the Federal Government; and, for that reason, an agreement was made with the county court providing for payment by the county of the non-reimbursable items, which amount to \$1,262.88.

Mr. Baer stated that Deschutes County accepts this debt but does not have sufficient funds available with which to pay it now. The suggestion was offered that the county assign to the Commission \$1,262.88 from its share of the motor vehicle and gasoline tax moneys that will be due and payable to the county on December 15, 1938. Mr. Baer expressed satisfaction with such an arrangement, whereupon the Commission instructed the Attorney to prepare an appropriate form of assignment covering the matter.

Mr. Stephen A. Hull, President of The Dalles & Southern Railroad Company, The Dalles, was present and asked permission to construct a roadway approach from the company's property adjacent to the Columbia River Highway near the east city limits of The Dalles, to the Columbia River Highway, necessitating special roadway construction on the highway right of way for a short distance. The Commission referred the matter to the Engineer for investigation and report.

Mr. R. E. Riley, City Commissioner, Portland, was present and discussed with the Commission the matter of the city's conveying unto the state city-owned land at Multnomah Falls and at Shepperd's Dell. He said that the City of Portland is ready and willing to proceed with the transfer of this

property in accordance with arrangements made with the State Parks Superintendent, which is to the effect that the city will deed to the state all of the land lying between the O.W.R.R. & N. railroad track and the Columbia River for about a mile and a half along the highway, including Multnomah Falls, Wahkeena Falls, and Benson Park, and will deed to the U. S. Forest Service that portion of the city property at Multnomah Falls which lies south of the railroad track, so that this area may be included in the U. S. Forest Service Recreational Area. He said that the city is glad to make this transfer but wants to urge the rapid development of the property for public use. He suggested the immediate construction of a dock for excursion boats opposite the Multnomah Falls Hotel, and expressed a wish that the Commission would consult the city authorities relative to the development of the entire area.

Commissioner Aldrich advised that it would be the natural thing for the Commission to consult with the city officials in regard to the development of this tract, but he pointed out that the present Commission cannot commit future commissions. After further discussion the Commission voted unanimously to accept this gift from the City of Portland, with the conditions mentioned by Mr. Riley but subject to the securing of releases from the O.W.R.R. & N. Company and from Mr. Simon Benson, who gave Benson Park to the City of Portland. The conference was concluded with the understanding that the City Attorney of Portland would prepare the necessary papers at once, including the release forms, and that these papers would be passed on by the Commission's Attorney before they are executed.

County Judge Guy Boyington and County Commissioner William Larson of Clatsop County were present. They thanked the Commission for contracting the Arch Cape Tunnel Project on the Oregon Coast Highway, which will result in the opening up of this coast route in 1939; and asked the Commission to designate as a future secondary highway the county road extending from the Oregon Coast Highway to Fort Stevens. Commissioner Aldrich explained that all three members of the State Highway Commission must be present to designate a secondary state highway, so the placing of the Fort Stevens road on the secondary highway system must await the return of Mr. Cabell from Europe.

The Commission adjourned for luncheon at 12:10 o'clock p. m., and reconvened at 2:00 o'clock p. m. in the same room with the same members present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Consideration was given by the Commission to the bids received at the morning session for the construction of P.W.A. projects. The Commission decided to award the contracts for the Catching Slough Bridge project, the Fleming Ranch-Schindler Bridge project, and for the Umapine-Sunnyside project to the low bidder in each instance, the Commission having been previously informed that the awards meet with the approval of the Regional Director of the Public Works Administration.

Moved by F. L. Tou Velle and seconded by E. B. Aldrich that the contract for the construction of the Catching Slough Bridge be awarded to J. W. and J. R. Hillstrom, of Marshfield, Oregon, for the sum of \$64,986.00.

AUG 4 1938

The following resolutions relative to the award of contracts for the Fleming Ranch-Schindler Bridge Project and the Umapine-Sunnyside Project were adopted by the Commission by the unanimous vote of the Commissioners present:

WHEREAS, the bids received for the construction of P.W.A. Docket 1184-F at Linn County, Oregon, have been duly opened, read and compared, and it appears that Leonard & Slate is low bidder, after taking alternate deductions; and

WHEREAS, such bid is within the available funds of \$53,000;

NOW, THEREFORE, BE IT RESOLVED, That the contract for the construction of said P.W.A. Docket 1184-F be and the same is hereby awarded to Leonard & Slate for the sum of \$46,352.00.

WHEREAS, the bids received for the construction of P.W.A. Docket 1190-F at Umatilla County, Oregon, have been duly opened, read and compared, and it appears that Edwin C. Gerber is low bidder, after taking alternate deductions; and

WHEREAS, such bid is within the available funds of \$44,600;

NOW, THEREFORE, BE IT RESOLVED, That the contract for the construction of said P.W.A. Docket 1190-F be and the same is hereby awarded to Edwin C. Gerber for the sum of \$34,230.50.

The Commission decided to readvertise the Klamath Falls building project inasmuch as unsatisfactory bids were received for such project.

The Secretary was authorized and instructed by the Commission to notify the Public Works Administration and the U. S. Bureau of Public Roads, in writing, of the action taken by the Commission with respect to the award of each of the above-mentioned P.W.A. projects.

The Attorney reported a possibility that it will be necessary to institute condemnation proceedings to acquire right of way that is needed for several of the jobs for which bids were opened at this session. He requested authority to institute such proceedings if further investigation indicates that to be necessary, and particularly to institute a friendly condemnation suit against the Northern Pacific Railroad Company to acquire right of way for the Bend Section of Century Drive Secondary Highway. The Commission approved the request.

Mr. Bill Smith, representing the Pacific Portland Cement Company, was present and inquired whether or not the State Highway Commission would have any objections to interests that he represents securing and operating a gravel plant in Hood River about a quarter of a mile above the Columbia River Highway Bridge. He said that the proposed operation will be readily seen from the highway and because of this the people whom he represents want to make certain that the Commission has no objections to it before proceeding with their plans. In the discussion of this matter it was brought out that the gravel bar is located on a small island a considerable distance beyond the limits of the highway right of way, hence the State Highway Department would have no jurisdiction over the same. Mr. Smith was informed by Commissioner Aldrich that the Commission prefers that a gravel plant be not operated

in this location because no doubt it would be unsightly and would detract from the beauty of the highway. However, it appears that the matter is entirely out of the Commission's jurisdiction.

At 2:30 o'clock p. m. Acting Chairman Aldrich announced the following awards of contracts for which bids were received at the morning session, the awards having been previously approved by the unanimous vote of the Commissioners present:

"Arch Cape-Beach Creek Section of the Oregon Coast Highway, in Clatsop and Tillamook Counties. 2.18 miles grading. The low bid received for this project was that of A. C. Greenwood Company, Inc., Portland, at \$128,832.50. The next low bid was that of McNutt Bros., Eugene, at \$138,912.60. There were 13 higher bidders. The Commission awards this contract to A. C. Greenwood Company, Inc., at its low bid of \$128,832.50.

"Catching Slough Bridge Section of Coos River Secondary Highway, in Coos County. 0.27 mile grading and a steel and timber bridge over Catching Slough. J. W. & J. R. Hillstrom, Marshfield, submitted the low bid for this project at \$64,986.00. The next low bid was submitted by Coos Bay Dredging Company, Marshfield, at \$65,734.40. There were 2 higher bidders. The Commission awards this contract to the low bidders, J. W. & J. R. Hillstrom, at their bid of \$64,986.00.

"Bend Section of Century Drive Secondary Highway, in Deschutes County. 1.2 miles grading and surfacing. Fisher Bros., Oregon City, submitted the low bid at \$9,731.50. The next low bid was submitted by the River Bend Sand & Gravel Company, Salem, at \$10,492.50. There were 3 higher bidders. The Commission has referred all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Construction of a frame building, 32'x140', complete with heating plant, at Klamath Falls, in Klamath County. G. I. Stebbins Construction Company, Klamath Falls, submitted the low bid at \$12,764.00. The next low bid was submitted by E. Gray of Klamath Falls, at \$13,178.00. There was only 1 other bidder. The Commission rejects all bids received and has ordered the project readvertised.

"Salt Creek Section of the Willamette Highway, in Lane County. Clearing 3.16 miles of highway right of way. The Commission received only 2 bids for this project, the low one being that of F. C. Dillard, Medford, at \$14,100.00. The other bid was that of Heller & Gulgannon, Scappoose, at \$18,150.00. The Commission has awarded this contract to F. C. Dillard at his low bid of \$14,100.00.

"Fleming Ranch-Schindler Bridge Section of the Albany-Lyons Secondary Highway, in Linn County. 1.62 miles of highway roadbed and a concrete bridge approximately 232 feet long over Thomas Creek. The low bid received for this project was that of Leonard & Slate, Multnomah, at \$46,352.00. The next low bid was that of Mountain States

AUG 4 1938

Construction Company, Eugene, at \$47,666.00. There were 4 higher bidders. The Commission awards this contract to the low bidders, Leonard & Slate, at their bid of \$46,352.00.

"Shedd-Halsey Section of the Pacific Highway East, in Linn County. 6.78 miles roadside improvement. D. L. Ashton, Lebanon, submitted the low bid at \$3,604.25. The second low bid was that of Leonard & Slate, Multnomah, at \$3,761.00. There was 1 higher bidder on this project. The Commission awards this contract to D. L. Ashton at his low bid of \$3,604.25.

"Umapine-Sunnyside Section of Umapine Secondary Highway, in Umatilla County. 5.64 miles grading, surfacing and oiling. Edwin C. Gerber, Oregon City, submitted the low bid for this project at \$34,230.50. The next low bid was that of Standard Asphalt Paving Company, Spokane, Washington, at \$36,448.50. There were 5 higher bidders. The Commission has awarded the contract to the low bidder, Edwin C. Gerber, at his bid of \$34,230.50.

"Buildings in North Portland. Buildings Nos. 5059-A and 5059-B, both formerly owned by the McGuire Construction Company of Portland, and located at 1626 N. McClellan Street and 1616 N. McClellan Street, respectively, in the city of Portland. The bid of the McGuire Construction Company, at \$176 each, was the high bid received for these buildings. The second high bid was that of Lebeck & Son, Portland, at a lump sum of \$253.00 for both buildings. The third and only other bidder was the Sullivan Wrecking Company of Portland. The Commission awards the sale of these buildings to the high bidder, the McGuire Construction Company, at its bid of \$176.00 each.

"Remodeling a portion of the State Office Building in Salem, Marion County. Removal of approximately 370 lineal feet of old partitions and construction of approximately 510 lineal feet of new partitions, complete with doors, paneling, etc. Erwin E. Batterman, Salem, submitted the low bid for this project at \$2,898.90. Carl Bahlburg, Salem, submitted the next low bid at \$3,448.00. There were 2 higher bidders. The Commission awards the contract to the low bidder, Erwin E. Batterman, Salem, at his bid of \$2,898.90."

Consideration was given by the Commission to readvertising for bids for the construction of the Klamath Falls maintenance building and it was decided by the unanimous vote of the Commissioners present to receive bids for the construction of this building on Tuesday, August 23, 1938, at 2:00 o'clock p. m. in the offices of Commissioner Aldrich in the East Oregonian Building, Pendleton. (This meeting was later postponed one week, until August 30, 1938.)

The Commission considered, approved, and signed the following agreements:

Cooperative agreement with the United States of America providing for the lease of 1150 acres of land in the Crooked River Recreational area in Jefferson County.

AUG 4 1938

Agreement with the Southern Pacific Company terminating the lease of a stock pile site at Hillsboro.

Agreement with the O.W.R.R. & N. Company and the Union Pacific Railroad relative to the encroachment of the Lombard-Killingsworth Section of Northeast Portland Secondary Highway upon the Railroad Company's right of way, being right of way transaction R-5413.

Agreement with Shell Oil Company covering the matter of moving buildings and other facilities from the Shell Oil Company property in Portland, which property is being acquired by the state for right of way for the Columbia Boulevard-Harding Avenue Section of the Pacific Highway West (Interstate Avenue), being right of way transaction 5383.

Agreement with Alvina H. Borland and R. S. Borland, authorizing the Borlands to occupy certain property which they have deeded to the state at Grants Pass for right of way purposes, being right of way transaction 6105.

Quitclaim deed conveying unto Ralph I. Robertson and wife 824 sq. ft. of land situate in the NW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 21, Township 40 S, Range 2 E, W. M., Jackson County, being right of way transaction 5181.

Bargain and sale deed conveying unto Frank D. Vetter and wife 0.86 acre in the N $\frac{1}{2}$ of the SE $\frac{1}{4}$ of Section 25, Township 38 S, Range 1 W, W.M., Jackson County, being transactions 4571, 4578, and 4569.

There being no further business to come before the Commission at this time, the meeting was adjourned at 2:45 o'clock p. m.

AUG 4 1938

Klamath Falls, Oregon, August 9, 1938

The State Highway Commission met in the City Council Chambers of the Klamath Falls City Hall at 9:00 o'clock a. m., in accordance with formal notification sent to the Mayor of Klamath Falls on July 7, 1938, for the purpose of securing expressions from the people of Klamath Falls with respect to the rerouting of The Dalles-California Highway within said city. Present were:

E. B. Aldrich, Commissioner and Acting Chairman
F. L. Tou Velle, Commissioner
H. G. Smith, Construction Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Chairman Henry F. Cabell and State Highway Engineer R. H. Baldock were absent.

Also present were 15 local citizens. Acting Chairman Aldrich called the meeting to order. He explained that the Commission had been requested by the Common Council of the City of Klamath Falls to determine whether or not the route of The Dalles-California Highway should be retained in its present location on 9th Street or should be rerouted on 11th Street, which is the purpose and object of this meeting. He called upon the Attorney to explain the legal features involved. The Commission's Attorney, J. M. Devers, explained the law which requires the State Highway Commission to hold a public hearing in an incorporated city or town before it alters or changes the route of any state highway into or through such city or town, in order to give the local citizens an opportunity to express themselves either for or against the change. Construction Engineer H. G. Smith exhibited a map showing the proposed change, which is described as follows:

Beginning at a point on The Dalles-California Highway at the intersection of Main Street with 9th Street in Klamath Falls; thence continuing northerly along Main Street to 11th Street; thence following along 11th Street in a northwesterly direction to Upham Street; thence westerly along Upham Street to a connection with the present highway at Prospect Street. He explained briefly the engineering features involved in such change. Commissioner Aldrich then invited all present to express themselves in regard thereto.

James Boyer stated that he lives on Oregon Avenue but owns property on 11th Street. He gave as his thought that 11th Street is the proper route for this highway from the traffic standpoint, particularly in order to eliminate the dangerous condition that exists on the present route at the intersection of Prospect Street and 9th Street, where, he said, many accidents occur. He further stated that he was informed at one time by an engineer of the Highway Department that 11th Street is the proper location for the highway and would be adopted by the Highway Commission if the city would build a bridge over the canal on such street, which has been done, the people having voted bonds for the purpose, with the idea in mind that the Commission would reroute the highway in that location.

Mr. J. S. Peck also spoke in favor of the 11th Street route.

AUG 9 1938

He said that he owns property on this street and is of the opinion that it is the proper route for the highway, and visitors to their city will then enjoy the same privileges as do the local people in travelling over it.

Mr. J. O. Dryden stated that 11th Street is a residence street and is the most beautiful street in the city, being lined on both sides with ornamental trees. He expressed a preference for the highway to be routed on 11th Street if the trees are not to be removed; otherwise, that the highway be retained in its present location on 9th Street.

Construction Engineer H. G. Smith stated that both 9th and 11th Streets are now too narrow to properly take care of traffic, and would have to be widened. His remarks were confirmed by John Beakey, Traffic Engineer for the State Highway Department. The Commission's Attorney advised that the Commission is without authority to extend its improvement beyond the curbs on any street without the consent of the city officials because the Commission's jurisdiction extends only to the curb line; however, the city officials have authority to remove the trees beyond the curb line if they so desire.

Mr. Peck, speaking again, urged the removal of trees on 11th Street if that is necessary in order to secure the routing of the highway on such street.

Dr. Lloyd Cass stated that he owns property on 11th Street and favors the rerouting of the highway on such street even if it is necessary to go to the extent of removing the trees therefrom. He urged the adoption of the 11th Street route, particularly from the safety standpoint.

City Engineer E. A. Thomas suggested that new trees could be planted to replace the old ones if they were cut down. He pointed out that the present trees, for the most part, are of the poplar species with a big root system, and the city has been put to a great deal of expense in the past in repairing the sewer and water mains because of the roots.

Mr. Earl Devlin, Manager of the Elk Hotel, spoke in favor of the 11th Street route because it would bring more traffic near the Elk Hotel. He said that his argument is simply from a selfish business standpoint.

Mr. H. V. Williams, salesman, gave as his thought that the highway should be rerouted in a location that will do the most good for the greatest number of people; and in his opinion the 11th Street route fits that requirement in the best possible manner. It was his thought that if the Commission should adopt the 11th Street route, a considerable amount of traffic would still use the 9th Street route, but through traffic would be accommodated because the confusion that now exists at the reverse turn on 9th Street will be eliminated if the route is changed to 11th Street. He gave as his opinion that it is unfair to continue to divert traffic from the business interests on 11th Street because these people are entitled to a just share of the business that is created by such traffic. Mr. Williams also spoke for the 11th Street route from the aesthetic standpoint, stating that 11th Street is a more beautiful street than 9th Street and tourists entering their city on that street will receive a much better first impression.

AUG 9 1938

Mr. Oscar Payton stated that he is in the fuel business and that he owns property along 9th Street and also resides on 9th Street. He spoke in favor of the 11th Street route. He said that, under present conditions, because of the narrowness of 9th Street and the large volume of traffic which uses this street, it is difficult for property owners to drive into their own driveways. It was his thought that a certain amount of traffic would use 9th Street regardless of whether or not it is a state highway route. He also said that he was one of those who voted for the bonds to finance the bridge on 11th Street, being of the opinion at that time that the highway would be routed there; and he has spent more money in developing his property than he would have spent had he known that the highway route was not going to be changed. Mr. Payton also spoke for the adoption of the 11th Street route from the standpoint of removing traffic hazards on the 9th Street route.

Mr. Robert Currier stated that he lives along 11th Street and recently purchased property there because it was his understanding that the highway would be routed on this street. He favored the 11th Street route for business reasons.

At this juncture Commissioner Aldrich inquired why the people of Klamath Falls thought that the highway would be rerouted on 11th Street if the city built a bridge over the canal on this street.

Mr. Dryden, in reply, stated that, as far as he knew, the people had no official assurance that the highway would be routed on 11th Street if the bridge were built there but the rumor was simply started and was based on a proposition of widening the old narrow bridge which had become hazardous and unsafe for vehicular traffic.

Mr. F. W. Van Buskirk stated that he resides along 11th Street. He denied statements that the rerouting of the highway had anything whatever to do with financing the new bridge on 11th Street. This bridge, he said, was built simply to do away with the existing blind-end street, although some thought at that time that the Highway Commission would designate 11th Street as the highway route if the bridge were built. He gave as his thought that the City Council made a mistake in asking the Highway Commission to adopt the 11th Street route until it had made a study of traffic conditions. He submitted traffic counts taken by himself during certain times of the day on July 9, 11, 15, 20, and 21, 1938, and declared that the traffic is now about as equally divided on 9th Street and 11th Street as it could be. He urged the retention of the highway on 9th Street for the following additional reasons: 1. 11th Street passes two schools and a cemetery, which would present a hazardous condition for school children. 2. To preserve the trees on 11th Street. 3. To eliminate congestion on Main Street. In this connection he suggested that a feasible route would be to follow the railroad into Klamath Falls on the north, which would eliminate the necessity to route traffic on either 9th or 11th Street. The present route on 9th Street, he said, could be used until the Commission is ready to permanently reroute the highway through Klamath Falls. Mr. Van Buskirk said that most of the property owners residing on 11th Street are opposed to the rerouting of the highway on that street because they do not want the extra traffic.

Mr. J. H. Hesse stated that he is satisfied to leave the decision up to the Highway Commission. Mr. J. L. Blackburn favored the retention of the present route on 9th Street. He spoke in the interests of safety to children, and pointed out that 11th Street would pass both the high school and grade school, and would be a death trap if it were the route adopted, inasmuch as there are no sidewalks on that street. He said that not only do the school children use this street more than any other street in that section but that funerals must be routed along this artery also. He alleged that rerouting of the highway on 11th Street would not eliminate the turns on the present route. He urged the Commission to leave the highway in its present location from the safety standpoint.

Mr. Chris Blants urged the adoption of the 11th Street route, as did also Mr. Lester Thompson, both being of the opinion that 11th Street is the most natural route and that the majority of the people are in favor of it.

Miss Dorothy Price, teacher in the public schools, spoke in the interests of school children, of whom she said that 50 per cent now use 11th Street in going to and from school. She favored the routing of the highway on 9th Street and the opening up of Washington Street through to 9th Street in order to alleviate the congestion of traffic on 11th Street.

Messrs. Joe Rose and L. D. Collins also voiced a preference for the adoption of the 11th Street route. Mr. Lee Bean, Councilman, advised that the city built the bridge on 11th Street in the interests of the city as a whole, and because the Council felt that 11th Street was the most natural and feasible route for the highway; and for that reason, when the bridge was completed, the Council asked the Commission to reroute the highway on the street on which this bridge is located. He alleged that the traffic hazards on the 9th Street route are much greater than on the 11th Street route. Furthermore, he said that 11th Street is much better for industrial traffic because it takes industry where it wants to go sooner than 9th Street does, and, at the same time, avoids the congestion at 9th and Main Streets.

There being no others present desiring to be heard on the subject, the hearing was declared concluded at 10:30 o'clock a. m. by Acting Chairman Aldrich, who advised that the Commission would consider the arguments presented and would make its decision later.

Following the hearing the Commission was in session for a short time for consideration of routine matters, among which was the adoption of minimum wage rates to be paid laborers employed on the Klamath Falls building project which it is proposed to construct with P.W.A. funds. After some discussion, Commissioner Tou Velle moved the adoption of the following resolution in regard thereto, which motion was duly seconded and declared by Commissioner Aldrich to have passed by the unanimous vote of the Commissioners present.

Klamath Falls Building Project PWA Docket Number Oregon 1177-F

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Klamath County, which is

AUG 9 1938

the locality in which the proposed project (hereinafter referred to as "Project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said Project, and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by an examination of the wage rates now being paid on the construction of a new gymnasium in the City of Klamath Falls, this construction project being the largest construction project under way at present in that locality, and an examination of the wage rates paid for grading, surfacing, and rock production on highway work which work is comparable to work to be performed on this project.

NOW, THEREFORE, BE IT RESOLVED by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed.

Air compressor oper.	\$.75	per hour	Sheet metal worker	\$1.25	per hour
Brick layer	1.50	per hour	Shingler	1.20	per hour
Building trades laborers	.62½	per hour	Fireman (steam shovel or hoist)	.75	per hour
Carpenter	1.20	per hour	Grader operator	.75	per hour
Conc. mixer operator (1 sack capacity)	.75	per hour	Hoist engr. (2 or more active drums)	1.20	per hour
Crane operator	1.20	per hour	Jackhammer operator	.75	per hour
Crusher oper. (400 tons per day or over)	1.20	per hour	Labor, misc. unskilled	.50	per hour
Crusher oper. (under 400 tons per day)	.75	per hour	Lather	1.25	per hour
Drill dresser	1.20	per hour	Le Tourneau operator	1.20	per hour
Electrician	1.20	per hour	Master conc. finisher	1.25	per hour
Excavator oper. (types comparable to Le Tourneau)	1.20	per hour	Mason's tender	1.00	per hour
Glasier	1.12½	per hour	Mechanic	1.20	per hour
Iron worker	1.25	per hour	Painter	1.12½	per hour
Pump man	.75	per hour	Pitman	.50	per hour
Reinf. steel setter	1.12½	per hour	Plasterer	1.50	per hour
Roller operator	.75	per hour	Powder man	.75	per hour
			Power shovel operator	1.20	per hour
			Plumber	1.25	per hour
			Teamster	.62½	per hour
			Truck driver	.62½	per hour

BE IT FURTHER RESOLVED that the foregoing list of trades or occupations includes, to the best of our knowledge, all the classifications of employees who will be engaged in work on said Project other than executive, supervisory, administrative, clerical, or other non-manual works as such.

BE IT FURTHER RESOLVED that there be transmitted with this resolution the substantiating data upon which the foregoing determination is based.

The Commission also had under consideration the matter of accepting the offer of the United States of America to aid in financing the construction of highway improvements on the Woodburn-Mt. Hood Loop Secondary Highway at Molalla, in Clackamas County, and the acquisition of necessary lands and rights of way therefor. After discussion, the Commission accepted the said offer and, by affirmative vote of each of the Commissioners present, adopted the following resolution in regard thereto:

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF HIGHWAY IMPROVEMENTS ON THE WOODBURN-MT. HOOD LOOP SECONDARY HIGHWAY AT MOLALLA IN CLACKAMAS COUNTY AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of highway improvements on the Woodburn-Mt. Hood Loop Secondary Highway at Molalla in Clackamas County and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 82396-55

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.
Dated: Aug 5 1938
Docket No. Oreg. 1247-F

"State Highway Commission
of the State of Oregon,

Salem, Oregon.

1. Subject to the terms and Conditions (FMA Form No.230, as amended to the date of this Offer), which are made a part hereof the United States of America hereby offers to aid in financing the construction of highway improvements on Woodburn-Mt. Hood Loop Secondary Highway at Molalla (herein called the "Project") by making a grant to the State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$6,462.

2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later than 10 weeks from the date of this Offer and to complete such Project with all practicable dispatch, and in any event within 5 months from the commencement of construction.

AUG 9 1938

3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

"UNITED STATES OF AMERICA

Federal Emergency Administrator
of Public Works

(Sgd.) E. W. Clark

By _____
For the Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all rules and regulations relating to such grant a copy of which rules and regulations were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than ten weeks from the date of this offer; and to complete the work with all practicable dispatch, and in any event within five months from the commencement of construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

The Commission discussed the matter of securing P.W.A. grant funds to assist in the financing of rock production projects. Construction Engineer H. G. Smith advised that if the federal authorities will approve grants for such projects, the state could make a considerable saving because there are a number of such projects that should be undertaken soon. He particularly mentioned the following projects: Moro-Wasco County line rock production

AUG 9 1938

in Sherman County; Madras-Deschutes County Line rock production in Jefferson County; and the Provolt maintenance project in Josephine and Jackson Counties, which are estimated to cost a total of \$44,000. After discussion the Commission decided to secure P.W.A. funds to assist in financing these projects, if possible, and thereupon adopted the following resolution authorizing the State Highway Engineer to file applications with the United States of America for grants for such purposes:

A RESOLUTION authorizing R. H. Baldock, as State Highway Engineer, to file applications with the United States of America through the Federal Emergency Administration of Public Works for grants to aid in financing the construction of certain State Highway projects; and, the purchase of right of way necessary to such construction.

BE IT RESOLVED BY THE OREGON STATE HIGHWAY COMMISSION:

1. That R. H. Baldock as State Highway Engineer, be and he is hereby authorized to execute and file applications on behalf of the Oregon State Highway Commission with the United States of America for grants to aid in financing the construction of the following State Highway projects.

County	Section	Type of Work
Sherman	Moro-Wasco County Line	Rock Production
Jefferson	Madras-Deschutes County Line	Rock Production
Josephine & Jackson	Provolt Maintenance Project	Rock Production

2. That the said R. H. Baldock is hereby authorized and directed to furnish such information as the United States of America through the Federal Emergency Administration of Public Works may reasonably request in connection with the applications which are herein authorized to be filed.

The Attorney discussed with the Commission matters pertaining to the acquisition of right of way that is needed for a revision of The Dalles-California Highway across the property of the Lamb Lumber Company at Modoc Point. It appears that the residence buildings in Modoc Point are heated by steam from the Lamb Lumber Mill, and that the company's steam pipes are constructed overhead rather than underground. Further, that the company desires to continue to serve these buildings with overhead steam pipes, which will necessitate the construction of such pipe over and across the highway right of way, which is undesirable from the standpoint of the state. It also appears that the company is not willing to let the state have right of way across its property unless it is allowed to construct its steam pipe line over the highway.

AUG 9 1938

After considerable discussion the Commission instructed the Attorney to negotiate further with the company on the basis of allowing the overhead steam pipe, the company to accede to the wishes of the Highway Commission with regard to other matters, including right of way, and to condemn the right of way in the event the company will not settle with the Commission on such basis.

The Commission had under consideration the request of the Engineer to purchase an industrial power unit at an estimated cost of \$1,600, for use in connection with the operation of a crusher that is being used on the Wolf Creek Highway W.P.A. work. It was explained that power for such crushing operations is now provided by an RD-7 caterpillar tractor which is valued at \$7,000 and for which a rental of \$500 per month is charged. It was also explained that some 200,000 cubic yards of material will be crushed by this plant, in view of which it seems advisable to purchase a special power unit for the operation, thus releasing the RD-7 tractor for other work where the high rental rate would be justified. The Secretary advised that it is the recommendation of the Engineer that the new power unit be purchased. After discussion the Commission approved the Engineer's recommendation unanimously.

The Commission discussed the matter of construction, as an experiment, of woven wire fence along the cut slopes on the Santiam Highway west of a point known as Hogg Pass to prevent the recurrence of snow slides such as blocked this highway during the past winter. The Secretary presented a letter from the Engineer in which he recommends an expenditure of about \$3,500 for such purpose, which would provide for the construction of about 3,500 lineal feet of fence and cable; also, in which he recommends that this amount be added to the 1938 minor betterment budget if this project is approved, in view of the fact that no provision has been made heretofore for such expense.

After discussion, the Commission approved the installation of this fence as recommended by the Engineer.

A letter was presented from District Maintenance Superintendent D.J. Sage, Coquille, requesting instructions with respect to the disposal of a load of fir logs which were dumped on the Powers Secondary State Highway in Coos County. Mr. Sage advises that the logs are owned by S. A. Hutchinson, Powers, Oregon, and that they were dumped on the highway on July 18 by Mr. Hutchinson's truck driver, Mr. Jim Brewster, of Powers; further, that on July 19 he (Mr. Sage) notified both Mr. Brewster and Mr. Hutchinson to remove the logs from the highway right of way, but to date that has not been done. He requested instructions. The Commission ordered that the owner of the logs be again notified to remove them from the highway and if they are not removed within a reasonable length of time, that they be given to anyone desiring them; further, if no one can be found who is willing to remove the logs, then they are to be burned, as provided in Circular Letter No. 50, dated April 7, 1938.

A letter was presented from the Acting Forest Supervisor of the Willamette National Forest, Eugene, advising that the C.C.C. Camp at Belknap, which has heretofore supplied men and equipment to open up the Clear Lake

road between Belknap Springs and the South Santiam Highway, is being transferred to another location and will not be available for future maintenance work on this road, which leaves the Forest Service without sufficient funds to finance the class of work heretofore performed in removing snow and graveling the road prior to and after the time when the road is open to travel. He inquired as to what cooperation the Forest Service can receive from the state in view of the circumstances. In the discussion of this matter it was pointed out that the road in question is not a state highway, hence the Commission is without legal authority to expend state funds for its improvement. The Commission ordered that the Forest Supervisor be so informed.

The Secretary brought up the matter of authorizing the Assistant State Highway Engineer, Mr. C. B. McCullough, and Construction Engineer H. G. Smith, to make an inspection of concrete pavements in the State of Washington, at state expense, with a view to securing needed information with regard to the construction of joints in such type of pavement, there being many good examples of such work in that state. He said that on January 7, 1938, the Commission authorized these engineers to make this inspection trip but it now develops that Mr. McCullough will be unable to go and wishes the Labor Relations Engineer, Mr. Ray Webber, to go in his place. The Commission approved the change, provided it also meets with the approval of Governor Martin.

The Commission discussed and authorized the making of a location survey of the North River County Road for a distance of approximately 6 miles north from Salem, same having been recommended by the Engineer.

There being no further business to come before the Commission at this time, the meeting was adjourned at 11:30 o'clock a. m.

Construction Engineer

Secretary

Commissioner and Acting Chairman

Commissioner

AUG 9 1938

Pilot Rock, Oregon, August 30, 1938

The State Highway Commission met in special session at 10:00 o'clock a. m. in the Public Library Building, in accordance with notice previously given to the Pilot Rock City Council, as required by law, to secure expressions from the people of this town with respect to a proposed rerouting of the Oregon-Washington Highway in order to eliminate three right-angle turns in the present routing of such highway between the intersection of Main and Lewis Streets and a point near the intersection of the present highway with Balm Street. Present were:

E. B. Aldrich, Commissioner and Acting Chairman
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Also present were 15 local citizens.

Commissioner Aldrich called the meeting to order and stated its purpose. He then called upon the Commission's Attorney to explain the necessity for the meeting from a legal standpoint. The Engineer then exhibited a map showing the proposed change and explained the plans for the improvement and the engineering features involved, following which Commissioner Aldrich invited all present to express their opinions, either for or against the proposed change.

Mr. George W. Done, City Recorder, stated that, in his opinion, the proposed change is a good one and will provide for a permanent improvement. He endorsed the project. Mr. M. D. Orange stated that he also approved the project and advised that he has heard no objections to the proposed change.

Dr. George Smith, Mayor, also approved the proposed change and gave as his thought that the people of Pilot Rock will be perfectly satisfied with it. He inquired whether or not the change would necessitate construction of a new bridge over East Birch Creek, and, if so, who would be responsible for the old bridge. He was informed by the Engineer that a new bridge would be constructed on the new alignment and that the city of Pilot Rock would have to assume the responsibilities and obligations with respect to the old bridge.

Dr. Smith then advised that the U. S. Army Engineers propose to conduct a hearing in Pilot Rock on the following day with respect to improvements to control the floods in Birch Creek, and the question has arisen, if the old bridge has to be raised to meet the Government's requirements with respect to the flood control project, would the city have to pay this expense? He was informed by the Engineer that such expense would be the obligation of the city unless the Government would assume it. Commissioner Aldrich confirmed the Engineer's remark by stating that if the Commission proceeded to construct the highway on new alignment, then the maintenance of the old route and the old bridge located thereon would be the city's obligation because it would then

AUG 30 1938

not be legal to expend state money on the old route. He suggested that the Government might assume the expense of raising the old bridge if that appeared to be necessary in order to meet the flood control requirements.

Mr. Smith then inquired as to the possibilities of securing patrol headquarters at Pilot Rock. He was informed by the Engineer that in the past when highway maintenance was carried on by horse-drawn equipment, the maintenance sections were much shorter than now when such work is done by motorized equipment, and under the circumstances it did not appear likely that the patrol headquarters would be located in Pilot Rock because it is too close to Pendleton.

Mr. George Carus requested the oiling of the uncoiled portion of the Oregon-Washington Highway between Pilot Rock and Heppner. He was informed by the Engineer that no funds have been budgeted by the Commission for such improvement. Commissioner Aldrich advised that the section between Nye and Heppner is not on the Federal Aid System, so any work that is done on such section will have to be paid for with strictly state money, and in view of the fact that there is a shortage of state money at the present time, it is doubtful that the Commission could finance the work in the near future.

There being no others present desiring to be heard on any subject, Commissioner Aldrich concluded the hearing by thanking the people for the expressions given and advising them that the Commission would take their suggestions under advisement and would make its decision relative to the proposed change at a future date.

The meeting was adjourned at 10:20 o'clock a. m.

State Highway Engineer

Secretary

Commissioner and Acting Chairman

Commissioner

Pendleton, Oregon, August 30, 1938

The State Highway Commission met in regular session at 11:00 o'clock a. m. in the office of Commissioner E. B. Aldrich in the East Oregonian Building. Present were:

E. B. Aldrich, Commissioner and Acting Chairman
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

County Judge Bert Johnson and County Engineer Harry Taablyn, of Morrow County, were present. Judge Johnson inquired as to the plans of the

AUG 30 1938

Commission for the improvement of the Heppner-Rhea Creek Section of the Wasco-Heppner Secondary State Highway No. 300, in Morrow County. He was informed that the Commission has already budgeted \$25,000 for the improvement of this section and has also budgeted a like sum for the improvement of the Rock Creek Grade Section of this highway in Gilliam County. Also, that the Commission has filed an application for P.W.A. funds with which to finance the Rock Creek Grade improvement, and if the application is approved, then the Commission proposes to transfer the \$25,000 of state money from the Rock Creek Grade project to the Heppner-Rhea Creek project, providing for a project costing \$50,000 on that section, which it is thought would be sufficient to finance the entire section. The Engineer explained that the Commission's application for P.W.A. funds has been approved by the local P.W.A. authorities and has been forwarded to Washington, D. C., for final approval. Judge Johnson expressed satisfaction with the Commission's plans for these improvements.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state and submitted a list of such properties, together with prices that he recommended be paid for each. After careful study the Commission approved the Engineer's request. The following resolution in regard thereto was adopted by affirmative action of the members present:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Commission considered and denied the application of Mr. Lizzie Coleman to lease certain state-owned property adjacent to the Oregon Coast Highway at the north end of the Coos Bay Bridge, in Coos County.

The Attorney requested instructions relative to the sale of buildings located on property acquired from John G. Maycock in Lots 11, 12, 21, & 22, of Block 14, Pasadena Addition to Portland. He explained that he is in receipt of an offer from a Mr. William Dervoe to purchase these buildings for the sum of \$15.00 and he recommended acceptance of this offer, in view of the fact that the buildings have been advertised for sale several times and no satisfactory bid has been received. The Commission approved the sale of the buildings to Mr. Dervoe for the amount of his offer.

The Attorney reported that the condemnation case for the acquisition of the Volz property as an addition to Silver Falls State Park, in Marion County, has been concluded and that the jury set a value of \$10,000 on this property. He said that this is about \$1,500 more than the Commission's offer to Mr. Volz but nevertheless recommended payment of the amount set by the jury in view of the desirability of acquiring the property to complete the present state park. The Commission approved the recommendation unanimously, thereby confirming its previous decision when condemnation was ordered.

A letter was presented from Henry Houck, Eugene, expressing a desire to acquire certain state-owned property adjacent to the Pacific Highway near the Southern Pacific overcrossing between Junction City and Eugene. The Engineer recommended that the state retain possession of this property because it will be needed in the future as right of way in connection with the construction of the proposed 4-lane highway between Junction City and Eugene. In view of the Engineer's recommendation, the Commission decided not to sell this property.

The Attorney reported the sale of certain buildings on property acquired by the Commission from Jens Thompson and R. B. Park, and also the sale of portions of lots outside of the standard right of way limits purchased from N. Solomon and from the McGuire Construction Company, Portland, which properties were acquired by the Commission in connection with negotiations for right of way for the Interstate Avenue improvement in Portland. He explained the transaction in detail, which shows a profit to the state of \$82.70 on the land and a profit of \$217.30 on the houses, and, considering the cost of moving the houses, results in a net accrual to the State Highway fund of \$1,750.00. (For details see letter of August 24, 1938, directed to

AUG 30 1938

H. B. Glaisyer, Secretary.) The Commission by unanimous vote confirmed the sale of this property as reported.

A letter was presented from Mr. Jack H. Moore, Agate Beach, Oregon, offering to remove some sand houses from state-owned property located about 200 yards north of the old roundhouse in Newport, if the Commission will give him the material salvaged therefrom. The Commission referred the matter to the Engineer with power to act.

The Commission had under consideration for approval prices to be paid for the following parcels of right of way:

Right of way acquired from Jasper Longcore for the Salem-Pringle Creek Section of the Pacific Highway in Marion County;

Right of way acquired from Edith Russ Connick for the Fat Elk Creek-Coquille River Section of the Oregon Coast Highway in Coos County.

The Engineer explained that at a previous meeting the Commission authorized the purchase of these properties for certain amounts, including the cost of moving buildings, which was only estimated at the time. Since then, he said, quotations have been received from house-movers and it now appears that the cost of moving the buildings in each instance will amount to approximately \$500 more than the estimated costs. He recommended payment on the basis of the lowest bid received for the house moving. The Commission approved the recommendation unanimously.

The Attorney reported receipt of a letter from the manager of the Marcus Whitman Hotel, Walla Walla, Washington, concerning the sign that this hotel maintains adjacent to the Old Oregon Trail, near Pendleton, in which the manager states that the hotel owners do not want to do anything that is contrary to the wishes of the State Highway Commission and it is their intention to repaint the sign some time this fall, at which time the wording thereon will be changed to meet the Oregon requirements. After discussion, the Commission authorized the granting of a 30-day extension of time for the hotel people to correct the wording on their sign. The Attorney was instructed to advise the hotel management to that effect and to request them to have the proposed wording of the sign passed upon and approved by the State Highway Department before the sign is repainted.

The Engineer reported on the investigations made on the request of Mr. Stephen A. Hull, President of The Dalles & Southern Railroad Company, for permission to construct an approach road to the Columbia River Highway just east of The Dalles. The Engineer advised that, notwithstanding the plans and good intentions of the Railroad Company, he is of the firm belief that the approach road will be used by traffic entering it from the west and by traffic leaving it and traveling west to The Dalles, which would cause an undue traffic hazard for Columbia River Highway traffic. He recommended that permission for the construction of the approach road be denied, particularly in view of the fact that the company now has access to its property from North

2nd Street, The Dalles. The Commission approved the recommendation.

The Engineer reported on the request of the County Court of Harney County to use the Highway Department's facilities in connection with a radio installation that the County Court proposes to make in the southern part of Harney County. He said that the County Court proposes to install its radio station at Fields, Oregon, which is about 110 miles south of Burns, and in connection therewith wants to use the Highway Department's radio facilities at Burns so as to provide emergency communication for the people of the Fields area who now do not have telephone service. He pointed out that there are two important factors involved in the establishment of this station: first, the obtaining of a frequency assignment from the Federal Communications Commission; and second, the financing of the proposed station. He expressed doubt that the Federal Communications Commission would authorize the additional service, and estimated that the installation would cost approximately \$2,000. He pointed out that up to the present time it has been contrary to the policy of the Highway Commission to permit the use of its radio facilities for anything but state purposes, and gave as his thought that such policy is sound and should be continued; otherwise the Commission might be placed in an embarrassing position in disposing of other requests for similar service. After considerable discussion and in view of the circumstances, the Commission decided to deny the County Court's request notwithstanding the fact that the Commission would like to help the county out, if possible. The Engineer was instructed to so inform the County Court.

Consideration was given by the Commission to the offer of the Community Friendship Club of Coquille to contribute the sum of \$222.00 toward the cost of sidewalk construction along a short section of the Oregon Coast Highway just north of Coquille, particularly between highway engineer's stations 841+63 and 846+00. The Engineer advised that the section along which the sidewalk is desired is 900 feet long and approximately 600 feet thereof is across a rather high fill which would have to be widened in order to accommodate the walk. He estimated that to widen this fill and construct an oiled footpath would cost about \$595.00. He pointed out that the construction of a walk between the limits desired would not provide for a continuous sidewalk into Coquille, so that it would still be necessary for pedestrians to walk on the highway; also, that it is contemplated to improve the highway north of Coquille at some future date. He gave as his thought that it would be a waste of money to build the sidewalk now in view of the contemplated highway improvement, and accordingly recommended denial of the request. The Commission approved the recommendation.

The Commission signed a letter dated August 29, 1938, and directed to the City of The Dalles, authorizing the city to erect a monument on state-owned property adjacent to the Upper Columbia River Highway at the west city limits of The Dalles, as a memorial to the Lewis and Clark expedition. In the discussion of this matter it was brought out that while the city is sponsoring this project, the city will not assume the obligation to maintain it, but such work is to be taken care of by a corporation of local citizens who are particularly interested in the erection of the monument. It was also brought out that the land on which the monument is to be erected is being

AUG 30 1938

maintained by the State Highway Department. It was the Commission's thought that the maintenance of the area by two agencies is undesirable. Accordingly, the Commission decided to assume the maintenance of the entire tract, including the monument site, thus relieving the city of The Dalles and the local citizens from such obligation. The Commission ordered that maintenance of the area by the state be made a condition of the permit to the city.

The Assistant Attorney presented the offer of C. F. Howard for an exchange of properties adjacent to the lower Columbia River Highway at Houlton, in Columbia County. He advised that Mr. Howard offers to convey to the state a right of way across certain property owned by him, and described as Lots, 9, 10, 11, and 12, of Block 3, Georgetown Addition to Houlton, and to remove therefrom certain buildings, including a residence building and service station, provided the state will convey unto him that portion of Lots 7, 8, 9, 10, 11, and 12, of Block 1 of such addition outside of the standard width highway right of way, and will pay him for moving his residence building located on the property that he is deeding to the state. He recommended acceptance of the offer. The Commission considered the offer fair and equitable and thereupon authorized the exchange of properties on such basis.

The Assistant Attorney presented a tabulation showing an estimated expenditure of \$652,000 for right of way during the year 1938, based upon present projects assigned to the Right of Way Department for purchases of right of way. The Commission decided, in view of the present shortage of funds, not to increase the present right of way budget, which amounts to \$550,000 for this year.

The Attorney reported a compromise offer from Mr. Anton Roskoski for the acquisition of right of way needed for the Interstate Avenue project in Portland. He said that Mr. Roskoski now indicates a willingness to accept the sum of \$15,000 for his entire holdings, provided the state will deed to him that portion of Lots 3, 4, and 5 in Block 3, Kenview Addition, outside of the standard width highway right of way, and provided he is given permission to remove the fixtures from his present location. The offer is further conditioned upon his being able to purchase Lot 2 of Block 3. After discussion the Commission authorized the attorney to complete the deal with Mr. Roskoski on the basis of his offer if a more favorable settlement cannot be secured upon further negotiation.

The Commission had under discussion matters pertaining to the acquisition of right of way for the proposed revision of the Oregon-Washington Highway between Pendleton and Adams, in Umatilla County; and in this connection the Attorney reported the results of appraisals made by a committee of three appraisers previously appointed by the Commission. The Attorney advised that indications are that it will be necessary to condemn for most of this right of way. After discussion the Commission decided unanimously that the respective owners should be offered the amounts as shown by the appraisal for the respective holdings, and, if such offers are not accepted, then the right of way should be acquired by condemnation. The Commission ordered that right of way should be acquired for the entire section between Pendleton and Adams regardless of the limits of the proposed construction project. The

AUG 30 1938

following resolution authorizing the Attorney to condemn such right of way, and right of way for other projects, was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following sections of the state highway system of the State of Oregon, to wit:

Troutdale-Multnomah Falls Section of the Columbia River Highway
 Brothers-Harney County Line Section of the Central Oregon Highway
 Fleming Ranch-Shindler Bridge Section of the Albany-Lyons Highway
 Pendleton-Adams Section of the Oregon-Washington Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

as their respective interests may appear, and this Commission does hereby declare further that the said properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of deeds or other instruments necessary to complete the acquisition of the said properties or which descriptions may be used in the preparation of complaints in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portions of the state highway system.

AUG 30 1938

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owners and/or with the tenants or persons in possession, if there be any, of said parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if any there be, and in the event that no satisfactory agreements can be reached then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suits or actions as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney reported that condemnation proceedings will be necessary in order to acquire certain gravel pits and quarry sites that are needed for various highway improvements, and requested authority to commence such proceedings. The Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon and to acquire by donation, purchase, agreement, condemnation, or by the power of eminent domain title to land upon or under which there is gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment or pavement, and to declare the necessity and need for the acquisition thereof and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for the purposes of road construction, improvement, betterment, repair and maintenance, and for the purpose of the manufacture of road materials on the following section or sections of the state highway system of the State of Oregon, to wit:

Brothers-Harney County Line Section of the Central Oregon Highway

land and property owned by or in the possession of the following parties and/or persons, to wit:

AUG 30 1938

Charles A. Burris

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties contain gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits or other mineral deposits or formations suitable for road construction, improvement, betterment, or pavement, and that the said property or properties is or are necessary and needful and the acquisition thereof will be of advantage to the State of Oregon for the said purposes in order to make it possible for the State Highway Commission to construct, improve, maintain, and repair the said portion or portions of the said state highway system in accordance with the standards adopted by this Commission.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for said purposes and to prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties, or which said descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same shall be lands necessary for the purposes stated herein.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

AUG 30 1938

The Commission adjourned at 12:30 o'clock p. m. and reconvened at 1:00 o'clock p. m. in the same room, with the same persons present and participating.

The Engineer reported that on August 16, in accordance with authority previously given him by the Commission, he awarded to Fisher Bros., Oregon City, the contract for grading and surfacing the last Section of the Century Drive Secondary Highway, in Deschutes County, for which bids were taken on August 4, 1938, Fisher Bros. being the low bidders for this job, and the conditions of the award having been satisfied. The Commission approved the award of this contract, as reported.

The Commission had under discussion the matter of changing the plans for the Interstate Avenue improvement in Portland so as to eliminate the proposed centerline curbing, particularly between Columbia Boulevard and Harding Avenue, as has been suggested by certain business interests in that district. The Engineer recommended against the change, at least until the curb has been constructed and given a satisfactory trial. The Commission approved the recommendation and instructed the Attorney to advise the petitioners accordingly.

The Engineer requested authority to purchase one Simplex pipe forcing jack for use by sign crews in forcing 3/4-inch to 2-inch pipe under highway pavements. He estimated the cost of this jack at \$100. The Commission approved the purchase.

The Commission also approved an expenditure of approximately \$2,500 for landscaping the state highway shop premises at Salem to conform with similar work that is being done on the premises of the State Forestry Department and the state penitentiary. An expenditure of approximately \$1,700 was authorized by the Commission to finance the construction of a parking shed for the accommodation of cars belonging to the men who are employed at the state highway shops.

The Engineer reported that the U. S. Forest Service is now constructing a parking area at the intersection of the Mt. Hood Highway with the Coopers Spur Road for the benefit of winter sports enthusiasts of Hood River; and they are asking the state to surface this area and to keep it free of snow during the winter months. He estimated that it would cost about \$100 to furnish and place such rock surface, and recommended approval of the project. The Commission approved the recommendation by unanimous vote.

The Secretary presented a letter from the Roseburg Chamber of Commerce requesting a private hearing for a Southern Oregon delegation during the afternoon of Wednesday, September 21, for discussion of matters pertaining to the issuance of bonds to finance the reconstruction of the Pacific Highway between Roseburg and Grants Pass, and the Upper Columbia River Highway between Portland and The Dalles. The Secretary was instructed to inform the Chamber that it would not be convenient for the Commission to meet on Wednesday afternoon, but the Commission would be pleased to hear the delegation on the afternoon of Thursday, September 22, in the auditorium of the Public Service Building, Portland. (This meeting was later postponed to September 29.)

AUG 30 1938

The Commission had under discussion the matter of extending for a period of one year the contract with Julius Gunnell for operating the state-owned ferry across Coos River on the Coos River Secondary Highway at Enegren Ferry, in Coos County, the present contract expiring September 30, 1938. The Engineer advised that the present contract provides for the extending of the same for a period of one year if the Commission so desires. He said that Mr. Gunnell has furnished satisfactory ferry service during the past year, and recommended that the present contract be extended to September 30, 1939. The Commission approved the recommendation and so ordered. The matter was referred to the Attorney to prepare an appropriate agreement covering the matter.

A letter was presented from the County Court of Umatilla County in which the Commission was requested to receive bids on behalf of the County Court for the construction of the Milton Nursery Bridge over the Walla Walla River in Umatilla County, as a P.W.A. project. It was explained that the County Court simply desires the Commission to receive the bids on behalf of the county so the county can secure the benefit of the Commission's list of contractors and its experience in handling P.W.A. jobs, but that the county will assume the responsibility of awarding the contract and paying for the job. The Commission approved the request.

The Commission had under consideration the matter of accepting the offers of the United States of America, through the Federal Emergency Administration of Public Works, of grants to aid in financing the construction of a highway maintenance building at Albany, Oregon, and the construction of highway improvements on the Halsey-Sweet Home Secondary State Highway at Brownsville, in Linn County, and the acquisition of necessary lands and rights of way therefor. Commissioner Tou Velle moved the adoption of the following resolutions in regard thereto. After discussion, the motion was declared by Commissioner Aldrich to have passed by the unanimous vote of the Commissioners present:

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES OF AMERICA TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF A HIGHWAY MAINTENANCE BUILDING AT ALBANY, OREGON, AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of a maintenance building at Albany, Oregon, and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

(Letter on following page)

AUG 30 1938

"P. W. 83034-136

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.,
Dated: Aug. 27, 1938
Docket No. Oreg. 1282-F

"Oregon State Highway Commission.
Salem, Oregon

"1. Subject to the Terms and Conditions (PWA Form No. 230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of a highway maintenance building and the acquisition of necessary land (herein called the "Project") by making a grant to Oregon State Highway Commission (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$6,300.

"2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later than 12 weeks from the date of this Offer and to complete such Project with all practicable dispatch, and in any event within 4 months from the commencement of construction.

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

"UNITED STATES OF AMERICA

Federal Emergency Administrator
of Public Works

By (Sgd.) H. A. Gray
Assistant Administrator"

Be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State

AUG 30 1938

of Oregon and the State of Oregon agree to abide by all rules and regulations relating to such grant a copy of which rules and regulations were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than twelve weeks from the date of this offer; and to complete the work with all practicable dispatch, and in any event within four months from the commencement of construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES OF AMERICA TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF HIGHWAY IMPROVEMENTS ON THE HALSEY-SWEET HOME SECONDARY HIGHWAY AT BROWNSVILLE IN LINN COUNTY AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of highway improvements on the Halsey-Sweet Home Secondary Highway at Brownsville in Linn County and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 82750-213

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.,
Dated August 18, 1938
Docket No. Oreg. 1250-F

"State Highway Commission of the
State of Oregon,

Salem, Oregon.

"1. Subject to the Terms and Conditions (PWA Form No. 230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of highway improvements on Halsey-Sweet Home Secondary

AUG 30 1938

Highway at Brownsville, including the acquisition of necessary lands and rights of way (herein called the "Project"), by making a grant to the State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$14,130.

"2. By acceptance of this Offer the applicant covenants to begin work on the Project as early as possible but in no event later than 10 weeks from the date of this Offer and to complete such Project with all practicable dispatch, and in any event within 10 months from the commencement of construction.

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

"UNITED STATES OF AMERICA

"Federal Emergency Administrator
of Public Works

"By (Sgd.) H. A. Gray
Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all rules and regulations relating to such grant a copy of which rules and regulations were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than ten weeks from the date of this offer; and to complete the work with all practicable dispatch, and in any event within ten months from the commencement of construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three

AUG 30 1938

certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

The Commission had under consideration the adoption of resolutions establishing minimum wage rates to be paid by contractors for labor employed on the Molalla paving project in Clackamas County and on the Suntex Junction and Brothers building project, both of which are being financed as P.W.A. projects. After discussion the following resolutions in regard thereto were adopted by the Commission by unanimous vote:

Molalla Paving Project, PWA Docket No. Oregon 1247-F

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Clackamas County which is the locality in which the proposed project (hereinafter referred to as "project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said project and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by an examination of the wage rates paid on various jobs as listed on Exhibit "A" attached hereto, which work is comparable to the work to be performed in this project.

NOW, THEREFORE, Be It Resolved by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed:

Concrete mixer operator (5-bag and over)	\$1.20
Concrete mixer operator (4-bag and under)	1.00
Finishing machine operator	0.75
Concrete finisher - master	1.20
Concrete finisher (bull floaters, etc.)	0.90
Joint-dowel-tie bar setters	0.75
Ribbon setter, head	1.00
Ribbon setter, assistant	0.75
Batch weighman	0.75
Vibrator operator	0.75
General labor	0.50
Roller operator	0.75
Blade operator	0.75
Truck driver	0.50

Be It Further Resolved that the foregoing list of trades or occupations includes to the best of our knowledge all the

AUG 30 1938

classifications of employees who will be engaged in work on said project other than executive, supervisory, administrative, clerical, or other non-manual workers as such.

Be It Further Resolved that there be transmitted with this resolution the substantiating data from which the foregoing determination is based.

Suntex Junction and Brothers Building Project
PNA Docket No. Oregon 1245-F

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Deschutes and Harney Counties which are the localities in which the proposed project (hereinafter referred to as "project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said project and the prevailing hourly wage rates being paid in such localities to such employees for such work have been determined by an examination of the wage rates paid on various jobs as listed on Exhibit "A" attached hereto, which work is comparable to the work to be performed in this project.

NOW, THEREFORE, Be It Resolved by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the localities in which the project is to be constructed:

Electrician	\$1.00
Plumber	1.10
Sheet Metal Worker	1.00
Brick Layer	1.50
Carpenter	1.10
Concrete Finisher	1.00
Painter	1.00
Lather	1.00
Plasterer	1.50
Reinforcing Steel Setter	1.10
Shingler	1.00
General Labor	.50
Concrete Mixer Operator	.75
Truck Driver	.60

Be It Further Resolved that the foregoing list of trades or occupations includes to the best of our knowledge all the classifications of employees who will be engaged in work on said project other than executive, supervisory, administrative, clerical, or other non-manual workers as such.

AUG 30 1938

Be It Further Resolved that there be transmitted with this resolution the substantiating data from which the foregoing determination is based.

The following resolution modifying the reduced load limit heretofore in effect on the Cottonwood Bridge over the John Day River, on the Wasco-Heppner Secondary State Highway No. 300 was adopted by the unanimous vote of the Commission upon recommendation by the Engineer:

WHEREAS, on the 31st day of August, 1932, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on the following state highway bridge, to wit:

WASCO-HEPPNER SECONDARY STATE HIGHWAY NO. 300
300-18.84 Cottonwood Bridge over John Day River--5 tons

and

WHEREAS, subsequent to the passage of said resolution, temporary repairs have been made to said bridge so that it is no longer necessary to maintain or impose the reduced load limit to the extent fixed in said order and resolution with respect to said bridge so long as temporary repairs are effective:

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the following bridge, to wit:

300-18.84 Bridge over John Day River (commonly known as the Cottonwood Bridge) on the Wasco-Heppner Secondary Highway No. 300, at the Sherman-Gilliam County Line,

be modified so as to permit a total gross weight of combined load and vehicle not exceeding ten (10) tons upon any portion of the entire length of said bridge. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle; and

BE IT FURTHER RESOLVED that, in the event the said temporary repairs are destroyed or rendered ineffective by reason of high water in the John Day River or for any other reason whatsoever, the maximum permissible load limit of five (5) tons heretofore in effect shall immediately be restored.

IT IS HEREBY ORDERED that a certified copy of this

AUG 30 1938

resolution be furnished to the county clerks of Sherman and Gilliam Counties, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Engineer brought up for discussion the matter of applying for P.W.A. funds to assist in financing numerous rock production projects throughout the state. He said that he believed such projects are eligible for P.W.A. funds and that a saving to the state of \$185,000 will be effected if the Government will approve them. After discussion the Commission authorized the Engineer to file an application for P.W.A. funds to assist in financing such projects. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

A resolution authorizing R. H. Baldock, as State Highway Engineer, to file applications with the United States of America through the Federal Emergency Administration of Public Works for grants to aid in financing the construction of certain State Highway projects and the purchase of right of way necessary to such construction.

Be it resolved by the Oregon State Highway Commission:

1. That, R. H. Baldock, as State Highway Engineer, be and he is hereby authorized to execute and file applications on behalf of the Oregon State Highway Commission with the United States of America for grants to aid in financing the construction of the following State Highway projects:

1. Central Oregon Rock Production Project

Unit A. Lakeview rock production on Fremont (MP 127-158) and Klamath Falls-Lakeview (MP 86-92) highways in Lake County.

Unit B. Sisters rock production on the McKenzie (MP 84-99), McKenzie-Bend (MP 0-19), Santiam (MP 94-101), Redmond-Bend (MP 0-7) highways in Deschutes County.

Unit C. Mt. Hood Rock Production on the Mt. Hood Loop Highway (MP 75-95) in Hood River County.

Unit D. Chemult and Crescent rock production on The Dalles-California (MP 189-211) highway in Klamath County.

Unit E. Paisley and Silver Lake rock production on Fremont Highway (MP 32-48) and (MP 88-115) in Lake County

(Central Oregon Rock Production, continued)

Unit F. Brothers rock production on the Central Oregon highway (MP 21-43) in Deschutes County.

2. Southern Oregon Rock Production Project

Unit A. Coquille and Myrtle Point rock production on Oregon Coast Highway (MP 270-292) and Coos Bay-Roseburg (MP 3-16) highway in Coos County.

Unit B. Blue River Rock Production on the McKenzie highway (MP 30-56) in Lane County.

Unit C. Blachly rock production on the Siuslaw highway (MP 33-63) in Lane County.

3. Eastern Oregon Rock Production

Unit A. Ione rock production project on the Oregon-Washington highway (MP 9-28) in Morrow County.

Unit B. Spray rock production project on the John Day highway (MP 80-113) in Wheeler and Grant Counties.

Unit C. Echo rock production on the Columbia River (MP 187-192), Old Oregon Trail (MP 192-207), and Lexington-Echo (MP 20-36) highways in Umatilla County.

Unit D. John Day rock production on the John Day highway (MP 137-163) in Grant County.

Unit E. Vale rock production on the Central Oregon (MP 190-246) and John Jay (MP 281-293) highways in Malheur County.

Unit F. Prairie City-Unity resurfacing on the John Day highway (MP 176-216) in Grant and Baker Counties.

4. Northwestern Oregon Rock Production

Unit A. Sweet Home rock production on the Santiam highway (MP 15-31) in Linn County.

Unit B. Newport rock production on the Oregon Coast (MP 145-154) and Corvallis-Newport (MP 0-8) highways in Lincoln County.

AUG 30 1938

(Northwestern Oregon Rock Production, continued)

Unit C. Jewell-Olney rock production on the Nehalem highway (MP 8-28) in Clatsop County.

Unit D. Stayton resurfacing, oiling and rock production on the North Santiam highway (MP 3-30) and Shaw two miles west in Marion County.

2. That the said R. H. Baldock is hereby authorized and directed to furnish such information as the United States of America through the Federal Emergency Administration of Public Works may reasonably request in connection with the applications which are herein authorized to be filed.

A letter was presented from Robert W. Sawyer, Bend, member of the Publicity Advisory Board appointed by the Commission to advise relative to publicity matters, requesting an opportunity to discuss with the Commission matters pertaining to the selection of personnel of another committee to advise regarding the matter of signs, et cetera. The Secretary was instructed to invite Mr. Sawyer to be present at the next regular meeting of the Commission in Portland.

At 1:30 o'clock p. m. the Commission met with several delegations in the Pendleton City Hall.

A delegation from Milton was present in regard to the improvement of the present highway route through their city, where, they alleged, a dangerous condition now exists. They particularly requested improvement between a certain lumber yard and the railroad tracks. The delegation was headed by Dr. T. M. Birkbeck, Mayor, and consisted of the following: C. D. Hobbs, T. E. Westberg, Cecil Olinger, J. H. Maxwell, Glenn Price, Fred Fullerton, J. D. Whitman, Hugh Murray, Glenn Strickler, Glenn Staggs, F. J. Wheeler, Leonard Sample, Martin Bjorn, T. C. Elliott, C. E. Zerba, Dr. Harry Flower, Dr. Gillis, and George Hibbert, City Manager.

The Engineer explained the plans of the Commission for rerouting the highway south from the Washington-Oregon State line. The delegation asked the Commission to improve the present route regardless of the plans to reroute the highway. It was their contention that the present route would be used by traffic as much as any secondary state highway even after the new route is constructed because of the fact that the depot, warehouses, packing plants, and other facilities front on the present route and cannot be changed.

The matter of the railroad tracks on the present route was mentioned and in this connection Mr. Hibbert stated that the railroad company has a franchise to occupy this street but there is nothing in this franchise to prevent the moving of the tracks as may be desirable from the highway traffic standpoint. He also said that they are simply asking the Highway Commission to widen the present road and make certain improvements, and stated that

the city would assume the responsibility for acquiring the extra right of way. He filed with the Commission a letter signed by numerous warehouse, packing-plant and refrigeration-plant owners doing business in Milton, endorsing the request of the Milton City Council and the Chamber of Commerce for the proposed improvement.

Mayor Birkbeck urged the Commission to include the project in the 1940 construction program if it is not possible to do it sooner. He was informed by Commissioner Aldrich that the Commission is not in a position today to make any commitment of funds, particularly in view of the fact that there is a question whether or not the government officials would approve the Project for federal funds.

Mayor Birkbeck then stated that they are extremely anxious that something be done to remedy the present conditions and that they would be glad to accept any type of improvement that the Commission might decide upon. After further discussion, the Commission decided to give consideration to a reconstruction project through this town, costing about \$9,000, without curbs, sidewalks, et cetera.

A delegation from Helix, headed by L. L. Stockman, and consisting of the following: Tom Cook, George Woodward, Clint Mumford, L. Christopher, Isaac Christopher, and Frank Shristopher, Gunder Tergeson, Randolph Cook, Henry Campbell, Rufus Campbell, Raphael Raymond, Carl Engdahl, Fred Brown, W. A. Stockman, and Lowell Stockman, Allen Leek, Ed Snapp, Roy Penland, August Kuipers, Raymond Reece, and Gerald Gillespie, was present and asked the Commission to give serious consideration to the oiling of the Havana-Helix Secondary State Highway and to the construction of a connecting road between this highway and the proposed new highway between Pendleton and Adams. In this connection the Secretary presented a letter from the County Court of Umatilla County endorsing both projects but requesting that preference be given to the Havana-Helix Road. Mr. Stockman filed a letter from the Pendleton Chamber of Commerce also requesting the oiling of this road.

The Commission thanked the delegation for its appearance and advised that their request would be given consideration in the formulation of future construction programs.

At 2:00 o'clock p. m. the Commission returned to Commissioner Aldrich's office in the East Oregonian Building where bids as follows for the construction of the Klamath Falls maintenance building and for the sale of a residence building in North Portland were opened and read in conformance with previously published notice.

MAINTENANCE BUILDING AT KLAMATH FALLS

Angelo A. Doveri	\$19,540.95
Snook Brothers	19,678.00
W. D. Miller Construction Company	19,945.45
Ellsworth Gray	20,594.25
Contracting & Sales Company, Inc.	24,412.00

AUG 30 1938

RESIDENCE BUILDING IN NORTH PORTLAND
 1606 North McClellan Street, on Lots 11 and 12, Block 42, Kenton
 (Formerly owned by Emily A. Recard)

Lebeck & Son	\$303.00
Realty Finance Company	183.00
Rose Smollinski	120.00

The Commission decided to defer the award of the contract for the Klamath Falls maintenance building and accordingly referred the bids to the Engineer with power to make the award later. The following resolution covering the matter was adopted by the unanimous vote of the Commission:

Moved by F. L. Tou Velle and seconded by E. B. Aldrich that R. H. Baldock, State Highway Engineer, be and he is hereby empowered to award the contract for the construction of the Klamath Falls Building, FWA Docket Oregon 1177-F to Angelo Doveri, providing such award is satisfactory to C. C. Hockley, Regional Director, Public Works Administration.

After consideration of the bids received for the sale of the house in Portland, the Engineer recommended acceptance of the offer of the high bidder, Lebeck & Son, amounting to \$303.00. The Commission approved the recommendation and thereupon sold the building to Lebeck & Son at their bid of \$303.00.

Mr. J. De Wilde, Pendleton City Councilman, came before the Commission and requested the erection of stop- and go- signs at the following street crossings: Main and Court, Court and Gardner, Cottonwood and Court, Alta and Main, Webb and Main, and Matlock and Court. The Commission deferred action on this matter pending a report from the Engineer as to the results of the traffic counts that have been taken heretofore in the city of Pendleton for the purpose of ascertaining whether or not traffic signals are justified.

The Engineer brought up for discussion the matter of the purchase of additional station boxes to complete the dictograph system in the Salem office. He said that, in order to secure full efficiency from the present dictograph system, it would be necessary to purchase 8 additional station boxes, which will cost approximately \$2,500 installed. He recommended approval of such expenditure. The purchase was approved by the Commission by unanimous vote.

A letter was presented from the County Court of Yamhill County forwarding a resolution adopted by the County Court and a petition signed by 167 residents of McMinnville and vicinity, requesting a sidewalk on the Yamhill River Bridge, which is located on the Threemile Lane Secondary Highway near the east city limits of McMinnville, for the protection of school children and other pedestrians who are required to use this structure. The Engineer estimated that such sidewalk construction would cost about \$4,800. The Commission denied the request on account of lack of funds to finance the

improvement at the present time. The Engineer was instructed to bear the project in mind for future consideration.

A letter was presented from the Oregon Timber Operators requesting permission to truck logs over the Coos River Secondary Highway, in Coos County, during Saturday afternoons and Sundays, from a point one-half mile above Allegany to a point one-half mile below Allegany. The Commission granted the request upon recommendation of the Engineer.

The Commission discussed a letter from the County Court of Lane County suggesting that the state designate as a state secondary highway the county road which extends from the Oregon Coast Highway, at a point about 3 miles south of Florence, easterly across Woahink State Park to a place known as Canary. The Commission denied the request as a matter of policy, it being contrary to such policy to add more roads to the state secondary highway system at the present time.

A letter was presented from County Judge N. E. Glass of Lane County requesting a location survey of the Noti-Walton Section of the Route "F" Secondary Highway in Lane County, so as to permit the county to conduct a W.P.A. construction project thereon this winter. The Commission referred this matter to the Engineer for investigation and report.

A letter was presented from Champoe Chapter, D. A. R., requesting permission to erect a marker on the state secondary highway 5 miles north of Newberg, directing attention to the location of the grave of Ewing Young, a pioneer, who, it is alleged, was the first white man to die in what is now the State of Oregon. The Commission ordered that this matter be referred to Lewis A. McArthur, President of the Oregon Historical Society, for recommendation.

A letter was presented from the Lower Columbia Associated Chambers of Commerce inviting members of the Commission and its staff to join a caravan on September 10 from Portland to Seaview, Washington, it being the occasion of the Association's quarterly meeting. The Commission ordered that the Association be thanked for its invitation and informed that the Commission will be pleased to accept, if possible. The Engineer was delegated to represent the Commission on this occasion in the event that the Commissioners are not able to be present.

The Commission considered and referred to the Travel and Information Department a letter from the Oregon Women's Industrial Forum, recommending that consideration be given to the colored moving pictures made by Miss Kathryn Gunnell, Salem, in connection with the exhibit at the San Francisco World's Fair in 1939.

The Commission considered and ordered filed a resolution from the County Court of Klamath County granting to the National Park Service permission to erect a marker at the intersection of The Dalles-California Highway and the Whitney County Road, directing the general public to the Lava Beds National Monument.

The Commission considered and referred to the Engineer for investigation and report letters from the City of Coquille and the Coquille Chamber of Commerce, requesting the rerouting of the Coos Bay-Roseburg Highway through Coquille on Hall Street rather than on Taylor Street; also requesting certain signs directing traffic to the Oregon Coast Highway.

The Commission considered and ordered filed a letter from the North Bend Chamber of Commerce thanking the Commission for the improvement made on Sherman Avenue, in North Bend.

Reconsideration was given by the Commission to the request of Bowman-Hicks Lumber Company, La Grande, for permission to transport logs over a 2-mile section of the Wallowa Lake Highway just west of the town of Wallowa during Saturday afternoons and holidays. The Commission granted the request upon recommendation of the Engineer, subject to the condition that the permit will be revoked as soon as traffic conditions justify such action.

Similar action was taken by the Commission on the request of J. E. Twidwell, La Grande, to transport logs over the Wallowa Lake Highway during Saturday afternoons and holidays between the town of Elgin and Mile Post 27.0.

A letter was presented from O. W. Fraser, Marshfield, requesting permission to leave his gasoline pump on the right of way of the Oregon Coast Highway, near Marshfield, for a limited time, so as to give him an opportunity to obtain sufficient funds with which to finance removal of the same. Mr. Fraser also mentioned a dangerous condition that exists because of a faulty highway culvert located near his place of business. After discussion the Commission decided to give Mr. Fraser 3 months within which to remove his pump from the highway right of way and instructed the Attorney to so inform him. The matter of the culvert hazard was referred to the Engineer for investigation and report.

The Attorney reported that it would be a great convenience to his office if the Oregon Road and Highway Laws were recodified. He requested authority to employ someone to do this work. The Commission approved his request.

The Commission approved the Engineer's letter dated August 26, 1938, directed to Mr. Edwin G. Amme, Attorney, of Portland, in reply to Mr. Amme's letter of August 10 criticizing the Highway Commission for improving Sandy Boulevard between 14th Avenue and 45th Avenue, in Portland.

The Commission approved the Engineer's letter dated August 30, 1938, directed to J. R. Tomlinson, Secretary, Portland Chapter, National Electrical Contractors' Association, and his letter of the same date directed to J. E. Lake, Business Manager of the International Brotherhood of Electrical Workers, Local Union, relative to the contracting of traffic signal installations in the city of Portland. In such letters the Engineer stated that he would recommend to the Commission the contracting of such installations wherever the amount of work justifies such procedure and provided reasonable bids are received. Furthermore, he would recommend that, if possible, the installation of individual signals be deferred until there is a sufficient number of such installations to warrant contracting the same.

A letter was presented from Lofts & Son, Inc., Hood River, offering objections to the Commission's allowing the contractor on paving work in the city of Hood River to obtain materials from the state-owned quarry about 4 miles east of the city, because Lofts & Son have a suitable privately-owned quarry available for such purposes and are willing and anxious to furnish the materials required. The Engineer advised that it has been the policy of the Commission for a long time to permit counties and cities to take materials from state-owned quarries and it is his recommendation that the city of Hood River be allowed the use of the state quarry notwithstanding the protest of Lofts & Son. The Commission approved the recommendation.

The Commission considered and ordered filed a letter from McKenzie River Grange No. 878, Lane County, expressing appreciation for the guard fence and sight posts that have been constructed recently by state highway forces along the Leaburg Dam Section of the McKenzie Highway.

The Commission also considered and ordered filed a letter from Ed. W. Miller, Manager of the Oregon Coast Highway Association, thanking the Commission for the improvements under way and those completed on the Oregon Coast Highway throughout its entire length, and suggesting that the Commission take advantage of the prevailing low interest rates to secure additional funds to hasten the highway construction program; and a letter from Mr. Samuel L. Brown, Portland, recommending certain changes in the Oregon Motor Vehicle Law.

A letter was presented from the Bank of America, San Francisco, inquiring as to the interests of the State Highway Commission in the bridge across the Columbia River at Longview, Washington, and whether or not the Commission is considering taking over this bridge as a state highway obligation. The Engineer was instructed to inform the Bank that the Oregon State Highway Commission is not interested in this project at the present time.

The Secretary presented a letter from the Umatilla County Court requesting the oiling of the Weston-Tollgate Section of the Weston-Elgin Secondary State Highway. The Commission ordered the letter filed for future consideration.

Reconsideration was given by the Commission to the application of the West Coast Power Company to construct its pole line through the state park recently acquired by the Commission from the Pratt interests adjacent to the Oregon Coast Highway at the Lane-Lincoln County line. The Engineer recommended against the granting of the permit authorizing construction of this pole line through the body of the park. He pointed out that a permit has already been issued authorizing telephone pole line construction on the easterly side of the highway right of way and that it is contrary to the Commission's policy to authorize pole line construction on the westerly or ocean side of the highway. He recalled that at a previous meeting of the Commission authority was given to grant a permit to the West Coast Power Company to overbuild the telephone line, provided the power company would allow the telephone company the joint use of its poles, and in this connection he advised that such type of construction has been disapproved by the power company.

AUG 30 1938

and the telephone company and also by the chief engineer of the Public Utilities Commissioner's office because of the interference that the power circuit would cause to the telephone circuit, which leaves only two alternates; viz., construction of the power line underground on the easterly side of the highway right of way, or the construction of a power pole line along the extreme easterly line of the state park.

After considerable discussion, the Commission decided to require the power company to build its pole line on the extreme easterly edge of the state park or to install its circuits underground on the highway right of way.

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

Medford Concrete Construction Company, Contract No. 1943, for furnishing crushed materials in stock pile for the Valley Falls-Cinder Butte Section of the Lakeview-Burns and Fremont Highways, in Lake and Harney Counties, requested an additional extension of time, from November 1, 1937, to August 10, 1938, within which to complete this project. They gave no reason for failure to complete the project within the specified time limit. The Engineer advised that this contract was awarded on December 17, 1936, and that the completion date specified therein was May 31, 1937. He further advised that the Commission previously extended the completion date to November 1, 1937, subject to the condition that the contractor would be charged for the cost of engineering expense incurred by the state subsequent to the date of completion specified in the contract. He recommended that the extension now requested be granted subject to the same penalty, that the contractor be charged for all engineering expense incurred by the state subsequent to May 31, 1937. The Commission approved the recommendation by unanimous vote.

Warren-Northwest, Inc., contract No. 1972, for surfacing and oiling the Burns-Buchanan Section of the Central Oregon Highway, in Harney County, requested an extension of time from July 31 to August 2, 1938, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to the fact that they were required to do more work than the contract called for. The Engineer advised that the contract overran the time limit by only three days, the reason being that the contractor was required to place certain rip rap work that was not contemplated in the original contract. He recommended that the extension requested be granted without penalty and presented a letter from the United States Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

Rogers Construction Company, Contract No. 2029, for furnishing crushed rock in stock pile for the Kamela-La Grande Section of the Old Oregon Trail, in Union County, requested an extension of time of 73 days, from April 30 to July 12, 1938, within which to complete this job. The contractors alleged that bad weather conditions interfered

with the progress of their work and was the reason for their failure to complete the project within the specified time limit. The Engineer advised that the quarry from which the road materials were taken was at a high elevation and required dry weather for proper screening. Due to the late spring, he said, it was not possible to properly manufacture the materials during the early part of the year, so the contractor was permitted to defer the crushing operations until the weather was suitable. He further advised that the state has not incurred any extra engineering expense in connection with this job; also, that the contractor produced sufficient maintenance materials in ample time for this season's work. He recommended, in view of the circumstances, that the extension requested be granted without penalty. The Commission approved the recommendation.

Mountain States Construction Company, Contract No. 2031, for grading and paving the Smith Point-Young's Bay Bridge Section of the Oregon Coast Highway, in Clatsop County, requested an extension of time of two days, from June 30 to July 2, 1938, within which to complete this project. The Engineer advised that the contractor was required to do considerable extra work in connection with this job, particularly the removal of unsuitable fill material and refilling with material suitable as a subgrade for the new pavement. He recommended that the extension requested be granted without penalty and presented a letter from the United States Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

O. C. Yocom, Contract No. 2033, for surfacing the North Unit of the Missouri Flat Section of the Medical Springs Secondary Highway, in Baker County, requested an extension of time from May 31 to July 20, 1938, within which to complete this project. Mr. Yocom alleges that the award of this contract was made contingent upon the award of Contract No. 2032 for the construction of the Gibbs Ranch-Baker Section of the Baker-Unity Highway, which job was completed on March 15 at a time when it was impossible to commence the Missouri Flat project because of unusually wet weather. He further alleges that bad weather slowed up the progress of the work so that the job was not completed until July 20. The Engineer advised that the reasons given by the contractor for failure to complete this project within the specified time limit are substantially correct. He further advised that the state has not incurred any extra expense for engineering supervision, neither has the traveling public been inconvenienced by the delay. He recommended, in view thereof, that the extension requested be granted without penalty. The Commission approved the recommendation unanimously.

Harold Blake, Contract No. 2035, for construction of Portland cement concrete pavement on the Ross Station-Arward Section of the Pacific Highway, in Lane County, requested an extension of time of 13 days, from July 31 to August 13, 1938, within which to complete

AUG 30 1938

this job. He gave the following reasons for failure to complete the project within the specified time limit: (1) Wet weather conditions prohibited work until May 1, almost four months after the contract was awarded; (2) Unforeseen difficulties in developing aggregates for paving work, such as the gravel pit being full of water and materials being extremely hard to excavate, necessitating the use of dynamite. The Engineer advised that the only reason that he could give for failure of the contractor to complete the project within the specified time limit was that he preferred not to erect his plant until he knew whether or not he would be successful in securing the contract for the paving of the adjoining section. He recommended, in view thereof, that the extension requested be granted but that the contractor be charged for the engineering expense incurred by the state subsequent to the specified date of completion. He presented a letter from the United States Bureau of Public Roads concurring therein. The Commission approved the recommendation.

Leonard & Slate, Contract No. 2037, for grading, surfacing, and oiling the Butte Creek Section of the John Day Highway, in Wheeler County, requested an extension of time of 15 days, from July 31 to August 15, 1938, within which to complete this job. They attributed their failure to complete the job within the specified time limit to the extra work required to develop several pits from which to secure topping material for this project. The Engineer advised that the reason given by the contractors for failure to complete the project within the specified time limit is only partially correct inasmuch as his record discloses that only 6 days were lost by reason of development of the pits for roadbed topping. He further advised that the contract provided for the placing of loose talus materials as a final topping course but the contractors used quarry material instead and, due to the fact that such material was harder to handle than the talus material, requiring blasting, they lost about 4 additional days. He gave as his thought that the contract should have been completed by August 9, so that a 10-day extension of time should be sufficient. Accordingly, he recommended that an extension of time of 10 days be granted without penalty and that the contractor should be charged for all of the engineering expense incurred by the state subsequent to the expiration of such 10-day period, or subsequent to August 10, 1938. A letter from the United States Bureau of Public Roads concurring in such recommendation was presented. The Commission approved the recommendation unanimously.

Mountain States Construction Company, Contract No. 2047, for furnishing crushed materials in stock pile for the Mohler-Kilchis River Section of the Oregon Coast Highway, in Tillamook County, requested an extension of time of 8 days, from June 30 to July 8, 1938, within which to complete this contract. They attributed their failure to complete the project within the specified time limit to the fact that it was necessary to put an extra amount of material through their plant due to reject materials, before they could obtain a sufficient quantity of the various sizes of rock required to meet the

specifications. The Engineer advised that the state incurred no extra engineering expense due to this overrun of time limit and recommended that the extension requested be granted without penalty. The Commission approved the recommendation.

Schmeer, Williams, and Gentemann, Contract No. 2057, for furnishing crushed rock in stock pile for the Hood River Rock Production Project on the Columbia River and Mt. Hood Highways, in Hood River and Wasco Counties, requested an extension of time from July 31 to August 15, 1938, within which to complete this job. They said that their quarry consisted of a slide which had only a very shallow covering of clean rock on the surface and for such reason their progress was delayed because they had to move their equipment around often to secure the best supply of material possible for the state. The Engineer advised that, in his estimation, there is no reason why the contractors should not have completed this project within the specified time limit. He recommended, therefore, that the extension requested be granted but that the contractors be charged for all extra engineering expense incurred by the state subsequent to the specified completion date, July 31, 1938. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 1943, 1972, 2031, 2033, 2035, 2037, 2057, 2084, and 2091, for the construction of state highway projects, have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commissioners present:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts or modifications thereof and said jobs are now ready for acceptance:

Contract No. 1943, with Medford Concrete Construction Company, for furnishing crushed rock for the Valley Falls-Cinder Butte Section of the Lakeview-Burns and Fremont Highways, in Lake and Harney Counties. Completed July 21, 1938.

Contract No. 1972, with Warren Northwest, Inc., for topping and road mix surfacing on the Burns-Buchanan Section of the Central Oregon Highway, in Harney County. Completed August 2, 1938.

Contract No. 2031, with Mountain States Construction Company, for grading and paving the Smith Point-Youngs Bay Bridge Section of the Oregon Coast Highway, in Clatsop County. Completed July 2, 1938.

Contract No. 2033, with O. C. Yocom, for surfacing

AUG 30 1938

the North Unit, Missouri Flat Section of the Medical Springs Secondary Highway, in Baker County. Completed July 20, 1938.

Contract No. 2035, with Harold Blake, for paving the Ross Station-Arward Section of the Pacific Highway, in Lane County. Completed August 13, 1938.

Contract No. 2037, with Leonard & Slate, for grading, surfacing, and oiling the Butte Creek Section of the John Day Highway, in Wheeler County. Completed August 13, 1938.

Contract No. 2057, with Schmeer, Williams & Gentemann, for furnishing crushed rock on the Columbia River and Mt. Hood Highways, in Hood River and Wasco Counties. Completed August 10, 1938.

Contract No. 2084, with A. M. Jannsen Drilling Company, for drilling a well near Brothers, on the Central Oregon Highway, in Deschutes County. Completed August 6, 1938.

Contract No. 2091, with J. C. Compton, for surfacing and oiling the Wigrich-Buena Vista Section of the Independence-Buena Vista County Road, in Polk County. Completed August 22, 1938.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Southern Pacific Company relative to the proposed Albany Overcrossing Project.

Agreement with Mountain States Power Company covering revision of the company's water lines adjacent to the Albany Grade Separation Project, in Albany.

Agreement with E. F. and W. F. Philpott, providing for disposal of their claim for extra compensation arising out of their contract No. 1944 with the State Highway Commission for the construction of a bridge over Necarney Creek on the Oregon Coast Highway, in Tillamook County.

Agreement with L. H. and F. R. Williams for the drilling of test holes or wells along the John Day Highway.

AUG 30 1938

Agreement with Henry and Anna A. Blankinship, husband and wife, providing for the substitution of a fill for a certain cattle pass located at Mile Post 24.13 on the Santiam Highway, in Linn County, being designated as Bridge No. 151-16.

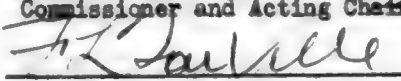

Bargain and Sale Deed conveying unto James J. Tuma a parcel of land containing 0.25 acre, situate in the N $\frac{1}{2}$ of Section 23, T. 12 S., R. 2 W., W. M., Linn County, Oregon, being Right of Way Transaction No. 6090.

Bargain and Sale Deed reconveying unto Douglas County certain lands formerly owned by W. G. Hoagland and which were acquired by the state by mistake, at tax sale.

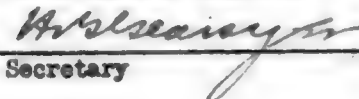

Permit extending to W. E. Purkeson the privilege of disposing of certain materials from a quarry which the State Highway Commission has under lease from him.

The Commission adjourned at 3:00 o'clock p. m.

Commissioner and Acting Chairman

Commissioner

State Highway Engineer

Secretary

Portland, Oregon, September 19, 1938

The State Highway Commission met in regular session at 7:30 o'clock p. m. in Room 204, Benson Hotel. Present were:

E. B. Aldrich, Commissioner and Acting Chairman
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration, the Commission approved the request and adopted the following resolution by the unanimous vote of the Commissioners present:

SEP 19 1938

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The State Parks Superintendent, S. H. Boardman, was present and brought up for discussion the matter of acquiring strips of undeveloped land lying between the Oregon Coast Highway and the Pacific Ocean from Newport to Yachats. He gave as his thought that the state should acquire these properties so as to preserve an unrestricted view of the ocean from the highway, and that the Commission would be justified in paying as much as \$500 an acre, if necessary. After discussion the Commission authorized the State Parks Superintendent to negotiate for the strips and report later the amount of money involved to acquire them.

The Commission considered the request of Robert E. Porter for the leasing of a parcel of land on the Grubb College Section of the Dayton-Amity Highway in the vicinity of Station 115, which property contains 6.14 acres outside of the standard right of way limits, and was acquired from R. A. Harpole under right of way file No. 3262 (main office file No. 3170). After consideration, the Commission authorized the leasing of the property for the term from October 1, 1938, to September 30, 1939, both dates inclusive, for a consideration of \$30.70 to be paid in advance.

The Commission had under consideration the matter of permitting Mr. K. N. Lucas to assign or transfer to a Mr. William G. Folsom a certain lease covering state-owned property situate adjacent to the Siuslaw Highway in the vicinity of Rainrock, being State Highway Commission Miscellaneous Contract No. 168. The Engineer advised that Mr. Lucas now holds a lease to the property in question and the same does not expire until March 1, 1943; further,

that while the lease is in the name of Mr. Lucas, his father-in-law, Mr. Folsom, has been conducting a service station on the property for the last four years and it is Mr. Lucas's desire to sell his interest to Mr. Folsom, if the Highway Commission will approve the transfer of the lease rights.

The Engineer gave as his thought, in view of the fact that the lease has nearly five years more to run, that there would be no objections to such transfer. However, he suggested that, if the Commission approves the transfer, it be subject to the condition that the lease will not be renewed after its expiration date and that the lessee turn the property back to the state in a satisfactory condition. He recommended favorable consideration of Mr. Lucas's request on such basis. The Commission approved the recommendation by the unanimous vote of the Commissioners present.

The Commission had under discussion a letter from Mr. H. Cogeshall, who is asking the Commission to complete the acquisition of right of way for a proposed revision of the Pacific Highway across his property south of Grants Pass so that he may properly develop the balance of his property. The Engineer advised that the Commission has in mind a revision of the highway at this point but no money has been allocated for the same for expenditure either this year or next year, so there is a question whether or not the Commission should proceed with the acquisition of right of way at this time. The Commission decided, in view of the circumstances, to defer the purchase of the right of way across Mr. Cogeshall's property until it is actually needed for construction, unless a very advantageous deal can be made for the same.

A letter was presented from County Judge Siegmund, Marion County, in regard to securing reimbursement for funds advanced by the county for the acquisition of 200 acres of government land as an addition to the Silver Creek Falls State Park. Judge Siegmund alleged that this purchase was made by the Marion County Court in 1931 as an accommodation to the State Highway Commission, it appearing at that time that the state was unable to make the purchase because of certain federal restrictions, and the County Court agreed to advance county funds for the purpose, with the understanding that it would be reimbursed later by the state. Judge Siegmund advised that the county paid \$500 for this land and is now ready and willing to deed it to the state as soon as the state reimburses the county in the amount of the purchase price. After discussion the Commission approved payment of \$500 to the county upon receipt of the deed conveying the tract to the state.

Mr. J. R. Hulburt, President of the Sunset Logging Company, Portland, came before the Commission in regard to exchange of certain timbered areas adjacent to the Wolf Creek Highway. It appears that in the acquisition of right of way for this highway it was necessary to acquire certain properties that are of no value to the state from the right of way or park standpoint, which properties are in close proximity to the lands of the Sunset Logging Company, which are now being logged off. Also, that the Sunset Logging Company owns certain timber tracts adjacent to the highway which should be owned by the state in order to preserve the scenic beauty of the highway; and that the Sunset Logging Company is willing to exchange its holdings for the state's property if satisfactory arrangements can be made with the Commission. Mr. Hulburt advised that an immediate decision is required because

the company has now completed its operations on the tract adjacent to the state property and plans to take up its railroad tracks immediately unless it can secure the state's timber. Furthermore, the company plans to cut the timber next to the highway as its next operation unless the state acquires it. After considerable discussion, the Commission told Mr. Hulburt that a decision would be rendered on the following day if possible and in the meantime the tract would be inspected by the State Parks Superintendent and the Construction Engineer, and a report rendered for the Commission's guidance. (This matter was reconsidered by the Commission at 2:00 o'clock p. m. on the following day in the Benson Hotel, at which time the Commission considered the report of the State Parks Superintendent and the Construction Engineer. Mr. Hulburt was also present at such meeting. Mr. Hulburt made the Commission an offer for exchange of properties, which was refused. The matter of the state acquiring the timber strip along the highway on a cash basis was then discussed. Mr. Hulburt advised that he would have to consult his associates relative to sale on such basis and would let the Commission know so that the matter could be discussed at the Commission's next regular meeting on September 29. This concluded the conference. Following the conference the Commission discussed the matter further, and authorized the Engineer to employ Mr. Eugene Walsh of Brown & Brown, Logging Engineers, Portland, to assist in appraising a 300-foot strip of the company's timber land along each side of the highway right of way so that such information would be available when the matter is discussed with Mr. Hulburt on September 29.)

The Engineer reported on the matter of installation of traffic signals in the city of Pendleton, as was previously requested by the Pendleton City Council. He advised that there is not enough traffic along the route of the Old Oregon Trail to justify the expense of installing "stop" and "go" signals at the intersections requested, but a study of traffic reports indicates that the installation of flashing beacons at the intersection of Court Street with Main Street and with Matlock Street is justified. After discussion the Commission authorized the installation of such flashing beacons, provided the city of Pendleton will pay one-half the cost thereof, which is in line with the Commission's recently adopted policy with regard to such matters.

The Engineer reported on the matter of permitting sidewalk construction along the Santiam Highway in the town of Sweet Home. It appears that the right of way, for the most part, is 80 feet wide, but along one particular section it is only 60 feet wide, and at such location property owners are desirous of constructing a sidewalk on the highway right of way, which will not conform to the sidewalk already in place where the right of way is 80 feet wide. It also appears that the Commission has plans for the widening of the right of way to 80 feet throughout this town at some future date, but, because of the expense involved, does not contemplate doing so now. It further appears that the property owners are very anxious to construct their sidewalk and that some of them are willing to donate right of way as may be needed to provide a uniform improvement, but the project is blocked because other property owners feel that a 60-foot right of way is wide enough and that they should be paid for the land taken to provide a wider one. After discussion, and in view of the desire of the Commission to help the town in this matter as much as possible, the Commission authorized the securing of options for

the extra right of way that will be needed. A report on the subject is to be rendered to the Commission as soon as possible.

The application of Mr. Bollinger, Pendleton, to maintain a finger-board sign reading "Bollinger Wood Camp", along the Old Oregon Trail near Emigrant Springs Park, had the attention of the Commission. It appears that Mr. Bollinger has a wood camp in this vicinity and that many people from Pendleton who purchase wood from him have difficulty in locating his place because of the absence of an appropriate sign on the highway. It appeared to the Commission that a sign worded as Mr. Bollinger desired would not meet the legal requirements, hence the request for the same, so worded, was denied; however, the Commission approved the erection of a sign worded "Bollinger Road", it being the opinion of the Commission that such a sign would meet the requirements.

The Engineer reported that in conformance with authority previously granted him by the Commission he awarded, on September 2, 1938, to Angelo Doveri, Klamath Falls, the contract for the construction of the Klamath Falls maintenance building, for which bids were taken by the Commission on August 30, 1938, Mr. Doveri's bid being the low one received for this project, and the conditions of the award having been satisfied. The Commission approved the award of this project as reported.

The matter of reducing the load limit on the Neahkahnie Mountain Chasm Bridge on the Oregon Coast Highway, in Tillamook County, had the attention of the Commission. The Engineer recommended that loads be restricted to a maximum of 10 tons in view of the fact that the bridge has been damaged by rocks rolling down the mountain side and is considered unsafe for loads weighing in excess of 10 tons. The Commission approved the Engineer's recommendation and adopted the following resolution in regard thereto by the unanimous vote of the members present:

WHEREAS, the Oregon Coast Highway (Neahkahnie Route) has been designated and declared to be and is a state highway and is being maintained by the State Highway Commission, pursuant to the laws of the State of Oregon as a state highway;

AND WHEREAS, on the said state highway there is located a certain bridge structure which, in the judgment of the State Highway Commission, is incapable of safely carrying the traffic to which it is being subjected, and in order to protect said bridge structure against damage and injury and in order to safeguard traffic over said bridge structure it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said bridge structure and of the traffic which uses the said bridge structure that the maximum weights now permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has, after due investigation, determined and found, and it is the judgment of the Commission that the maximum gross loads which shall be permitted

SEP 19 1938

upon any single span of the said structure at any time shall be reduced and fixed as in this order provided;

NOW, THEREFORE, the premises being in part as above stated and the State Highway Commission having as a result of due investigation found that the bridge structure above referred to and herein-after designated is incapable of safely sustaining or supporting a total gross load in excess of that specified hereinbelow;

IT IS HEREBY ORDERED, that the total gross weight of combined load and vehicle which at any one time shall be permitted upon any single or individual span of the bridge structure hereinbelow designated shall not exceed the limits given and set forth hereinbelow. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle. This combined gross weight shall not exceed the limits given hereinbelow, to wit:

OREGON COAST HIGHWAY (NEAHKAHNIE ROUTE)
9A-40.0 Neahkahmie Mountain Chasm Bridge 10 tons

IT IS FURTHER ORDERED that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 83 of Chapter 360, Oregon Laws 1931, Section 55-2707 Oregon Code 1935 Supplement, shall be in full force and effect from the 19th day of September, 1938, until rescinded, modified or revoked by order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named bridge structure so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED that a certified copy of this order be furnished to the county clerk of the county in which said bridge is located and that a certified copy of said order be furnished the Superintendent of the Department of State Police for his information.

The Engineer requested authority to purchase the following equipment:

1. One automobile of a type similar to the Buick assigned to Division Engineers, for use of the Commission's Attorney, the Attorney's old car to be traded in as part purchase price; estimated net cost \$900. (He explained that the Attorney's car has been driven 75,000 miles and is badly in need of replacement.)
2. 15 push-type snow plows, to be used on lightweight trucks, estimated total cost \$2,100.
3. 5 - 45 H.P. tractors equipped with angle dozers, with 5 obsolete tractors to be traded in as part purchase price. Estimated net cost \$20,000.

SEP 19 1938

After discussion the Commission approved the purchases as requested.

The Commission considered and approved payment of the bill of the American Road Builders Association in the amount of \$5.00, covering membership of the State Highway Engineer in such association during the year 1938.

The Commission considered the adoption of minimum wage rates to be paid by contractors for labor employed on the Brownsville Section of the Halsey-Sweet Home Secondary Highway, in Linn County, being P.W.A. Docket No. Oregon 1250-F. The following resolution in regard thereto was adopted by the unanimous vote of the Commissioners present:

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Linn County which is the locality in which the proposed project (hereinafter referred to as "project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said project and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by an examination of the wage rates paid on various jobs as listed on Exhibit "A" attached hereto, which work is comparable to the work to be performed in this project.

NOW, THEREFORE, Be It Resolved by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed:

Shovel Operator	\$1.20	Truck Driver (over 1½-ton manufacturer's rated capacity)	\$0.75
Caterpillar Operator (Le Tourneau)	1.20	Distributor Operator	0.75
Retort Operator	0.85	Power Broom Operator	0.75
Mechanic	1.20	Leverman	0.75
Pumpman	1.00	Leader Operator	0.75
Boilerman	0.75	Miscellaneous Labor	0.50
Oiler	0.75	Retort Fireman	0.80
Blademan	0.75	Truck Driver (1½-ton manufacturer's rated capacity or less)	0.50
Roller Operator	0.75		
Dumpman	0.75		

Be It Further Resolved that the foregoing list of trades or occupations includes to the best of our knowledge all the classifications of employees who will be engaged in work on said project other than executive, supervisory, administrative, clerical, or other non-manual workers as such.

Be It Further Resolved that there be transmitted with this

SEP 19 1938

resolution the substantiating data from which the foregoing determination is based.

The Commission also had under consideration acceptance of the offers of the United States of America to aid by way of grant in financing the construction of the following P.W.A. projects:

1. Surfacing and oiling the Cape Arago Secondary Highway in Coos County, P.W.A. Docket No. Oregon 1322-F.
2. Construction of a bridge over the Umpqua River on the Pacific Highway, in Douglas County, P.W.A. Docket No. Oregon 1298-F.
3. Surfacing and oiling a section of the Baker-Cornucopia (Homestead) Highway, in Baker County, P.W.A. Docket No. Oregon 1294-F.
4. Deschutes River-Madras Section of the Warm Springs Highway, in Jefferson County, P.W.A. Docket No. Oregon 1287-F.

Commissioner Fou Velle moved the adoption of the following resolutions accepting the said offers. After discussion, the motion was declared by Commissioner Aldrich to have passed by the unanimous vote of the Commissioners present:

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE CAPE ARAGO SURFACING AND OILING IN COOS COUNTY, AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

BE IT RESOLVED by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the Cape Arago Surfacing and Oiling in Coos County and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P.W.83475-59

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.

Dated: Sep 13 1938

Docket No.Oreg.1322-F

"State Highway Commission of the State of Oregon
Salem, Oregon.

"1. Subject to the Terms and Conditions (PWA Form No.230, as amended to the date of this Offer), which are made a part hereof,

SEP 19 1938

the United States of America hereby offers to aid in financing the construction of highway improvements, including acquisition of necessary lands and rights of way (herein called the "Project") by making a grant to State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$19,300.

"2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later than 12 weeks from the date of this Offer and to complete such Project with all practicable dispatch, and in any event within 8 months from the commencement of construction.

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

"UNITED STATES OF AMERICA

"Federal Emergency Administrator of Public Works

By (Sgd.) H. A. Gray
Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all rules and regulations relating to such grant a copy of which rules and regulations were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than twelve weeks from the date of this offer; and to complete the work with all practicable dispatch, and in any event within eight months from the commencement of construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith

SEP 19 1938

to send to the Federal Emergency Administration of Public Works three certified copies of this resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE UMPQUA RIVER BRIDGE ON THE PACIFIC HIGHWAY IN DOUGLAS COUNTY, AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the Umpqua River Bridge on the Pacific Highway in Douglas County and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P.W.83499-8

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.

Dated: Sep 12 1938

Docket No.Oreg.1298-7

"State Highway Commission of the State of Oregon
Salem, Oregon

"1. Subject to the Terms and Conditions (PWA Form No.230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of a highway bridge with approaches, including the acquisition of necessary land and rights of way (herein called the "Project"), by making a grant to the State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$54,652.

"2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later than 12 weeks from the date of this Offer and to complete such Project with all practicable dispatch, and in any event within 10 months from the commencement of construction.

SEP 19 1938

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all rules and regulations relating to such grant a copy of which rules and regulations were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than twelve weeks from the date of this offer; and to complete the work with all practicable dispatch, and in any event within twelve months from the commencement of construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies

of the proceedings of this Commission in connection with the adoption of this resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

The Commission considered and denied a resolution from the City Council of the City of Enterprise, Wallowa County, requesting the placing of a speed limit of 35 miles per hour on the Minam Hill Section of the Wallowa Lake Highway, and on the secondary highway around Wallowa Lake, it being the opinion of the Attorney that the Commission is without legal authority to fix the speed limit on these particular sections of highway.

The Commission considered a letter from the Marshfield Chamber of Commerce, and a resolution from the Fairview North Fork Grange No. 739, Coos County, in which the Commission was asked to designate as a secondary state highway the old Coos Bay Wagon Road between Roseburg and Coos Bay. The Commission denied the request because there are no funds available to finance improvements to this road and for the further reason that the Commission considers that Coos County now has too large a mileage of secondary highways in comparison with the other counties of the state.

The Commission considered a resolution from the Astoria Chamber of Commerce, giving as its understanding that a proposal has been submitted to the State Highway Commission to issue \$18,000,000 in bonds to finance the reconstruction of the Pacific Highway south of Roseburg, and the reconstruction of the Columbia River Highway between Pendleton and Portland; and advising the Commission that it is opposed to the issuance of any bonds for highway purposes. The Commission ordered the communication filed.

The Secretary presented a letter from the County Court of Lane County and a petition signed by numerous residents of Eugene and vicinity in which the Commission was requested to name the old Pacific Highway between Junction City and Eugene "East Highway No. 99", and to erect an appropriate sign at each end thereof. It appeared to the Commission that what these people want is merely an alternate route for U. S. Highway No. 99 between Junction City and Eugene. The Engineer advised that the American Association of State Highway officials is strongly opposed to naming alternate routes for U. S. highways because of the confusion that develops when there is more than one route of a similar name. Furthermore, the Association will not approve the naming of any alternate route. In view of the circumstances, the Commission denied the request and ordered that the petitioners be so informed.

The Commission considered and denied a petition signed by numerous residents of Hillsboro and vicinity urging the oiling of the Farmington Secondary Highway, in Washington County, from the end of the present oiled section to a place known as Campbells Bridge. The Commission denied the request because of lack of funds to finance the improvement.

A resolution was presented from the County Court of Wallowa County requesting the resurfacing and oiling of that portion of the Enterprise-Flora

Highway from Enterprise to the U. S. Forest boundary, a distance of about 14 miles, during the 1939 season. The Secretary was instructed to inform the County Court that the Commission cannot now commit funds to finance this improvement but will consider it in the formulation of the 1939 construction program.

A letter was presented from the Lane County Court, asking for a location survey of the Walton-Noti Section of the Route "F" Secondary State Highway in Lane County, so as to permit the County Court to conduct a W.P.A. construction project thereon during the coming winter. The Commission approved the request by unanimous vote upon recommendation of the Engineer.

A letter was presented from Mayor Geo. W. Melville, Empire, Oregon, thanking the Commission for improvements already completed on the Cape Arago Secondary Highway between Tarheel and Charleston and on the Oregon Coast Highway in North Bend, and requesting completion of the Cape Arago Project through to Cape Arago State Park during the 1939 season. The Commission decided that the P.W.A. project that is now included in the P.W.A. construction program is all that it can finance on the Cape Arago road at this time, and ordered that Mayor Melville be so informed.

A resolution was presented from the Forest Grove Chamber of Commerce, suggesting that a bridge on the Wilson River Highway be dedicated in honor of Mr. Loyal M. Graham, Forest Grove, who has given much of his time and money in the interests of the Wilson River Highway project. The Commission considered that the dedication of a bridge in honor of Mr. Graham would be a fine tribute to him, but deferred a definite decision thereon pending a recommendation from Mr. Lewis A. McArthur, President of the Oregon Historical Society. The Secretary was instructed to secure such recommendation.

A letter was presented from Mr. Robert W. Sawyer, Bend, relative to the Commission's plans for the construction of the Third Street railroad grade separation project in Bend. Mr. Sawyer advised that rumors are to the effect that the Commission contemplates postponement of this project until next year, and gave as his thought that this would be inadvisable in view of the fact that the San Francisco World's Fair will be in progress in 1939, which is bound to create an unusual amount of traffic on The Dalles-California Highway. It was his thought that the grade separation project should be completed before that traffic begins, so as to avoid the necessity for detours. The Engineer advised that this is a costly project and cannot be financed at the present time in view of the condition of the Commission's finances, unless some other project is deferred. He also advised that, notwithstanding the fact that federal funds are to be used to pay the costs, there are numerous nonparticipating items that will have to be paid with state funds, including right of way and damages to adjacent properties. Furthermore, the state would have to advance the money to finance construction and it might be six or eight months before reimbursement could be secured from the Government. He pointed out that this is a desirable project but on account of the uncertainty of funds to finance it there is a question whether or not it should be contracted this year. After considerable discussion, the Commission deferred a definite decision in this matter pending an additional report from the

Engineer as to approximately what the damages will amount to and the amount of the state expense involved. Such report is to be rendered to the Commission at its next meeting. The Secretary was instructed to so inform Mr. Sawyer.

A letter was presented from the County Court of Gilliam County, requesting the oiling of secondary highways within Gilliam County, east and west as far as possible from Condon. The Commission decided that the reconstruction of the Rock Creek grade section of the Wasco-Heppner Secondary Highway is all that it is able to finance at the present time, and ordered that the County Court be so informed.

The Commission considered and ordered filed a letter from the Lower Columbia Associated Chamber of Commerce, advising that the Association at its meeting on September 10 adopted a resolution definitely supporting the general policy of the Highway Departments of the states of Oregon and Washington relative to the inauguration and operation of free ferry service across the Columbia River between Astoria, Oregon, and Megler, Washington; also, advising that their organization will support any and every appeal for a free ferry arrangement that may be presented whenever its cooperation is requested.

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

Consolidated Highway Company, Inc., Contract No. 1984, for grading the East Unit of the Jordan Creek Section of the I.O.M. Highway, in Malheur County, requested an extension of time from February 28 to August 29, 1938, within which to complete this project. They advised that a combination of circumstances prevented the completion of the project within the specified time limit, particularly adverse weather conditions which prevailed during the months of December, 1937, and January, February, March, and part of April, 1938.

The Engineer advised that, due to mismanagement by the contractor, it was necessary for the bonding company to take over the job in November, 1937, about six months after the contract was awarded, and at that time there was almost as great an amount of work involved for proper completion of the project as at the beginning of the work. He further advised that bids were taken for the project on April 28, 1937, but the contract was not awarded until June 1, 1937, which would automatically allow the contractor an extension of time of 30 days. However, weather conditions between February 28 and March 28, 1938, were totally unsuitable for work, so the contractor secured no benefit whatsoever from this 30-day extension. The Engineer further advised that he ordered the contractor to shut down his work on February 15, 1938, because of adverse weather conditions, but the contractor resumed operations on April 15, 1938, although for two or three weeks thereafter he was considerably handicapped by reason of late spring rains. He gave as his thought that the contractor is entitled to a 105-day extension of time without penalty, or until July 13, 1938,

SEP 19 1938

to cover the delay in the award of the contract, the period when the work was shut down because of inclement weather, and a 7% increase in the quantities of material to be moved; but that the contractor should be charged for the engineering expense incurred by the state subsequent thereto, and he so recommended. A letter was presented from the Bureau of Public Roads concurring in such recommendation. The Commission approved the recommendation by unanimous vote.

J. C. Compton, Contract No. 2004, covering the Tillamook County oiling project, requested an extension of time from July 15 to July 23, 1938, within which to complete this project. He gave no reason for failure to complete the project within the specified time limit. The Engineer advised that the contractor completed this project, except for the application of the final seal coat, within the specified time limit; in fact, he could have applied the final seal coat before the time limit expired, but his oiling crew was working at the time on a contract on the Wilson River Highway and it was deemed advisable to leave the final seal on the other project until the Wilson River job was completed. He advised, further, that the delay in completing the project within the specified time limit was due to no fault of the contractor. He recommended, in view of the circumstances, that the extension requested be granted without penalty, and presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

Roy L. Houck, Contract No. 2014, for grading, surfacing, and bituminous macadam construction on the North Powder-Muddy Creek Section of the Old Oregon Trail, in Baker County, requested an extension of time from August 31 to September 20, 1938, within which to complete this project. He alleged that his failure to complete the project within the specified time limit was occasioned by the fact that he was operating a very hard quarry and that he lost his plant and some equipment by fire. The Engineer advised that the contractor's failure to complete the project within the specified time limit was the result of a fire early in August, which almost entirely destroyed his crushing plant. Had Mr. Houck not experienced this difficulty, he said, he would very probably have finished the project within the specified time limit, notwithstanding the difficulties he had with his quarry. He recommended, in view of the circumstances, that the extension requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

E. L. Rigdon, Contract No. 2026, for grading, surfacing, and oiling the Harris Creek-Chalk Cliff Section of the Fremont Highway, in Lake County, requested an extension of time of 15 days, from August 31 to September 15, 1938, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to unusually bad weather conditions during the winter months. The Engineer advised that in his estimation the

contractor should have completed the project within the specified time limit notwithstanding the weather conditions. He recommended, therefore, that the extension requested be granted but that the contractor be charged the amount of the extra engineering expense incurred by the state subsequent to the specified date of completion. A letter was presented from the Bureau of Public Roads concurring in this recommendation. The Commission approved the recommendation unanimously.

The Engineer reported that contracts Nos. 2004, 2027, 2036, 2043, 2047, 2055, 2065, 2077, 2088, 2089, 2097 for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commissioners present:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts or modifications thereof and said jobs are now ready for acceptance:

Contract No. 2004, with J. C. Compton, for surfacing and oiling on four sections of county roads, in Tillamook County. Completed July 23, 1938.

Contract No. 2027,, with A. S. Wallace, for furnishing crushed rock for the Belknap Springs-McKenzie Summit Section of the McKenzie Highway, in Lane County. Completed August 26, 1938.

Contract No. 2036, with E. H. Itschner, for grading, surfacing, and oiling the Forest Boundary-Elgin Section of the Weston-Elgin Secondary Highway, in Union County. Completed August 29, 1938.

Contract No. 2043, with H. L. Rice, for furnishing crushed rock in stock piles for the Dillon-John Day River Section of the Columbia River Highway, in Sherman and Wasco Counties. Completed July 15, 1938.

Contract No. 2047, with Mountain States Construction Company, for furnishing crushed rock in stock piles for the Mohler-Kilchis River Section of the Oregon Coast Highway, in Tillamook County. Completed July 8, 1938.

Contract No. 2055, with Edlefsen-Weygandt Company, for grading and paving and construction of a trestle bridge, on the Hill Creek Bridge Section of the Pacific Highway, in Lane County. Completed July 1, 1938.

Contract No. 2065, with J. C. Compton, for oiling the Mills Bridge-Jordan Creek Section of the Wilson River

SEP 19 1938

Highway, in Tillamook County. Completed July 30, 1938.

Contract No. 2077, with Clifford A. Dunn, for surfacing and oiling the Peoria-Harrisburg Section of the Corvallis-Harrisburg County Road, in Linn County. Completed August 31, 1938.

Contract No. 2088, with Saxton, Looney & Risley, for grading, surfacing, and oiling the Washington County Line-Skyline Boulevard Section of the Northwest Thompson County Road, in Multnomah County. Completed September 12, 1938.

Contract No. 2089, with McNutt Bros., for surfacing and oiling the Roberts-Orville Section of Halls Ferry County Road, in Marion County. Completed September 2, 1938.

Contract No. 2097, with Clifford A. Dunn, for placing road mix surfacing on the Malone-California Line Section of the Whitney County Road, in Klamath County. Completed September 10, 1938.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

A letter was presented from I. J. Rossman, member of the City Council of Florence, Oregon, advising that the city has filed an application for P.W.A. funds with which to finance a street improvement project within the city limits, and that it is planned to open up and pave a new avenue of entrance to the city from the Oregon Coast Highway beginning at the intersection of Lincoln Street with Washington Street, and extending in a northwesterly direction to a connection with the Oregon Coast Highway, which will necessitate crossing state property under control of the State Highway Commission. Mr. Rossman inquired as to whether or not the Commission has any objections to the city constructing this street across the state property, and if there are no objections, how much consideration the Commission wants for this property.

The Engineer gave as his thought that the proposed street will provide a better connection to the business district of the town than the existing one because it will be farther from the bridge over the Siuslaw River. He recommended the sale of the property to the city at a price equal to that which the state paid for it. The Commission approved the recommendation unanimously.

The Engineer reported that the World's Fair Commission of Oregon is considering showing at the San Francisco Fair the animated diorama of ocean views invented by Mr. Bud Dietlein, of Vancouver, Washington, provided it meets with the approval of the State Highway Commission. He said that Mr.

Dietlein will allow this diorama to be shown at the San Francisco Fair and three times a year for two years thereafter for the sum of \$3,250, and recommended approval of the proposition. The Commission approved the recommendation unanimously.

A letter was presented from A. J. Kelly, Portland, inquiring whether or not the Commission would be interested in constructing a building for rental purposes at the intersection of McLoughlin Boulevard and Holgate Street in Portland. The Secretary was instructed to inform Mr. Kelly that the Commission is not interested in any proposition of that kind.

The Engineer reported the results of an inspection of the sand houses which Mr. Jack H. Moore of Agate Beach wants to remove from the state property near Newport if the Commission will let him have the buildings for the value that he can salvage from them. He said that one of the buildings is 10' x 14' in dimension and the other is 12' x 16' and that both are located on the old U. S. Spruce Corporation's railroad right of way recently acquired by the state, north of Newport; further, that they were built in 1918 and are now practically worthless. He further advised that there are some larger buildings on the property that would have a salvage value. He recommended that the two small buildings be given to Mr. Moore if he will remove them from the state property, but that the other buildings be retained for state purposes. The Commission approved the recommendation.

The Commission discussed the proposed agreement with Dr. Gus H. Huthman, Portland, disposing of his claim for damages arising out of the construction of the Union Avenue viaduct on the East Portland-Oregon City Highway, in Portland. The following resolution in regard thereto was adopted by the Commission by unanimous vote of the Commissioners present:

WHEREAS, a case is pending in the Circuit Court of the State of Oregon for Multnomah County entitled Gus H. Huthman et al, vs. State of Oregon, et al, in which action the plaintiff seeks to recover damages in connection with the location and construction of the Union Avenue viaduct; and

WHEREAS, an adjustment of differences has been effected and the terms and understandings of said adjustment have been reduced to writing and said written agreement is now before the Commission for consideration and execution; and

WHEREAS, the Commission having fully considered the provisions of said agreement is of the opinion that the agreement should be executed by the State of Oregon, by and through its State Highway Commission;

NOW, THEREFORE, a majority of the members of the Commission being present and affirmatively voting, it hereby is ordered that the agreement covering and incorporating a settlement of the differences between Gus H. Huthman and Henrietta B. Huthman and the State of Oregon involving Lots 3 and 4 and the North one-half

SEP 19 1938

of Lot 5, Block 1, Villa Heights, City of Portland, County of Multnomah, State of Oregon, be and the said agreement hereby is approved, and it is hereby ordered that said agreement be executed, for and on behalf of the State of Oregon, by E. B. Aldrich, and F. L. Tou Velle, members of the State Highway Commission.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Odette Martin Hall, et al, relative to an easement across private property south of the Willamette River Bridge on the Pacific Highway at Harrisburg.

Agreement with Board of Park Commissioners, Pendleton, covering the maintenance of a proposed landscape area at the west end of the overcrossing on the Old Oregon Trail, in Pendleton.

Agreement with Deschutes County Court whereby the county assigns to the state \$1,262.88 of its share of the gasoline tax revenues which are to be distributed on December 15, 1938, as reimbursement for expenditures advanced by the state for construction of the Tumalo Falls-Bend Road.

Agreement with Elmer Griffith, authorizing Mr. Griffith to construct a fence around a state-owned quarry site in Morrow County.

Agreement with Klamath Indian Agency providing for the construction of a turn-out and check dam adjacent to the Modoc Point-Lobert Section of The Dalles-California Highway, in Klamath County.

Agreement with Dr. Gus H. Huthman, disposing of his claim against the state, arising out of the construction of the Union Avenue viaduct in Portland.

Agreement with the City of Brownsville, providing for lease of a borrow pit from which to obtain materials needed in connection with the construction of the Brownsville-Crawfordsville Section of the Halsey-Sweet Home Secondary Highway, in Linn County.

Quitclaim deed conveying unto Harry R. Elbon and Charlotte L. Elbon 2,400 sq.ft. of land situate adjacent to the Lower Columbia River Highway in the NW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 28, T. 2 N., R. 1 W., W. M., Multnomah County, Oregon.

Bargain and Sale Deed conveying unto James Ben Green 0.084 acre of land situate adjacent to the Pacific Highway, near Salem, being a part of Lot 10, Smith Fruit Farms Subdivision.

The Commission confirmed the date of September 29, 1938, as the date for its next regular meeting in Portland, same being a postponement of the

meeting heretofore scheduled for September 22, 1938. The Commission also set Thursday, November 10, 1938, as the date for its regular meeting in November for the receiving of bids on highway construction projects. The Secretary was instructed to make the usual arrangements to hold these meetings in the Auditorium of the Public Service Building, Portland.

There being no further business to come before the Commission at this time, the meeting was adjourned at 10:00 o'clock p. m.

Commissioner and Acting Chairman

[Signature]
Commissioner

Portland, Oregon, September 28, 1938

The State Highway Commission met in regular session at 8:00 o'clock p.m. in the Rose Room of the Benson Hotel. Present were:

E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glalayer, Secretary

Chairman Henry F. Cabell arrived at 10:00 o'clock p. m.

County Commissioner Geo. N. Peck of Morrow County was present and discussed briefly with the Commission matters pertaining to the construction of the Heppner-Rhea Creek Section of the Wasco-Heppner Secondary State Highway and the Little Butter Creek County Road.

The Assistant Attorney reported briefly the status of the right of way budget for 1938. He said that present indications are that the Commission will spend this year for right of way purposes approximately \$600,000. The Commission took no action on this matter.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration the Commission approved the request and adopted the following resolution in regard thereto by the unanimous vote of the Commissioners present:

SEP 19 1938

SEP 28 1938

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Silver Falls Section - Silver Creek Falls Park</u>				
3617A-Cieslak, Hattie & Leo	Park		Surrender and cancellation of lease on Fred Volz property acquired by state - Lump Sum \$500	McCallister

The Attorney reported that apparently it will be necessary to institute a suit of condemnation to acquire a certain quarry site that is needed in Douglas County, in view of the fact that there is a question of the ownership of the property, it being claimed by two people, John T. Black and William Berdine. He requested authority from the Commission to start the proceedings in the event that the matter cannot be adjusted in any other way. The Commission approved the request.

The Attorney also reported that it may be necessary to institute condemnation proceedings to acquire right of way across the property of the Tolakin Estate for the relocation of the Pendleton-Adams Section of the Oregon-Washington Highway, in Umatilla County. The purchase price of the property, he said, is satisfactory but there is a difference of opinion among the owners of the estate relative to the distribution of the same and it may be necessary to condemn the property in order to secure title. He requested authority to start the condemnation suit in the event that further negotiations reveal that to be necessary. The Commission approved the request.

The State Parks Superintendent, S. H. Boardman, was present and reported receipt of an offer to purchase the sand spit at the mouth of Yaquina Bay, Newport, which property is owned by the state. He inquired whether or not the Commission wishes to sell this property and recommended that it be retained for state purposes. The Commission decided to retain ownership of this property.

The Parks Superintendent also reported receipt of a request from the Relief Committee of Wheeler County for the cordwood that has been cut in Shelton State Park by C.C.C. forces during the past summer. He recommended the granting of the request in view of the fact that the wood has cost the state nothing and that it will be used in a good cause. The Commission authorized the Parks Superintendent to give this wood to the relief committee as has been done in the past.

The Parks Superintendent also advised that the Wheeler County Relief

SEP 28 1938

Committee would like permission to fell some of the beetle-infested trees in Shelton State Park for fuel purposes. He gave as his thought that it would be a good idea to get rid of these trees in this manner because they are badly infested, and recommended approval of the request. The Commission approved the recommendation.

The Commission considered and ordered filed a resolution from the Clatsop County Court changing the name of a county park located adjacent to the Wolf Creek Highway near the summit of the Coast Range from "Douglas Fir Park" to "David Douglas Park".

The Engineer reported on the request of the City of Coquille for the rerouting of the Coos Bay-Roseburg Highway through Coquille. He said that this highway now connects with the Oregon Coast Highway at Front and B Streets in Coquille but the city wants it routed along Hall Street to 3rd Street; thence along 3rd Street for a distance of one block to a junction with the Oregon Coast Highway, which would mean two parallel highway routes for a distance of three blocks. In the discussion of this matter it was pointed out that the Commission has under contemplation the rerouting of the Oregon Coast Highway between Coquille and Marshfield, which would have some bearing on the routing of the Coos Bay-Roseburg Highway, and in view thereof the Commission decided not to grant the city's request at this time.

The Commission had under discussion a letter from Mrs. Jessie M. Honeyman, President of the Oregon Roadside Council, in which the Commission is requested to assume the cost of printing forms that are to be used by the Roadside Council in the securing of pledges from the owners of property situated adjacent to highway rights of way that they will not sell or lease any of their lands for the purpose of erection and maintenance of commercial signs and billboards thereon and that they will refuse to permit such signs to be erected and maintained on their property or to be painted on fences or buildings adjacent thereto unless said signs are first approved by the State Highway Commission. The Commission authorized printing of the forms at state expense.

The Secretary presented a letter from Mr. Lewis A. McArthur, President of the Oregon Historical Society, with respect to the application of the Champeog Chapter, D.A.R., for permission to erect a monument on the secondary state highway north of Newberg, pointing out the location of the grave of Ewing Young, who, it is alleged, was the first white man to die in what is now the state of Oregon. Mr. McArthur recommended approval of the request, which, in his estimation, is a desirable project. The Commission approved the recommendation and instructed the Secretary to so inform the D.A.R.

The Engineer requested authority to purchase the following equipment:

15 trucks of the Ford or Chevrolet type, 15 old trucks to be turned in as part purchase price for the same. Estimated total cash outlay \$12,750.

4 light-power shovels of $\frac{1}{2}$ -yard capacity, 4 old shovels to be

turned in as part purchase price for the same. Total estimated cash outlay \$20,000.

The Commission approved the request by the unanimous vote of the members present.

Reconsideration was given by the Commission to the penalty heretofore imposed on Smith & Company, contractor for furnishing crushed rock in stock piles for the Maupin Section of The Dalles-California and Wapinitia Highways, in Wasco County, Contract No. 2030. The Engineer explained that this contractor did not complete the contract within the specified time limit and that the Commission on July 20, 1938, extended the completion date to August 15, 1938, under the condition that the contractor be charged for the extra engineering expense incurred by the state subsequent to the completion date specified in the contract. However, he is now of the belief that the penalty is too severe and recommends that the previous penalty be modified so as to charge the contractor with only one-half of the extra expense for engineering, amounting to approximately \$125, that the state has incurred subsequent to the specified date of completion. The Commission approved the recommendation.

The Engineer requested authority for the Labor Relations Engineer, Mr. Ray Webber, to accompany engineers from the State of Washington and from the State of California on an inspection of concrete paved highways in the three coast states, at state expense. He estimated that Mr. Webber's expense would not exceed \$75, exclusive of transportation. The Commission approved the request, subject to further approval by Governor Martin.

The Commission also authorized the State Highway Engineer to go to San Francisco at state expense to discuss matters pertaining to the use of dowel bars in concrete pavement construction with engineers from the states of Washington and California and representatives of the United States Bureau of Public Roads, same having to do with information secured from the above-mentioned inspection trip. The Commission's approval was subject to concurrence by Governor Martin.

The Commission had under consideration the matter of renewal of the contract with Julius Gunnell for the operation of the Enegren Ferry on the Coos River Secondary Highway, in Coos County. It was explained that the present contract expires at 11:00 o'clock p. m. on September 30, 1938, and that arrangements have been made to extend the contract for another year, but Mr. Gunnell wishes to assign his interests to Andrew Stambuck, Marshfield, who has actually operated the ferry for the past year in a satisfactory manner. The Secretary presented a copy of the assignment given by Mr. Gunnell to Mr. Stambuck, together with bond and insurance submitted by Mr. Stambuck as a requirement of the contract. The Attorney advised that the assignment, the bond, and the insurance are satisfactory and meet with his approval. The Engineer advised that the service rendered by Mr. Stambuck during the past year was satisfactory and it is his recommendation that the assignment be approved and that the contract for the extended period be awarded to Mr. Stambuck. After due consideration the Commission approved the recommendation by unanimous

SEP 28 1938

vote of the members present and thereupon signed an agreement with Mr. Stanbuck covering the matter.

The Commission considered the offer of the United States of America to aid, by way of grant of P.W.A. funds, in financing the construction of the Provolt Rock Production Project on the Williams and Medford-Provolt Secondary State Highways in Josephine and Jackson Counties, and the acquisition of necessary lands and rights of way therefor. The Commission accepted the Government's offer and, by unanimous vote, adopted the following resolution in regard thereto, upon motion of Commissioner Tou Velle which was duly seconded by Commissioner Aldrich:

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE PROVOLT ROCK PRODUCTION JOB ON THE WILLIAMS AND MEDFORD-PROVOLT SECONDARY HIGHWAYS AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the Provolt rock production job on the Williams and Medford-Provolt Secondary Highways in Josephine and Jackson counties and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 83951-101

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.,
Dated: Sep 26 1938
Docket No. Oreg. 1348-F

"State Highway Commission of the State of Oregon,
Salem, Oregon.

1. Subject to the Terms and Conditions (PWA Form No.230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of highway improvements, including the acquisition of necessary land and rights of way (herein called the "Project"), by making a grant to State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$6,462.

2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later

SEP 28 1938

than 12 weeks from the date of this Offer and to complete such Project with all practicable dispatch, and in any event within 4 months from the commencement of construction.

3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's Application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

"UNITED STATES OF AMERICA

Federal Emergency Administrator
of Public Works

By (Sgd.) H. A. Gray
Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all rules and regulations relating to such grant, a copy of which rules and regulations were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than twelve weeks from the date of this offer; and to complete the work with all practicable dispatch, and in any event within four months from the commencement of construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

A letter was presented from the Acting Forest Supervisor of the Willamette National Forest advising that the C.C.C. camp at Belknap, which heretofore has supplied men and equipment for opening the Clear Lake road

SEP 28 1938

between Belknap Springs and the Santiam Highway for early spring travel, has been transferred to another location so that the services of the men from this camp are no longer available; hence it will not be possible for the Forest Service to maintain this road in a condition satisfactory as a detour unless the state will cooperate by way of betterment. The Secretary was instructed to inform the Forest Supervisor that the road in question is not a state highway, hence the Commission is without legal authority to spend state funds thereon.

A letter was presented from T. C. Richter, Amity, in which demand is made for the improvement of the Amity-Bellevue Secondary State Highway, in Yamhill County. The Commission ordered the communication filed and that Mr. Richter be informed that the Commission does not have funds available with which to finance this project at the present time.

A letter was presented signed by five homeowners and taxpayers of North Coos River, Coos County, requesting that the Enegren Ferry service across Coos River on the Coos River Secondary Highway be started at 5:00 o'clock a. m. instead of 7:00 o'clock a. m. if the Commission cannot provide 24-hour service. The Commission denied the request.

The Commission considered and ordered filed a letter from L. M. Lepper, Director of the Eastside Commercial Club, Portland, suggesting the sale of bonds, if necessary, in order to provide funds with which to match Federal Aid Funds.

The Commission also considered and ordered filed a resolution from the Gold Beach Chamber of Commerce opposing any additional bond issue for highway purposes.

A letter was presented from the Shasta-Cascade Wouderland Association inviting members of the Commission and its staff to be present at the Eighth Annual Convention of this association, which is to be held in Ashland, Oregon, Monday and Tuesday, October 10 and 11, 1938. The Commission delegated Commissioner Tou Velle; R. H. Baldock, State Highway Engineer; and H. B. Glaisyer, Secretary, to represent the Commission at this meeting.

A letter was presented from the Redwood Empire Association inviting the Commission and its staff to attend the Eighteenth Annual Convention and Banquet of the Association which is to be held at Eureka Inn on Saturday, October 22, 1938. The Commission expressed regrets that it would not be able to attend this meeting and instructed the Secretary to so inform the association.

A petition was presented signed by 145 persons residing along and served by the Coos Bay Wagon Road, in which the Commission is asked to take over and accept this road as a secondary state highway as has previously been requested by the Coos County Court. The Commission denied the request, it being contrary to its established policy to place any more roads on the secondary highway system until the reconstruction of the roads now on that system has been further advanced.

The Engineer reported that in conformance with authority previously granted him by the Commission he has ordered a number of surveys to be made. He presented a list of such surveys and asked the Commission to confirm them and the amounts authorized for each. After due consideration motion was made by Commissioner Tou Velle that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized for survey expenditures, are as follows:

Plans - - - -	1-2813 - Richland-Halfway Section, Baker-Homestead Highway.	
	1st authorization -	\$850.00
Quarry - - - -	104-2821 - Astoria-Jewell Section, Nehalem Secondary Highway.	
	1st authorization -	\$150.00
Right of Way -	9-2812 - Brothers-Gap Ranch Section, Central Oregon Highway.	
	4th authorization -	\$650.00
	Total to date	\$6,000.00
Quarry - - - -	9-2821 - Redmond-Sisters Section, McKenzie Highway.	
	1st authorization -	\$400.00
Right of Way -	9-2818 - Third Street Undercrossing, The Dalles-California Highway.	
	2nd authorization -	\$500.00
	Total to date	\$750.00
Right of Way -	9-1906 - Redmond Section, The Dalles-California Highway.	
	1st authorization -	\$25.00
Plans - - - - -	10-2822 - Dillard Section, Pacific Highway.	
	2nd authorization -	\$400.00
	Total to date	\$800.00
Quarry - - - -	35-2809 - Butte Creek Summit-Branson Creek Section, John Day Highway.	
	1st authorization -	\$400.00
Plans - - - -	114-2809 - Jericho Lane-Odell Junction Section, Mt. Hood Secondary Highway.	
	3rd authorization -	\$300.00
	Total to date	\$1,950.00
Plans - - - -	15-2817 - Siskiyou Station-Bear Canyon Section, Pacific Highway.	
	3rd authorization -	\$2,350.00
	Total to date	\$6,000.00
Location - - -	17-2802 - Grants Pass-Green Creek Section, Pacific Highway.	
	3rd authorization -	\$800.00
	Total to date	\$4,000.00
Plans - - - - -	18-2831 - Klamath Falls Maintenance Headquarters, The Dalles-California Highway.	
	1st authorization -	\$100.00

Quarry - - - - 18-2823 - Walker Mountain-Gold Lake Trail Section, Willamette Highway.
 2nd authorization - \$250.00
 Total to date \$1,250.00

Right of Way - 19-2814 - Picture Rock Pass-Harris Creek Section, Fremont Highway.
 1st authorization - \$500.00

Location - - - 19-2815 - Silver Lake-Picture Rock Pass Section, Fremont Highway.
 1st authorization - \$700.00

Plans - - - - - 19-2816 - Horse Ranch-Silver Lake Section, Fremont Highway.
 1st authorization - \$200.00

Quarry - - - - 20-2830 - Greenleaf Creek-Pacific Highway Section, Siuslaw Highway.
 1st authorization - \$400.00

Recon. - - - - 20-2831 - Salt Creek-Lookout Point Section, Willamette Highway.
 1st authorization - \$1,000.00

Plans - - - - - 20-2808 - Maywood-Oak Hill Section, Eugene-Veneta Highway.
 6th authorization - \$500.00
 Total to date \$6,175.00

Recon. - - - - 20-2831 - Salt Creek-Lookout Point Section, Willamette Highway.
 2nd authorization - \$500.00
 Total to date \$1,500.00

Right of Way - 22-2815 - Sweet Home Section, Santiam Highway.
 1st authorization - \$50.00

Right of Way - 22-2811 - Shedd-Halsey Section, Pacific Highway East.
 2nd authorization - \$100.00
 Total to date \$300.00

Drainage - - - 22-2816 - Lamb Creek-Sheep Ridge Section, Santiam Highway.
 1st authorization - \$500.00

Plans - - - - 125-2807 - Rhea Creek-Heppner Section, Wasco-Heppner Secondary Highway.
 2nd authorization - \$900.00
 Total to date \$2,400.00

Quarry - - - - 25-2808 - Gilliam County Line-Ione Section, Oregon-Washington Highway.
 1st authorization - \$200.00

Drainage - - - 127-2812 - Buell Section, Dallas-Coast Secondary Highway.
 1st authorization - \$50.00

Plans - - - - - 30-2820 - Pendleton Landscape Section, Old Oregon Trail.
 1st authorization - \$75.00

Plans - - - - 30-2820 - Pendleton Landscape Section, Old Oregon Trail.
 2nd authorization - \$50.00
 Total to date \$125.00

Quarry - - - - 30-2821 - Morrow County Line-Echo Section, Columbia River, Old
 Oregon Trail, and Lexington-Echo Highways.
 1st authorization - \$200.00

Plans - - - - - 30-2822 - East Pendleton Overcrossing, Old Oregon Trail.
 1st authorization - \$100.00

Plans - - - - - 30-2823 - Pendleton Section, Old Oregon Trail.
 1st authorization - \$400.00

Plans - - - - - 31-2814 - Jimmy Creek-North Powder Section, Old Oregon Trail.
 1st authorization - \$525.00

Location - - - 233-2813 - Forest Boundary-He He Butte Section, Warm Springs
 Highway.
 2nd authorization - \$1,200.00
 Total to date \$6,800.00

Plans - - - - - 36-2821 - Tillamook Junction Section, Pacific Highway West &
 McMinnville-Tillamook Highway.
 1st authorization - \$200.00

Plans - - - - - 36-2816 - Lafayette Section, Pacific Highway West.
 2nd authorization - \$25.00
 Total to date \$3,625.00

The motion was seconded and was declared by Acting Chairman Aldrich to have passed by the affirmative vote of the Commissioners present.

The Commission considered requests for extensions of time within which to complete highway construction projects, as follows:

Leonard & Slate, Contract No. 2023, for construction of a bridge over the North Fork of the John Day River on the John Day Highway near Kimberly, in Grant County, requested an extension of time of 15 days, from August 31 to September 15, 1938, within which to complete this project. They attributed their failure to complete the project within the specified time limit to bad weather conditions which prevented them from applying the finishing coat of paint to the structure. The Engineer advised that he knows of no reason why the job could not have been completed within the time limit specified in the contract and accordingly recommended that the extension requested be granted but that the contractors be charged with the extra engineering expense incurred by the state subsequent to the specified completion date. A letter was presented from the Bureau of Public Roads concurring in such recommendation. The Commission approved the recommendation unanimously.

SEP 28 1938

R. I. Stuart & Sons, Contract No. 2061, for furnishing crushed rock in stock piles for the Bandon-Port Orford Section of the Oregon Coast Highway, in Coos and Curry Counties, requested an extension of time from August 31 to October 15, 1938, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to change in quarry location. The Engineer advised that bids were taken for this job on March 24, 1938, and the contract was awarded on April 6, 1938; that work of erecting the bunkers was started on April 25, 1938, and actual crushing operations began on May 31, 1938; and it was his opinion that the contract should have been completed within the specified time limit. In view thereof, he recommended that the extension requested be granted but that the contractor be charged with the extra engineering expense incurred by the state subsequent to the date of completion specified in the contract. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 1984, 2001, 2023, 2030, 2039, 2068, 2072, 2079, and 2083, for the construction of state highway projects, have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commissioners present:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts or modifications thereof and that said jobs are now ready for acceptance:

Contract No. 1984, with Consolidated Highway Company, Inc., for grading the East Unit, Jordan Creek Section, of the I.O.N. Highway, in Malheur County. Completed August 29, 1938.

Contract No. 2001, with C. J. Montag & Sons, for construction of an undercrossing structure on the Old Oregon Trail, at Ontario, in Malheur County. Completed September 16, 1938.

Contract No. 2023, with Leonard & Slate, for construction of a steel and concrete bridge over North Fork of John Day River, on the John Day Highway, near Kimberly, in Grant County. Completed September 13, 1938.

Contract No. 2030, with Smith & Company, for furnishing crushed rock for the Maupin Rock Production Project on The Dalles-California and Wapinitia Highways, in Wasco County. Completed August 27, 1938.

Contract No. 2039, with Harold Blake, for grading the Bear Canyon Section of the Pacific Highway, in Jackson County. Completed September 24, 1938.

Contract No. 2068, with Snook Bros., for construction of two concrete bridges over Wolf Creek, near Sunset Camp, on the Wolf Creek Highway, in Columbia and Washington Counties. Completed September 16, 1938.

Contract No. 2072, with Mountain States Construction Company, for grading, surfacing, and oiling the Spaulding Ranch Section of the Salem-Dayton Secondary Highway, in Yamhill County. Completed August 26, 1938.

Contract No. 2079, with Fisher Bros., for grading, surfacing, and oiling the Carver-Redland Store Section of the Carver-Redland County Road, in Clackamas County. Completed September 23, 1938.

Contract No. 2083, with Saxton, Looney & Risley, for surfacing and oiling the Hillsboro-Airport Road Section of the Hillsboro-Cornelius Pass County Road, in Washington County. Completed August 31, 1938.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

lowe: The Commission considered and signed agreements, et cetera, as follows:

Agreement with the City of Klarath Falls and the California-Oregon Power Company relative to the construction of an undercrossing of Main Street, Klamath Falls, under the tracks of the Southern Pacific Company.

Agreement with the Southern Pacific Company, the Central Pacific Railway Company, and the City of Klamath Falls, relative to the construction of an undercrossing of Main Street under the Southern Pacific Company's tracks, in Klamath Falls.

Agreement with the Southern Pacific Company providing for lease by the state of a maintenance building and storage site at Woodburn.

Bargain and Sale Deed conveying unto Anton Roskoski and wife 7,400 sq.ft. of land lying in Lots 3, 4, 5, 6, and 7, of Block 3, Kenview Addition to Portland, being part consideration for property acquired by the Commission from the Roskoskis for right of way for the Interstate Avenue improvement. Right of way transaction 5079.

Bargain and Sale Deed conveying unto John A. Hatala and wife Lot 16 of Block 3, Overlook Addition to Portland, being part

consideration for property which the state is acquiring from the Hatalas for right of way for the Interstate Avenue improvement.
Right of way transaction 5385-A.

County Judge Guy Boyington and County Commissioner Wm. Larson, of Clatsop County, were present in regard to the proposed road extending northwesterly from the Wolf Creek Highway at Elsie to a connection with the Nehalem Secondary Highway at a place known as Fish Hawk Falls, a distance of about 7 miles. They stated that the County Court proposes to conduct a W.P.A. project on this road within the next 12 months and they would like the Commission to authorize a location survey of the road so that their work will be done on the proper alignment. The Engineer advised that this is a logical proposition because it will provide a good connection from Astoria to the Wolf Creek Highway and when constructed will make the distance from Portland to Astoria over state highways about the same as that from Portland to Seaside. He recommended approval of the County Court's request. After discussion the Commission approved the recommendation and authorized the Engineer to proceed with the making of a location survey at his convenience.

Judge Boyington alleged that this road was placed on the federal aid system some time ago when the Wolf Creek Highway was placed on such system. The Engineer was instructed to investigate this allegation and report his findings at the next meeting.

Judge Boyington inquired whether or not the Commission would offer objections to the construction of a roadway approach to the Oregon Coast Highway from the beach at a point near the north end of the Arch Cape Tunnel, in Clatsop County. He advised that the highway is constructed on a high embankment at this particular point and a question has arisen whether or not such approach road would be objectionable from the state's standpoint. This inquiry, he said, is made in behalf of people who are interested in securing a roadway connection between the highway and the ocean beach at this place. The Commission referred the matter to the Engineer for investigation.

The Engineer brought up for discussion a federal aid secondary highway matter in Josephine County. He advised that the Commission has allocated the sum of \$12,000 to build a new bridge over the Illinois River on the Waldo-Holland Road in this county, and it is proposed to contract the work next year. However, the bridge is in very bad condition at the present time and the County Court has indicated a willingness to replace it at once, paying for the same with county funds, if the Highway Commission will spend its money for the construction of approaches to the bridge rather than for the bridge itself. He gave as his thought, in view of the circumstances, that the County Court's proposition is satisfactory, and accordingly recommended acceptance of the same notwithstanding the fact that it will necessitate a location survey of the project because the present bridge structure is not on the proper alignment. After discussion the Commission approved the Engineer's recommendation and authorized him to make such location survey as soon as possible.

Chairman Henry F. Cabell arrived at the meeting at 10:00 o'clock

p. m. and participated in all matters that were discussed subsequent to that time.

The Commission by unanimous vote approved the minutes of the meetings held on March 23, 24, and 25; April 14; April 27, 28, and 29; May 12; and June 1, 2, and 3, 1938.

A letter was presented from Dewey D. Gault, Portland, owner of Gault's Boat Harbor, in regard to the construction of a roadway extending easterly from the Pacific Highway at a point near the intersection of Denver and Union Avenues, Portland, to his boat dock in the Columbia River. Mr. Gault alleges that the present roadway is in bad condition and unsafe for travel, and as a result he has lost considerable business; also, that he has deferred repairing his roadway because of the plans of the State Highway Commission to construct a traffic separation project at the intersection of Denver and Union Avenues. He further advised that he wants to rebuild the roadway on a permanent basis but cannot do so until the state constructs at least a portion of its traffic separation project, including a roadway under the Pacific Highway to a connection with Swift Boulevard. It was his contention that it would be to the advantage of the state to install the underpass now because of the developments that are to take place on certain properties involved during the next year, which would make the purchase of right of way more complicated and more expensive. The Engineer advised that to construct the underpass and approaches thereto would cost about \$60,000. On account of the expense involved, the Commission decided that it could not contract this work next year and after that time would have to take its chances along with others in Portland on the basis of priority. The Engineer was instructed to suggest to Mr. Gault that he build a private road which would leave the Pacific Highway a little farther away from the end of the Interstate Bridge but which would be a much safer one to travel than the present road. In this connection he pointed out that the Commission's plans for the improvement of the highway require the acquisition of additional right of way on the easterly side of the present highway where it has been suggested that Mr. Gault build his private road. In view thereof the Commission decided that it might be advisable to acquire this extra right of way now and let Mr. Gault use it until it is needed for state purposes. The Engineer was authorized and instructed to ascertain the cost of such extra right of way and report his findings at the next meeting.

The Engineer brought up for discussion the matter of securing P.W.A. funds to reconstruct the Devil's Garden-Quartz Mountain Section of the Klamath Falls-Lakeview Highway, which section was badly damaged and was rendered almost impassable during the last spring breakup. He said that to grade, surface, and oil a 9-mile section of this road would cost about \$106,000, and suggested that an application be filed for a P.W.A. grant to assist in financing the work in view of the fact that the road is not a federal aid highway and is not eligible for other federal funds. The Commission concurred in the viewpoint of the Engineer that this would be a good project to undertake if funds can be found to finance the state's share of the cost, and in view thereof instructed the Engineer to secure P.W.A. funds, if possible, to help finance it. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

SEP 28 1938

A RESOLUTION AUTHORIZING R. H. BALDOCK, AS STATE HIGHWAY ENGINEER, TO FILE AN APPLICATION WITH THE UNITED STATES OF AMERICA THROUGH THE FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS FOR A GRANT TO AID IN FINANCING THE CONSTRUCTION OF A CERTAIN STATE HIGHWAY PROJECT AND THE PURCHASE OF RIGHT OF WAY NECESSARY TO SUCH CONSTRUCTION.

Be it resolved by the Oregon State Highway Commission:

1. That R. H. Baldock, as State Highway Engineer, be and he is hereby authorized to execute and file an application on behalf of the Oregon State Highway Commission with the United States of America for a grant to aid in financing the construction of the Devil's Garden-Quartz Mountain Section of the Klamath Falls-Lakeview Highway between mileposts 53 and 62 in Klamath and Lake Counties and the purchase of necessary lands and rights of way therefor.

2. That the said R. H. Baldock is hereby authorized and directed to furnish such information as the United States of America through the Federal Emergency Administration of Public Works may reasonably request in connection with the application which is herein authorized to be filed.

The State Parks Superintendent, Mr. S. H. Boardman, reported on the cost to acquire from the Sunset Logging Company timber strips 300 feet wide on each side of the right of way of the Wolf Creek Highway, as instructed by the Commission at the previous meeting. He said that he inspected this property very carefully in company with Mr. Eugene Walsh, Forest Engineer, Portland, and consulted the officials of the Sunset Logging Company on the basis of acquiring 300-foot strips on each side of the highway for a distance of about three miles, involving approximately 269 acres of land; also, that the company has set a cash price of \$34,000 for this property based on timber at the rate of \$2.50 per thousand, and \$1.00 per thousand added as profit over and above the regular market price. He advised that, while the strips are about 3 miles in length, they are not covered entirely with timber, portions being devoid of timber altogether and other portions being timbered on only one side of the highway. He also advised that the company proposes to cut the rest of the timber adjacent to the highway just as soon as it is permitted to truck the logs on the highway. In a discussion of this matter the question arose whether or not it would be advisable to acquire the land on which no timber exists and the strips where there is timber on only one side of the highway. Chairman Cabell suggested that the Commission should confine its negotiations to the acquisition of strips where timber is located on both sides of the highway. Commissioners Aldrich and Tou Velle concurred and it was decided that Chairman Cabell and the State Highway Engineer would inspect the premises in the near future. The Parks Superintendent was instructed to continue negotiations with the company on such basis when further instructed by the Engineer.

The Commission had under consideration a resolution from the Wasco

County Court requesting the extension of the Warm Springs Secondary Highway from its present terminus at the Wasco-Jefferson County line northerly to a connection with the Wapinitia Highway. The Engineer advised that in his estimation it would be advisable to designate this road as a secondary state highway in view of the fact that the Commission plans to construct a project at the northerly end thereof next year in connection with which state funds will have to be expended. Furthermore, it is a logical extension to the present Warm Springs Secondary Highway. The Commission concurred and thereupon approved the County Court's request. The following resolution designating this secondary state highway extension was adopted by the Commission by unanimous vote upon motion by Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle:

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the state, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Wasco County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Wasco County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Warm Springs Secondary Highway No. 360:

Beginning at a point on the Wapinitia Highway at a point near the Range line between Section 13, T. 5 S., R. 9 E. and Section 18, T. 5 S., R. 10 E., W. M; thence in a southeasterly direction to the Jefferson-Wasco County line at a point near the township corner common to T. 8 S., R's. 11 and 12 E. and T. 9 S., R's. 11 and 12 E., W. M., a distance of approximately 25.3 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931, and amendments thereof.

The Commission had under consideration the matter of rerouting the Oregon-Washington Highway through the town of Pilot Rock in connection with which matter the Commission held a public hearing in the town of Pilot Rock on Tuesday, August 30, 1938, as required by statute. The Commission decided, in view of the fact that the citizens of Pilot Rock appear to be unanimously in favor of the proposed rerouting of the highway, to adopt the proposed location, which will eliminate two right-angle turns in the present route. The following resolution in regard thereto was adopted by the Commission by unanimous vote on motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle:

WHEREAS, pursuant to notice given as required by Section 44-120, Oregon Code 1935 Supplement, the Highway Commission met in the Public Library Building in the City of Pilot Rock on the thirtieth day of August, 1938, for the purpose of conducting a hearing as provided for in said law with respect to a proposed change in the point or place of entrance of the Oregon-Washington Highway into said City from the southerly boundary thereof, the proposed change in the point or place of entrance of said highway into said City from the easterly boundary thereof, and the proposed change of the route of said highway in and through said City; and

WHEREAS, said meeting was called to order by E. B. Aldrich, Acting Chairman of the State Highway Commission, who explained to those assembled the purpose of the meeting and the proposed change in the route in and through said City, the proposed change in the point of entrance from the southerly boundary, and the change in the point of entrance from the easterly boundary thereof, and the Acting Chairman then invited discussion with respect to said matters and extended to all persons present an opportunity to be heard for or against said proposed change; and

WHEREAS, after all who evidenced a desire to be heard had entered their names in the records and minutes of the meeting and had declared their approval or disapproval of said proposed change, the Acting Chairman announced that said matters would be taken under advisement by the Commission and a decision made and announced at a later date; and

WHEREAS, after due and full consideration of said matters and of the arguments and declarations made for and against the said proposed change at said public hearing, both with respect to the point of entrance of said highway into said City from the south and the point of entrance of said highway from the east, and with respect to the change of route in said City, and the Commission now being fully advised with respect to all of said matters, it is the

opinion and judgment of the Commission that the interests of the State at large will be best served by the adoption of said proposed change of route of said highway in and through said City and the change in the point of entrance into said City from the southerly boundary or direction and the change in the point of entrance into said City from the easterly boundary thereof, all of which changes will, in the judgment of the Commission, make possible a better alignment, a more serviceable, convenient and safe thoroughfare into and through said City, and therefore, it is the opinion of the Commission that the route and alignment of said highway should be altered and modified, and the point of entrance into said City from the southerly direction thereof and the point of entrance into said City from the easterly direction thereof, and the route in and through said City should be changed, fixed and determined, all as in said notice announced and at said hearing heard;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of the members being present and affirmatively voting, as follows:

1. That the route and location of the Oregon-Washington Highway as the same enters the City of Pilot Rock from the southerly direction and the route of said highway as the same enters the said City from an easterly direction, and the route of said highway in and through said City shall be and the same hereby is routed along the route and over streets described and defined as follows:

Beginning at a point on the present Oregon-Washington Highway on Main Street at the intersection with Willow Street in the town of Pilot Rock, Umatilla County, Oregon; thence in a northerly direction along Main Street to Alma Street; thence in an easterly direction along Alma Street to a point near Bluff Street; thence in a northeasterly direction to a connection with the present above-mentioned highway approximately 1000 feet northeasterly of the easterly city limits of said town of Pilot Rock.

2. That the said above described route, location and alignment be and the same hereby is adopted as the route and location of said highway between the termini as defined and described above.

3. That the Engineer be and he is hereby instructed to definitely locate and establish said highway by proper monuments and markers and make proper record thereof in the records of the Highway Commission, and erect proper signs on the street or streets over which said highway is routed, and proceed with the permanent improvement and maintenance of said highway along the route herein defined and in harmony with plans and specifications by this Commission approved.

4. That this resolution be entered in the records and

minutes of the Highway Commission, and a duly certified copy thereof mailed to the Mayor of the City of Pilot Rock, and a like copy to the County Court of Umatilla County.

The Commission also had under consideration the matter of rerouting The Dalles-California Highway from 9th Street to 11th Street, in Klamath Falls, in connection with which matter a public hearing was held in the city of Klamath Falls on Tuesday, August 9, 1938, to secure expressions from the citizens of this city relative to the proposed change, as is required by statute. The Engineer gave as his thought that no advantage would be gained by rerouting the highway, in view of the fact that 11th Street is no wider than 9th Street and contains practically the same number of turns, and for the further reason that there is a possibility that at some time in the not far distant future the route of this highway into Klamath Falls from the north will be continued along the railroad, which will take traffic away from both streets. For reasons stated by the Engineer and for the further reason that there is strong opposition by the citizens of Klamath Falls to the change, the Commission decided to retain the highway in its present location on 9th Street, notwithstanding the request of the Klamath Falls City Council that it be rerouted along 11th Street.

The Attorney reported the status of the suit of Oregon City against the Security and Investment Company of Oregon City to determine the ownership of certain street ends, portions of which are needed for right of way for the East Portland-Oregon City Highway in Oregon City. He said that the case has been tried and it is now before the trial judge for decision. Also, that the attorneys for the Security and Investment Company have approached him relative to a compromise settlement for the street ends. He gave as his thought that the Commission should not consider compromising with the company for these street ends because the object and purpose of the suit was to determine the ownership of the same, and that would be defeated in the event that the Commission would now arrange a compromise settlement. If any compromise settlement is made, he said, it should be confined to the private property that is not in controversy rather than the street ends, which are claimed by both the city and the company. The Commission concurred in the viewpoint of the Attorney and instructed him to inform the attorneys for the Security and Investment Company that the Commission refuses absolutely to consider a compromise settlement for the acquisition of the right of way across the street ends that are in controversy, and the parties to the suit will therefore have to abide by the decision of the trial judge with respect thereto.

The Attorney also reported difficulties in securing right of way for the East Portland-Oregon City Highway across the property of the Oregon City Laundry which is located between Main Street and Water Street in Oregon City. It appears that the owners of the laundry will not set a price on their property, and they allege that if the highway right of way is taken there is insufficient space left on which to establish their laundry business, which is contrary to the belief of the attorneys and engineers of the Highway Department. The Commission instructed the Attorney to continue negotiations and expedite them as much as possible so that no delay will be encountered because of right of way difficulties when this project is ready for construction.

The Commission discussed briefly a letter from Timberline Lodge, Inc., Government Camp, Oregon, in which request was made for the support of the Commission in the matter of maintaining and operating the spur road leading from the Mt. Hood Highway to Timberline Lodge. The Commission took no definite action on this matter. (Delegation was present on following day regarding this.)

Harold B. Say, Manager of the Travel and Information Department, called the Commission's attention to the fact that, by the terms of the contract between the Commission and the San Francisco World's Fair Committee whereby the Commission has budgeted \$40,000 of state highway funds for participation in the Oregon exhibit of the San Francisco Fair, the exposition committee was required to submit to the Highway Commission by October 3, 1938, a list of the various items for which it was proposed that the State Highway Commission's contribution will be expended. He said that it has been impossible to determine all of the items to date, and recommended that an extension of time to December 15, 1938, be given the World's Fair Committee within which to submit a list of all items that the Highway Commission will be called upon to finance. The Commission approved the recommendation unanimously.

Mr. Say also brought up the matter of the Commission's approving an expenditure of state highway funds to pay a portion of the cost of renting an exhibit building at the San Francisco Fair. After discussion the Commission approved in principle the payment of a proportionate share of such expense from the \$40,000 appropriation that it has budgeted for the World's Fair.

The matter of purchasing two or three reels of motion pictures in addition to those called for in the agreement between the State Highway Commission and the World's Fair Committee with Castle Films, Inc., was brought up for discussion by Mr. Say. He advised that such reels could be secured for the sum of \$2,000, and recommended purchase of the same, the cost to be paid from the \$40,000 that the Commission has set up for World's Fair purposes. The Commission approved the recommendation unanimously.

The Commission adjourned at 11:15 o'clock p. m. to reconvene at 9:00 o'clock a. m. on the following day in the Auditorium of the Public Service Building.

Portland, Oregon, September 29, 1938

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

SEP 28 1938

Bids as follows for highway construction projects and for the purchase of buildings were opened and read in conformance with previously published notice:

Mr. and Mrs. H. D. Rohde	\$ 51.00
--------------------------	----------

Chairman Cabell announced that the Commission would make its award of contracts, et cetera, at 3:00 o'clock p. m. in the same room.

County Judge Nelson B. Higgs, Harney County, and County Commissioner William Baer, Deschutes County, were present and asked that the Central Oregon Highway be officially designated as U. S. Highway No. 14, so as to provide a U. S. highway route with this number extending from the Atlantic Coast to the Pacific Coast. The Engineer gave as his thought that the idea is a good one but suggested that the numbering of this road be deferred until the road is in better condition for general public travel. The Commission concurred in the Engineer's suggestion and advised that a recommendation to the effect that the Central Oregon Highway be designated as U. S. Highway Route No. 14 would be forwarded to the American Association of State Highway Officials at the proper time.

Mr. Robert W. Sawyer, Bend, came before the Commission in regard to the appointment of a committee, as recommended by the Advisory Board on Publicity Matters, to make a study of Oregon conditions tending to affect tourist travel and to make suggestions that will lead to a more efficient meeting of tourist advertising competition. He gave as his thought that this committee should be composed of probably three members and that the personnel should be people who reside outside of the State of Oregon. He further suggested that this committee should make a trip over the highways throughout the state, taking about a week or so of time, and that they should serve without pay except for reimbursement for their necessary traveling expenses. The Commission indicated approval of Judge Sawyer's suggestion but deferred definite action on the matter until its next meeting. Mr. Sawyer was assured by Chairman Cabell that the matter would be definitely disposed of at such meeting.

In this connection the matter of removal of signs from the highway rights of way and properties adjacent thereto was brought up for discussion. The Commission authorized and instructed the Engineer to prepare a circular letter to all field engineers ordering the removal of all advertising signs of every description, regardless of who owns the signs, from state highway rights of way and all right of way fences.

Mr. Sawyer also brought up the matter of substituting the Butler Market Road in Deschutes County for a portion of the Powell Butte Secondary Highway No. 371. Present and entering into the discussion of this matter were County Judge C. E. Lyon and County Commissioners Wm. Baer and Millard T. Triplett, of Deschutes County, representing the County Court. Mr. Sawyer pointed out that the Butler Market Road connects with the Powell Butte Secondary Highway about 7 miles northeast of Bend and extends directly into Bend, whereas the Powell Butte Secondary Highway connects with the Central Oregon Highway about 5 miles east of Bend. He further stated that the Butler Market Road is the logical secondary highway because, in his estimation, it more nearly meets the federal aid secondary highway requirements, being a feeder road which is a mail route and over which school busses are routed. He urged the Commission to either designate this road as another secondary state highway or to reroute the Powell Butte Secondary Highway over it into Bend rather than to the present connection with the Central Oregon Highway.

SEP 29 1938

After discussion the delegation was informed by Chairman Cabell that he expects to make a trip to Burns within the next month or so and would be pleased to inspect the Butler Market Road enroute. Action on the request was accordingly deferred for the time being.

Mr. Sawyer also brought up for discussion the matter of construction of the proposed 3rd Street Railroad Grade Separation Project on The Dalles-California Highway, in Bend. He gave as his understanding that the Commission has postponed this project and urged reconsideration of the decision so that tourists visiting the state, after attending the San Francisco World's Fair next year, will not be inconvenienced. He predicted an unusual amount of travel on The Dalles-California Highway during progress of the San Francisco World's Fair. The Engineer advised that the Commission's revenues from the gasoline tax and motor vehicle license fees have not materialized as was anticipated, and indications are that receipts will be from \$250,000 to \$300,000 below the estimates made last fall, in view of which the Commission will not be able to match all of the federal funds as rapidly as they become available, and has found it necessary to postpone a number of projects, including the 3rd Street project in Bend, for the time being.

He further explained that, whereas the government funds are to be used to finance construction of this grade separation project, the state will have to pay the nonparticipating items, including the acquisition of right of way, which, in a project of this kind, will aggregate a considerable sum. Furthermore, the state must advance the cost of construction, and experience shows that, in connection with grade separation projects, the percentage of state funds that are tied up during the time that construction operations are in progress sometimes amounts to as much as 50 percent of the cost of the project, and reimbursement is not secured from the Government for several months after the work is completed. It is apparent, he said, that the state will gain no material financial advantage by giving priority to the 3rd Street Grade Separation Project in Bend, or any other grade separation project, over other federal aid projects. This matter was discussed further but the Commission made no change in its plans for the contracting of the job.

A delegation from Clatsop County, consisting of County Judge Guy Boyington and County Commissioner Wm. Larson, representing the County Court; G. Clifford Barlow, Auditor and Police Judge, Warrenton; Senator F. M. Franciscovich; Colonel Edgar Thompson, Commander of Fort Stevens; and James O. Convill, City Manager of Astoria, was present in regard to a road extending from the Oregon Coast Highway to Fort Stevens. They asked the Commission to designate this road as a state secondary highway and to improve the same as such. They pointed out that the present road is paved, although the pavement is narrow, and asked that it be widened to at least 20-foot width and that the numerous sharp curves and right-angle turns be eliminated. Judge Boyington said that they would be satisfied with an improvement costing about \$25,000.

Speaking in behalf of the project, in addition to Judge Boyington, were the following: Colonel Thompson, Mr. Barlow, and Senator Franciscovich. The speakers urged the improvement from the standpoint of providing a usable

and safe road for the general traveling public when heavy government equipment is being transported over the same; from the standpoint of fire prevention, the government fire-fighting equipment at Fort Stevens being the only available equipment of this kind to serve the towns of Warrenton and Hammond; and to provide a good military road for use in times of war. In this connection it was pointed out that this is the only road leading to Fort Stevens and from that standpoint it should be reconstructed to high standards and placed in exceedingly good condition.

The Engineer advised that the road is a little over 6 miles long and that it would cost approximately \$200,000 to reconstruct it to modern standards. He also said that the road has a high solvency quotient, which would indicate that its improvement would be a desirable project if there were funds to finance it.

Senator Franciscovich pointed out that the road is the only one available between Fort Stevens and Camp Clatsop, which is quite important from the military standpoint.

Chairman Cabell pointed out that the highway improvements which are being financed with government funds must meet certain requirements. He questioned the government authorities approving a minor improvement on this road. He further stated that the road has merit but the Commission is short of funds and is not able to finance the improvement of the same now, hence is not in a position to place the road on the state highway system at present. He agreed to inspect the road the next time he is in the vicinity of Astoria. This concluded the conference.

Mr. Convill then conferred with the Commission in regard to highway improvements in Astoria. He inquired as to the plans of the Commission for the construction of the proposed revision of the Oregon Coast Highway on Bond Street and was informed that this project is in an indefinite status due to shortage of funds, hence there is no possibility of doing the work this year unless it should develop that savings accrue from the contracting of other work, which appears doubtful at the present time.

The Engineer brought up the matter of financing the Surtex and Brothers Building Project, for which the Commission took bids at this meeting. He pointed out that the low bid received for this work exceeds the original estimated cost of the work as submitted to the P.W.A. authorities, and, under the present setup, the Government will not pay more than 45 percent of the original estimated cost. He recommended that an amended application be filed with the P.W.A. authorities to secure, if possible, additional grant funds which would relieve the state from payment of such amount; and, if the Government denied the application, that the excess amount be paid entirely with state funds so that the project can proceed. The Commission voted unanimously to secure the additional P.W.A. funds if possible and authorized the Engineer to file an amended application for the same. The Commission also voted unanimously to pay the excess amount entirely with state funds in the event that the P.W.A. authorities refuse the additional grant. The Commission decided to proceed with the award of the contract on such basis.

SEP 29 1938

Messrs. J. E. Turnbull and William Tugman, representing the city of Eugene, were present in regard to the adoption of a permanent route for the Pacific Highway through Eugene. Mr. Tugman stated that important business developments are being held up because of the uncertainty of where the permanent highway is to be routed and he urged the Commission to make necessary surveys and to decide a permanent route as soon as possible, whether or not construction is undertaken for two or three years. He filed petitions as follows endorsing the request: letter from the Eugene Chamber of Commerce bearing endorsements by 69 businessmen of Eugene; resolution from the Board of Directors of the Eugene Chamber of Commerce; letter from the Eugene Realty Board; and a letter from the Eugene City Council. He also filed with the Commission a statement showing the 1938 owners of property lying north of and adjacent to 6th Street, Eugene, between Grant and Pearl Streets, which is being considered as a possible route for this highway.

The Engineer advised that several alternate routes have been considered through Eugene and it appears to him that the 6th Street route meets the qualifications and requirements of second stage construction better than the others. It was his thought that a definite route should be decided, and recommended that a location survey be made of the two best routes when there is money available to finance the surveys, which probably would not be until after the first of the year, and that 2-year options be then taken for the right of way; also, that a public hearing be held in Eugene as required by law. The Commission approved the recommendation unanimously and authorized the Engineer to make the survey.

The County Court of Lane County, consisting of County Judge M. E. Glass and Commissioners Walter J. Holland and C. M. Young, was present. They were accompanied by P. M. Morse, County Engineer. Judge Glass inquired whether or not the Commission has as yet acted on the petition of Lane County citizens requesting that the old Pacific Highway between Junction City and Eugene be designated as U. S. Highway No. 99 East. He was informed that the Commission has acted on this matter and has denied the request because it is contrary to the policy of the American Association of State Highway Officials, whose recommendation is followed in such cases, to approve of alternate highway routes, and in this particular instance it is doubtful that approval could be secured because the old route closely parallels the new route of the Pacific Highway.

Judge Glass then brought up the matter of sidewalk construction along the Junction City-Eugene Secondary Highway through the Santa Clara District. He said that the Commission approved of such sidewalk construction at one time but the provisions of the permit that was prepared were so drastic that the county could not accept them, hence did not build the sidewalk, which was to have been undertaken as a W.P.A. project.

The Engineer explained the requirements of the Commission in regard to sidewalk construction on state highway rights of way and pointed out that in most instances the state requires the sponsor of the sidewalk to maintain the same, but in this particular instance the Commission agreed to maintain the sidewalk because of the unusual circumstances.

Judge Glass then stated that the sidewalk is badly needed through this district because of the large volume of traffic using the road and gave as his thought that the state should build the sidewalk and suggested that the work be done as a state W.P.A. project.

The Engineer pointed out that the funds budgeted by the Commission for W.P.A. work have all been allocated. He suggested that further consideration of the sidewalk project be deferred until the new highway between Junction City and Eugene is open for travel, which will be in the near future, when a traffic count can be taken to determine the justification for a sidewalk along the old road, and the Commission can then decide who should sponsor the W.P.A. project if the sidewalk is required. The suggestion was approved by all parties.

Judge Glass then asked the Commission to furnish powder for use in connection with a W.P.A. project that the county proposes to undertake on the Walton-Noti Section of Route "F" Secondary State Highway this winter. The Commission deferred a decision on this matter pending completion of a survey which is now under way, and a determination as to what the Commission's obligations are to be for next year, there being a question as to whether or not the Commission would have any money to spare in view of the fact that its finances are now low and every dollar must be conserved to match federal aid funds.

The Commission adjourned at 12:30 o'clock p. m. and reconvened at 1:45 o'clock p. m. in the same room with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

A delegation from Roseburg, consisting of W. C. Harding, Secretary of the Chamber of Commerce; A. C. Marsters; County Judge Huron W. Clough; and Senator C. W. Clark, came before the Commission with an urgent plea for the reconstruction of the Roseburg-Shady Point Section of the Pacific Highway. They alleged that they were previously given to understand by the Commission that this project would be contracted this fall, but it now appears that the Commission has deferred it and it is a big disappointment to them and to the people of their district. They urged the Commission to reconsider its decision and to take bids for the work so that construction can be started this year.

Chairman Cabell advised that the revenues that the Commission expected to receive this year have not materialized because the amounts received from the gasoline tax and motor vehicle license fees have decreased since 1937 to such an extent that it has been necessary for the Commission to defer a number of projects, including the one south of Roseburg, because of inability to finance them. He further stated that the Roseburg-Shady Point project is a desirable one and that the Commission wants to contract it as soon as possible but because of financial stringency cannot do so now. This project, he said, was placed on the tentative construction program earlier in the season but the Commission made no definite commitment or promise in regard thereto because that is contrary to the Commission's established policy

and the Commission regrets if the people of Roseburg have misunderstood the Commission in this regard. He pointed out that the Commission has a considerable amount of contract work under way and has to make partial payments to its contractors each month, so it would be unwise for the Commission to jeopardize such payments to the contractors by the contracting of more work than it is able to finance. Commissioner Aldrich concurred in the remarks of Chairman Cabell and added that the Commission has no intention to sidetrack this job and expects to contract it at the earliest possible time.

Mr. and Mrs. E. C. Newall of Vancouver, Washington, and Mrs. Newall's mother, Mrs. Ida B. Hadley, Newberg, came before the Commission in regard to damage that occurred to Mrs. Hadley's property adjacent to the Pacific Highway West, about one mile east of Newberg, by reason of the reconstruction of this highway. Mr. Newall stated that Mrs. Hadley conducted a fruit stand alongside of the highway before the highway was reconstructed but is now unable to do so because the grade line of the highway was lowered several feet, which places her stand at the top of a deep cut, where it is not readily accessible to highway traffic, and as a result she is now deprived of the only income that she had, amounting to about \$250 per year. He further explained that Mrs. Hadley donated land that was needed for extra right of way in front of her premises, and had no intimation of any kind that the highway grade line would be lowered, and the only compensation that she received from the state was about \$20 to pay the cost of moving some shrubbery. He added that Mrs. Hadley is now asking the Commission to recompense her in some way for her loss and will be satisfied if the Commission will do additional grading work in front of her place so that she can resume her business, which, although small, is her only source of income and is badly needed by her.

The Engineer advised that, in order to provide a site for Mrs. Hadley's fruit stand, it would be necessary to do a considerable amount of grading work, which would be quite costly.

Chairman Cabell pointed out that the Commission has an established policy which does not permit the opening up of negotiations after they have once been completed because it is considered a bad precedent to do this unless there is a very valid justification for the same. He added that, notwithstanding this policy, in view of the circumstances, he would be glad to inspect the premises in the near future, but a decision cannot be made at this time.

Messrs. Bernard Schoenburg, Tom Root, and Wallace Telford, representing the Clackamas County Planning Board, came before the Commission with a request that the Highway Commission take over as a state secondary highway the spur road leading from the Mt. Hood Highway to Timberline Lodge. They also asked the Commission to place on the state secondary highway system the county road which extends from Estacada up the Clackamas River to Oak Grove Fork. They said that both roads are scenic in character and, in their estimation, should be state highways. They pointed out that the Estacada-Oak Grove Fork road has possibilities for future connection with the Wapinitia Highway.

They were informed by Chairman Cabell that state highway funds are at a low ebb and the Commission is not in a position today to give them any encouragement for either project; however, the Commission is now considering the matter of taking over the road to Timberline Lodge, although from a check of the Commission's finances and obligations it does not appear possible to do this right now because of the expense involved. However, the Commission has not yet definitely decided what it will do in the matter.

Mr. Telford then brought up the matter of the improvement of 82nd Street (Cascade Secondary Highway) between a place known as Pope Hill and Oregon City. He asked the Commission to rebuild this road next year (1939) as a safety measure inasmuch as it will eliminate two dangerous railroad crossings and one dangerous bridge on the present route, which is a very serious matter. He said that the Clackamas County Planning Board believes that the selection of the proper route should be left with the State Highway Commission and its engineers, but that their purpose at this time is simply to urge the Commission to rebuild the section at the earliest possible time. Mr. Root also spoke in favor of this project.

Chairman Cabell pointed out that the people of this district are not in accord as to what the Commission should do to improve this road and the Commission feels that, since there are so many projects throughout the state where the people are in agreement, it should proceed with those projects rather than with a project where there is so much opposition. In such matters, the Commission acts, he said, on the theory that it should not spend its money for improvements on inferior locations, and believes, in cases where there is considerable opposition to construction on the proper location, that the thing to do is to discontinue further consideration of the project rather than to build on inferior line changes to fit local sentiment. In any event, he added, the Highway Commission does not have funds to proceed with this project now and will not have until it receives the federal appropriations for railroad grade separation projects. The Commission will keep this project in mind, he added, but can make no definite commitment or promises at this time.

The Engineer requested instructions relative to the contracting of the proposed revision of the Oregon-Washington Highway between Pendleton and Adams, in Umatilla County. He said that this project is scheduled for letting at the December meeting of the Commission but there is a question whether or not it will be ready at that time because of difficulties encountered in the acquisition of right of way, some of the property owners having demanded considerably more for their holdings than they are worth or than was anticipated. It appears now, he said, that it will be necessary to condemn the right of way if the Commission wants to contract this work before the end of the year. After considerable discussion the Commission instructed the Attorney to proceed with condemnation immediately under authority heretofore given him. He was also instructed to render a report on the right of way situation at a special meeting of the Commission which is to be held before the end of October, at which time the Commission will decide whether or not to advertise this project for bids to be received at its meeting on November 10.

The Commission thereupon set Thursday, October 20, 1938, as the date for such special meeting, which is to be held in the office of the State Highway Engineer in Salem.

The Commission also confirmed Thursday, November 10, 1938, as the date for its next regular meeting for the receiving of bids in Portland, and decided to take bids also on Wednesday, November 9, 1938, in Portland, inasmuch as there will be too many jobs listed for a one-day letting. The Secretary was instructed to make the usual arrangements to hold the Portland meetings in the Auditorium of the Public Service Building in accordance with the usual practice.

The Commission had under consideration bids received at the morning session for the construction of highway department maintenance buildings at Suntex Junction and at Brothers on the Central Oregon Highway, in Deschutes and Harney Counties. Inspection of the bids revealed that of Henry C. Nelson, Bend, to be low at \$36,394.00. The Engineer advised that in his estimation the bid is satisfactory and recommended the award of the contract to Mr. Nelson at his bid price of \$36,394.00. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

Moved by E. B. Aldrich and seconded by F. L. Tou Velle, that the contract for the construction of Highway Department maintenance buildings at Brothers and Suntex Junction be awarded to Henry C. Nelson of Bend, Oregon, the low bidder, at his bid of \$36,394.00.

The Commission thereupon authorized the State Highway Engineer and the Secretary to sign a letter directed to Mr. C. C. Hockley, Regional Director, P.W.A., advising him of the action taken and informing him that the Commission will proceed with the award of the contract upon receipt of approval from his office.

The Commission also had under consideration the bids received at the morning session for the construction of the Molalla Section of the Woodburn-Mt. Hood Secondary Highway, in Clackamas County, and for the construction of the Brownsville Section of the Halsey-Sweet Home Secondary Highway, in Linn County. Inspection of the bids received for the Molalla paving project revealed that of the Mountain States Construction Company of Eugene to be low at \$12,286.00, and that of the Mountain States Construction Company, Eugene, for the grading, surfacing, and oiling of the Brownsville Section at \$21,970.50 to be low for that project. The Commission considered that these bids are satisfactory, and, having previously received approval from the United States Bureau of Public Roads, decided to award the contract for each project to the Mountain States Construction Company at the low bids submitted therefor. The following resolutions in regard thereto were adopted by the Commission by the unanimous vote of the Commissioners present:

WHEREAS, the bids received for the construction of paving at Molalla, Oregon, have been duly opened, read and compared,

and it appears that Mountain States Construction Co. is low bidder, after taking alternate deductions; and

WHEREAS, such bid is within the available funds of \$13,300;

NOW, THEREFORE, BE IT RESOLVED, That the contract for the construction of said Molalla paving be and the same is hereby awarded to Mountain States Construction Co. for the sum of \$12,286.00.

WHEREAS, the bids received for the construction of grading and surfacing at Brownsville, Oregon, have been duly opened, read and compared, and it appears that Mountain States Construction Co. is low bidder, after taking alternate deductions; and

WHEREAS, such bid is within the available funds of \$26,500;

NOW, THEREFORE, BE IT RESOLVED, That the contract for the construction of said Brownsville grading and surfacing be and the same is hereby awarded to Mountain States Construction Co. for the sum of \$21,970.50.

The Secretary was authorized and instructed by the Commission to notify W. H. Lynch, District Engineer, Bureau of Public Roads, in writing of the action taken.

The Commission had under consideration the offer of the United States of America to contribute P.W.A. funds to aid in financing the construction of the Madras-Deschutes County Line Rock Production Project in Jefferson County, and the acquisition of necessary lands and rights of way therefor. Commissioner Aldrich moved the adoption of the following resolution accepting such offer. The motion was duly seconded by Commissioner Tou Velle and was declared carried by the Commission by unanimous vote:

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES OF AMERICA TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE MADRAS-DESCHUTES COUNTY LINE ROCK PRODUCTION PROJECT IN JEFFERSON COUNTY AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the Madras-Deschutes County Line Rock Production Project in Jefferson County and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

(Letter follows on next page)

SEP 29 1938

"P. W. 84060-12

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.,
Dated: Sep. 29, 1938
Docket No. Oreg. 1347-F

"State Highway Commission of the State of Oregon
Salem, Oregon.

"1. Subject to the Terms and Conditions (PWA Form No.230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the acquisition of necessary lands and rights of way and the production of road material for the Madras-Deschutes County Line Rock Production Project (herein called the "Project") by making a grant to State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$7,416.

"2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later than 12 weeks from the date of this Offer and to complete such Project with all practicable dispatch, and in any event within 4 months from the commencement of construction.

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

"UNITED STATES OF AMERICA
Federal Emergency Administrator
of Public Works

By (Sgd.) H. A. Gray
Assistant Administrator"

Be and the same is hereby in all respects accepted.

SEP 29 1938

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all rules and regulations relating to such grant a copy of which rules and regulations were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than twelve weeks from the date of this offer; and to complete the work with all practicable dispatch, and in any event within four months from the commencement of construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

At 3:00 o'clock p. m. Chairman Cabell announced the following awards of contracts and sale of buildings, bids for which were taken at the morning session, the awards having been previously approved by the Commission by unanimous vote:

"Molalla Section of the Woodburn-Mt. Hood Secondary Highway, in Clackamas County. 0.34 mile paving. The low bid for this project was that submitted by the Mountain States Construction Company, Eugene, at \$12,286.00. The next low bid was that of the Oregon Contracting Company, Portland, at \$12,427.00. There were 2 higher bidders. The Commission has awarded the contract to the low bidder, the Mountain States Construction Company, at its bid of \$12,286.00.

"Roadside Oasis at Brothers on the Central Oregon Highway, in Deschutes County. The Commission received 2 bids for this project, being those of Saxton, Looney & Risley, Oak Grove, at \$7,009.00 and that of the Contracting & Sales Company, Inc., Portland, at \$8,254.00. The Commission considers these bids unsatisfactory, hence has rejected them and has ordered the project readvertised.

"Construction of maintenance buildings at Suntex Junction and Brothers, on the Central Oregon Highway, in Deschutes and Harney Counties. The Commission received 3 bids for this project, the low one being that submitted by Henry C. Nelson, Bend, at \$36,394.00. The second low bid was that of Allen V. Moore, Portland, at \$39,180.97. The Commission has awarded this contract to the low bidder, Henry C. Nelson, at his bid of \$36,394.00.

"Grading, surfacing, and oiling the Brothers-Harney County

Line Section of the Central Oregon Highway, in Deschutes and Lake Counties. The low bid for this project was received from E. C. Hall, Eugene, being in the amount of \$174,821.30. The next low bid was submitted by Edwin C. Gerber, Oregon City, at \$177,143.00. There were 13 higher bidders. The Commission has awarded this contract to the low bidder, E. C. Hall, at his low bid of \$174,821.30.

"Construction of Crooked Creek-Lobert Section of The Dalles-California Highway, in Klamath County. The low bid was submitted by Roy L. Houck, Salem, at \$120,203.50. The next low bid was submitted by Mountain States Construction Company, Eugene, at \$127,252.50. There were 13 higher bidders. The Commission has referred the bids to the Engineer with power to award the contract to the low bidder, Roy L. Houck, when certain conditions have been satisfied.

"Construction of canal and railroad roadbed in connection with the Albany Grade Separation Project on the Pacific Highway East, in Linn County. The Commission received 4 bids for this project, the low one being that of Mountain States Construction Company, Eugene, at \$6,422.50. The next low bid was that of C. J. Montag & Son, Portland, at \$6,789.00. The Commission has awarded this contract to the low bidder, Mountain States Construction Company, at its bid of \$6,422.50.

"Brownsville Section of Halsey-Sweet Home Secondary Highway, in Linn County. 1.14 miles grading, surfacing, and oiling. The low bid submitted for this project was that of the Mountain States Construction Company, Eugene, at \$21,970.50. The next low bid was that of D. L. Ashton, Lebanon, at \$23,545.00. There were six higher bidders. The Commission has awarded this contract to the low bidder, the Mountain States Construction Company, at its bid of \$21,970.50.

"Construction of the Milton Nursery Bridge over Walla Walla River on County Road No. 360, in Umatilla County. The low bid submitted for this project was that of C. J. Montag & Son, Portland, at \$19,330.00. The next low bid was that of Snook Bros., Eugene, at \$20,916.00. There were 8 higher bidders. This is a county road project and bids for the same were received by the Commission on behalf of the County Court of Umatilla County, hence the Commission is referring all of the bids to the Umatilla County Court for further handling. (The contract was awarded to C. J. Montag & Son by the Umatilla County Court later in the session. Announcement of the award was made by County Judge Carl W. Chambers.)

"Furnishing and installation of an interconnected flexible progressive traffic signal system in the city of Eugene, Lane County. The Commission received 6 bids for this project, as follows:

Sigwart Electric Company, Eugene	\$6,877.50
Castellote & Stocker, Eugene	7,741.00
W. R. Grasle Company, Portland	7,930.00

(Continued)

(Bids for Eugene traffic signal system, continued)

Kenney Electric Company, Portland	\$8,238.00
Bosler Electric Company, Salem	8,997.00
McPage-McKinney Company, Portland	9,030.70

The Commission desires more time to study these bids so as to make definitely certain that the proposal submitted by the low bidder meets the specifications. In view thereof, the Commission has referred all of the bids to the Engineer, with power to award the contract to the low bidder whose bid meets the state's specifications."

Building in South Salem

"Building No. 5777, formerly owned by Alice M. Prescott, The Commission received 3 bids for the purchase of this building, the high one being that of George Lammers, Eugene, at \$156.00. The next high bid was submitted by R. M. Toler, Salem, at \$130.00. The Commission considers the offer of George Lammers satisfactory and accordingly has sold the building to him for \$156.00."

Building in Oregon City

"Building No. 3044, formerly owned by Chas. and Lena Wieland. 3 bids were submitted for the purchase of this building, the high one being that of C. H. Walter, Aurora, at \$107.00. Mack H. Spencer, Oregon City, submitted the next high bid at \$103.00. The Commission has sold the building to C. H. Walter at his high bid of \$107.00."

Building in West Portland

"Building No. 5037, formerly owned by John T. Paulson. C.H. Walter, Aurora, submitted the high bid for this building at \$59.00. The next high bid was submitted by F. A. Graddy, Portland, at \$45.00. There was one other bid received. The Commission considers the bid of C. H. Walter satisfactory and accordingly has sold the building to him for \$59.00."

Buildings in Albany

"Building No. 4958, formerly owned by Gladys V. Holloway. No bids were received by the Commission for the purchase of this building.

"Building No. 4972, formerly owned by S. J. Brown. Mr. and Mrs. H. D. Rohde, Albany, submitted the only bid received for this building at \$51.00. The Commission has rejected this offer and ordered the building readvertised."

SEP 29 1938

Mr. Roy Kilpatrick, Canyon City, was present and asked for the improvement of the 4-mile section of the John Day-Burns Highway (Three Flags Highway) between Seneca and the Masonic Lodge picnic ground. He said that he represents the people of Canyon City, John Day, and Seneca, who would like to have the road drained and graveled so as to avoid a repetition of conditions which obtained during the last winter when the road was almost impassable. He further stated that the people of the Seneca district do a considerable portion of their trading in the towns of John Day and Canyon City and it is absolutely necessary for them to have a usable road throughout the entire year. They are fearful, he said, that, unless the road is given some attention now, travel conditions will be much worse this winter than last winter because there is considerably more moisture in the ground now than last year. Mr. Kilpatrick filed with the Commission several petitions bearing the names of 109 residents of John Day, Canyon City, and Seneca, in which the Commission is urged to immediately take steps as may be necessary to insure that the road under discussion will remain in reasonably passable condition throughout the year.

The Engineer advised that the present road was constructed a number of years ago to light-traffic standards and is incapable of standing up under present-day traffic, and to put it in proper condition would cost a large sum of money, which the Commission does not have available at the present time. He said that to add a small amount of surfacing material to the road now would do no good and funds expended for such an improvement would simply be wasted. The road is now being maintained, he said, in as good condition as is possible under the circumstances.

Chairman Cabell advised that this is a forest road section and the Commission is not able at the present time to do anything for it other than to see that it is maintained in the best possible condition. That will be done, he said, to the best of the Highway Department's ability until the road can be reconstructed.

County Commissioners J. D. Smullin and R. W. Perry, of Hood River County, were present in regard to the proposed revision of the Mt. Hood Highway near a place known as Fike's Corner. They said that one of their county roads intersects the Mt. Hood Highway near this place, on which county road there is a bridge that is badly in need of replacement, but they are unable to proceed with their plans for the same because a connection with the Mt. Hood Highway is involved. It appears that this bridge is an old structure and is incapable of safely carrying the loads to which it is subjected, and must be replaced in the near future; and that the County Court has two alternatives, one of which is to build a new bridge where the old bridge now stands, which would not make a proper connection with the Mt. Hood Highway and would cost considerably more to build than one on a location that would connect properly with the Mt. Hood Highway revision that the Highway Commission plans to construct. In fact, it would be possible to take care of the drainage situation satisfactorily by means of a culvert on the new location. The County Court asked the Commission to take action as may be necessary because the construction of their new bridge next spring is an absolute necessity. The question arose whether or not it would be possible, if the county

road were reconstructed on the proposed location, to connect it with the present Mt. Hood Highway, it being the thought of the Commission that such temporary connection would be satisfactory from the County Court's standpoint and would make it possible to defer the improvement of the Mt. Hood Highway until funds can be spared to finance such work. The idea met with general approval and after further discussion the Commission instructed the Engineer to inspect the premises and ascertain whether or not that can be done. A report on the matter is to be rendered to the Commission at its next meeting.

The County Commissioners also asked the Commission to complete the oiling of the Hood River Secondary State Highway between Dee and Hood River in the Commission's 1939 construction program. They were informed that the Commission has not yet formulated a program for next year but will give this project due consideration when the matter comes up for discussion.

The County Court of Umatilla County was present in regard to the award of the contract for the construction of the Milton Nursery Bridge for which bids were taken at the morning session. County Judge Carl W. Chambers stated that the County Court is satisfied with the low bid submitted by C. J. Montag & Son at \$19,330.00 and would like to announce the award of this contract at this meeting if that is agreeable to the Commission. He advised that the award has been approved by the P.W.A. authorities. The Commission thereupon turned the meeting over to the County Court and the following announcement of the award of the contract under discussion was made by County Judge Chambers:

"Umatilla County Court wishes to announce that it is satisfied with the bid submitted by C. J. Montag & Son for the construction of the Milton Nursery Bridge, this bid being the low bid received for this project at \$19,330.00, and accordingly has awarded the contract to C. J. Montag & Son at their bid price."

Following this announcement the State Highway Commission resumed charge of the meeting.

A delegation from Albany, representing the City Council and headed by Mayor C. R. Ashton, was present. Others in the delegation were Elton Coates and W. V. Merrill, Councilmen; City Engineer Walter W. Larsen; and Glen Junkin, City Street Superintendent. They asked permission to construct and maintain public rest-room facilities under the approach to the Willamette River Bridge at Albany. The Commission granted the request subject to the condition that the rooms be kept in a clean and sanitary condition, and with the understanding that the place would be closed in the event that these conditions are not complied with. The Commission ordered that the matter be covered by an appropriate agreement and instructed the Attorney to prepare the same.

The delegation then discussed with the Commission a drainage problem in the southern part of Albany, it being their thought that the State Highway Commission is interested in view of the fact that the city plans to

construct a drainage ditch along the newly acquired highway right of way. Mayor Ashton advised that there is a considerable amount of surface water originating in the southeastern part of Albany which flows into and through town and they want to correct this condition, which will involve the construction of a drainage ditch along the new highway right of way and the construction of a siphon under the highway so that the water can be taken into Oak Creek rather than through town, as at present. Unless the water is taken care of in this manner, he said, the highway grade, when constructed, will act as a barrier to the free flow of water, much to the discomfort of the people residing in that district, and will also have a bad effect on the highway fill. The delegation advised that the plans are to construct the canal this fall, and that the city would like some cooperation from the state in view of the benefits that the state would receive. They suggested that, if the state would construct the canal, they would be satisfied, and advised that the city would furnish the right of way for the same.

The Engineer pointed out that no funds have been budgeted by the Commission to construct the new highway in the southern part of Albany. He also said that the state would receive some benefit from the city's proposed improvement because the material excavated from the canal could be used to partially build the highway embankment, the grade line of which could be lowered about a foot on account of the betterment of the drainage facilities. Relative to right of way, he gave as his thought that it would be advisable for only one agency to negotiate for the right of way for the highway and also for the canal, and suggested, in view of the apparent necessity for early action and in order to conserve funds, that the state assume this obligation and that the right of way options for both projects be obtained at once. The city officials agreed to such arrangement. The Commission appeared favorably inclined to assist the city, if possible, and after further discussion authorized the Engineer to proceed with the securing of options for right of way for both highway and canal, and instructed him to report on the matter at the next meeting, if possible.

Messrs. E. R. Fatland and C. W. Harris, Condon, representing the John Day Highway Improvement Association, were present and asked for the opening of another section of the John Day Highway across the Butte Creek Summit. They particularly urged the Commission to construct at least a one-mile section lying at the summit, if funds are not available to construct a larger project.

Chairman Cabell and the Engineer explained the status of the Commission's finances and advised that, in view of the shortage of funds, the Commission cannot make any promises or commitments in regard to the project under discussion until the reconstruction of the Prairie City-John Day Section has been completed.

A delegation from Portland and vicinity, consisting of 18 members, came before the Commission at this time and asked the Commission to join with the United States Forest Service and the Bureau of Public Roads in securing the designation as a forest highway of the spur road leading from the Mt.

Hood Highway near Government Camp to Timberline Lodge. Mr. Jack Meier headed the group and introduced the speakers. Other members of the delegation were A. A. Comrie, A. M. Cronin, Jr., Forrest Berg, and Horace Mecklem, all representing Timberline Lodge, Inc.; John Standish, representing the Portland Junior Chamber of Commerce; Dale Cowen, representing the Oregon Winter Sports Association; James A. Mount, representing the Mt. Hood Development Association; Henry Corbett, Jr., representing the WY'East Climbers; Rod Norwood, representing the Nile River Yacht Club; Leslie Walrad, representing the Gresham Chamber of Commerce; Bob Smith, representing the Sandy Chamber of Commerce; Jack Greenwood, representing the Mt. Hood Activities Association; Jack Godfrey, Governor of the Columbia River Kiwanis District; E. J. Griffith, Administrator of Works Progress Administration; George M. Henderson, representing the U. S. Olympics Ski Tryouts Commission; and Berger Underdahl, representing the Mt. Hood Ski Sports. Speaking in behalf of the project were Messrs. Meier, Mecklem, Cowen, Greenwood, Comrie, Griffith, and Henderson.

Mr. Mecklem recited the history of Timberline Lodge and gave figures to show that the lodge has been operating very successfully, much to the surprise of its stockholders, the patronage being far above expectations. He said that during the period February 4 to September 5, 1938, the lodge has been visited by over 200,000 people, and that they predict that at least 6000 cars monthly will visit this place if road facilities are made available for their use. He also said that it was their understanding when the lodge was completed that the road leading to the lodge would be kept open the year round; in fact, he said, the road must be kept open, otherwise the general public will not be able to enjoy to the fullest extent the facilities that are offered and which were provided at large expense for public use. He gave as his thought that the cost to the state to maintain the road would not exceed the amount of revenue that the state will receive from gasoline tax collected from motorists who use the road. He alleged that Timberline Lodge, Inc., is not a private undertaking but is a public proposition provided by the Federal Government for the citizens of Oregon and for the benefit of the people of the entire country. Mr. Mecklem concluded his argument by stating that 11 busses were operated over this road the past winter but they did not begin to take care of the people who wanted to visit the lodge, which is a further indication that the road should be kept open.

Mr. Cowen spoke from the standpoint of the skiers and from the point of view of the active members of the Winter Sports Association. He declared that about 5000 people now enjoy the Mt. Hood facilities every week end, which is a remarkable showing compared with only a very limited number of people who spent the week end at this place only as recently as 1932. He advised that this year Mt. Hood has been selected as a site for the Olympic Tryouts for skiers and that these tryouts will take place next April. He further advised that the association that he represents has gone on record as being unanimously in favor of keeping the road up to Timberline Lodge open the year round. He mentioned the names of several organizations that go to make up the Oregon Winter Sports Association.

Mr. Greenwood said that he lives at the foot of Mt. Hood east of the town of Sandy and that he operates a transportation system up to Mt. Hood,

hence is qualified to make a recommendation. He said that Timberline Lodge is being largely advertised in numerous ways in an endeavor to attract people and, in his estimation, it would be giving a false impression to the people who respond to this advertising if the road to the lodge is not kept open. It was his thought that the present road could be improved at small cost; in fact, he said that the road is now in condition to be oiled and he thought it could be kept open during the winter by the state for about one-half the amount that it cost the Government to keep it open last winter. He also said that he believed the state would receive sufficient revenues in gasoline tax to justify keeping the road open the year round.

Mr. Comrie stated that Timberline Lodge, Inc., is being operated on a nonprofit basis, except that the stockholders receive 6 percent on their investment. The Government, he said, secures 80 percent of the balance of the revenues, and 20 percent is spent for operation. He declared that there is absolutely no chance for private profiteering.

Mr. Griffith advised that the Federal Government has spent over \$1,000,000 in the development of the Timberline Lodge Recreational Area for the benefit of the people of the whole United States, and that the Works Progress Administration, under whose direction the lodge was constructed, estimates that, during the first year's operation of the lodge, more than one-half a million people will have enjoyed its facilities.

Chairman Cabell inquired as to the possibilities of providing a place for the parking of cars at the lodge in the winter time. He was informed that it would not be feasible, on account of the wind and snow difficulties, to provide an open-air parking space, but plans are being formulated for the parking of cars underground; in fact, several propositions to that end are now being considered.

The Engineer inquired whether or not any estimates have been made as to how many of the people who have visited the lodge did so because the lodge attracted them, and whether or not these people would have gone to Mt. Hood regardless of the offerings of the lodge. He was informed by Mr. Henderson that available information indicates that the attendance on Mt. Hood has been doubled since the lodge was constructed. He also said that the lodge has a state-wide appeal and is a drawing card for the whole state and that the blame will rest with the State Highway Commission if the road leading to the lodge is not oiled and the dust nuisance alleviated and if the road is not kept open during the winter months, because the people now know that the Mt. Hood Highway is a state highway and they will naturally think that the road leading to the lodge from the state highway is also under the state's control.

The Engineer then advised that, if the Commission should accept the responsibility of this road, he could not guarantee to keep it open at all times because extremely bad winter storms are bound to occur and close the road. He inquired whether or not provision is made for such contingencies by way of having supplies on hand in the lodge to take care of the people who might be snowbound there. He was informed by Mr. Meier that the association

has made provision for such contingency and that a three weeks' supply of food will be on hand at all times.

Chairman Cabell summed up the matter by stating that it is his understanding that the delegation is asking for two things: first, that the State Highway Commission join with the United States Forest Service and the Bureau of Public Roads in securing the designation of this road as a forest highway so that forest highway funds can be used to assist in financing construction of the same; and secondly, that the delegation is asking the state to take over and assume responsibility for maintaining the road and for snow removal operations thereon so that the road can be kept open during all seasons of the year. He advised that the Commission has given this matter considerable thought and will give it further consideration after it is furnished with figures showing the estimated revenue that the state will receive in gasoline taxes if the road is made a state road. The Commission will take the matter under advisement, he said, and will consult the United States Forest Service regarding it and will make its decision as soon as possible thereafter.

Mr. J. A. Schmidtke, Portland, and his attorneys, Robert Bradshaw and A. G. Beatty, came before the Commission in regard to Mr. Schmidtke's log hauling operations along the Columbia River Highway from its junction with the Brower County Road to the Sandy River Bridge, near the Portland automobile Club grounds. Mr. Bradshaw stated that Mr. Schmidtke has been hauling logs over this section of the highway for the past three years under a permit issued by the Public Utilities Commissioner, which permit was evidently issued by mistake because the Public Utilities Commissioner cancelled it a few days ago upon request of the Secretary of the State Highway Commission, such cancellation being based on a previous ruling of the Commission which prohibits the hauling of logs on this highway between the town of Corbett and the Sandy River Bridge. He asked the Commission to reconsider its ruling because the combined length of load and vehicle does not exceed 35 feet and, in his estimation, the operation will not take up more than one-half the roadway. Furthermore, they have 3,000,000 feet of timber to transport, much of which has already been felled and Mr. Schmidtke has a large investment in hauling equipment.

(After considerable discussion the Engineer advised that he would have no objections to the hauling of 35-foot overall length loads from Brower Road to the Sandy River Bridge if they could be transported without any part of load or vehicle crossing the center line of the pavement. He recommended a trial run of one load of logs under the supervision of the District Maintenance Superintendent and the granting of a permit in the event that the Superintendent reports that the movement does not take up more than one-half the roadway. Further, that if the District Maintenance Superintendent's report is adverse, the matter be then brought to the attention of the Commission again for further discussion. The recommendation was approved by all concerned and the Commission so ordered. The Secretary was instructed to make the necessary arrangements for such trial run on the following day.)

Mr. George Henderson, representing the Cascade Ski Club, Inc., Portland, was present and requested authority from the Commission to move

three buildings , each 24' x 36' in dimension, directly across the Mt. Hood Highway at Government Camp. He said that the buildings really constitute one building but it has been cut up into three sections so as to facilitate the moving operation. Further, that the buildings are of light construction and will be moved with regular house-moving apparatus equipped with wheels so that the buildings would not come in direct contact with the surface of the road and can be moved easily and quickly. He estimated that it would take between three minutes and five minutes for the moving of each building across the highway and alleged that highway traffic will not be inconvenienced or delayed in the least because the highway, where the movement is to take place, is wide and traffic can be detoured around the movement without interruption and with the least possible amount of inconvenience. After discussion the Commission granted the request subject to the condition that the club will furnish the Commission with public liability insurance in the amount of \$50,000/\$100,000; property damage insurance in the amount of \$10,000; and a bond in the amount of \$1,000, to protect the Commission and to insure repairs to the road in the event the road surface is damaged; and subject to the further condition that each movement be properly flagged so as to warn other highway traffic of the movement; and that a state police officer and a representative of the State Highway Department be present during each movement.

A delegation from Portland, consisting of Mrs. Mary H. Clarke, C.W. West, E. C. Warner, and F. E. Bolich, came before the Commission and asked that a definite location for the proposed revision of the Pacific Highway West in the vicinity of Tigard be adopted immediately. They said that the uncertainty as to the highway location is seriously handicapping the property owners in the improvement and development of their properties and also in the matter of property sales, and they would like the Highway Commission to make a definite decision as to the permanent location as soon as possible, regardless of when construction is undertaken. The Engineer advised that the right of way options for this improvement have not yet all been accounted for, so the Commission has not been in a position up to the present time to adopt a definite route. He gave as his thought that full information should be ready for the attention of the Commission at its meeting on November 10. Chairman Cabell advised that the Commission will dispose of this matter as soon as the Engineer's final report has been received and considered. Mrs. Clarke filed with the Commission a petition signed by 30 residents of Tigard and vicinity in support of their request.

There being no further business to come before the Commission at this time, the meeting was adjourned at 6:00 o'clock p. m.

Rosemary
State Highway Engineer

W. E. Cleary
Secretary

Henry F. Cabell
Chairman

E. E. Cleary
Commissioner

F. L. Souville
Commissioner

Salem, Oregon, October 20, 1938.

The State Highway Commission met in regular session at 10:00 o'clock a. m. in the office of the State Highway Engineer, Room 325, State Office Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Also present were W. H. Lynch, District Engineer, and Tom Davis, Highway Engineer, representing the U. S. Bureau of Public Roads.

The Assistant Attorney reported on the status of the right of way budget and advised that expenditures for such purpose during 1938 will be at least \$600,000, which is \$50,000 more than the amount budgeted for such purpose, exclusive of expenditures for quarry sites, stock pile sites, gravel pits, et cetera. The Commission authorized an increase in the right of way budget for 1938 to \$600,000, it appearing to the Commission that it would not be possible to carry on the construction program at lesser expense for right of way.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties, together with prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, It is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby

OCT 20 1938

are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Engineer reported receipt of a letter from Governor Charles H. Martin pointing out the state law which prohibits the solicitation for contributions to the campaign fund of any candidate for election, and requesting that the Highway Commission take appropriate action. After due and careful consideration, the Commission approved and signed the following letter in regard thereto directed to all State Highway Department employees, being Circular Letter No. 83:

October 20, 1938

Circular Letter No. 83

To All State Highway Department Employees:

In view of the nonpartisan nature of the State Highway Department and the necessity of administering its functions on a strictly nonpolitical basis and in the interest of the state as a whole, the employees of the State Highway Department are again cautioned to refrain from all political activities.

No one is or will be authorized by the Oregon State Highway Commission to solicit contributions from state highway employees for the campaign fund of any candidate. No employee will be permitted to engage in such solicitation. Your attention is called to two sections of the Corrupt Practices Act, quoted below:

"Section 36-2420. Holders of nonelective positions not to contribute. No holder of a public position or office other than an office filled by the voters, shall pay or contribute to aid or promote the nomination or election of any other person to public office. No person shall invite, demand or accept payment or contribution from such holder of a public position or office for campaign purposes.

"Section 36-2419. Promise of appointments prohibited. No person shall, in order to aid or promote his nomination or election, directly or indirectly, himself or through any other person, promise to appoint another person, or promise to secure or aid in securing the appointment, nomination, or election of another person to any public or private position or employment, or to any position of honor, trust, or emolument, except that he may publicly announce or define what is his choice or purpose in relation to any election in which he may be called to take part, if elected, and if he is a candidate for nomination or election as a member of the legislative assembly he may pledge himself to vote for the people's choice for United States senator, or state what his action will be on such vote."

This is brought to your attention at this time in order that there may be no misunderstanding as to the attitude of the Highway Commission in this matter, and with the view of preventing participation of employees in the election campaigns being waged this year.

By order of
THE OREGON STATE HIGHWAY COMMISSION

Henry F. Cabell (sgd.) as Chairman
E. B. Aldrich (sgd.) as Commissioner
F. L. Tou Velle (sgd.) as Commissioner

OCT 20 1938

The Attorney reported on the matter of acquiring additional right of way for widening the Pacific Highway at the intersection of Denver and Union Avenues, in Portland, which matter was referred to him by the Commission at a previous meeting when the request of Dewey M. Gault for a suitable roadway approach from the highway to his boat dock was under consideration. The Attorney presented an arrangement for an exchange of properties, which the Commission considered and re-referred to the Attorney for additional information and report. The Attorney was authorized by the Commission to carry on negotiations on the basis of exchange of properties, if possible.

The Attorney also reported receipt of a communication from Mr. James L. Conley, Attorney, Portland, in which Mr. Conley inquires whether or not the Highway Commission cares to purchase a strip of land 20' wide and about 6,400' long, for widening the Oregon Coast Highway at Gearhart. In the discussion of this matter it was brought out that the Commission previously authorized the purchase of certain property at Gearhart from the same people who are now offering to sell the 20-foot strip; and when that matter was discussed the owners indicated that they would donate the 20-foot strip to the state if the state would purchase the other property. In view of the circumstances, the Commission deferred action on Mr. Conley's inquiry pending a report on the status of acquisition of other property, and whether or not the 20-foot strip is needed for right of way. The Commission ordered that such report be rendered at its next meeting.

The Commission considered and denied the request from Mr. Thomas Purdy, Yachats, to purchase a portion of the widened highway right of way of the Oregon Coast Highway at a place known as Bob Creek, near Mile Post 183.21, in Lincoln County, it being brought out in the discussion of the matter that this property is needed for state highway purposes.

The Attorney reported results of investigations for the acquisition of right of way for the improvement of the Umpqua Highway across the property of the Reedsport Garage at Reedsport, involving the cutting back of the garage building. He said that Mr. N. Hogan, who owns this garage, plans to remodel the building this winter and will make it fit the proposed highway improvement if the Commission will assure him that he will be reimbursed for the work which is estimated to cost between \$5,000 and \$6,000. He further stated that Mr. Hogan has expressed a willingness to convey unto the state, without charge, the extra right of way needed in front of his premises, provided the state will pay the cost of remodelling his building. Further, that he is willing to wait until 1939 for such reimbursement and will wait until 1940, if necessary. The Engineer advised that this highway project has not been programmed for construction in the near future; also, that the estimated cost to grade and oil the section through the business part of town is about \$20,000. To grade, surface, and oil the entire project, he said, would cost approximately \$47,000; and to grade, surface, and oil the portion outside the city limits with a hard-surfaced pavement construction within city limits would cost about \$63,000.

Chairman Cabell questioned the advisability of making any commitment at this time, in view of the possibility of a change in the personnel of

the Highway Commission after the first of the year and particularly because funds now available to the Commission are at a low ebb. After discussion, it was decided to tell Mr. Hogan that the Commission is not in a position to accept his proposition at the present time but will give him a definite answer after the first of the year. The Engineer was authorized by the Commission to set grade stakes for the highway in front of Mr. Hogan's premises for his guidance should he proceed with his present plans before the Commission takes final action on his proposition.

The Commission considered and approved the payment of \$564.71 to Alden E. Miller, City Attorney of Oregon City, for services rendered in connection with defense of a suit brought by the Security & Investment Company of Oregon City against the city to quiet title to certain street ends, a portion of which are required by the state for right of way for the East Portland-Oregon City Highway, in Oregon City. In this connection the Attorney advised that an adverse decision was rendered by the trial judge, who ruled that the street ends were the property of the Security & Investment Company. He gave as his thought that appeal from this decision should be made to the State Supreme Court, and he so recommended. The Commission approved the recommendation and authorized the Attorney to file the appeal at once, the cost and expense thereof, including the payment for additional service rendered by Mr. Miller, to be paid by the state.

The Commission also discussed other matters pertaining to the Oregon City project, particularly the matter of acquiring right of way across the property of the Oregon City Laundry. In this connection the Attorney advised that he has been unable to make a satisfactory settlement with the owners of the laundry for right of way across their property and it appears that it is going to be necessary to institute condemnation proceedings to acquire it, and that it may be necessary to acquire all of the laundry property because the owners allege that if the right of way is taken from them there will be insufficient room on the balance of their property to re-establish their business.

The Engineer advised that the United States Post Office Department has indicated an unwillingness to cooperate with the state in this highway improvement, objections having been offered to the narrowing of the sidewalk in front of the post-office building from 10 feet to 6½ feet, and to the plan of the Commission to prohibit the parking of cars in front of the post-office building on 5th Street, so it appears that if the original plan for this improvement, which contemplates four lanes of highway traffic, is adhered to, it will be necessary to acquire the extra right of way on the opposite side of the street from the post office. He exhibited a map showing a proposed revision which contemplates the acquisition of all of the laundry property, and pointed out that the adoption of such change would make it possible to flatten the curve where the highway turns from 5th Street onto Water Street, which is desirable, but would not affect the rest of the adopted route.

Mr. W. H. Lynch, District Engineer, Bureau of Public Roads, who was

OCT 20 1938

present, advised that he would approve such change provided it did not affect the balance of the project.

After considerable discussion the Commission approved the change as suggested by the Engineer and authorized him to make surveys as may be necessary in connection therewith. The Attorney was authorized and instructed by the Commission to continue negotiations with the owners of the laundry for right of way across their holdings and for the acquisition of all of the laundry property. He was authorized also to institute condemnation proceedings, if necessary, to acquire this property and other right of way for this project, which cannot be procured by agreement. The Commission voted unanimously not to proceed with the construction of this project until all of the right of way matters have been cleared up satisfactorily, and instructed the Attorney to expedite them as much as possible.

The Commission had under consideration a plan proposed by Messrs. Schindler, Kronenberg, and Freeman, of Bandon, for the securing of a 200-foot right of way for the Oregon Coast Highway through the town of Bandon at no greater cost than would be involved in the acquisition of right of way 80 feet wide. The plan proposed involves the acquisition of privately-owned lots on each side of the 80-foot right of way and the planting of the same to trees and shrubbery so as to provide a parkway through this town. It was the thought of the sponsors that the extra land could be acquired at no extra cost because, since the town of Bandon was burned by forest fire in 1936, the lots were placed in a "pool" for disposal and, in their estimation, a transfer of title could be made to the state that would be agreeable to all concerned.

The Attorney advised that the "pool" of lots has been dissolved since this matter was submitted to him, and the acquisition of the extra land is no longer feasible under the plan proposed by the sponsors, notwithstanding which the sponsors wish the matter brought to the attention of the Commission. The Commission appeared favorably inclined to the project but decided to adhere to the original plan for an 80-foot right of way in view of the fact that the status of the lots has been changed and they very likely could not be secured without payment for the same. The Attorney was instructed to proceed with negotiations for the acquisition of right of way 80 feet wide.

The Commission had under consideration the application of Lee A. Duncan, Baker, Oregon, for a permit authorizing him to pump water from a gravel pit that he sold to the state for use in connection with the construction of the Baker-Flagstaff Hill Section of the Baker-Homestead Highway, in Baker County. The Commission denied the request, it being considered inadvisable to grant it and contrary to the Commission's policy to give any written easement or permit granting exclusive rights in and to state property, either to Mr. Duncan or to anyone else. The Commission offered no objections to Mr. Duncan taking the water from this pit, provided it would not conflict with or be detrimental to the use of the pit by the state, but preferred not to have the matter covered by a written permit or agreement on account of its present policy.

Mr. W. H. Lynch, District Engineer, Bureau of Public Roads, brought

up for discussion the matter of providing additional funds to finance the construction of a lining in the Willamette Highway tunnel. He said that the tunnel bore has been completed and on account of the peculiarities of the materials encountered a heavier lining will have to be provided than was originally contemplated. Furthermore, it will be necessary to extend the lining beyond the limits of the tunnel portals, all of which will cost approximately \$50,000 more than has been budgeted for such purpose. He further advised that savings have accrued in the contracting of other forest highway work so that the \$50,000 needed is now available in the forest highway contingent fund, and all that is necessary to secure approval of the additional expense is for the Commission to join with the regional forester and himself in recommending to the authorities in Washington, D. C., that the extra expense be allowed. He asked the Commission to do this in order to expedite the completion of the tunnel project. The Commission approved the request by unanimous vote and thereupon signed a joint letter with the Regional Forester and the District Engineer of the Bureau of Public Roads recommending such transfer of funds.

The Commission adjourned at 12:30 o'clock p. m. and reconvened at 1:30 o'clock p. m. in the same room, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

Mr. J. W. Dunn, County Commissioner of Lincoln County, and Mr. John W. Schroeder, Newport, came before the Commission in regard to the Siletz Secondary Highway. They asked the Commission to provide for the oiling of this road, particularly the Lincoln County portion thereof, and that the work be done as a federal aid secondary highway project. They were informed that the Commission has already budgeted \$30,000 of federal aid secondary highway funds for grading, surfacing, and oiling on this road during the 1939 season, but the contracting of the work will depend entirely upon the availability of state funds to match the federal appropriation. However, the work will be undertaken as early as possible.

Mr. Dunn also asked the Commission to reconstruct the Toledo-Newport Section of the Corvallis-Newport Highway by widening and eliminating numerous curves in the present road. He was informed that the Commission is aware that this section is not up to modern standards of highway construction but the Commission is short of funds at the present time to finance rebuilding of the same and there is no prospect that the work can be undertaken in the near future.

The Secretary presented a letter from Mr. Lewis A. McArthur, Secretary of the Oregon Geographic Board, recommending approval of the request of Mr. Archie McGowan, Burns, Oregon, that the bridge over Poison Creek on the Central Oregon Highway, east of Burns, be named "Susan's Bridge" in honor of Susan Dixon Whiting, a pioneer of this district. The Commission approved the recommendation and instructed the Secretary to convey such information to Mr. McGowan.

The Engineer presented a list of landscaping projects, as follows, which he recommended for construction in the Commission's 1939 Roadside Improvement Program:

<u>Highway</u>	<u>Section</u>	<u>Amount</u>
DIVISION II.		
Oregon Coast	<u>South Entrance to Astoria.</u> Plantings in the plaza between the old and new rights of way.	\$4,000
DIVISION III.		
Pacific	<u>Ambrey-Eugene Section.</u> Plantings around gravel pits and lakes and seeding right of way.	\$12,000
Pacific	<u>North Entrance to Medford.</u> Plantings along right of way.	\$4,000
Pacific	<u>North Entrance to Roseburg.</u> Plantings on extra right of way owned by State.	\$3,000
DIVISION IV.		
Lakeview-Fremont	<u>Summer Lake to Paisley.</u> Sowing crested wheat grass along new grading and improving site for the Fremont Monument.	\$5,200
DIVISION V.		
Old Oregon Trail	<u>North Powder-Muddy Creek Section.</u> Sowing blue grass or crested wheat grass along new excavation. Slight amount of planting.	\$4,800
Old Oregon Trail	<u>Stanfield-Pendleton Section.</u> Sowing crested wheat grass on west unit.	\$3,000
Total Program		\$36,000

After discussion the Commission approved the projects and authorized the Engineer to present the same to the Bureau of Public Roads for further approval inasmuch as it is proposed to finance them with federal aid funds that are required to be expended for such purposes.

The Engineer reported that an investigation has been made of the status of the county road which extends from the Wolf Creek Highway at Elsie to a connection with the Nehalem Highway at a place known as Fish Hawk Falls, which road the County Court of Clatsop County alleges was made a federal aid highway at the same time that the Wolf Creek Highway was placed on the federal aid system. Investigation reveals, he said, that this county road was not designated as either a federal aid highway or a state highway and accordingly

is still a county road notwithstanding the County Court's understanding of the matter. After discussion the Commission confirmed the instructions given to the Engineer at the previous meeting to make a survey of this road so the County Court can construct a W.P.A. project thereon this winter on proper alignment, it being the opinion of the Commission that the road will at some time in the future be designated as a state highway in view of the fact that it will provide a good connection with the Wolf Creek Highway and will shorten the distance from Astoria to Portland by several miles.

At 2:00 o'clock p. m. Mr. Percy C. Caulfield, Postmaster of Oregon City, and Mr. W. F. Case, Post Office Inspector, Portland, came before the Commission in regard to the widening of 5th Street (route of the East Portland-Oregon City Highway) past the Oregon City Post Office, for four lanes of traffic. In this connection the Engineer read aloud a letter from the Acting Director of Procurement, Washington, D. C., in which he advised that the Post Office Department is of the opinion that the plan to decrease the width of the sidewalk on 5th Street from 10 feet to 6½ feet and to eliminate parking on the street is undesirable in that it would be seriously detrimental to the appearance of the federal building and would result in the routing of heavy automobile traffic nearer to the entrance of the post office, which is used by more than 75 percent of the patrons. Further, that it is the opinion of the Post Office Department that the alternate scheme to construct a 10-foot sidewalk encroaching from 3 feet to 4 feet on the Government's property is objectionable in that it would create undesirable conditions. Mr. Case stated that their greatest objection is to the prohibition of parking on 5th Street. He said that there is a steady stream of cars stopping at the post office for only a few minutes each, and 5th Street is the only route available to them where they can park their cars without making a "U" turn when they drive away from the post-office building.

The matter was discussed at some length and several suggestions were made, among which was one by the Engineer, that a sufficient amount of the Government's property be taken to provide for a sidewalk 6½ feet wide and the parking space alongside of the post office. It was his thought that a strip of government land 6½ feet wide would be sufficient to provide such accommodations and inquired whether or not the Government would sell the strip to the state and if so for what amount.

Mr. Caulfield stated that he was not prepared to reply to the inquiry but, in his estimation, the thing for the state to do would be to secure its extra right of way on the north side of the street, which he understood was in accordance with the Commission's original plan for this improvement.

A decision in this matter was deferred pending additional information from the Engineer, who was instructed to inspect the premises in company with Mr. Caulfield and Mr. Case with a view in mind to arrive at a solution that would be satisfactory to all concerned.

A delegation from Cottage Grove, consisting of Cy Eakin, Vinal Randall, C. F. Hoskins, and Frank Heck, businessmen of this town, came before the Commission and inquired as to the plans of the Commission to reconstruct

OCT 20 1933

the Pacific Highway on the revised alignment through Cottage Grove. They asked the Commission to provide for this project in its 1939 program so people can improve and develop their properties that will be affected by such change. They were informed by Chairman Cabell that, due to shortage of funds, it is doubtful whether the Commission would be able to finance this project next year, but the Commission might consider it as a project for the fiscal year 1940 federal aid money.

Mr. Heck inquired if there is any question as to the construction of this proposed change. He was informed by Chairman Cabell that, in so far as the present Commission is concerned, the change will be constructed as soon as there are funds available to finance it, but that he could not speak for any highway commission that might be appointed in the future. He explained that, whereas the present commission might make a commitment to a certain project, a new highway commission would not be legally bound to accept the commitment and it could change the plans if it saw fit to do so.

The Engineer reported receipt of a letter from F. D. White, scout master for a boy scout troop in Albany, inquiring whether or not it would be possible for the scout groups to secure the salvaged lumber from the wrecking of the old brewery building in Albany, and to secure also the doors, windows, and brick from such building. He said that such salvaged material consists of approximately 11 MFBM lumber, together with doors and windows, none of which are suitable for use in connection with any of the Highway Department's construction activities, although by advertising the state might realize a few dollars from the sale of the same. The brick, he said, is in first class condition and can be used to good advantage if a job should come up where it would fit in. All of this material, he said, is now stock-piled on a vacant lot in Albany and at some time the state will have to go to the expense of removing it and cleaning up the premises. He suggested that it would be advisable to let the scout group have this material if they will remove it from the present location and will clean up the lot to the satisfaction of the Commission, and he so recommended. The Commission approved the recommendation unanimously.

The Engineer reported receipt of a complaint from residents of Hebo of an unsanitary condition that exists there on account of certain people draining their septic tanks through a culvert under the McMinville-Tillamook Highway. He said that the matter was investigated and it was found that the overflow from the septic tanks on the north side of the highway is being turned into the highway culvert, with the result that a very unsanitary and offensive condition is created at the lower end of the culvert. He further stated that the people who are responsible for this condition were contacted and asked to make other arrangements for the disposal of this sewage, and their attention was called to the law which prohibits the draining of any refuse, sewage, or other matter from any cesspool or septic tank upon any public road of this state, but the offenders do not seem to take the matter very seriously, and nothing has been done to remedy the situation. It was his thought that legal steps as may be necessary should be undertaken to abate this nuisance, and so recommended. The Commission approved the recommendation unanimously and referred the matter to the Attorney for appropriate action.

The Attorney reported that a number of claims have been filed by property owners in Ontario for damages arising out of the construction of the Ontario undercrossing project and particularly on account of the change in the grade of certain city streets along the west approach of such undercrossing, and requested instructions relative thereto. The Commission ordered an appraisal of the property affected and of the alleged damages. The matter was referred to the Attorney to make such appraisal and render a report thereon.

The Engineer reported that the bridge over the Nehalem River on the Nehalem Secondary Highway just east of Vernonia is in bad condition and will have to be repaired in some manner so that traffic can use it with safety. He advised that the existing bridge is not in the proper location, and that to replace it with a new structure on permanent alignment, construct approaches thereto, and purchase right of way, would cost about \$41,000. He further advised that the present structure could be bolstered up with falsework to carry traffic safely this coming winter, for about \$500, and that it could be fixed up to carry traffic with safety for four or five years, for about \$5000. He recommended, in view of the estimated cost to build a new structure on permanent alignment, and the fact that the Commission's finances are at a low ebb at the present time, that the Commission authorize repairs costing \$5000, which would take care of the matter for several years, when a new bridge could be built if funds are then available to finance it. The Commission approved the recommendation and referred the matter to the Engineer to work out the details.

The Commission considered and denied the application of Brown Bros., Summit, Oregon, to maintain a guy wire over and across the Eddyville-Blodgett Secondary Highway, in Benton County, near the town of Summit, to facilitate the loading of logs on railroad cars at this point, it being contrary to the established policy of the Commission to permit such encroachments upon highway rights of way.

The Commission had under consideration the application of the Oregon Utilities Company to construct a telephone pole line along the right of way of the Oregon Coast Highway between Wheeler and Brighton, in Tillamook County. The Engineer recommended that the company be allowed to build its pole line on the westerly side of the highway from Wheeler to Fisher's Point, but from that point south to Brighton that the company be required to arrange for the joint use of poles with the Western Union Telegraph Company, whose pole line now occupies a location on the Southern Pacific Railroad right of way; or to construct its own pole line on private property east of the highway, in order to preserve unobstructed the splendid view of Tillamook Bay which may be had from the highway along this section. He explained that his recommendation is based on a joint report from Division Engineer F. D. Eason and Landscape Engineer George Otten, who inspected the premises in person with Mr. J. D. Langman, President of the Oregon Utilities Company, who apparently is satisfied with such arrangement. The Commission approved the recommendation unanimously.

The Secretary reported receipt of an offer from the United Air Lines to furnish airplane transportation to state officials at a cost of 15 percent less than the cost of single fares if the state will deposit with the company

OCT 20 1938

the sum of \$425 as evidence to the agent of any air-line company throughout the United States that the holder of a card issued by the United Air Lines is entitled to air-line transportation without the payment of cash for the same. The Attorney advised that the Commission has legal authority to deposit state funds for such purpose if it so desires, and wishes to take advantage of the 15 percent reduction. It was the thought of the Commission that inasmuch as this arrangement would be for the benefit of all state departments, it should be consummated through the Secretary of State or the State Board of Control, hence action on the matter was deferred for the time being.

The Engineer requested authority to purchase miscellaneous material that is needed in connection with the operation of the Wolf Creek Highway W.P.A. rock crushing plant, and to purchase 4 rock spreaders for use in connection with the spreading of macadam laid by W.P.A. forces on this project. He estimated the cost of the miscellaneous material at \$1000 and the spreaders at \$2400, making a total expenditure of \$3400. The Commission approved the request by unanimous vote..

The Secretary presented a letter from Mr. Lewis A. McArthur, Secretary of the Oregon Geographic Board, relative to the suggestion by the Forest Grove Chamber of Commerce that a bridge on the Wilson River Highway be dedicated the "Loyal M. Graham Bridge" in honor of Mr. Loyal M. Graham of Forest Grove. Mr. McArthur recommended that the Commission dedicate a bridge on this highway to Mr. Graham in view of the tremendous amount of enthusiastic and effective work that he has done in connection with Oregon highway matters. The Commission approved the recommendation unanimously and so ordered, but deferred the selection of the particular structure to be so named because none of the bridges on this highway have been constructed as yet and the Commission wants to make certain that a worthwhile structure is selected in honor of Mr. Graham. The Secretary was instructed to convey this information to the Forest Grove Chamber of Commerce and to advise the Chamber that, while the Commission has approved the naming of a bridge for Mr. Graham, it is making no commitment or promises as to when these bridges will be constructed.

The Engineer requested authority for Division Engineer William E. Chandler to attend the annual convention of the Three Flags Highway Association at Reno, Nevada, on October 21 and 22, 1938, at state expense. The Commission approved the request subject to further approval by Governor Charles H. Martin.

The Engineer also requested authority for Assistant State Highway Engineer C. B. McCullough and Harold B. Say, Director of the Travel and Information Department, to attend the annual meeting of the Redwood Empire Association in Eureka, California, on October 22, 1938, at state expense. The Commission approved the request subject to further approval by Governor Charles H. Martin.

A letter was presented from the American Planning and Civic Association, in which the Commission was asked to send a representative to the conference on roadside improvement which is to be held jointly by the National Roadside Council, the Conservation Committee of the Garden Clubs of America,

and the American Planning and Civic Association on November 15 and 16, 1938, in New York City. The Commission decided not to be represented at this meeting in view of the expense involved.

The Engineer requested an additional authorization of \$50 to reimburse the Labor Relations Engineer, Ray Webber, for expense incurred by him on an inspection of concrete pavements in the state of California in company with engineers from the states of Washington and California and representatives of the U. S. Bureau of Public Roads. He said that this inspection trip took longer than was originally anticipated and in addition thereto Mr. Webber was required to purchase train transportation from San Francisco to Salem, necessitating an expenditure of \$50 more than was originally authorized for the trip. It was his thought that Mr. Webber should be reimbursed for this extra expense inasmuch as it was incurred in connection with his duties as a state official, and he so recommended. The Commission approved the recommendation unanimously.

The Engineer reported the award of contracts as follows for highway construction projects for which bids were received by the Commission at its meeting on September 29, 1938:

Crooked Creek-Lobert Section of The Dalles-California Highway, in Klamath County. Grading, surfacing, and oiling. Contract awarded on October 17, 1938, to Roy L. Houck, Salem, who submitted the low bid therefor at \$120,203.50.

Furnishing and installation of an interconnected flexible progressive traffic signal system in the city of Eugene, Lane County. Contract awarded on October 13, 1938, to Castelloe & Stocker Electric Company, Eugene, at \$7,741.00, this company having submitted the low bid for such work which meets the state's specifications.

The Engineer advised that the conditions of the awards have all been satisfied. The Commission by unanimous vote approved the awards of the contracts as reported by the Engineer.

The Commission had under consideration the offers of the United States of America to aid, by way of grant of P.W.A. funds, in financing the construction of the following projects and the acquisition of necessary lands and rights of way therefor:

- (1) Construction of the Rock Creek-County Line Section of the Wasco-Heppner Secondary Highway, in Gilliam County, PWA Docket No. Oreg. 1194-F.
- (2) Construction of the Moro-Wasco County Line Rock Production Project on the Sherman Highway, in Sherman County, PWA Docket No. Oreg. 1349-F.
- (3) Construction of the Northwestern Oregon Rock Production Project, PWA Docket No. Oreg. 1372-F.

OCT 20 1938

- (4) Construction of the Southern Oregon Rock Production Project, PWA Docket No. Oreg. 1374-F.
- (5) Construction of the Central Oregon Rock Production Project, PWA Docket No. Oreg. 1375-F.

The Commission approved and accepted the several offers and, by unanimous vote, adopted the following resolutions in regard thereto upon motion of Commissioner Aldrich which was duly seconded by Commissioner Tou Velle:

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE ROCK CREEK COUNTY LINE SECTION ON THE WASCO-HEPPNER SECONDARY HIGHWAY IN GILLIAM COUNTY AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the Rock Creek County Line Section on the Wasco-Heppner Secondary Highway in Gilliam County and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 34614-71

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.,
Dated: Oct 17 1938
Docket No. Oreg. 1194-F

"State Highway Commission of the State of Oregon
Salem, Oregon.

1. Subject to the Terms and Conditions (PWA Form No. 230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of road improvements, including the acquisition of necessary land and rights of way (herein called the "Project"), by making a grant to State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$28,545.

2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later than 8 weeks from the date of this Offer and to complete such Project with all practicable dispatch, and in any event within 6 months from the commencement of construction.

OCT 20 1938

3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

"UNITED STATES OF AMERICA
Federal Emergency Administrator
of Public Works

By (Sgd.) E. W. Clark
For the Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all rules and regulations relating to such grant, a copy of which rules and regulations were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than eight weeks from the date of this offer; and to complete the work with all practicable dispatch, and in any event within six months from the commencement of the construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE MORO-WASCO COUNTY LINE ROCK PRODUCTION JOB ON THE SHERMAN HIGHWAY AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way

OCT 20 1938

of grant in financing the construction of the Moro-Wasco County line rock production job on the Sherman Highway and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 84117-21

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.

Dated: Sep 30 1938

Docket No. Oreg. 1349-F

"State Highway Commission of the State of Oregon
Salem, Oregon.

"1. Subject to the Terms and Conditions (PWA Form No.230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the quarrying, crushing, hauling, and storing of rock for highway improvement, including the acquisition of necessary land (herein called the "Project"), by making a grant to the State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$8,190.

"2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later than 12 weeks from the date of this Offer and complete such Project with all practicable dispatch, and in any event within 4 months from the commencement of construction.

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm, or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

The Commission also had under consideration the establishment of minimum wage rates to be paid by contractors for labor employed on the following projects:

Rock Creek-Morrow County Line Project, PWA Docket No. Oreg. 1194-F
 Umpqua River Bridge Project, PWA Docket No. Oreg. 1298-F
 Deschutes River-Madras Project, PWA Docket No. Oreg. 1287-F
 Madras-Deschutes County Line Rock Production Project, PWA Docket No. Oreg. 1347-F
 Charleston-Miner Creek Project, PWA Docket No. Oreg. 1322-F
 Provolt Rock Production Project, PWA Docket No. Oreg. 1348-F
 Richland-Halfway Project, PWA Docket No. Oreg. 1294-F
 Moro-Masco County Line Rock Production Project, PWA Docket No. Oreg. 1349-F
 Southern Oregon Rock Production Project, PWA Docket No. Oreg. 1374-F
 Central Oregon Rock Production Project, PWA Docket No. Oreg. 1375-F
 Northwestern Oregon Rock Production Project, PWA Docket No. Oreg. 1372-F
 Albany Maintenance Building, PWA Docket No. Oreg. 1282-F

The Engineer presented a schedule of wage rates for each project. After careful consideration and study, the Commission approved such wage rates and by unanimous vote, upon motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle, adopted the following resolutions in regard thereto:

A RESOLUTION ESTABLISHING MINIMUM WAGE RATES TO BE PAID BY
CONTRACTORS FOR LABOR ON THE ROCK CREEK-MORROW COUNTY LINE SECTION
PWA DOCKET NO. OREGON 1194-F

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Gilliam County, which is the locality in which the proposed project (hereinafter referred to as "project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said project, and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by an examination of the wage rates paid on various jobs as listed in our letter of September 21 to Mr. C. C. Hockley, which work is comparable to the work to be performed in this project.

NOW, THEREFORE, Be It Resolved by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed:

Sloper	\$.75
Timber fallers	.90
Timber buckers	.75
Powderman	1.00
Jackhammer man	.75
Steel and tool dresser	1.00
Drag scraper operator (up to 1 yard capacity)	.80
Drag scraper operator (over 1 yard capacity)	1.12½
Oiler	.80
Crusher feeder	.75
Truck driver (1½-3 tons mfr. rated capacity)	.75
Truck driver (3 tons and over mfr. rated capacity)	.85
Roller operator	1.00
Power shovel operator (1 yard and under)	1.25
Power shovel operator (over 1 yard)	1.50
Tractor operator (75 H.P. & over with attachments)	1.25
Tractor operator (75 H.P. & over without attachments)	1.00
Tractor operator (35 to 75 H.P.)	1.00
Tractor operator (under 35 H.P.)	.85
Power blade operator	1.12½
Compressor operator	1.00
Common labor	.50

Be It Further Resolved that the foregoing list of trades or occupations includes to the best of our knowledge all the classifications of employees who will be engaged in work on said project other than executive, supervisory, administrative, clerical, or other non-manual workers as such.

OCT 20 1938

A RESOLUTION ESTABLISHING MINIMUM WAGE RATES TO BE PAID BY
CONTRACTORS FOR LABOR ON THE UMPQUA RIVER BRIDGE SECTION
PWA DOCKET NO. OREGON 1298-F

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Douglas County, which is the locality in which the proposed project (hereinafter referred to as "project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said project, and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by an examination of the wage rates paid on various jobs as listed in our letter of September 21 to Mr. C. C. Hockley, which work is comparable to the work to be performed in this project.

NOW, THEREFORE, Be It Resolved by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed:

Carpenters	\$1.12 $\frac{1}{2}$
Structural Steel workers	1.37 $\frac{1}{2}$
Structural steel workers, hoist and derrick	1.37 $\frac{1}{2}$
Reinforcing iron workers	1.12 $\frac{1}{2}$
Concrete mixer (5 sacks and over mfr. rated cap.)	1.20
Concrete mixer (under 5 sacks mfr. rated capacity)	1.00
Pumpman (6" suction and over)	1.00
Derrick operator (hook)	1.37 $\frac{1}{2}$
Painters	1.10
Pile driver engineer	1.37 $\frac{1}{2}$
Pile driver boomman	1.31 $\frac{1}{2}$
Pile driver man	1.25
Concrete finisher	1.12 $\frac{1}{2}$
Burner man or drier	.90
Pugmixer man	.90
Rakers	.90
Spreaders	.75
Head ribbon setter	1.00
Truck drivers (3 ton and over mfr. rated capacity)	.85
Truck drivers (1 $\frac{1}{2}$ ton and under mfr. rated capacity)	.75

PWA DOCKET NO. OREGON 1374-F

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Coos and Lane Counties, which is the locality in which the proposed project (hereinafter referred to as "project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said project, and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by an examination of the wage rates paid on various jobs as listed in our letter of October 11 to Mr. C. C. Hockley, which work is comparable to the work to be performed in this project.

NOW, THEREFORE, Be It Resolved by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed:

Stationary drag scraper operator (up to 1 C.Y. cap.)	\$.80
Stationary drag scraper operator (over 1 C.Y. cap.)	1.12½
Powderman	1.00
Jackhammer man	.75
Oiler	.80

(Continued on next page)

Crusher feeder	\$.75
Truck Driver (3 tons and over)	.85
Truck Driver (1½ tons to 3 tons)	.75
Power shovel operator (over 1 C.Y. capacity)	1.50
Power shovel operator (1 C.Y. and under)	1.25
Compressor operator	1.00
Common labor	.50

Be It Further Resolved that the foregoing list of trades or occupations includes to the best of our knowledge all the classifications of employees who will be engaged in work on said project other than executive, supervisory, administrative, clerical, or other non-manual workers as such.

**A RESOLUTION ESTABLISHING MINIMUM WAGE RATES TO BE PAID BY
CONTRACTORS FOR LABOR ON THE CENTRAL OREGON ROCK PRODUCTION
PWA DOCKET NO. OREGON 1375-F**

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Lake, Deschutes, Hood River and Klamath Counties, which is the locality in which the proposed project (hereinafter referred to as "project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said project, and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by an examination of the wage rates paid on various jobs as listed in our letter of October 14 to Mr. C. C. Hockley, which work is comparable to the work to be performed in this project.

NOW, THEREFORE, Be It Resolved by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed:

Stationary drag scraper operator (up to 1 C.Y.cap.)	\$.80
Stationary drag scraper operator (over 1 C.Y.cap.)	1.12½
Powderman	1.00
Jackhammer man	.75
Oiler	.80
Crusher feeder	.75
Truck driver (3 tons and over)	.85
Truck driver (1½ tons to 3 tons)	.75
Power shovel operator (over 1 C.Y. capacity)	1.50
Power shovel operator (1 C.Y. and under)	1.25
Compressor operator	1.00
Common labor	.50

OCT 20 1938

Be It Further Resolved that the foregoing list of trades or occupations includes to the best of our knowledge all the classifications of employees who will be engaged in work on said project other than executive, supervisory, administrative, clerical, or other non-manual workers as such.

A RESOLUTION ESTABLISHING MINIMUM WAGE RATES TO BE PAID BY
CONTRACTORS FOR LABOR ON THE NORTHWESTERN OREGON ROCK PRODUCTION
PWA DOCKET NO. OREGON 1372-F

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Linn, Lincoln, Clatsop, and Marion Counties; which is the locality in which the proposed project (hereinafter referred to as "project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said project, and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by an examination of the wage rates paid on various jobs as listed in our letter of October 14 to Mr. C. C. Hockley, which work is comparable to the work to be performed in this project.

NOW, THEREFORE, Be It Resolved by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed:

Stationary drag scraper operator (up to 1 C.Y. cap.)	\$.80
Stationary drag scraper operator (over 1 C.Y. cap.)	1.12½
Powderman	1.00
Jackhammer man	.75
Oiler	.80
Crusher feeder	.75
Truck driver (3 tons and over)	.85
Truck driver (1½ tons to 3 tons)	.75
Power shovel operator (over 1 C.Y. capacity)	1.50
Power shovel operator (1 C.Y. and under)	1.25
Compressor operator	1.00
Common labor	.50

Be It Further Resolved that the foregoing list of trades or occupations includes to the best of our knowledge all the classifications of employees who will be engaged in work on said project other than executive, supervisory, administrative, clerical, or other non-manual workers as such.

**A RESOLUTION ESTABLISHING MINIMUM WAGE RATES TO BE PAID BY
CONTRACTORS FOR LABOR ON THE ALBANY MAINTENANCE BUILDING
PWA DOCKET NO. OREGON 1282-F**

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Linn County, which is the locality in which the proposed project (hereinafter referred to as "project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said project, and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by an examination of the wage rates paid on various jobs as listed in our letter of September 22 to Mr. C. C. Hockley, which work is comparable to the work to be performed in this project.

NOW, THEREFORE, Be It Resolved by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed:

Brick layers	\$1.50
Carpenters	1.00
Concrete finishers	1.12½
Electricians	1.00
Glasiers	1.00
Hoisting engineers (1 drum)	1.00
Wood and metal lathers	1.37½
Mortar mixers	0.90
Painters	1.00
Plasterers	1.37½
Plumbers	1.25
Sheet metal workers	1.00
Truck drivers	0.62½
Laborers, common	0.62½
Laborers, building trades	0.75

Be It Further Resolved that the foregoing list of trades or occupations includes to the best of our knowledge all the classifications of employees who will be engaged in work on said project other than executive, supervisory, administrative, clerical, or other non-manual workers as such.

A telegram was presented from Douglas Puckett, Klamath Falls, requesting authority to transport logs during Saturday afternoons and Sundays over the Klamath Falls-Lakeview Highway from Bly to a point 12 miles easterly thereof, and over the Green Springs Highway from Weyerhaeuser Junction to a point 3 miles westerly thereof. The Engineer recommended the granting of this

OCT 20 1938

request in view of the fact that travel over these highways at this time of the year is not very heavy. The Commission approved the recommendation subject to the condition that log hauling on those days shall be discontinued immediately in the event that the Commission finds that an undue hazard to other traffic is created.

The Commission had under consideration a request from the County Court of Clackamas County that the Commission advertise for and receive bids in behalf of the county for the construction of the "Shipley Bridge" over the Tualatin River on Market Road No. 12, in Clackamas County. The Engineer explained that the County Court proposes to build this bridge as a P.W.A. project and is simply asking the Commission to receive bids for them so as to secure the advantages and benefits of the Commission's advertising medium, but the County Court expects to make the award of the contract and to pay all of the costs incident thereto. He recommended approval of the County Court's request. The Commission by unanimous vote approved the recommendation and authorized the Engineer to handle this matter in the same manner as similar matters have been handled in the past.

A petition was presented from Lorane Grange No. 54, Lorane, Oregon, bearing the names of 93 residents of this district, in which the Commission was requested to oil the Territorial Secondary Highway, in Lane County, south from a place known as Gillespie Corners, through Lorane, to the Addison Lumber Company's mills, a distance of approximately 10 or 12 miles. The Commission denied the request for construction this year on account of lack of funds to finance the same but agreed to give the project consideration in the formulation of future construction programs, although it could not hold out much encouragement that the work would be undertaken in the near future. The Secretary was instructed to so inform the petitioners.

The Secretary presented a letter from Ruth M. Shearer, County Treasurer of Deschutes County, requesting, in behalf of Deschutes County Court, an advance of a portion of Deschutes County's share of the motor vehicle license funds that are due and payable on December 15, 1938, so as to permit the county to pay off road-warrant indebtedness. There was also presented a certificate prepared by the said treasurer at the request of the County Court, setting forth the requirements of the county in that regard and formally requesting an advance of \$4,897.77 on or before November 1, 1938. The Attorney advised that the law which authorizes the Commission to make advance payments to the several counties applies only to payments for road bond indebtedness, either principal or interest, but does not include other indebtedness; hence, in his opinion, the Commission is without authority to authorize the Secretary of State to advance the amount requested, which is for the payment of warrants. In view of the Attorney's opinion, the Commission denied the request and instructed the Secretary to inform the county treasurer of the reasons therefor.

The Secretary also presented a letter and a certificate from Ruth M. Shearer, Deschutes County Treasurer, setting forth the amount of Deschutes County's bonded indebtedness that is due and payable on November 1, 1938, and requesting an advance of \$4,132 of Deschutes County's share of the motor

vehicle fund due and payable on December 15, 1938, to enable the county to pay this bonded indebtedness when due. The Attorney advised that the Commission has legal authority to grant this request if it so desires. The Commission decided, in view of this opinion, to assist the county in this matter and thereupon signed a letter directed to the Secretary of State, as required by law, authorizing the Secretary of State to make such advance payment of \$4,132 to Deschutes County on or before the first day of November, 1938, and requesting that such amount be deducted from the next payment or allocation due Deschutes County out of the motor vehicle fund. The Secretary was instructed to inform the county treasurer of the action taken.

A letter was presented from H. B. Brady, Eugene, in which the Commission was urged to adopt immediately a permanent route for the Pacific Highway through Eugene so as to permit property owners to improve and develop their properties in accordance therewith. The Attorney was instructed to inform Mr. Brady that the Commission has already ordered a survey to determine such permanent routing of this highway, but it would not be possible, because of shortage of funds, to undertake the survey before January 1, 1939. Further, that in view of the importance of the matter it is not likely that a report would be ready for study by the Commission for about a year after the survey is completed.

A letter was presented from Joseph R. McCready, City Attorney of Forest Grove, with respect to the rerouting of the Tualatin Valley Highway along "B" Street in that town, south of Pacific Avenue. Mr. McCready pointed out that if the highway is rerouted on "B" Street it will necessitate the acquisition of two blocks of right of way on which it is tentatively planned to construct a large warehouse, and the City Council wishes to know what plans the Commission has for the highway improvement and whether or not the Council should discourage the construction of buildings on such proposed right of way. The Secretary was instructed to inform Mr. McCready that the State Highway Commission is interested in the matter of rerouting the highway on "B" Street because it will avoid the crossing of several railroad tracks and will eliminate two right-angle turns in the present route, but the Commission does not have funds available to finance the improvement at the present time. Further, that the Commission would appreciate anything that the City Council can do to discourage the sale or development of the property required for right of way and the construction of buildings thereon, so that if and when the project comes up for construction no delays will be encountered on account of right of way difficulties. He was also instructed to inform Mr. McCready that this action of the Commission is not to be considered as a commitment or promise in any way with respect to the proposed rerouting of this highway or the construction of the same.

A letter was presented from the Myrtle Point Chamber of Commerce urging the Commission to designate as a secondary state highway the old Coos Bay Wagon Road from Roseburg to a place known as Sitkum, thence to Myrtle Point, and the construction of the same as such at the earliest possible time. The Engineer advised that the Commission has heretofore received requests for the designation of the old Coos Bay Wagon Road as a secondary highway from Roseburg to Marshfield. After discussion the Commission decided unanimously

OCT 20 1938

not to place either of these roads in the state secondary highway system at the present time because there are no funds available to finance improvement of the same, and for the further reason that the mileage of secondary highways in Coos County is much greater now than the county is entitled to, comparing the mileage with that of secondary highways in the other counties of the state.

The Secretary presented a letter from H. W. Goff, City Recorder of Waldport, requesting, in behalf of the Waldport City Council, the oiling of the Oregon Coast Highway full width between curbs from the south end of the Alsea Bay Bridge to the sea wall south of Waldport. The Commission ordered that the City Council be informed that the Commission does not have funds available to finance this work at the present time but will consider it in the formulation of next year's construction program, although such consideration does not carry with it any commitment or promises.

A letter from G. Clifford Barlow, Warrenton, asking the Commission to set a definite date for the inspection of the road leading from the Oregon Coast Highway to Fort Stevens, had the attention of the Commission. It was decided that Chairman Cabell and the Engineer should inspect this road some time during the coming week, a definite date to be set later.

A letter was presented from Earl C. Reynolds, Executive Secretary, Klamath County Chamber of Commerce, transmitting a newspaper item from the Klamath News and Herald of Monday, September 26, 1938, relative to the hazard that exists at the Lost River Bridge crossing south of Klamath Falls on The Dalles-California Highway. The Commission ordered the communication acknowledged and filed.

The Commission discussed a letter from Frank T. Morgan, Secretary of the Nyssa Commercial Club, pointing out the need for the oiling of the Old Oregon Trail, full width between curbs, through the town of Nyssa, and requesting that such oiling work be done this fall. The Commission denied the request in view of the fact that there are insufficient funds available to finance the work this year and for the further reason that it is considered advisable to do this work in connection with the contract for the elimination of the railroad grade crossing in Nyssa when such contract is awarded.

The Commission considered and ordered filed a letter from The Dalles Chamber of Commerce opposing a proposal to issue \$18,000,000 of highway bonds to finance highway construction work.

The Commission also considered and ordered filed a letter from Mrs. William Hanley acknowledging receipt of an engrossed copy of a resolution adopted by the Commission in honor of the late Mr. William Hanley, former State Highway Commissioner, and thanking the Commission for the same.

A letter was presented from W. E. Milburn, Salem, requesting permission to operate a concession in one of the state highway department shop buildings in Salem. The Commission denied the request as a matter of policy.

The Commission discussed a letter from B. G. Brockway, Portland,

who urges the improvement of the Tualatin Valley Highway between Sylvan and Beaverton by straightening and widening for four lanes of traffic. The Commission denied the request because of lack of funds to finance such improvement.

A petition was presented signed by 109 residents of Hillsboro and vicinity, in which the Commission was requested to oil a four-mile section of the Hillsboro-Woodburn Secondary Highway northwesterly from Scholls to a point known as Campbells Bridge. The Commission denied the request on account of lack of funds to finance the project but agreed to inspect the project the next time it is in that vicinity.

Reconsideration was given by the Commission to the construction of the 3rd Street grade separation project in Bend, and a request from Mr. Robert W. Sawyer, Bend, that the contract for this work be awarded this fall rather than next year. The Engineer was instructed to inform Mr. Sawyer that, from a study of the Commission's finances, it does not appear possible to place this work under contract this fall, but the Commission will give the matter serious consideration in the event that conditions should change, making it possible to advertise the project for bids sooner than is now expected. In order to expedite the project when funds are available to finance it, the Commission authorized the securing of options for needed right of way for the same, and the filing of an application with the Public Utilities Commissioner for a hearing with respect to the elimination of the present grade crossing, as is required by law.

Reconsideration was also given by the Commission to advancing the construction of the Roseburg-Shady Point Section of the Pacific Highway, in Douglas County, which project has been deferred because of lack of funds to finance the same. The Engineer was instructed to inform the Roseburg Chamber of Commerce, which made an urgent plea at a previous meeting for the contracting of the work this year, that the Commission does not believe it possible to comply with its request, but will advertise the project for bids to be received this fall in the event that the Commission's finances improve, and in any event will be glad to reconsider the matter in the early spring.

The Commission considered and referred to the Engineer for attention a letter from the Oregon State Game Commission with respect to a certain gravel pit located on the Game Commission's Pendleton Game Farm; also concerning the matter of maintaining signs directing the general public to the game farms and fish hatcheries.

The Attorney brought up for discussion the matter of the disposal of the old right of way of the Oregon Coast Highway in the vicinity of Nelscott, Lincoln County. He advised that some time prior to 1931 right of way was acquired for the construction of this highway over a new alignment in the vicinity of Nelscott, and that the highway was reconstructed on such alignment in 1931, which left parts of the old road beyond the limits of the standard 80-foot right of way; further, that it was not until 1936, some five years after the reconstructed road was put into use, that the Highway Commission took action preserving the fragments of land within the old highway right of

way for highway purposes, during which time property owners in some instances assumed that the normal operation of law had taken effect and that such fragments of land had reverted to the abutting property owners, and on that assumption properties changed hands and improvements were made, some of which, it is now found, encroach upon state property. These property owners, he said, are now asking the state to give them this property, in view of their misunderstanding, which is causing them considerable embarrassment.

The Attorney pointed out that it is now the practice of the State Highway Commission, when a revision is made in state highway alignment, to adopt a resolution, either retaining the old right of way for highway purposes; or, if it is not needed by the state, abandoning the same and allowing such fragments to revert to the county court or to the abutting property owners. He gave as his thought that if the Commission's authority were challenged in connection with the properties under consideration, the Court would hold against the Commission on the ground that too much time has elapsed between the adoption of the new alignment and the resolution preserving the eliminated fragments of the old right of way. He suggested that, in order to clarify this situation, it would be advisable for the Commission to adopt a resolution modifying its previous resolution by eliminating therefrom the parcels of land which are now in controversy.

After considerable discussion, the Commission decided to let the property owners have the fragments of the old right of way that abut upon their respective holdings, provided they purchased their properties in good faith and with the understanding that they then owned all of the land up to the right of way of the new highway, but not otherwise. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the Commission on January 9, 1936, adopted a resolution by which certain fragments of real property formerly within the limits of the right of way of the Oregon Coast Highway in the vicinity of Nelscott were preserved and kept for public purposes; and

WHEREAS, it appears that said highway at said place was reconstructed over the new alignment in 1930, but the resolution preserving for public purposes fragments of land formerly within the limits of the old right of way but not incorporated within the limits proper of the new alignment was not adopted until January 9, 1936, during which time in certain instances improvements had been made on abutting properties on the theory that the area of land within the limits of the old right of way but not within the limits of the new right of way proper had been left to revert to the abutting property owner; and

WHEREAS, it is the opinion of the Commission that in instances where abutting property owners have made improvements on their property or dealt with their property on the theory that the said fragments had reverted to them and become a part of their property, said resolution adopted January 9, 1936, should be modified or amended in the manner and to the extent hereinafter set out;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the resolution adopted by this Commission on January 9, 1936, by which resolution there was preserved and kept for public purposes certain areas of real property confined within the limits of the right of way of the Otis-Siletz River Section of the Oregon Coast Highway as said highway was formerly located, be and said resolution hereby is amended as follows:

The area confined between Highway Engineer's Station 1012+25 and Station 1020+10 and the area between Highway Engineer's Station 1021+35 and Station 1023+75 be and the same hereby are eliminated from said resolution and said parcels of real property hereby are left to revert to the abutting property owners and shall no longer be considered a part of the right of way of said highway.

2. Be it further resolved that the Engineer be and he hereby is instructed to correct the map attached to said original resolution to correspond with this action now taken by the Commission.

3. Be it further resolved that the Secretary be and he hereby is instructed to send by mail to the County Court of Lincoln County a certified copy of this resolution.

The Attorney was instructed to convey this information to the property owners who are affected by the same.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

R. I. Stuart & Sons, Contract No. 1975, for furnishing crushed rock in stock piles for the Klamath Falls Rock Production Project on state highways in Klamath County, requested an extension of time from September 30, 1937, to October 15, 1938, within which to complete this project. They alleged that bad weather conditions interfered with the progress of their work and it was necessary for them to close down their operations for several months because of snow and rain. The Engineer advised that the contract was awarded on April 27, 1937, but the work was not started until July 29, 1937. He further advised that in his estimation there is no good reason for the contractors' failure to complete the project within the specified time limit, as weather conditions were no worse than could be expected in that part of the state. He also advised that the contractor furnished 800 cubic yards of material under this contract for use in Division No. 3, which took 7 days' time to manufacture. The general public, he said, has not been inconvenienced

OCT 20 1938

by the delay in completing this contract within the specified time limit and the state has not been handicapped by lack of materials although the cost of engineering supervision is considerably more than it would have been had the contract been completed within the specified time. He recommended, in view of the circumstances, that the extension requested be granted but that the contractor be charged for the extra engineering expense incurred by the state subsequent to the specified completion date except that incurred on the first 7 days immediately following the specified date of completion, as time allowance for furnishing the 800 cu. yds. of materials for delivery in Division No. 3. The Commission approved the recommendation by unanimous vote.

Roy L. Houck, Contract No. 1979, for grading the Lamb Creek-Sheep Ridge Section of the South Santiam Highway, in Linn County, requested an extension of time from December 15, 1937, to November 1, 1938, within which to complete this job. He alleged that he was not able to begin grading work until August 25, 1937, being held up by the progress of work on an adjoining job. Also, that on November 6, 1937, he was ordered by the engineer to suspend operations until 1938 because of the wet condition of the soil. He also alleged that numerous slides occurred during the progress of the work and he was required to remove them, which took considerable extra time. The Engineer advised that he ordered the contractor to close down the work for the winter season on November 6, 1937, which was 38 days prior to the date of completion of the contract as specified in the contract, thereby entitling him to a 38-day extension of time without penalty, or until July 20, 1938, inasmuch as he resumed operations, following the winter close-down, on June 13, 1938. He also advised that the yardage to be moved on this job was increased from 199,000 cubic yards to 260,000 cubic yards, or approximately 30 percent, due to slides. He gave as his thought that the contractor should be allowed an extension of time equal to 30 percent of the time specified in the contract for completion of the work, to offset the extra time that it took to remove the slide material, and that this time allowance should start on July 20, 1938, the end of the extra period allowed him because of being required to close down his operations during the winter months. He recommended, therefore, that the extension now requested be granted subject to the condition that the contractor be charged for the extra engineering expense incurred by the state subsequent to October 1, 1938. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

Mountain States Construction Company, Contract No. 1996, for construction of the South Yamhill River Bridge and Underpass, on the Pacific Highway West, in Yamhill County, requested an extension of time from February 28, 1938, to July 27, 1938, within which to complete this project. They gave the following reasons for failure to complete the project within the specified time limit: (1) 117

days' time lost because of an order of the Engineer closing work from December 17, 1937, to April 13, 1938; (2) 8 days' time lost in securing an even settlement of the grade, necessitating the use of dynamite, and to remove surplus dirt from the toe of the fill; (3) 3 days' time lost in eliminating soft spots in the grade and re-filling same; (4) 7 days' time lost in construction of more riprap than was specified in the contract; (5) 20 days' time lost on account of increase in excavation quantities. The Engineer advised that the reasons given by the contractor for failure to complete the contract within the specified time limit are substantially correct. He recommended that the extension requested be granted without penalty and presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

Berke Bros., Inc., Contract No. 2005, for clearing the Arch Cape-Beach Creek Section of the Oregon Coast Highway, in Clatsop and Tillamook Counties, requested an additional extension of time, from July 31 to September 9, 1938, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to the fact that they were ordered by the State Forest Ranger to close down their operations during the fire hazard season. The Engineer advised that Berke Bros. completed all of their work except the burning operations within the time limit specified in the contract; but, due to the dry, hazardous condition existing, were unable to secure permits for the burning operations, so final cleanup of the job was not completed until September 9, 1938. He gave as his thought that all of the work could have been completed within the specified time limit if the operations had been carried on in the proper manner, and accordingly recommended that the extension requested be granted but that the contractor be charged for the extra engineering expense incurred by the state subsequent to the date of completion specified in the contract. He presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

Roy L. Houck, Contract No. 2017, for furnishing crushed rock in stock piles for the Eddyville-Blodgett and Corvallis-Newport Highways, in Lincoln County, requested an extension of time from June 30 to September 17, 1938, within which to complete this job. Mr. Houck alleged that bad weather conditions were the direct cause of his failure to complete the project within the specified time limit. The Engineer advised that the contract was awarded on October 22, 1937, with a provision that it should be completed by June 30, 1938. Further, that Mr. Houck made an effort to get the job started during the fall, but made very little progress because of rainy weather, and he was not able to move his equipment to the quarry site until late in June of this year. He further advised that the delay has caused no inconvenience either to the state or to the traveling public. In view of the circumstances, he recommended that the extension of time now requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

OCT 20 1938

The Engineer reported that Contracts Nos. 1996, 2017, 2041, 2063, 2087, and 2093, for the construction of state highway projects, have been completed according to the terms and provisions of the contracts or modifications thereof and said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commissioners present:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 1996, with Mountain States Construction Company, for construction of a bridge over the South Yamhill River and construction of a subway under the Southern Pacific Company's tracks on the South Yamhill River Section of the Pacific Highway West, in Yamhill County. Completed July 27, 1938.

Contract No. 2017, with Roy L. Houck, for producing crushed rock for the Eddyville Rock Production Project on the Corvallis-Newport and Eddyville-Blodgett Highways, in Lincoln County. Completed September 17, 1938.

Contract No. 2041, with J. F. Johnston, for construction of a bridge on the West Fork Dairy Creek Section of the Nehalem Secondary Highway, in Washington County. Completed August 8, 1938.

Contract No. 2063, with Mountain States Construction Company, for paving the Siuslaw Junction-Ross Station Section of the Pacific Highway, in Lane County. Completed October 14, 1938.

Contract No. 2087, with H. L. Rice, for grading, surfacing, and oiling the Chenoweth Creek-The Dalles Section of the Chenoweth County Road, in Wasco County. Completed September 30, 1938.

Contract No. 2093, with Harold Blake, for grading and surfacing the Dixonville Section of the North Umpqua County Road, in Douglas County. Completed October 8, 1938.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission reconsidered the matter of acquiring extra right of way for the East Portland-Oregon City Highway in the city of Oregon City, which matter was discussed earlier in the session. The following resolution, authorizing the Attorney to commence condemnation proceedings to acquire such right of way across the holdings of the Security & Investment Company of Oregon City and R. A. Schofield and R. W. Knoefel, was adopted by the Commission by unanimous vote, upon motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Oregon City Section of the East Portland-Oregon City Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

3056 Security & Investment Company of Oregon City
3053 R. E. Schofield and R. W. Knoefel

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument

OCT 20 1938

or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Commission considered and signed the following agreements, et cetera:

Agreement with Deschutes County providing for the payment of the county's indebtedness to the state for the construction of a 1.2-mile section of Century Drive Secondary Highway, at Bend, amounting to \$2,900.00.

Agreement with the Portland General Electric Company relative to the construction of a power transmission pole line across Silver Creek Falls State Park, in Marion County.

Agreement with W. H. Kay, Coquille, relative to the maintenance of a logging road over and across Humbug Mountain State Park, in Curry County.

Agreement with Hattie Cieslak and Leo Cieslak concerning a lease on property which was acquired by the state from Fred Vols at Silver Creek Falls State Park, in Marion County.

Agreement with the City of Eugene relative to the award of a contract for the installation of traffic signals in Eugene.

Agreement with Minnie T. and Frank H. Reed relative to the acquisition of right of way for the Upper Columbia River Highway across the Reeds' property, in Multnomah County.

Easement agreement with Minnie T. and Frank H. Reed relative to the location and maintenance of a dock on state property acquired from the Reeds.

Bargain and Sale Deed conveying unto E. H. Moore and Anna M. Moore 0.5 acre of land situate in the N.E. $\frac{1}{4}$ of the S.E. $\frac{1}{4}$, Section 25, T. 1 S., R. 16 E., W.M., Sherman County. Right of way transaction No. 5534.

Bargain and Sale Deed conveying unto Jettora Asbahr 324 sq. ft. of land situate in Lots 33 and 34 of Block 43, Kenton, in the city of Portland. Right of way transaction Nos. 5057 and 5065.

Warranty Deed conveying unto Anton Roskoski and Eva Roskoski 7,400 sq.ft. of land situate in Lots 3, 4, 5, 6, and 7 of Block 3, Kenview, in the city of Portland. Right of way transaction No. 5079.

The Commission had under discussion the setting of dates for its next regular meetings to be held in November and December, 1938, and decided to postpone the November meeting which was previously scheduled for November 9 and 10, 1938, one week, to Thursday and Friday, November 17 and 18, 1938. The Commission decided to hold its December meeting on Thursday, December 22, 1938, and, if a two-day session is required, to start the meeting on Wednesday, December 21, 1938. The Secretary was instructed to make the usual arrangements to hold these meetings in the auditorium of the Public Service Building, Portland.

There being no further business to come before the Commission at this time, the meeting was adjourned at 4:30 o'clock p. m.

OCT 20 1938

Bend, Oregon, November 14, 1938

The State Highway Commission conferred with members of the Deschutes County Court and a delegation of local citizens at 10:00 o'clock a. m. in the Pilot Butte Inn relative to several road matters in Deschutes County. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Also present were: County Judge C. E. Lyon; County Commissioners Wm. Baer and Millard T. Triplett of Deschutes County; Ernest Butler, farmer; Don Peoples, Secretary of the Bend Chamber of Commerce; Mr. McCallister; and others.

The first project mentioned was the proposed rerouting of the Century Drive Secondary Highway along Riverside Drive to Franklin Street, which would eliminate one right-angle turn in the present route and would provide a direct connection with The Dalles-California Highway on Franklin Street. The proponents of this route urged its adoption from the scenic as well as the safety standpoint. They pointed out that Riverside Drive borders the city park which overlooks the Deschutes River and affords a very attractive view for tourists. After considerable discussion the Commission indicated a favorable attitude toward this change but deferred definite action thereon. It was explained to the delegation that the Commission cannot act on the matter until it has received a formal request from the County Court to make the change and until a public hearing has been held on the matter as is required by statute. The County Court advised that it would present such request to the Commission in the near future. The Commission decided tentatively to hold a public hearing on the matter shortly after the adjournment of the 1939 legislative assembly.

The matter of designating the Butler Market Road as a state secondary highway was then discussed. County Commissioner Baer advised that this is one of the most important roads in the county and they are extremely anxious that it be reconstructed soon to modern standards of surfacing and oiling; also, that the road is 6.4 miles in length from its junction with the Central Oregon Highway in Bend to its junction with the Powell Butte Secondary State Highway, of which distance 5.6 miles is outside of the Bend city limits. He said that Deschutes County would contribute the sum of \$5,000 toward the cost of the improvement outside of the city limits and that the City of Bend would contribute \$650 for improvement of the section within the city limits. Mr. Butler declared that this road carries more travel than any other county road within the county and that it serves directly 72 families, many of whom cannot be considered as farmers because they are engaged in business in Bend and travel the road at least twice daily. He gave as his thought that the state would be fully justified in improving the road and that no difficulties whatsoever would be encountered in acquiring right of way that may be needed.

NOV 14 1938

The Engineer pointed out that snow conditions on this road are quite bad; also, that while the road stands at the head of the list of county roads in Deschutes County from the standpoint of solvency, it is an expensive one to construct. He estimated that it would cost between \$50,000 and \$60,000 to put the road in proper condition.

Chairman Cabell advised that state funds available to the Commission are very limited and that the only money the Commission has for improvement of this class of road is the federal aid secondary highway funds which the Commission is allocating to county roads and state secondary highways. He gave as his thought in view thereof that the improvement would be completed sooner as a federal aid secondary highway project than as a state secondary highway project.

County Judge Lyon advised that the County Court is not particular how the project is financed, but their concern is to secure the improvement at the earliest possible time. Mr. Butler concurred and added that they have waited twelve years for a good road and feel that they should have it now.

The Engineer then suggested that the improvement be undertaken as a federal aid secondary highway project when possible to finance it, and when construction is done that the Commission designate it as a state secondary highway. He pointed out that if the work is done in this manner it would be up to the county to furnish the right of way and to maintain the road until the state took it over. The entire improvement, he said, could be completed sooner in this manner than if the road were placed on the state secondary highway system now. The members of the County Court and Mr. Butler all approved the Engineer's suggestion.

The Engineer then explained the condition of the Commission's finances. As a matter of information only he advised that the Commission could not possibly do the work next summer and it appears that the best the Commission could do would be to include the project in the 1940 federal aid secondary highway program, and if that were done the work might be placed under contract in the fall of 1939.

Mr. Butler urged earlier construction, if possible. He was informed by Chairman Cabell that it does not appear possible to advance the improvement unless the Commission's finances look much better next spring than they do now.

After further discussion the Engineer's suggestion for the construction of this project was approved by all parties including the members of the State Highway Commission, the County Court, and the Bend Chamber of Commerce. It was agreed that the County Court would file a formal petition requesting that this job be given preference over others for the first federal aid secondary highway funds that become available to the Commission for allocation. The County Court agreed to hold intact the \$5,000 of county funds that it has available for this improvement and to pay the same over to the State Highway Commission when the Commission is ready to use it. The members of the County Court agreed to write a letter to the State Highway Commission setting forth in detail what it would do in this regard.

NOV 14 1938

The matter of removing from the state secondary highway system a section of the Powell Butte Secondary Highway, extending from its junction with the Butler Market Road to the Central Oregon Highway, if and when the Butler Market Road is placed on such system, was considered and it was decided to leave this road on the state secondary highway system at least until the other road has been constructed.

The County Court then asked the Commission to take the necessary steps to abandon a short section of the Century Drive Secondary State Highway (old route) that is not now being used by highway traffic, since the section was reconstructed on new alignment last fall. They advised that one of the considerations in acquiring the right of way on the new alignment was that the old highway would be turned back to the adjacent property owners, and they would like to fulfill their agreement if possible. The Engineer advised that the old section is of no value from the state highway standpoint and recommended approval of the County Court's request. The Commission, after discussion, approved the Engineer's recommendation by unanimous vote and instructed the Attorney to prepare an appropriate resolution covering the matter. (Resolution adopted at meeting held on November 18, 1938)

Inquiry was made by the County Court as to the possibilities of securing state aid in connection with the construction of a road into the Tumalo Creek recreational area which is being developed by the United States Forest Service. They were informed that the Commission has no funds available for expenditure on this road at the present time.

The meeting was adjourned at 11:00 o'clock a. m.

W. H. Devers
State Highway Engineer
H. B. Glaisyer
Secretary

Henry F. Cabell
Chairman
E. B. Aldrich
Commissioner
F. L. Tou Velle
Commissioner

Burns, Oregon, November 14, 1938

The State Highway Commission conferred with a delegation from Grant County at 6:15 o'clock p. m. in the Arrowhead Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. H. Devers, Attorney
H. B. Glaisyer, Secretary

Members of the delegation were: County Judge J. H. Allen and

County Commissioner John Porter, Grant County; Rev. Back and Dan Fisk, Prairie City; Herman Oliver, C. R. Schmidt, Wm. Ford, and Orval D. Yocom, of John Day.

The delegation asked for the improvement of the John Day-Burns Highway from the top of the hill south of Canyon City to Seneca. They were informed that this is a forest highway section, and improvement of the same is being financed with forest highway funds under supervision of the United States Bureau of Public Roads. Further, that the present road surface is of light construction and is being maintained as well as it can be maintained under the circumstances.

The delegation then asked for additional improvements on the John Day Highway between the towns of John Day and Prairie City. They were informed that the Commission is doing the best it possibly can for this highway with funds available; and, while federal aid funds are available to allocate to this project, they cannot be used because of the federal requirements that the federal funds be matched with state funds, and there are no state funds available for matching purposes. Chairman Cabell explained in detail the status of the Commission's finances. The State Highway Engineer suggested the possibility of allocating some of the 1940 federal aid moneys to the project, although it would not be possible to make a definite commitment at this time.

The delegation then requested improvements on this highway east of the town of Prairie City so as to avoid a repetition of the bad condition that existed during the past winter. They were informed that the Commission has already made arrangements to secure crushed rock for maintenance purposes under a P.W.A. contract and this material will be stock-piled for use as occasion demands, but the Commission does not have sufficient funds to finance a type of surfacing that would be good enough to oil. Mr. Oliver particularly urged the improvement of the unimproved section between John Day and Prairie City. Messrs. Schmidt and Back endorsed Mr. Oliver's request. Mr. Schmidt also asked for the oiling of the John Day Highway throughout its entire length except possibly over Dixie Mountain.

Chairman Cabell advised that the Commission regrets that it could not complete the John Day-Prairie City Section this year and explained that it is simply a case of having to defer some of the projects because revenues that the Commission anticipated did not materialize.

The Engineer advised that the road is being maintained in the best possible manner under the circumstances and that it would not be possible to do any better until the road has been reconstructed, which cannot be done now because of the cost involved. He gave as his thought that it would be a waste of money to make a temporary improvement. Mr. Oliver concurred.

After further discussion of a general nature, the meeting was adjourned at 6:45 o'clock p. m.

Commissioner

FOV 14 1938

La Grande, Oregon, November 15, 1938

The State Highway Commission conferred with several delegations at 9:30 o'clock p. m. in the Sacajawea Hotel following dinner with the Oregon Trail Association. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Mr. Charles E. Reynolds, President of the Oregon Trail Association, presided.

A delegation from Wallowa County, consisting of County Judge Ben Waethers, County Commissioners Harry O. Harmon and Floyd W. Hammack, County Engineer Glen Jacob; Arthur Hallgarth, and H. F. Reed of Elgin, was present.

They asked for the following projects: (1) oiling of the Enterprise-Flora Highway from Enterprise northerly to the forest boundary; (2) general improvement of the Wallowa Lake Highway, particularly the 2-mile section over Minam Hill, which they declared is narrow, crooked, and dangerous to travel. The Wallowa Lake Highway project, they said, is a very important one to both Wallowa and Union Counties and will be much more important in the future when the Enterprise-Flora Highway has been completed throughout, because of the increased amount of traffic which they anticipate this road will carry from the Spokane territory. They were informed that the Enterprise-Flora Highway is not on the federal aid highway system and its improvement depends entirely upon availability of state funds, except that the northerly end thereof is a forest highway section and could be improved as a forest highway project if there were funds to finance it. Further, that there is a question whether or not the Commission could improve the section immediately north of Enterprise in view of the status of funds, unless perchance the work is done as a federal aid secondary highway project.

Judge Waethers asked for the oiling of the Trout Creek Section and expressed a hope that the Commission would find it possible to grade a 2-mile section just south of the Washington State Line to connect with the improvement completed this year. The Engineer explained the status of the Commission's funds and, in view thereof, the Commission advised that it did not seem possible to undertake this project next summer.

Mr. Reynolds then introduced members of the Oregon Trail Association as follows: County Judge Chas. E. Baird, Henry McKinney, W. C. Calder, all of Baker; Messrs. W. J. Carlson, G. M. Heggard, Ira Owen, and Amoth, all of Cascade Locks; Messrs. L. K. Kinzel and Lanzer, County Judge U. G. Couch, County Commissioners Clyde Myers and Chris Johnson, and County Engineer S. B. Morgan, all of La Grande.

He advised that at a meeting of the Oregon Trail Association held in La Grande this day it was decided to recommend to the State Highway

NOV 15 1938

Commission the construction of the following projects on the Old Oregon Trail: (1) widening and resurfacing a 6-mile section between Ontario and Fayette Spur junction; (2) widening the Durkee Undercrossing and flattening the approach curves thereto; (3) reconstruction of a 0.7-mile section at John Troy Ranch about 3 miles east of Pleasant Valley; (4) complete the reconstruction work between Muddy Creek and Baker by widening, resurfacing and constructing bituminous macadam; (5) reconstruct the North Powder-Union Section to modern standards; (6) reconstruct the section between Arlington and John Day River; (7) reconstruct the highway between The Dalles and Portland to provide a suitable road for traffic. Mr. Reynolds advised that these projects have not been listed in accordance with preference but they would present a preference program in writing later.

Chairman Cabell advised that the Commission will be pleased to consider such projects in the formulation of future construction programs. He further advised that the Commission had under consideration today the proposed rerouting of the Old Oregon Trail between Ontario and Huntington, which it is believed will save considerable mileage over the present route. He gave as his thought that a reconnaissance survey of the proposed change should be made as soon as possible. Commissioners Aldrich and Tou Velle concurred and the Engineer was thereupon instructed to make such survey.

Chairman Cabell then inquired as to the wishes of the association in regard to the building of the proposed Stanfield-Boardman Cutoff Section. Mr. Reynolds replied that he personally favored this project but the majority of the members of the association opposed it so it is eliminated from their program.

Mr. W. C. Calder, Baker, particularly urged the reconstruction of the Troy Ranch Section, which, he said, contains very bad curves. The Engineer estimated that such project would cost about \$20,000. The Commission took no action on the matter.

The Union County Court, represented by County Judge U. G. Couch and County Commissioner Chris Johnson and the following local citizens, in addition to Mr. Reynolds, conferred with the Commission: Dick Richards, L. H. Bramwell, Mr. Galles, Merton Davis, L. K. Kinsel, County Engineer S. B. Morgan. Judge Couch presented the following Union County projects for the Commission's consideration and advised that they have been approved by the Union County Court but have not been listed in order of preference:

Primary Highways

1. North Powder-Union Section of Old Oregon Trail, modernization.
2. Minam to Elgin, on Wallowa Lake Highway, modernization.
3. Improve curves at Ora Dell Overhead and between Perry and Hilgard.

Secondary Highways

1. Hilgard-Starkey. Extend to county line and connect with Forest Utilization Road, 4 1/2 miles. Also improve present road.
2. Medical Springs Secondary. Improve to standards of secondary roads. First 6 miles originally had a crushed rock surface. The remaining 16 miles need completion.

3. Alicel-Lower Cove-Becker Corner-Warm Creek-Cove Road, 13.4 miles. Extends through a farming community and into Cove. Desire the state to include this in secondary system.
4. Cove-Union Secondary: 8 miles in length. Now on secondary system and desire to be modernized and brought up to secondary standards.
5. North Powder-Baker County line, Federal Secondary: 4.8 miles. Allocation made for $2\frac{1}{2}$ miles. Desire completion to Baker County line and construction of new bridge over North Powder River.
6. Complete oiling of Cove-Island City secondary.

Mr. Davis said that their most important primary project is the modernization of the North Powder-Union Section of the Old Oregon Trail and the most important secondary highway project is the completion of the oiling of the Cove-Island City Highway and the modernization of the secondary highway between Cove and Union.

Mr. Kinzel urged the extension of the Hilgard-Starkey Secondary Highway to the Umatilla County line and the construction of some 6 or 7 miles of road to connect with the forest service utilization road.

Judge Couch urged the improvement of the county road which extends up the North Powder River from the town of North Powder to the Baker County line, including a new bridge over the North Powder River on this road.

Mr. Reynolds urged the completion and the oiling of the Cove-Island City Secondary Highway. He was informed by the Commission that this project is on the Commission's program for construction but the Commission is unable to state definitely at this time when it will be placed under contract.

Judge Couch asked the Commission to designate as a secondary state highway the county road which extends from Alicel easterly to a connection with the Island City-Cove Secondary Highway. He was informed by Chairman Cabell that it is contrary to the policy of the Commission to place any more roads on the state secondary system now; furthermore, the Commission prefers to confer with the highway department engineers before making any definite commitments to such projects.

The meeting was concluded at 10:30 o'clock p. m.

Commissioner

NOV 15 1938

Pendleton, Oregon, November 16, 1938

The State Highway Commission conferred with a delegation of Umatilla County citizens in the Umatilla County Courthouse at 11:30 o'clock a. m.
Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Local citizens present were: Wm. R. Meiners, County Commissioner; Roy Ritner, President of the Pendleton Chamber of Commerce; Roy Raley, Attorney, Pendleton; C. M. Sly, W. L. Rayborn, Walter Rayborn, J. M. Price, S. A. Barnes, and Mr. Hill, Superintendent of the Weston Union High School, all of Weston. Mr. Walter Rayborn headed the group.

They asked for the oiling of the Weston-Elgin Secondary Highway easterly from Weston to the end of the present oiled section near Tollgate. Mr. Barnes alleged that the present road is narrow, in very bad condition, and that it needs straightening and widening as well as an oiled surface. He asked the Commission to do this work next summer. He declared that traffic demands, in his estimation, justify the improvement. He also urged the improvement from the recreational standpoint and for the development of the recreational features at Tollgate.

Mr. W. L. Rayborn stated that he is a farmer and lives $6\frac{1}{2}$ miles east of Weston and is fully acquainted with traffic needs. He recited the history of the road and urged its improvement from both the agricultural and recreational standpoints. The development of the district served by this road, he said, is absolutely dependent upon the improvement of the road.

Mr. Hill spoke for the improvement from the standpoint of the young people of the Basket Mountain District and the Weston Mountain District who attend the Weston Union High School. He said that under present conditions it is not possible to run a school bus over the road, so pupils cannot live at home and attend this school. The improvement of the road, he said, would correct this condition. He also declared that the Basket Mountain and Weston Mountain districts supply one-half of the pea crop for the local canneries; in fact, during the later part of the canning season the canneries depend entirely on the peas received from these districts to supply them with this commodity, and a good road is needed over which to transport their produce.

Mr. Price also spoke for the improvement, as did also Mr. Raley who gave as his thought that the Highway Commission is morally obligated to oil the road. The Pendleton Chamber of Commerce, he said, is 100 per cent in favor of this improvement.

Mr. Ritner, speaking as President of the Weston-Elgin Committee that was appointed to further the interests of this road, spoke for the same

NOV 16 1938

from the standpoint of tourist traffic. He declared that the road is a link in an interstate highway and when completed will carry a large volume of interstate traffic. The oiling of the road, he said, is essential from the tourist standpoint and for traffic safety. He pointed out that the Tollgate district is the winter sports playground for the people of Pendleton, Walla Walla, and most of Umatilla County, as well as being a summer recreational area for these people, which is an added argument for the improvement of the road leading into the district. The Weston-Elgin Committee, he said, expects to spend a lot of money to advertise this district as the "Little Switzerland of North America". The availability of a good road into the district, he declared, will be a big advantage in this advertising campaign.

Chairman Cabell concluded the conference by stating that the Highway Commission has at its disposal only a limited amount of money for construction purposes, so must be very careful how it allocates this money; further, that the Commission does not doubt that the project is a very desirable one but the Commission cannot overlook the fact that there are numerous roads of this type throughout the state which are in similar condition, so the Commission cannot say today whether or not it will proceed with the improvement, but will give the matter serious consideration.

The meeting was concluded at 12:15 o'clock p. m., following which the Commission proceeded to Portland by automobile and disposed of the following routine matters enroute:

The Engineer reported the following appraisals made by the Right of Way Department on the value of additional right of way that is required for the Santiam Highway in Sweet Home to permit the city to construct sidewalks on the proper alignment:

ESTIMATE OF ADDITIONAL RIGHT OF WAY THROUGH
THE SWEET HOME SECTION OF THE SANTIAM HIGHWAY

STATION 1512+38.7 to STATION 1517+19.2

File No.	Name	Area in Sq. Ft.	Amount per Sq. Ft.	Total	Options
6290	Kenneth S. Groves	1824		Gratis	Options Secured
* 6291	J. D. Long and Vivian Weddle Long	144	10 cents	\$14.40	
* 6292	J. E. Long and A. L. Weddle, Agent	90	10 cents	9.00	
6293	Roshal M. Groves	512		Gratis	Options secured
6294	Kenneth S. Groves and Viva Smith Groves	1189		Gratis	Options secured

* These parcels of land have only a nuisance value, but litigation may be involved in acquiring title as the agent has stated that he will not sell the parcels.

He pointed out that options have been secured for the acquisition of three of the parcels, gratis, and that the value of the other two properties is nominal, although there is a possibility that it may be necessary to acquire them by condemnation. He recommended acquisition of all of the properties listed, and litigation, if necessary, to acquire them. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion the matter of conducting snow removal operations on the Santiam and North Santiam Highways so as to keep the North Santiam Highway open for travel throughout the winter season. He said that it is the state's responsibility to keep the Santiam Highway open over Hogg Pass from Suttle Lake to the junction with the North Santiam Highway, but the responsibility for the maintenance of the North Santiam Highway from its junction with the South Santiam Highway to Detroit, a distance of 32.88 miles, rests with the Bureau of Public Roads and Marion County, it being the county's obligation to maintain the 6.88 miles at the south end of the road and the Bureau's obligation to maintain the balance. The County Court, he said, has asked the Highway Department to undertake the snow removal on the Marion County Section and also to assist the Bureau of Public Roads in maintaining travel along its section, if necessary, all of the work to be paid for by the county. He estimated that it would cost about \$4,000 to keep the 12-mile section between Suttle Lake and the junction with the North Santiam Highway open all winter, and recommended the expenditure and the acceptance of the county's offer in view of the fact that in any case the state would have to spend a portion of the \$4,000 to open the highway early in the spring. After discussion the Commission voted unanimously to conduct snow-removal operations on these highways in conformance with the Engineer's recommendation, so long as the cost of such work is being paid by Marion County.

The Engineer reported a request from the Eugene "Ski Lauferers" that snow-removal operations be conducted on the McKensie Highway this winter so as to keep this road open for two lanes of traffic as far as Pole Bridge Cabin. The Commission by unanimous vote approved a maximum expenditure of \$1,000 for such purpose.

The Commission had under discussion the claim of Mr. L. D. Dollarhide, Ashland, for damages that he alleges occurred to his property south of Ashland by reason of the construction of the Siskiyou Section of the Pacific Highway. Mr. Dollarhide alleges that several acres of his land have been rendered valueless by reason of slides caused by the highway construction and is demanding payment of \$500 for the settlement of his claim. After considerable discussion the Commission authorized the payment of \$50 to Mr. Dollarhide provided he will sign a statement releasing the state from responsibility for damage that has occurred in the past and any that may occur in the future. The matter was referred to the Attorney for handling.

A letter was presented from Mrs. Ida M. Odell, Klamath Falls, Regent for Bulalona Chapter D. A. R., in regard to the selection of a site for a monument marking the site of Fort Klamath. The Commission appeared favorably inclined to this project but deferred definite action thereon pending a

NOV 16 1938

recommendation from Mr. Lewis A. McArthur, President of the Oregon Historical Society, as to the proposed location.

The Commission considered and denied the application of E. S. Schwantes for permission to truck logs along and across the Columbia River Highway in Mosier, it being the opinion of the Commission that such operation on the highway at this place is unsafe and will create an undue hazard to highway traffic.

The Engineer requested instructions relative to the sale of the timber salvaged from tunnels on the Robinette Secondary Highway, in Baker County, for which he has received an offer. He questioned the advisability of letting anyone remove the timber from the tunnels because of the hazard of falling rocks and the possibility of cave-in. In a discussion of this matter the question arose whether or not the state actually owns the tunnels. The Engineer was instructed to investigate the deed whereby Baker County conveyed the right of way to the state, to ascertain definitely if the tunnels were included in the transfer, and to barricade the entrances to the tunnels and to erect "No Trespassing" signs so as to prevent anyone from entering the tunnels if it is found that the tunnels belong to the state. He was also instructed to refuse everyone permission to take the tunnel timbers.

The Engineer reported a request from the Medford Concrete Construction Company, contractors for the furnishing of surfacing materials for the Valley Falls-Cinder Butte Section of the Burns-Lakeview and Fremont Highways, in Lake and Harney Counties, Contract No. 1943, for a reduction in the penalty imposed on them for failure to complete this contract within the specified time limit. He advised that the overrun in time limit amounted to several months and as a consequence the state incurred considerable more expense for engineering supervision than was contemplated; and that at a previous meeting the Commission granted the contractor an extension of time subject to the condition that the contractor would be charged for this extra engineering expense, which amounts to about \$2,100. He further advised that the contractor is not altogether to blame for failure to complete the project within the specified time limit and in one instance went to considerable extra expense in removing from one of the stock piles a rather large amount of materials that did not meet the specifications, thus showing good faith to the state. He recommended, in view of the circumstances surrounding the case, that the penalty heretofore imposed be reduced to 50 per cent of the extra engineering expense incurred by the state. The Commission approved the recommendation unanimously.

A letter was presented from the Attorney relative to Mr. Lewis P. Crosby, who is employed jointly by the State Highway Commission and the State Treasurer to check on fines imposed for violations of the motor vehicle law. The Attorney advised that Mr. Crosby makes certain reports with respect to his work which vitally affect the revenues which the State Highway Commission and the State Treasurer are seeking to recover for the state highway fund, and it appears that these reports have no official recognition in the Secretary of State's office. He gave as his opinion that it would be desirable to give Mr. Crosby's reports and findings some official standing with the

Secretary of State, and suggested that a letter be addressed to the Secretary of State requesting that the findings and reports made by Mr. Crosby be recognized and given proper consideration in connection with the work and records made by the Secretary of State with respect to such matters. The Commission approved the Attorney's suggestion unanimously and instructed the Secretary to write the Secretary of State in harmony therewith.

The Engineer requested authority to purchase the following equipment:

One 2,000 or 2,500-watt Kohler light and power plant for section headquarters at Meacham, estimated cost \$700;

Two electric gasoline pumps for installation at highway shops at La Grande and Klamath Falls, estimated total cost \$400;

One saw and jointer for La Grande shops, estimated cost \$225;

One Mercury vacuum gauge for La Grande shops, estimated cost \$35;

Two floor jacks for Klamath Falls shops, estimated total cost \$150;

Vacuum cleaning attachment for Salem shops, estimated cost \$48;

Four sets power-operated greasing equipment for each of the shops, estimated total cost \$1,200;

Three machines for cleaning equipment by use of solvent, estimated total cost \$1,800;

Four 2,000-gallon, semi-trailer tanks and one flat bed semi-trailer, total estimated cost \$12,150;

One electric welder for use on Wolf Creek Highway W.P.A. work, estimated cost \$300.

The Commission approved the request unanimously and ordered that the purchases be made through the State Purchasing Agent in the usual manner.

The Commission, after discussion, authorized the following officials to represent the State Highway Department at the annual meeting of the American Association of State Highway Officials in Dallas, Texas, December 5 to 9, 1938, at state expense, subject to approval by Governor Charles H. Martin: Henry F. Cabell, Chairman; Commissioners E. B. Aldrich and F. L. Tou Velle; R. H. Baldock, State Highway Engineer; J. M. Devers, Attorney; and G. S. Paxson, Bridge Engineer.

The Engineer reported that a portion of the Mile Bridge Section of the Nehalem Secondary Highway, in Columbia County, is no longer of value for state highway purposes, in view of the fact that this section has been reconstructed on new alignment. He recommended, in view thereof, that the

NOV 16 1938

Commission take formal action abandoning this section. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Mile Bridge Section of the Nehalem Highway in Columbia County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section or part is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said state highway as formerly located, improved, and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. The fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Nehalem Highway in Columbia County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Columbia County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Mile Bridge Section of the Nehalem Highway situated in Section 3, Township 4 North, Range 4 West, W. M., Columbia County; and lying southerly of the right of way required for the reconstructed highway, the beginning and ending points with reference to the engineer's stations of the reconstructed highway being Station 4+33.2, the beginning of the southerly wye connection on the easterly end, and Station 13+95 on the westerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and is dated the 25th day of October, 1938, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red. *

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Columbia County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Columbia County and beyond any responsibility or supervision by the State Highway Commission.

A letter was presented from Mr. C. C. Chapman, Portland, inquiring as to the possibility of securing the services of one of the Highway Department's draftsmen for three or four weeks' time to prepare a topographical map of the State of Oregon for use of the State Planning Board. The Commission found it necessary to deny this request as a matter of policy.

The Commission considered and denied the request of Mr. Henry Hout, Eugene, for permission to construct a private roadway across state-owned property to a connection with the Pacific Highway near the end of the overcrossing structure between Junction City and Eugene, it being considered that traffic entering the highway from such roadway at this point would cause an undue hazard to traffic on the highway, which is of considerable volume at this particular location.

The Commission had under discussion a letter directed to Governor Charles H. Martin by Mr. Cornelius O'Donovan, Portland, requesting the

* Filed in Right of Way Abandonment and Retention File - No. 59

NOV 16 1938

extension of the Scotts Mills county road in Marion County southeasterly from its present terminus to a connection with the North Santiam Highway near Gates. Mr. O'Donovan alleges that this extension is only 7 miles long and that its construction will shorten the distance from Portland to Bend by some 35 miles. Further, that it will open up for development large areas of farm lands, mines, health resorts, clay deposits, and other natural state resources. The Secretary was instructed to inform Mr. O'Donovan that the Commission appreciates the reason that prompted his letter but is not financially able to undertake this project at the present time.

The Commission considered and denied the request of Harry Polk, Ashland, for a permit authorizing him to construct a tunnel under and across the Pacific Highway near Bear Gulch in Jackson County in connection with certain mining operations.

A letter was presented from Mr. S. T. White, Oregon State Coordinator, Soil Conservation Service, United States Department of Agriculture, Corvallis, requesting in behalf of Robert L. Brown, Manager of the Astoria Nursery Unit, permission to collect small lots of various grass, legume, tree, and shrub seeds along the right of way of state highways. The Commission approved the request by unanimous vote, subject to the condition that Mr. Brown will conduct his activities in accordance with the provisions of the Commission's standard permit covering such matters and will comply with the Commission's rules and regulations in regard thereto.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Coos Bay Construction Company, Contract No. 1949, for grading the Elsie-Nehalem River Section of the Wolf Creek Highway, in Clatsop County, requested an additional extension of time, from June 15 to October 15, 1938, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to unusually inclement weather during the past winter and the impracticability of moving earth materials during such time. The Engineer advised that the contractor used on this job carry-all scrapers in the moving of the solid rock throughout the winter months, which equipment was unsuitable on this type of work, resulting in numerous breakdowns and delays. However, all of the work under the contract was completed by September 15 except the burning of debris, which could not be done because of the fire hazard, the contractor being unable to secure a permit to carry on burning operations. He further advised that part of the contractor's delay in completing the project could be attributed to numerous slides that occurred near the Elsie Summit, which could not be removed until the summer dry season. He pointed out that the Commission previously extended the time limit on this job from December 15, 1937, to June 15, 1938, with a provision that the contractor be assessed with the extra engineering expense incurred by the state over and above the cost of engineering required in connection with extra work involved, such as slides. He recommended, therefore,

that the extension of time now requested be granted subject to the condition that the contractor pay the extra engineering costs in excess of those incurred in slide removal work and other extra work; in other words, those which were incurred between February 5 and August 30, 1938. A letter was presented from the Bureau of Public Roads concurring in such recommendation. The Commission approved the recommendation by unanimous vote.

E. L. Rigdon, Contract No. 2026, for grading, surfacing, and oiling the Harris Creek-Chalk Cliff Section of the Fremont Highway, in Lake County, requested an additional extension of time, from September 15 to September 24, 1938, within which to complete this project. He alleged that his failure to complete the project within the specified time limit was due to the delay in securing road oil shipments and to adverse weather conditions. The Engineer advised that the date of completion specified in the contract was August 31, 1938, but that the Commission extended this to September 15, 1938, subject to the condition that the contractor would pay the extra engineering expense incurred by the state. He recommended that the 9 days' extension of time now requested be granted subject to the same penalty. A letter was presented from the Bureau of Public Roads concurring in such recommendation. The Commission approved the recommendation unanimously.

Newport Construction Company and Kern & Kibbe, Contract No. 2073, for grading and asphaltic concrete paving on the St. Helens-Warren Section of the Columbia River Highway, in Columbia County, requested an extension of time from September 15 to October 13, 1938, within which to complete this job. They alleged that the time limit specified in the contract for the completion of this job was too short because they worked diligently to complete the project within the specified time but were not able to do so, notwithstanding that they started work immediately after the contract was awarded and had on the job all of the equipment the job could stand. They also alleged that their work was handicapped to some extent by reason of highway traffic during the Labor Day holiday period and their work was also handicapped by reason of bad weather conditions during the early part of October. The Engineer advised that the contract was awarded on June 2, 1938, and the contractors commenced operations on June 13. The production of rock, he said, was started on July 18 and paving on September 7. He further advised that the contractor employed an adequate supply of good equipment and in general pushed the work rapidly, with two shifts working. He confirmed the contractors' allegation that traffic over the Labor Day period interfered with the operations. He gave as his thought that the work could have been completed within the specified time limit, so there is no justification for an extension of time without penalty, in his estimation. Accordingly, he recommended that the extension requested be granted subject to the condition that the contractor be required to pay the extra engineering expense incurred by the state. A letter was

presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

McNutt Bros., Contract No. 2076, for grading and talus rock roadbed topping on the Cottonwood Creek-Maddock Corner Section of the Klamath Falls-Lakeview Highway, in Lake County, requested an extension of time of 15 days, from September 30 to October 15, 1938, within which to complete this job. They gave no reason for their failure to complete the project within the specified time limit. The Engineer advised that, in his estimation, the extension of time requested should be granted but that the contractor should be charged for the engineering expense incurred by the state subsequent to the date of completion specified in the contract, and he so recommended. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

Edwin C. Gerber, Contract No. 2086, for surfacing and oiling the Sheeley Bridge Section of the Nehalem County Road, in Columbia County, requested an extension of time of 10 days, from August 31 to September 10, 1938, within which to complete this project. He attributed his failure to complete the project within the specified time limit to delays incurred in securing materials for the job. The Engineer advised that this contract was awarded on June 15, 1938, but the contractor did not start operations for some time thereafter, with the result that the work was not completed until the specified time limit had expired. He recommended, in view of the circumstances, that the extension of time requested be approved subject to the condition that the contractor be required to reimburse the state for the engineering expense incurred subsequent to the expiration of the specified time limit. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

Rogers Construction Company, Contract No. 2090, for grading, surfacing, and oiling the Enterprise-Scotch Creek Section of the Hurricane Creek County Road, in Wallowa County, requested an extension of time of 34 days, from September 15 to October 19, 1938, within which to complete this project. They attributed their delay to the fact that the quarry designated by the state to be used did not contain a sufficient quantity of rock to complete the job and they were forced to obtain extra material from other sources, which slowed their operations and carried them into a period of adverse weather. The Engineer advised that the principal reason for the contractor's failure to complete the project within the specified time limit was the delay in starting the project, the contract having been awarded on June 20, 1938, whereas actual work was not started until July 22, 1938. He confirmed the contractor's statement that there was some loss of time due to there being insufficient quantity of material in the designated gravel pit, so it was necessary for the contractor to secure materials from another pit

in order to complete the project, resulting in one week's lost time. He recommended, in view of the circumstances, that the extension of time now requested be granted but that the contractor be charged all engineering costs incurred by the state subsequent to September 22, which would allow 7 days' extension of time without penalty on account of the necessity to change the quarry. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts 1975, 2005, 2026, 2042, 2066, 2073, 2075, 2076, 2080, 2082, 2086, 2090, and 2094, for the construction of state highway projects, have been completed according to the terms and provisions of the contracts or modifications thereof and said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commissioners present:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 1975, with R. I. Stuart & Sons, for furnishing crushed rock for the Klamath Falls Rock Production Project on The Dalles-California, Green Springs, and Klamath Falls-Lakeview Highways, in Klamath County. Completed August 2, 1938.

Contract No. 2005, with Berke Bros., Inc., for clearing the Arch Cape-Beach Creek Section of the Oregon Coast Highway, in Clatsop and Tillamook Counties. Completed September 8, 1938.

Contract No. 2026, with E. L. Rigdon, for grading, surfacing, and oiling the Harris Creek-Chalk Cliff Section of the Fremont Highway, in Lake County. Completed September 24, 1938.

Contract No. 2042, with Saxton, Looney & Risley, for producing crushed rock for the Mt. Hood Rock Production Project on the Mt. Hood and Wapinitia Highways, in Clackamas, Hood River, and Wasco Counties. Completed September 30, 1938.

Contract No. 2066, with Mountain States Construction Company, for remodeling steel swing span, construction of pile trestle approach, and grading and surfacing the Wal-luski River Bridge Section of the Nehalem Secondary Highway, in Clatsop County. Completed October 12, 1938.

Contract No. 2073, with Newport Construction Company

and Kern & Kibbe, for grading and paving the St. Helens-Warren Section of the Columbia River Highway, in Columbia County. Completed October 13, 1938.

Contract No. 2075, with Mountain States Construction Company, for construction of the Williamson River Bridge on The Dalles-California Highway, in Klamath County. Completed November 9, 1938.

Contract No. 2076, with McNutt Bros., for grading and talus rock roadbed topping on the Cottonwood Creek-Maddock Corner Section of the Klamath Falls-Lakeview Highway, in Lake County. Completed October 15, 1938.

Contract No. 2080, with Snook Bros., for construction of a bridge over South Fork of Rock Creek on the Wolf Creek Highway, in Clatsop County. Completed October 15, 1938.

Contract No. 2082, with Birkemeier & Saremal, for reconstruction of Northeast 33rd Avenue Overcrossing at Columbia Boulevard, in Portland, Multnomah County. Completed October 10, 1938.

Contract No. 2086, with Edwin C. Gerber, for surfacing and oiling the Sheeley Bridge Section of the Upper Nehalem County Road, in Columbia County. Completed September 9, 1938.

Contract No. 2090, with Rogers Construction Company, for grading, surfacing, and oiling the Enterprise-Scotch Creek Section of the Hurricane Creek County Road, in Wallawa County. Completed October 19, 1938.

Contract No. 2094, with Oregon Contracting Company, for paving the Court Street Section of the Pacific Highway East in the city of Salem, Marion County. Completed October 19, 1938.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The meeting was declared adjourned at 4:00 o'clock p. m.

Chairman Cabell announced that the award of contracts and sale of buildings would be made at 3:30 o'clock p. m. in the same room.

Parks Superintendent S. H. Boardman was present and reported on the following park matters:

Cleaning up the roadside through the Indian village at Celilo adjacent to the Columbia River Highway, in Wasco County:- It was pointed out in the discussion of this matter that the cleaning up of this area is beyond the jurisdiction of the State Highway Commission. However, it was thought that everything possible should be done to effect the cleaning up of the premises by the Federal Government, which has control. A suggestion that the Commission adopt a resolution urging the federal authorities to do this cleaning-up

work was approved by the Commission. The Engineer was instructed to have the Parks Superintendent and the Landscape Engineer consult with the Attorney in the preparation of such resolution, which is to be presented to the Commission for adoption as soon as possible.

Wayside timber strips along the Wolf Creek Highway, about three miles west of Sunset Camp:- The Parks Superintendent advised that he consulted with Mr. J. R. Hulbert of the Sunset Logging Company which owns this timber, relative to the acquisition of strips 300 feet wide on each side of the highway where timber is growing on both sides of the highway, and that Mr. Hulbert has set a price of \$5.10 per MFBM for their timber, at which price the timber would cost the state \$17,136. The Commission considered this price exorbitant and instructed the Parks Superintendent to ascertain from Mr. Hulbert whether or not the company would consider the acceptance of \$3.50 per MFBM.

Acquisition of an ocean-view park site in northern Curry County:- The Parks Superintendent advised that this proposed park, which contains 1,400 acres, is owned by the Blacklock Sandstone Company of San Francisco, which is asking the price of \$10 per acre for its property. He explained that the proposed park area borders on Floras Lake for a distance of about one-half mile and has a 2-mile frontage on the Pacific Ocean, that there are a number of streams running through the area, and that it is covered with pine and rhododendron. Access to the property, he said, may be had from the secondary highway leading to Cape Blanco by extending this road a distance of about one-fourth mile. The Commission appeared favorably inclined to acquire this property but deferred action pending a personal inspection on the ground.

Acquisition of wayside areas on the Wolf Creek Highway, in Clatsop County through the holdings of the Oregon American Lumber Company and Mr. H. B. Van Duser, Portland:- The Parks Superintendent stated that he has conferred with the owners of these timber areas, and the officials of the Oregon American Lumber Company have agreed to set a price on their holdings. Mr. Van Duser, he said, advises that he is willing to sell his holdings to the state at the same rate that the state pays for the holdings of the Oregon American Lumber Company. The Commission ordered the report filed.

Request of the State Game Commission for permission to trap elk in Ecola State Park for rehabilitation purposes in a new game reserve to be located on Mt. Hood, in Clackamas County:- The State Parks Superintendent offered objections to the taking of these elk from Ecola State Park because they are very tame and are a great attraction to park visitors. The Commission concurred in the viewpoint of the Parks Superintendent in this matter.

Acquisition of a 20-foot strip adjacent to the Oregon Coast Highway in Gearhart:- The Parks Superintendent stated that this property is owned by the Gearhart Land Company, and, according to the information he has received, extends for a distance of about 6,400 feet north from Seaside. He advised that there is a question in his mind whether the strip is the same strip that the company agreed to deed to the state free of cost when the state purchased

other property from it, or whether it is an entirely different strip. In view of this uncertainty the Commission deferred a decision relative to the purchase of the property and referred the matter to the Attorney to investigate and clarify the company's proposal.

Plan of National Park Service to acquire a large monument or park to be located along the Oregon coast line:- The Parks Superintendent advised that the National Park Service proposes to establish a large monument some place along the Oregon coast line, consisting of a large acreage of land overlooking the Pacific Ocean, and that a coastal survey has been made by a committee of national park representatives from Washington, D. C., who have selected three sites to present to their superiors in Washington, one being the area including the Sea Lion Caves, in Lane County; another being the area fronting on the ocean between Florence and Gardiner, in Lane and Douglas Counties, the eastern boundary of which site borders on Woahink, Siltcoos, and Tahkenitch Lakes. The third area, he said, is located in Curry County between Cape Sebastian and Brookings, the boundaries being the ocean on the west and the Oregon Coast Highway on the east. He gave as his understanding that if the authorities in Washington select any one of these sites for a national park or monument, the State of Oregon will be asked to purchase the area and present it to the National Park Service as a gift. It was the consensus of opinion that the area located in Curry County would be the most suitable as a national park or monument. However, the Commission took no action on the matter in view of the high cost involved to acquire any of these sites.

The Commission had under discussion the application of the West Coast Power Company to construct its pole line through Benson Park adjacent to the Columbia River Highway at Multnomah Falls, to serve the substation of the Pacific Telephone and Telegraph Company. In the discussion it was pointed out that, in accordance with a previous agreement, the City of Portland, which owns this park, is transferring title to the same to the state, but the negotiations have not yet been completed, so the State Highway Commission does not have, as yet, the authority to issue a permit covering the proposed pole line construction in this area. The Parks Superintendent advised that the City of Portland is ready to transfer title as soon as the survey of that portion north of the railroad tracks has been made. The Engineer was authorized and instructed by the Commission to make such survey so as to complete the deal with the city at the earliest possible time.

The Engineer advised that considerable study has been made of the location for the West Coast Power Company's pole line, and, in his estimation, the proper location is just north of and approximately parallel to the right of way of the O.W.R. & N. Company, in which location the poles will be least objectionable from the highway standpoint. He recommended that such location be designated for this pole line. The Commission approved the recommendation unanimously and instructed the Engineer to consult with the Portland city officials relative thereto, particularly in view of its previous agreement with the City of Portland relative to this park and the fact that the title to the park has not yet been transferred to the state.

It was the thought of the Commission that, if a permit is issued to the West Coast Power Company before the transfer is made, the permit should come from the City of Portland rather than from the state. The Secretary was authorized and instructed to prepare an appropriate permit covering the matter, using the name of the City of Portland as grantor rather than the State of Oregon, upon receipt of information by the Engineer to the effect that that is satisfactory with the Portland city officials.

The Commission had under discussion the matter of surfacing a roadway from the Oregon Coast Highway to the Azalea State Park at Brookings. In this connection the Engineer reported receipt of information from Mr. Elmer Bankus that his company, which owns the property across which this roadway is to be constructed, is ready and willing to deed the right of way to the state without cost as soon as it is furnished with a description of such right of way; also, that Curry County has a W.P.A. project under way for clearing the right of way and grading a portion of the roadway and will continue such work to a connection with the state highway if the State Highway Commission will surface the road when the grading is completed. He further advised that investigation reveals that the section that the state would have to surface is about 3,400 feet in length and will require approximately 1,800 cubic yards of pit-run gravel to provide a surface 8 inches in depth and 20 feet in width. Further, that it is estimated that the surfacing work will cost a total of about \$1,200. He gave as his thought that the expenditure is justified for two reasons: first, the proposed road will provide access to an important state park; and, secondly, when the proposed revision of the Oregon Coast Highway south of Brookings is constructed, this road will be used as a detour for traffic. He further said that, if the state does not cooperate in this improvement now, it will be necessary for the state to pay not only the cost of surfacing later on, but also the cost of the grading work. The State Parks Superintendent, who was present, concurred in the Engineer's recommendation. After discussion the Commission approved the recommendation by unanimous vote. The question then arose whether or not this expense should be charged against the maintenance budget; or whether it should be charged to the state parks budget. The Commission referred the matter to the Engineer to make a decision with respect thereto.

The Commission had under consideration the offers of the United States of America to contribute P.W.A. funds to aid in financing the construction of the Devil's Garden-Quartz Mountain Section of the Klamath Falls-Lakeview Highway and the Eastern Oregon Rock Production Project.

After discussion of the offer of the United States of America to aid by way of grant in financing the construction of the Devil's Garden-Quartz Mountain Section of the Klamath Falls-Lakeview Highway, the following Resolution entitled "A Resolution Accepting the Offer of the United States to the State Highway Commission of the State of Oregon to Aid by Way of Grant in Financing the Construction of the Devil's Garden-Quartz Mountain Section of the Klamath Falls-Lakeview Primary Highway in Klamath and Lake Counties and the Acquisition of Necessary Lands and Rights of Way Therefor" was proposed by Commissioner Tou Velle and read in full:

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE DEVIL'S GARDEN-QUARTZ MOUNTAIN SECTION OF THE KLAMATH FALLS-LAKEVIEW PRIMARY HIGHWAY IN KLAMATH AND LAKE COUNTIES AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it Resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the Devil's Garden-Quartz Mountain Section of the Klamath Falls-Lakeview Primary Highway in Klamath and Lake Counties and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 85296-205

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.,
Dated: Nov 7 - 1938
Docket No. Ore. 1404-F

"State Highway Commission of the State of Oregon,
Salem, Oregon.

"1. Subject to the Terms and Conditions (FHA Form No. 230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of highway improvements, including the acquisition of necessary land and rights of way (herein called the "Project"), by making a grant to the State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$49,005.

"2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later than December 31, 1938, and to complete such Project with all practicable dispatch, and in any event within 11 months from the commencement of construction.

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or

NOV 17 1938

agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

"UNITED STATES OF AMERICA

Federal Emergency Administrator
of Public Works

By (Sgd.) E. W. Clark
For the Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all Terms and Conditions relating to such grant, a copy of which Terms and Conditions were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than December 31, 1938; and to complete the work with all practicable dispatch, and in any event within eleven months from the commencement of the construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

The above resolution was seconded by Commissioner Aldrich and was adopted with the following voting yes: Chairman Henry F. Cabell, Commissioner E. B. Aldrich, and Commissioner F. L. Tou Velle. The Chairman thereupon declared said Resolution carried.

Following discussion of the offer of the United States of America to aid by way of grant in financing the construction of the Eastern Oregon Rock Production Project, the following Resolution entitled "A Resolution Accepting the Offer of the United States to the State Highway Commission of the State of Oregon to Aid by Way of Grant in Financing the Construction of the Eastern Oregon Rock Production Project and the Acquisition of Necessary Lands and Rights of Way Therefor" was proposed by Commissioner Aldrich and read in full:

NOV 17 1938

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE EASTERN OREGON ROCK PRODUCTION PROJECT AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it Resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the Eastern Oregon Rock Production Project and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 85296-308

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.

Dated: Nov 7 - 1938

Docket No. Oreg. 1373-F

"State Highway Commission of the State of Oregon,
Salem, Oregon.

"1.. Subject to the Terms and Conditions (FWA Form No.230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of highway improvements, including the production of stock-pile materials for maintenance purposes and the acquisition of necessary land and rights of way (herein called the "Project"), by making a grant to the State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$92,421.

"2. By acceptance of this Offer the Applicant covenants to begin work on the Project as early as possible but in no event later than December 31, 1938, and to complete such Project with all practicable dispatch, and in any event within 10 months from the commencement of construction.

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission, or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all Terms and Conditions relating to such grant, a copy of which Terms and Conditions were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than December 31, 1938; and to complete the work with all practicable dispatch, and in any event within ten months from the commencement of the construction.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

The above resolution was seconded by Commissioner Tou Velle and was adopted with the following voting yes: Chairman Henry F. Cabell, Commissioner E. B. Aldrich, and Commissioner F. L. Tou Velle. The Chairman thereupon declared said Resolution carried.

The Commission also discussed the matter of establishing minimum wage rates to be paid by contractors for labor employed on the Devil's Garden-Quartz Mountain Section and on the Eastern Oregon Rock Production Project. The following resolutions pertaining thereto were adopted by the Commission by unanimous vote upon motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle:

NOV 17 1933

A RESOLUTION ESTABLISHING MINIMUM WAGE RATES TO BE PAID BY
CONTRACTORS FOR LABOR ON THE DEVIL'S GARDEN-QUARTZ MOUNTAIN SECTION
PWA DOCKET NO. OREGON 1404-F

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Klamath and Lake counties, which is the locality in which the proposed project (hereinafter referred to as "project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said project, and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by an examination of the wage rates paid on various jobs as listed in our letter of November 1 to Mr. C. C. Hockley, which work is comparable to the work to be performed in this project.

NOW, THEREFORE, Be It Resolved by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed:

Retort operator	\$1.00
Retort fireman	.87½
Distributor driver	.90
Distributor leverman	.90
Power brooms	.75
Sloper - layout man	.75
Timber fallers	.90
Timber buckers	.75
Powderman	1.00
Jackhammer men	.75
Steel and tool dresser	1.00
Stat. drag scraper oper., up to 1 yd. cap.	.80
Stat. drag scraper oper., over 1 yd. cap.	1.12½
Oiler	.80
Crusher feeder	.75
Road rollers (finishing high type pavement)	1.12½
Road rollers (grade and surfacing)	1.00
Power shovels, draglines, cranes, over 1 yd. inc. all attachments	1.50
Power shovels, draglines, cranes, 1 yd. and under, inc. all attachments	1.25
Grease monkey	.80
Tractor oper., 75 HP and over, with attach.	1.25
Tractor oper., 75 HP and over, without att.	1.00
Tractor oper., 35 - 75 HP	1.00
Tractor oper., under 35 HP	.85

(Continued on next page)

(Minimum wage rates, Devil's Garden-Quartz Mountain Section, continued:)

Power blade	\$1.12½
Elevating grader operators	1.00
Power loader	1.00
Common labor	.50
Truck drivers, 3 ton & over, mfr. rated cap.	.85
Truck drivers, 1½ - 3 ton, mfr. rated cap.	.75

Be It Further Resolved that the foregoing list of trades or occupations includes to the best of our knowledge all the classifications of employees who will be engaged in work on said project other than executive, supervisory, administrative, clerical, or other non-manual workers as such.

A RESOLUTION ESTABLISHING MINIMUM WAGE RATES TO BE PAID BY
CONTRACTORS FOR LABOR ON THE EASTERN OREGON ROCK PRODUCTION PROJECT
PWA DOCKET NO. OREGON 1373-F

WHEREAS, a thorough investigation has been made of the hourly wage rates which are being paid in Eastern Oregon, which is the locality in which the proposed project (hereinafter referred to as "project") is to be constructed by the Oregon State Highway Commission, to employees in each trade or occupation engaged in work of a nature similar to the work to be performed in the construction of said project, and the prevailing hourly wage rates being paid in such locality to such employees for such work have been determined by an examination of the wage rates paid on various jobs as listed in our letter of November 1 to Mr. C. C. Hockley, which work is comparable to the work to be performed in this project.

NOW, THEREFORE, Be It Resolved by the Oregon State Highway Commission of the State of Oregon that the following rates for the respective trades or occupations listed below shall be and are hereby fixed as the minimum hourly wage rates and have been determined in accordance with rates prevailing for work of a similar nature in the locality in which the project is to be constructed:

Retort operator	\$1.00
Retort fireman	.87½
Distributor driver	.90
Distributor leverman	.90
Power brooms	.75
Sloper - layout man	.75
Timber fallers	.90
Timber buckers	.75
Powderman	1.00
Jackhammer men	.75
Steel and tool dresser	1.00

(Continued on next page)

NOV 17 1938

(Minimum wage rates, Eastern Oregon Rock Production Project, continued)

Stat. drag scraper oper., up to 1 yd. cap.	\$.80
Stat. drag scraper oper., over 1 yd. cap.	1.12 $\frac{1}{2}$
Oiler	.80
Crusher feeder	.75
Truck drivers, 3 ton & over, mfr. rated cap.	.85
Truck drivers, 1 $\frac{1}{2}$ - 3 ton, mfr. rated cap.	.75
Road rollers (finishing high type pavement)	1.12 $\frac{1}{2}$
Road rollers (grade and surfacing)	1.00
Power shovels, draglines, cranes, over 1 yd. with attachments	1.50
Power shovels, draglines, cranes, 1 yd. and under, with attachments	1.25
Grease monkey	.80
Tractor oper., 75 HP and over, with attach.	1.25
Tractor oper., 75 HP and over, without att.	1.00
Tractor oper., 35 - 75 HP	1.00
Tractor oper., under 35 HP	.85
Power blade	1.12 $\frac{1}{2}$
Elevating grader operators	1.00
Power loader	1.00
Common labor	.50

Be It Further Resolved that the foregoing list of trades or occupations includes to the best of our knowledge all the classifications of employees who will be engaged in work on said project other than executive, supervisory, administrative, clerical, or other non-manual workers as such.

The Commission adjourned at 12:30 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

The Commission reconsidered the matter of the date for its next regular meeting in December heretofore scheduled for Thursday, December 22, and decided to advance the date of such meeting to Monday and Tuesday, December 19 and 20, 1938. The Secretary was instructed to arrange to hold such meeting in the auditorium of the Public Service Building, Portland, in accordance with the usual practice. It was tentatively decided to hold a conference with representatives of the United States Bureau of Public Roads and the United States Forest Service on the afternoon of Tuesday, December 20, to arrange a construction program for the fiscal year 1940 forest highway funds.

Messrs. Walter Buse and Raymond Caufield, Oregon City, representing the Oregon City Chamber of Commerce, came before the Commission and inquired as to the Commission's plans for the construction of the East Portland-Oregon City Highway through Oregon City. They were informed by Chairman Cabell that the Commission has adopted a policy not to construct highway projects until all right of way matters in connection therewith have been satisfactorily

disposed of. The right of way for the north unit of the Oregon City project, he said, has been obtained and the Commission proposes to advertise for bids for the construction of this unit in the near future, probably in January of 1939, but the contracting of the south unit of the project will have to be deferred until right of way matters have been clarified.

Mr. Caulfield inquired whether or not the Commission has taken any action toward designating as a secondary state highway the county road extending westerly from West Linn to a connection with the Pacific Highway West, as was heretofore requested by an Oregon City delegation. He was informed by Chairman Cabell that, on account of shortage of funds for construction, the Commission does not feel that it is proper to place any more roads on the state highway system until the many roads now on such system have been rebuilt to proper standards; so the designation of the road under discussion as a secondary state highway will simply have to wait until a more propitious time.

Messrs. Earl J. Knutson, State Manager, and Glenn D. McNeilly, representing the California Western States Life Insurance Company, conferred with the Commission in regard to furnishing group insurance for state highway department employees. The matter was discussed at considerable length but no definite action was taken thereon, although the Commission advised that it would consider the matter and make a decision as soon as possible. The matter was referred to the Attorney for investigation and report.

Following a discussion of this matter, the Commission considered the renewal of the agreements with the National Hospital Association of Portland, the Multnomah Industrial Health Association, Portland, and the Physicians and Surgeons Hospital Association of Salem, for the furnishing of medical and hospital service to state highway department employees. The Commission was advised by the Attorney that the services rendered by these associations in the past have been satisfactory. In view thereof, the Commission decided unanimously to continue these agreements for another year.

Mr. H. R. Peets, Turner, was present and suggested a new route for the Pacific Highway between Salem and Eugene, passing through or near the town of Turner. He submitted a map showing the proposed route and alleged that the adoption of the same would shorten the distance between Salem and Eugene by about 17 miles. He also alleged that the proposed route could be constructed on much straighter alignment than the present route and with fewer adverse grades. Furthermore, it would avoid crossing of the Southern Pacific railroad and the Willamette River. He advised that he has no particular personal interest in the matter but simply wished to bring the route to the Commission's attention because it is so much shorter, straighter, and is much freer from adverse grades than the present route, on which a number of fatal accidents have occurred recently. Chairman Cabell thanked Mr. Peets for his suggestion and advised him that the Commission would be glad to bear it in mind for future consideration.

A delegation from Polk and Benton Counties conferred with the Commission in regard to the improvement of the Kings Valley Secondary State Highway. Mr. H. J. Leverman, Pedee, headed the group, which included the

following members: Messrs. Edward Turner, G. H. Fowler, and R. W. Craven, of Independence; Messrs. Gardner and P. M. Ritner, of Pedee; County Commissioner Fred Gibson, and Harrison H. Brant, of Polk County; Gus A. Nyman, of Kings Valley; and Ira L. Vincent, of Wren.

Mr. Leverman stated that the people served by this road are very anxious to have the road improved next summer and thought it best to bring the project to the Commission's attention at this time so as to make certain that it will be considered when the Commission arranges its 1939 construction program. He said that the section between Lewisville and Pedee should receive first consideration, and advised that they would be satisfied with the improvement of the present road notwithstanding that it might be somewhat longer than is absolutely necessary. He said that their greatest concern is to secure a good, smooth, travelable, dustless road to be used the year round rather than to save them some distance. Mr. Leverman's remarks were endorsed by each of the other members of the delegation.

The Engineer advised that a reconnaissance survey of the road is now being made and a report will be rendered to the Commission as soon as such survey is completed.

Chairman Cabell advised that the Commission is not in a position at the present time to make any promises or commitments to the project but will be pleased to consider it in the formulation of future construction programs.

Mr. Frank Forth, Ashland, was present in regard to damages that he alleges occurred to his property by reason of the reconstruction of the Pacific Highway in the Siskiyou Mountains, south of Ashland. Mr. Forth alleged unfair treatment on the part of the highway department engineers and asked the Commission to widen the fill in front of his premises to provide a parking place 15 feet wide and about 150 feet long so that people can drive to his service station with safety. Mr. Forth also alleged that part of his property had been covered to a depth of 6 feet with materials from the highway right of way, rendering this property valueless, and asked the Commission to pay him for this damage. This matter was discussed at considerable length but no definite action was taken thereon except that the Commission agreed to inspect the premises if it visits this district soon; otherwise, Commissioner Tou Velle and the Engineer are to inspect the property personally before snow falls.

A delegation from Forest Grove, consisting of Loyal M. Graham, John A. Thornburg, Hugh McGilvra, Fred Gardner, Mr. McSorlie, and Russell Stanton came before the Commission in regard to the Gales Creek Road. Mr. Graham headed the group. He pointed out that the state is now maintaining the Gales Creek Road as a temporary state highway route from Forest Grove to Balm Grove pending construction of the Wolf Creek and Wilson River Highways, and asked the Commission to extend this maintenance work approximately 4 miles, to the junction with the Wilson River Highway near Glenwood, and to maintain that portion of the new grade of the Wilson River Highway that is being used by traffic going to the Consolidated Timber Company's camp. He said that the

present road is in very bad condition and, in his estimation, there is sufficient travel over it to justify state maintenance. He advised that they are not asking for a permanent improvement but simply that the road be put in good condition and maintained properly. He filed with the Commission petitions bearing the names of 295 users of this road, urging the improvement of the same as a state highway route until the Wilson River Highway is completed. Mr. McSorlie endorsed the remarks of Mr. Graham.

After discussion the Commission approved the request and authorized the Engineer to maintain the additional section at state expense. The Engineer was instructed to consult with the W.P.A. officials relative to the maintenance of the used portion of the new grade of the Wilson River Highway up to the Consolidated Timber Company's plant in an endeavor to get the W.P.A. to assume this responsibility. If he is unsuccessful in this attempt, then he is authorized to maintain this section at state expense.

The Commission discussed with the Engineer the bids received at the morning session for highway construction projects, including several that are to be financed in part with P.W.A. funds. The following resolutions with respect to the award of the P.W.A. projects were adopted by the Commission by unanimous vote on motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle:

**A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE RICHLAND-HALFWAY SECTION OF THE BAKER-HOMESTEAD HIGHWAY IN BAKER COUNTY
DOCKET NUMBER OREGON 1294-F**

WHEREAS, bids received for the construction of the Richland-Halfway Section of the Baker-Homestead Highway in Baker County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Norris Brothers, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Richland-Halfway Section of the Baker-Homestead Highway in Baker County be and the same is hereby awarded to Norris Brothers, contractor, in the amount of Fifty-five Thousand Four Hundred Ninety-four Dollars and Fifty Cents (\$55494.50), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

**A RESOLUTION AWARDCING THE CONTRACT FOR THE CONSTRUCTION OF THE
CHARLESTON-MINER CREEK SECTION OF THE CAPE ARAGO SECONDARY
HIGHWAY IN COOS COUNTY - DOCKET NUMBER OREGON 1322-F**

WHEREAS, bids received for the construction of the Charleston-Miner Creek Section of the Cape Arago Secondary Highway in Coos County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Coos Bay Dredging Company, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Charleston-Miner Creek Section of the Cape Arago Secondary Highway in Coos County be and the same is hereby awarded to Coos Bay Dredging Company, contractor, in the amount of Thirty-four Thousand Four Hundred Twenty-six Dollars and Twenty-five Cents (\$34,426.25), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

**A RESOLUTION AWARDCING THE CONTRACT FOR THE CONSTRUCTION OF
THE ROCK CREEK-MORROW COUNTY LINE SECTION OF THE WASCO-HEPPNER
SECONDARY HIGHWAY IN GILLIAM COUNTY - DOCKET NUMBER OREGON 1194-F**

WHEREAS, bids received for the construction of the Rock Creek-Morrow County Line Section of the Wasco-Heppner Secondary Highway in Gilliam County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by H. L. Rice, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project.

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Rock Creek-Morrow County Line Section of the Wasco-Heppner Secondary Highway in Gilliam County be and the same is hereby awarded to H. L. Rice, contractor, in the amount of Thirty-two Thousand Three Hundred Forty-five Dollars (\$32,345.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

**A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF
THE MADRAS-DESCHUTES COUNTY LINE SECTION OF THE DALLES-CALIFORNIA
HIGHWAY IN JEFFERSON COUNTY - DOCKET NUMBER OREGON 1347-F**

WHEREAS, bids received for the construction of the Madras-Deschutes County Line Section of The Dalles-California Highway, in Jefferson County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Fisher Bros., contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW, THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Madras-Deschutes County Line Section of The Dalles-California Highway in Jefferson County be and the same is hereby awarded to Fisher Bros., contractor, in the amount of Twelve Thousand Seventy Dollars (\$12070.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

**A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION
OF THE NEWPORT ROCK PRODUCTION PROJECT ON THE OREGON COAST AND CORVALLIS-
NEWPORT HIGHWAYS IN LINCOLN COUNTY - DOCKET NUMBER OREGON 1372-F, UNIT B**

WHEREAS, bids received for the construction of the Newport Rock Production Project on the Oregon Coast and Corvallis-Newport Highways in Lincoln County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by E. F. Altree, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Newport Rock Production Project on the Oregon Coast and Corvallis-Newport Highways in Lincoln County be and the same is hereby awarded to E. F. Altree, contractor, in the amount of Ten Thousand Nine Hundred Forty-eight Dollars (\$10948.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

NOV 17 1938

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF
A MAINTENANCE BUILDING AT ALBANY IN LINN COUNTY
DOCKET NUMBER OREGON 1282-F

WHEREAS, bids received for the construction of a maintenance building at Albany in Linn County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Viesko & Hannaman, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of a maintenance building at Albany in Linn County be and the same is hereby awarded to Viesko & Hannaman, contractor, in the amount of Twelve Thousand Eight Hundred Fifty-seven Dollars and Seventy Cents (12857.70), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF
THE LEBANON-FOSTER SECTION OF THE SANTIAM HIGHWAY IN LINN COUNTY
DOCKET NUMBER OREGON 1372-F, Unit A

WHEREAS, bids received for the construction of the Lebanon-Foster Section of the Santiam Highway in Linn County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by A. S. Wallace, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW, THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Lebanon-Foster Section of the Santiam Highway in Linn County be and the same hereby is awarded to A. S. Wallace, contractor, in the amount of Ten Thousand Eight Hundred Forty Dollars (\$10840.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

Chairman Henry F. Cabell announced at 3:30 o'clock p. m., for the benefit of contractors and others present, that there would be a slight delay in announcing the names of the successful bidders on the projects on which bids were received at the morning session, in order to secure P.W.A. approval of the awards of the P.W.A. projects as made by the Commission.

The Attorney reported that, according to present estimates, expenditures during 1938 for right of way will exceed \$700,000, which is about \$100,000 in excess of the amount budgeted for such purposes. The Commission took no action on the matter.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He exhibited a list of such properties together with prices that he recommended be paid for each. After careful consideration the Commission approved the Engineer's request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney reported that it probably will be necessary to institute condemnation proceedings to acquire a quarry site on the property of John T. Black and William Berdine for the Myrtle Creek Section of the Pacific Highway, in Douglas County, and to acquire right of way needed for several construction projects. He requested authority from the Commission to institute condemnation proceedings if further negotiations reveal that to be absolutely necessary. The Commission approved the request and by unanimous vote adopted the following resolutions in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon and to acquire by donation, purchase, agreement, condemnation, or by the power of eminent domain title to land upon or under which there is gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders, quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment or pavement, and to declare the necessity and need for the acquisition thereof and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for the purposes of road construction, improvement, betterment, repair and maintenance, and for the purpose of the manufacture of road materials on the following section or sections of the state highway system of the State of Oregon, to wit:

Myrtle Creek Section of the Pacific Highway

land and property owned by or in the possession of the following parties and/or persons, to wit:

John T. Black and William Berdine

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties contain gravel, gravel beds or bars, sand, sand beds or bars, rock, boulders,

quarries or quarry sites, lime deposits, or other mineral deposits or formations suitable for road construction, improvement, betterment, of pavement, and that the said property or properties is or are necessary and needful and the acquisition thereof will be of advantage to the State of Oregon for the said purposes in order to make it possible for the State Highway Commission to construct, improve, maintain, and repair the said portion or portions of the said state highway system in accordance with the standards adopted by this Commission.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for said purposes and to prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties, or which said descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same shall be lands necessary for the purposes stated herein.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof and the advantages to be gained thereby;

NOV 17 1938

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Ochoco Dam-Marks Creek Section of the Ochoco Highway
 Charleston-Miner Creek Section of the Cape Arago Highway
 Dillard Section of the Pacific Highway
 Drews Valley Section of the Klamath Falls-Lakeview Highway
 Sweet Home Section of the Santiam Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

Ochoco Dam-Marks Creek Section of the Ochoco Highway
 6032A-Ochoco Timber Company
 Charleston-Miner Creek Section of the Cape Arago Highway
 6348-G. Von Salsen
 6349-Lillian Smith
 6357-Nick Bastendorf Estate
 Dillard Section of the Pacific Highway
 6308-Jennie McKay
 Drews Valley Section of the Klamath Falls-Lakeview Highway
 6022-Mathew Zdroles
 Sweet Home Section of the Santiam Highway
 6291-Vivian Weddle Long
 6292-G. E. Long

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

A letter was presented from Mr. Pentress Hill, Agent and Attorney in Fact for the Detroit Trust Company, Trustees, requesting, in behalf of Walker & Hovey, logging operators near Beatty, Oregon, authority to purchase approximately 2,000 cubic yards of rock from a state quarry near Beatty for use in connection with surfacing of certain roads that are being used in connection with their logging operations. The Commission denied the request as a matter of policy.

Chairman Cabell left the meeting at 4:15 o'clock p. m.

At 4:30 o'clock p. m. the Engineer publicly announced the following awards of contracts and sale of buildings, bids for which were taken at the morning session, such awards and sales having been previously approved by the unanimous vote of the Commission and by the P.W.A. officials with respect to the P.W.A. projects:

"Richland-Halfway Section of the Baker-Homestead Highway, in Baker County. 18.0 miles oil mat surface treatment. The low bid for this project was that submitted by Norris Bros., Burlington,

Washington, at \$55,494.50. The next low bid was that of Babler Bros., Portland, at \$59,707.00. There were 4 higher bidders. The Commission has awarded the contract to Norris Bros., the low bidders, at their bid price of \$55,494.50.

"Construction of Shipley Bridge on Market Road No. 12, in Clackamas County. Joplin & Eldon, Portland, submitted the low bid at \$41,712.00. Contracting & Sales Company, Portland, submitted the next low bid at \$44,955.00. There were 4 higher bidders. These bids were received for and in behalf of the Clackamas County Court, to which they are being referred. The Commission has been informed that the County Court will consider them at 10:00 o'clock a. m., on November 21, 1938, in the Clackamas County Courthouse, Oregon City.

"Charleston-Miner Creek Section of the Cape Arago Secondary Highway, in Coos County. 1.49 miles grading and surfacing. 3 bids were received for this project, the low one being that of Coos Bay Dredging Company, Marshfield, at \$34,426.25. The next low bid was submitted by Leonard & Slate, Multnomah, at \$35,277.00. The Commission has awarded the contract to the Coos Bay Dredging Company, the low bidder, at its bid price of \$34,426.25.

"Rock Creek-Morrow County Line Section of the Wasco-Heppner Secondary Highway, in Gilliam County. 2.99 miles grading. The low bid received for this project was submitted by H. L. Rice, Portland, at \$32,345.00. The next low bid was submitted by Joplin & Eldon, Portland, at \$38,462.50. There were 13 higher bidders. The Commission has awarded this contract to the low bidder, H. L. Rice, at his bid of \$32,345.00.

"North Unit, Bear Canyon-State Line Section of the Pacific Highway. 2.29 miles grading. 9 bids were received for this project, the low one being that of Harold Blake, Portland, at \$163,808.00. The next low bid was that of E. L. Gates, Flora, at \$165,407.50. The Commission has awarded the contract to Harold Blake, the low bidder, at his bid price of \$163,808.00.

"Madras-Deschutes County Line Section of The Dalles-California Highway, in Jefferson County. Furnish 7,100 cubic yards crushed rock in stock piles. Fisher Bros., Oregon City, submitted the low bid for this project at \$12,070.00. Clifton & Applegate, Spokane, Washington, submitted the second low bid at \$12,425.00. There were 7 higher bids submitted. The Commission has awarded the contract to the low bidders, Fisher Bros., at their bid price of \$12,070.00.

"Main Street Undercrossing in Klamath Falls. 2 bids were received for this project, the low one being that of C. J. Montag & Sons, Portland, at \$103,000.00, and the other bid being that of Clifford A. Dunn, Klamath Falls, at \$116,423.00. The Commission has awarded the contract to C. J. Montag & Sons, the low bidders, at their bid of \$103,000.00.

"Odell Lake-Walker Mountain Section of the Willamette Highway, in Klamath County. 23.0 miles surfacing and oiling; also furnish 6,000 cubic yards crushed rock in stock piles. Fisher Bros., Oregon City, submitted the low bid for this project at \$131,466.00. Mountain States Construction Company, Eugene, submitted the next low bid at \$131,476.00. There were 8 higher bids submitted. The Commission has awarded the contract to the low bidders, Fisher Bros., at their bid of \$131,466.00.

"Newport Rock Production Project on the Oregon Coast and Corvallis-Newport Highways, in Lincoln County. Furnish 6,000 cubic yards crushed rock in stock piles. 5 bids were received for this project, the low one being that of E. F. Altree, Agate Beach, at \$10,948.00. The second low bid was submitted by A. S. Wallace, Roseburg, at \$12,325.00. The Commission has awarded the contract to E. F. Altree, the low bidder, at his bid of \$10,948.00.

"Maintenance Building at Albany, in Linn County. Viesko & Hannaman, Salem, submitted the low bid for this project at \$12,857.70. Keebler Bros., Lebanon, submitted the next low bid at \$12,919.05. There were 5 higher bidders. The Commission has awarded the contract to Viesko & Hannaman at their low bid of \$12,857.70.

"Lebanon-Foster Section of the Santiam Highway, in Linn County. Furnish 7,500 cubic yards crushed rock or crushed gravel in stock piles. The low bid for this project was submitted by A. S. Wallace, Roseburg, at \$10,840.00. The second low bid was submitted by D. L. Ashton, Lebanon, at \$10,865.00. There were 2 higher bidders. The Commission has awarded the contract to the low bidder, A. S. Wallace, at his bid price of \$10,840.00.

"State Hospital-Ash Street Unit of the Pendleton Landscaping Project on the Old Oregon Trail, in Umatilla County. Roadside improvement. 3 bids were received for this project, the low one being that of Leonard & Slate, Multnomah, at \$4,144.00. The next low bid was submitted by Contracting & Sales Company, Inc., Portland, at \$5,489.00. The Commission has referred the bids to the Engineer with power to award the contract to the low bidders, Leonard & Slate, when certain conditions have been satisfied."

Buildings in Albany

"Building No. 4955, formerly owned by Melissa J. Kitchen. No bids were received by the Commission for the purchase of this building.

"Building No. 5130, formerly owned by Chas. Childs and Wm. Eagles. The only bid received by the Commission for the purchase of this building was that submitted by W. A. Jones, Albany, at \$11.00. The Commission accepted the offer of Mr. Jones.

"Building No. 4957, formerly owned by Barbara Kinney. No bids were received for the purchase of this building.

"Building No. 4958, formerly owned by Gladys V. Holloway. 9 bids were received for the purchase of this building, the high one being that of Wilbert Bilyeu, Albany, at \$75.46. The next high bid was submitted by C. E. Vols, Albany, at \$75.00. The Commission considers the bid of Wilbert Bilyeu satisfactory and accordingly has sold the building to him for \$75.46.

"Building No. 4972, formerly owned by S. J. Brown. V. L. Vols, Albany, submitted the high bid for this building at \$61.00. Mr. and Mrs. H. D. Rohde, Albany, submitted the next high bid at \$51.00. There were 2 other bidders. The Commission has sold the building to V. L. Vols at his bid price of \$61.00.

"Building No. 5162, formerly owned by Nancy Gray. The high bid for this building was submitted by C. E. Vols, Albany, at \$80.00. The next high bid was submitted by Chas. Childs, Albany, at \$77.00. There were 2 other bidders. The Commission considers the offer of C. E. Vols satisfactory and has sold the building to him for \$80.00."

The Attorney was authorized by the Commission to dispose of the other buildings at private sale if he can secure a satisfactory offer.

The Commission adjourned at 5:00 o'clock p. m. and reconvened at 7:00 o'clock p. m. in the dining room of the Benson Hotel for a conference with the Advisory Board on Publicity Matters. All members of the Commission were present at this conference. Also present were the State Highway Engineer, the Attorney, the Secretary, and the Director of the Travel and Information Department, Mr. Harold B. Say. Members of the Advisory Committee present were: Messrs. Frank Jenkins, Acting Chairman; John Laing, Hugh Ball, R. R. Cronise, Merle Chessman, Ed. W. Miller, Charles Reynolds, Robert W. Ruhl, and Donald Sterling.

Matters pertaining to the Travel and Information Department were discussed briefly, particularly the travel budget for the year 1939. Mr. Jenkins advised that the committee, in its deliberations this date, decided to recommend to the State Highway Commission increasing the budget to \$120,000 for the year 1939, it being the opinion of the committee that the San Francisco World's Fair, which is to take place in 1939, presents an unusual opportunity for advertising the State of Oregon. It is planned, he said, to spend the extra amount for publicity outside of the State of Oregon in an endeavor to reach people before they definitely decide their vacation itinerary, so as to make certain that they will consider visiting Oregon either enroute to or from the San Francisco Fair. He advised that the committee does not want the State Highway Commission to feel that by approving an increase in its travel budget for 1939 it would be establishing a precedent for future increases, because that is not what the committee has in mind, the idea being simply to take advantage of what the committee considers

an unusual opportunity at this time to attract people to this state, and it would not be a permanent proposition. He advised that the committee would present its recommendations in writing on the following day.

Chairman Cabell thanked the committee for the service that it has rendered and advised that it has been of inestimable value to the Commission in its work.

There followed a general discussion of miscellaneous matters, among which were the following: (1) Appointment of a special committee as heretofore recommended by the Advisory Committee, to make a study of Oregon conditions tending to affect tourist traffic. Mr. Jenkins said that the Advisory Committee wishes to urge upon the Commission the importance of this matter. Chairman Cabell advised that the Highway Commission expects to act on this recommendation in the near future. (2) Use of colored motion pictures prepared by Miss Kathryn Gunnell, Salem, at the San Francisco World's Fair. Motion was made by Mr. Chessman that Miss Gunnell's films be not used and that her offer be tabled without action. The motion was seconded by Mr. Ball and, after considerable discussion, carried by the unanimous vote of the committee members present. Mr. Say was instructed to inform Miss Gunnell of the action taken.

After further discussion of a general nature, the meeting was adjourned at 9:00 o'clock p. m. with the understanding that the members of the committee would present their written recommendations to the Commission in person on the following morning in the auditorium of the Public Service Building.

Portland, Oregon, November 18, 1938

The State Highway Commission met in regular session at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

NOV 17 1938

NOV 18 1938

Bids as follows for highway construction projects were opened and read in conformance with previously published notice:

NEHALEM SECONDARY HIGHWAY
OLNEY-JEWELL SECTION - CRUSHED ROCK IN STOCK PILES

D. L. Ashton	\$ 10,272.00
R. O. Dail and Warren Bros.	11,995.00
A. S. Wallace	12,275.00
Saxton, Looney & Risley	12,900.00
Dolan Construction Company	14,730.00
Tidepoint Company	17,520.00

OCHOCO HIGHWAY
OCHOCO DAM-MARKS CREEK SECTION
GRADING, TRESTLE BRIDGES, SURFACING AND OILING, CRUSHED ROCK

McNutt Bros.	\$171,865.30
Leonard & Slate	178,452.50
Babler Bros.	179,673.00
Edwin C. Gerber	180,201.00
Mountain States Construction Company	195,853.50
Joplin & Eldon	198,773.00
Clifford A. Dunn	204,558.00
A. C. Greenwood, Inc.	206,290.00
Roy L. Houck	208,138.70
E. C. Hall Company	212,871.92
Harzer G. Johnson	235,378.00

CENTRAL OREGON HIGHWAY
ROADSIDE OASIS AT BROTHERS

D. L. Ashton	\$ 6,211.65
W. H. Philpott	6,569.00

PACIFIC HIGHWAY
UMPQUA RIVER BRIDGE SECTION - BRIDGE AND ROADWAY APPROACHES

C. J. Montag & Sons	\$119,000.00
Mountain States Construction Company	119,391.00
Theo. Arens	120,853.00
Leonard & Slate	125,505.00

WILLIAMS AND MEDFORD-PROVOLT SECONDARY HIGHWAYS
POWERS RANCH-JACKSONVILLE SECTION
CRUSHED GRAVEL IN STOCK PILES

R. I. Stuart & Sons	\$ 11,195.00
A. S. Wallace	11,233.00
D. L. Ashton	12,226.00
Saxton, Looney & Risley	14,925.00

WARM SPRINGS SECONDARY HIGHWAY
VANORA-MADRAS SECTION - SURFACING AND OILING

J. C. Compton	\$ 75,879.00
McNutt Bros.	78,423.00
O. C. Yocom	83,246.00
Saxton, Looney & Risley	85,633.20
A. Milne	85,782.00
Fisher Bros.	86,204.00
Norris Bros.	89,443.00
Mountain States Construction Company	91,497.00
Babler Bros.	93,835.00
A. C. Greenwood, Inc.	93,931.00
Newport Construction Company and Kern & Kibbe	96,075.20
Joplin & Eldon	96,825.00
E. C. Hall Company	97,999.20
Harold Blake	102,312.75
Homer G. Johnson	103,584.00
R. O. Dail and Warren Bros., Inc.	112,739.00

JOHN DAY HIGHWAY
JAMIESON-LANCASTER SECTION
GRADING, SURFACING AND OILING, TIMBER BRIDGES, CRUSHED GRAVEL

Leonard & Slate	\$ 66,179.00
Triangle Construction Company	73,596.00
E. L. Gates	74,036.00
J. A. Terteling & Sons	75,413.00
Homer G. Johnson	77,400.50
McNutt Bros.	82,179.50

EAST CITY LIMITS OF SALEM
FRAME BUILDING FOR CAR STORAGE

Carl Bahlburg	\$ 2,242.00
Robert L. Forster	2,391.70
Erwin E. Batterman	2,426.00
Contracting & Sales Company, Inc.	2,490.00
Frank Watt Construction Company	2,636.00

COLUMBIA RIVER HIGHWAY
CORBETT STATION-ROOSTER ROCK SECTION
CLEARING, GRADING, ROCK TOE EMBANKMENT

Colonial Construction Company	\$129,430.00
Leonard & Slate	133,460.00
Harold Blake	139,520.00
E. L. Gates	143,045.00
Berke Bros., Inc.	144,485.00
Kuckenberg Construction Company	148,570.00

(Continued)

NOV 18 1938

(Corbett Station-Rooster Rock Section, continued)

Oregon Contracting Company	\$151,295.00
K. L. Coulter	151,848.50
J. A. Lyons	163,405.00
A. C. Greenwood, Inc.	168,855.00
Parker-Schram Company	177,655.00
Joplin & Eldon	178,145.00
Kern & Kibbe	180,092.50
McNutt Bros.	180,781.00
Birkemeier & Sarsenal	184,176.00
J. C. Papin	187,800.00
Hauser Construction Company	197,860.00
Homer G. Johnson	216,565.00

SHERMAN HIGHWAY

MORO-WASCO COUNTY LINE SECTION - CRUSHED ROCK IN STOCK PILES

H. L. Rice	\$ 13,833.00
Rogers Construction Company	13,833.00
Clifton & Applegate	14,703.00
Fisher Bros.	14,790.00

\$ 21,587.50
23,697.00
24,350.00

Chairman Cabell announced that the award of contracts would be made at 3:30 o'clock p. m. in the same room.

The Commission discussed the matter of acquiring a portion of the right of way that is needed for the proposed traffic separation structure on the Pacific Highway at the intersection of Denver Avenue and Union Avenue, Portland, so as to allow Mr. Dewey D. Gault, who owns a boat moorage a short distance east of the highway at this location, access to his property. It appears that Mr. Gault formerly had access to his property via the Swift Secondary Highway, crossing under the end of the Interstate Bridge, but such access is no longer available to him because the short section of the Swift Secondary Highway which was abandoned when a new approach to the Pacific Highway was completed has been allowed by Multnomah County to revert to the adjacent property owner, Mr. Joel J. Westerlund, who is making use of the property in connection with his boat-building business, and as a result Mr. Gault's patrons are being greatly inconvenienced and he is losing considerable business thereby. Because of these conditions, Mr. Gault is extremely anxious to improve his roadway facilities and would like to secure permission from the Commission to construct an approach road to the highway directly from his premises on the east side thereof.

This matter was discussed by the Commission at a previous meeting, at which time the Commission instructed the Attorney to look into the matter of acquiring a portion of the right of way needed for the grade separation project with a view in mind that it might be possible to solve Mr. Gault's problem without bringing the traffic from his private road directly onto the highway area where it would cause an undue traffic hazard in view of the large volume of traffic on the Pacific Highway at this place.

The Attorney rendered a tentative report on the right of way situation, which included a proposition for an exchange of properties on the east side of the highway, involving an expenditure of about \$3,500 of state funds, and a report on the situation mentioned above with respect to the status of the roadway that is now being used by Mr. Gault through the Westerlund holdings. The question arose whether or not it would be possible to construct a portion of the grade separation project, particularly that part which would provide a new connection of Swift Secondary Highway with the Pacific Highway, passing under the Pacific Highway near the end of the Interstate Bridge.

The Engineer advised that such project would cost approximately \$60,000 to construct and in addition thereto it would be necessary to acquire right of way, which probably could not be purchased for less than \$25,000. He gave as his thought, in view of the amounts involved, that it would be better and cheaper to assist Mr. Gault in securing the right of way through the Westerlund property, which would give him the same access to his property

NOV 18 1938

that he previously enjoyed and would avoid a private-road entrance to the highway where there would be danger of accidents.

Mr. Gault was called into conference at this time and was informed by Chairman Cabell that the Commission is having difficulty in solving his problem. He advised that the Commission is of the firm belief that the construction of a private roadway approach to the highway at the point desired by Mr. Gault would cause a very serious traffic hazard, and, accordingly, the Commission would have to oppose him if he proceeded with his plans for the same. He further advised that the Commission has discussed the matter of constructing a portion of the grade separation structure but it is an expensive project and the Commission does not feel justified in going to that expense at this time, particularly in view of the fact that the Commission has not adopted any definite plan as yet for the grade separation improvement. He inquired as to whether or not it would be possible for Mr. Gault to force a way through the Westerlund property. Mr. Gault replied that he did not think that would be possible at reasonable expense. The Commission expressed a desire for definite information with respect to the cost of the right of way for the partial highway improvement, and accordingly, after further discussion instructed the Attorney to secure options for such right of way across the properties of Mr. Gault, Leonard F. Willmot, and Joel J. Westerlund. The Engineer was instructed by the Commission to furnish the Attorney with descriptions of the several parcels, that through the Westerlund property to be of the narrowest width possible that will accommodate traffic going to and from the Gault boat moorage.

The following members of the Advisory Committee on Publicity Matters appeared before the Commission at this time: Messrs. Frank Jenkins, Merle Chessman, John Laing, and R. R. Cronise. Mr. Jenkins read aloud and presented to the Commission the committee's recommendations adopted at its meeting on the previous day, with respect to the budget and activities of the Travel and Information Department for the year 1939. He pointed out particularly that the Advisory Committee is recommending to the Commission a budget of \$120,000 for the Travel and Information Department for the year 1939, being \$20,000 more than the amount set up in the budget for 1938, and explained that the committee feels that the increase in the amount is justified in view of the unusual opportunity that will be available next year by reason of the San Francisco World's Fair, to attract tourists to the State of Oregon. He further stated that it is not the idea of the Advisory Committee that the increase be a permanent proposition, neither does the committee feel that the approval of the increased amount for 1939 will constitute a precedent upon which to base future increases. After discussion the Commission accepted and approved the recommendations of the Advisory Committee by unanimous vote, including the recommendation for increase in the budget for 1939, with the understanding that the budget for 1940 will be reduced to \$80,000, if necessary, and in any event will not exceed \$100,000. Mr. Jenkins also presented the following resolution adopted by the Advisory Committee, urging upon the Highway Commission the importance of appointing a special committee to make a study of Oregon conditions tending to affect tourist travel:

WHEREAS at a meeting of the Advisory Committee of the Travel and Information Department of the Oregon State Highway Commission held on November 29, 1937 a resolution was adopted as follows:

"That it is the opinion of the Advisory Committee that a necessary concomitant of a successful advertising undertaking is a study of the thing that is advertised for the purpose of bringing about such improvement as may tend to larger sales, and therefore the committee recommends to the Highway Commission the appointment of a committee to make a study of Oregon conditions tending to affect tourist travel, said committee to make recommendations for changes and betterments that will lead to a more efficient meeting of modern tourist advertising competition and tend to enlarge tourist business in the state," and

WHEREAS the Highway Commission has taken no action on this recommendation of the Advisory Committee:

NOW THEREFORE BE IT RESOLVED that the Committee urge again upon the Highway Commission the importance of having the study made as recommended in 1937.

In renewing this recommendation the Advisory Committee calls attention to the fact that many other states are advertising for tourist business in the same manner that Oregon is advertising, that so far as highway conditions are concerned there is little to choose between the states so advertising, and that said states offer varieties of scenic attraction and tourist resource as interesting in their way as are those of Oregon. This being so the Committee urges the proposition that if Oregon wishes to differentiate itself from the other states it can best do so by making the recommended study and thereafter carrying out suggestions made in the study report.

The Commission adjourned at 12:15 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The Commission had under consideration the tabulation of bids received at the morning session for highway construction projects and decided to award the contract in each instance to the low bidder except as follows:

In the case of the bids received for the Powers Ranch-Jacksonville Section of the Williams and Medford-Provolt Secondary Highways, the Commission referred the bids to the Engineer to award the contract to the low bidder when such bidder signs the noncollusion affidavit as required by the P.W.A. authorities. In the event the low bidder refuses to sign such affidavit the Engineer is then authorized to award the contract to the second low bidder.

NOV 18 1938

In the case of bids received for the Corbett Station-Rooster Rock Section of the Columbia River Highway, the Commission referred the bids to the Engineer to award the contract to the low bidder when certain conditions relative to right of way have been satisfied.

With respect to the bids received for the Moro-Wasco County Line Section of the Sherman Highway, there were two contractors who submitted identical low bids. The Commission decided to select the successful bidder by lot when public announcement is made of the award of the contracts at 3:30 o'clock p. m.

The following resolutions with respect to the award of the contracts for the P.W.A. projects were adopted by the Commission by unanimous vote upon motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle:

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE OLNEY-JEWELL SECTION OF THE NEHALEM SECONDARY HIGHWAY IN CLATSOP COUNTY
DOCKET NUMBER OREGON 1372-F, UNIT C

WHEREAS, bids received for the construction of the Olney-Jewell Section of the Nehalem Secondary Highway in Clatsop County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by D. L. Ashton, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Olney-Jewell Section of the Nehalem Secondary Highway in Clatsop County be and the same is hereby awarded to D. L. Ashton, contractor, in the amount of Ten Thousand Two Hundred Seventy-two Dollars (\$10272.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE UMPQUA RIVER BRIDGE SECTION OF THE PACIFIC HIGHWAY IN DOUGLAS COUNTY
DOCKET NUMBER OREGON 1298-F

WHEREAS, bids received for the construction of the Umpqua River Bridge Section of the Pacific Highway in Douglas County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by C. J. Montag & Sons,

contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Umpqua River Bridge Section of the Pacific Highway in Douglas County be and the same is hereby awarded to C. J. Montag & Sons, contractor, in the amount of One Hundred Nineteen Thousand Dollars (\$119,000.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE POWERS RANCH-JACKSONVILLE SECTION OF THE WILLIAMS AND MEDFORD-PROVOLT SECONDARY HIGHWAYS IN JACKSON AND JOSEPHINE COUNTIES
DOCKET NUMBER OREGON 1348-F

WHEREAS, bids received for the construction of the Powers Ranch-Jacksonville Section of the Williams and Medford-Provolt Secondary Highways in Jackson and Josephine Counties have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by R. I. Stuart & Sons, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Powers Ranch-Jacksonville Section of the Williams and Medford-Provolt Secondary Highways in Jackson and Josephine Counties be and the same is hereby awarded to R. I. Stuart & Sons, contractor, provided R. I. Stuart & Sons execute and file with the Oregon State Highway Commission the form of non-collusion affidavit required by the contract, in the amount of Eleven Thousand One Hundred Ninety-five Dollars (\$11,195.00), and in the event R. I. Stuart & Sons refuse to execute this form of non-collusion affidavit, the contract be awarded to the second low bidder, A. S. Wallace, contractor, in the amount of Eleven Thousand Two Hundred Thirty-three Dollars (\$11,233.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

NOV 18 1938

**A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE VANORA-MADRAS SECTION OF THE WARM SPRINGS SECONDARY HIGHWAY IN JEFFERSON COUNTY
DOCKET NUMBER OREGON 1287-F**

WHEREAS, bids received for the construction of the Vanora-Madras Section of the Warm Springs Secondary Highway in Jefferson County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by J. C. Compton, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Vanora-Madras Section of the Warm Springs Secondary Highway in Jefferson County be and the same is hereby awarded to J. C. Compton, contractor, in the amount of Seventy-five Thousand Eight Hundred Seventy-nine Dollars (\$75879.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

County Judge George A. Potter and County Commissioners A. A. Dunlap and David Reid of Sherman County were present and asked for an allocation of funds for the surfacing of the Erskinville Road which extends westerly from the Sherman Highway, near Moro. They asked for the improvement as a federal aid secondary highway project and inquired whether or not it would be possible to reallocate to this project the \$10,000 that the Commission has budgeted for the Moro-Hay Canyon County Road easterly from Moro. They also asked for the improvement of the Cottonwood Grade Section of the Wasco-Heppner Secondary Highway westerly from the John Day River crossing. The matter was referred by the Commission to the Engineer for investigation and report.

The County Court also asked for the oiling of the unciled portion of the Sherman Highway, which is about 9 miles in length and extends north-easterly from the junction with The Dalles-California Highway, in Wasco County. The Commission agreed to give this project due consideration in arranging future construction programs.

Messrs. W. A. Lovelace and Wm. Burdick, Reedsport, came before the Commission in regard to the improvement of the Umpqua Highway, in Reedsport. They particularly requested the improvement of this highway through the main part of their town. Chairman Cabell advised that the Commission has this project in mind for consideration in the formulation of programs for future highway work but is not in a position at the present time to make any definite commitment in regard thereto.

Mr. Lovelace then advised that their City Planning Board is now

making plans for improvement of the city streets in Reedsport and in connection therewith would like very much to have the assistance of engineers of the State Highway Department, if that can be arranged. Chairman Cabell advised that the Highway Commission would be pleased to render what assistance it can in this matter, provided the city improvements will fit in with the highway improvements, and would send an engineer to Reedsport in the near future to consult with them. He suggested that the City of Reedsport could obtain valuable assistance from the State Planning Board in the formulation of its plans, and referred them to City Commissioner Ormond R. Bean, of Portland, who is a member of this board.

At 3:30 o'clock p. m. Chairman Cabell announced the following awards of contracts for which bids were taken at the morning session, the awards having been previously approved unanimously by the Commission and by the P.W.A. authorities with respect to the P.W.A. projects:

"Olney-Jewell Section of the Nehalem Secondary Highway, in Clatsop County. Furnish 6,000 cubic yards crushed rock in stock piles. D. L. Ashton, Lebanon, submitted the low bid for this project at \$10,272.00. R. O. Dail and Warren Bros., Inc., Portland, submitted the next low bid at \$11,995.00. There were 4 higher bidders. The Commission has awarded the contract to D. L. Ashton, the low bidder, at his bid price of \$10,272.00.

"Ochoco Dam-Marks Creek Section of the Ochoco Highway, in Crook County. 7.68 miles grading; 132 lin. ft. composite trestle bridges; 10.0 miles surfacing and oiling; also furnish 4,400 cubic yards crushed rock in stock piles. 11 bids were received for this project, the low one being that of McNutt Bros., Eugene, at \$171,865.30. The next low bid was submitted by Leonard & Slate, Multnomah, at \$178,452.50. The Commission has awarded the contract to the low bidders, McNutt Bros., at their bid of \$171,865.30.

"Roadside Oasis at Brothers, on the Central Oregon Highway, in Deschutes County. Construction of pump house; furnish pump and gas engine; install pipe line irrigation system; construct 98 rods of woven wire fence; and plant 500 trees and shrubs. D. L. Ashton, Lebanon, submitted the low bid for this project at \$6,211.65. The only other bid submitted was that of W. H. Philpott, Portland, at \$6,569. The Commission has awarded the contract to the low bidder, D. L. Ashton, at his bid of \$6,211.65.

"Umpqua River Bridge Section of the Pacific Highway, in Douglas County. Construction of bridge and roadway approaches. 4 bids were received for this project, the low one being that of C. J. Montag & Sons, Portland, at \$119,000.00. The next low bid was that of Mountain States Construction Company, Eugene, at \$119,391.00. The Commission has awarded the contract to C. J. Montag & Sons, the low bidders, at their bid price of \$119,000.00.

"Powers Ranch-Jacksonville Section of the Williams and Medford-Provolt Secondary Highways, in Jackson and Josephine Counties. Furnish 7,700 cubic yards crushed gravel in stock piles. The low bid for this project was submitted by R. I. Stuart & Sons, Medford, at \$11,195.00. The next low bid was submitted by A. S. Wallace, Roseburg, at \$11,233.00. There were 2 higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, R. I. Stuart & Sons, if and when this contractor signs the noncollusion affidavit required by the P.W.A. The Engineer is authorized to award the contract to the second low bidder, A. S. Wallace, in the event R. I. Stuart & Sons refuse to sign the affidavit.

"Vanora-Madras Section of the Warm Springs Secondary Highway, in Jefferson County. 9.37 miles surfacing and oiling. J. C. Compton, McMinnville, submitted the low bid for this project at \$75,879.00. McNutt Bros., Eugene, submitted the next low bid at \$78,423.00. There were 14 higher bidders. The Commission has awarded the contract to the low bidder, J. C. Compton at his bid price of \$75,879.00.

"Jamieson-Lancaster Section of the John Day Highway, in Malheur County. 7.04 miles grading, surfacing, and oiling; construction of two 15-ft. timber bridges; and furnish 2,700 cubic yards crushed gravel in stock piles. 6 bids were submitted for this project, the low one being that of Leonard & Slate, Multnomah, at \$66,179.00. The next low bid was submitted by Triangle Construction Company, Boise, Idaho, at \$73,596.00. The Commission has awarded the contract to the low bidders, Leonard & Slate, at their bid of \$66,179.00.

"Construction of frame building for car storage on property of the Oregon State Highway Commission at the east city limits of Salem, Marion County. Carl Bahlburg, Salem, submitted the low bid at \$2,242.00. Robert L. Forster, Salem, submitted the next low bid at \$2,391.70. There were 3 higher bidders. The Commission has awarded the contract to Carl Bahlburg, the low bidder, at his bid of \$2,242.00.

"Corbett Station-Rooster Rock Section of the Columbia River Highway, in Multnomah County. 2.26 miles clearing; 0.37 mile grading; and 1.15 miles rock toe embankment. The low bid for this project was submitted by Colonial Construction Company, Spokane, Washington, at \$129,430.00. The next low bid was submitted by Leonard & Slate, Multnomah, at \$133,460.00. There were 16 higher bidders. The Commission has referred the bids to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Pendleton State Farm Section of the Oregon-Washington Highway, in Umatilla County. 7.43 miles grading and 0.57 mile oiling. M. L. O'Neil & Son, Eugene, submitted the low bid for this project at \$74,901.00. Roy L. Houck, Salem, submitted the next low bid at

\$75,440.10. There were 13 higher bidders. The Commission has awarded the contract to M. L. O'Neil & Son, the low bidder, at their bid of \$74,901.00.

"Sheridan-Polk County Line Section of the Sheridan-Lincoln County Road, in Yamhill County. 2.90 miles grading, surfacing and oiling. 5 bids were received for this project, the low one being that of O.C. Yocom, Willamina, at \$18,887.00. The next low bid was submitted by Mountain States Construction Company, Eugene, at \$19,401.50. The Commission has awarded the contract to O. C. Yocom, the low bidder, at his bid of \$18,887.00.

"Moro-Wasco County Line Section of the Sherman Highway, in Sherman County. Furnish 8,700 cubic yards crushed rock in stock piles. 8 bids were received for this project. Identical low bids of \$13,833.00 were submitted by H. L. Rice, Portland, and Rogers Construction Company, Dayton, Washington. The next low bid was submitted by Clifton & Applegate, Spokane, Washington, at \$14,703.00. The low bids are satisfactory to the Commission, which will decide the successful bidder by lot." (Contractors H. L. Rice and Mr. Rogers of the Rogers Construction Company were called to the platform to witness the drawing, which resulted in the contract being awarded to Rogers Construction Company.)

The following resolution with respect to the award of this contract was adopted by the Commission by unanimous vote:

**A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE MORO-WASCO COUNTY LINE SECTION OF THE SHERMAN HIGHWAY IN SHERMAN COUNTY
DOCKET NUMBER OREGON 1349-F**

WHEREAS, bids received for the construction of the Moro-Wasco County Line Section of the Sherman Highway in Sherman County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Rogers Construction Company, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW, THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Moro-Wasco County Line Section of the Sherman Highway in Sherman County be and the same is hereby awarded to Rogers Construction Company, contractor, in the amount of Thirteen Thousand Eight Hundred Thirty-three Dollars (\$13833.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

NOV 18 1938

The Attorney reported that the officers of the Security and Investment Company of Oregon City have indicated a willingness to settle with the state for right of way for the East Portland-Oregon City Highway in Oregon City on the basis of the appraisal made by appraisers employed by the State Highway Commission, which is \$14,000 for the land, \$8,000 for the street ends, and \$12,000 for moorage rights, and will permit the state to withhold the payment for the street ends until such time as the case involving such areas has been settled by the Supreme Court. The Commission refused to settle with the company on such basis.

The Attorney also rendered a report on the status of the negotiations for right of way at Tigard. He said that the right of way agent assigned to this project has recovered from his recent illness and has resumed the negotiations, and it is believed that he will be able to make a full report on the subject at the Commission's next regular meeting. The Secretary was instructed to convey this information to Mrs. Mary H. Clarke, Portland, who is particularly interested from the property owners' standpoint.

Reconsideration was given by the Commission to the claim of Ida B. Hadley, who alleges that her property adjacent to the Pacific Highway West, near Newberg, was damaged by reason of the improvement of this highway, the change making it impossible for her to conduct a fruit-stand business on her property next to the highway as she did before the highway was rebuilt. The Commission decided that Mrs. Hadley was dealt with fairly when extra right of way was acquired from her for this improvement and that she has been given as fair and equitable treatment as other property owners from whom right of way was purchased. The Commission considered that the donating of the extra right of way by Mrs. Hadley and the other property owners was an important consideration in the selection of a route for this improvement and the construction of the project. Furthermore, it is contrary to the established policy of the Commission to reopen right of way cases when they have once been settled, and it was thought that the reopening of this case might set a precedent that would result in the submission of similar claims by other property owners along this highway, hence the claim was denied. The Engineer was instructed to advise Mrs. Hadley of the action taken.

The Commission had under consideration a resolution from the County Court of Benton County requesting that the Corvallis-Eastside Secondary State Highway No. 210 be extended westerly from its present terminus at the east end of the Willamette River Bridge at Corvallis to a connection with the Albany-Corvallis Primary State Highway in Corvallis, a distance of about 950 feet. After considerable discussion the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary State highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the County Court of Benton County, has selected the route hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said route as a section of highway to constitute, together with other highways which have heretofore been added and which may hereafter from time to time be added, a part of the system of secondary state highways of Benton County, under the provisions of said Acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

That the following named section of city street in the City of Corvallis in Benton County be and the said route is hereby selected, designated, established, adopted and approved as a secondary State highway and shall be and is hereby designated as a part of the secondary State highway system, to wit:

A Section of the Albany-Corvallis Secondary Highway
No. 210:

Beginning at the intersection of 3rd Street and Van Buren Street in the City of Corvallis; thence in a southeasterly direction to the east city limits of Corvallis, a distance of approximately 950 feet.

That said route shall be, and is hereby qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931, and Chapter 196, Oregon Laws 1935, and amendments thereof;

That the Engineer be, and he hereby is authorized to make proper surveys with respect to the physical location upon the ground of the said route and properly file in the records of the Commission all of said data;

That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Benton County.

The Engineer was thereupon authorized by the Commission to make repairs to the bridge structure as may be necessary to make it safe for traffic.

Commissioner Aldrich offered and moved the adoption of the following resolution abandoning a short section of the Century Drive Secondary Highway (old route) near Bend, in Deschutes County, which is no longer of value for state highway purposes in view of the fact that the highway has been reconstructed on other alignment. After discussion the motion was duly seconded by Commissioner Tou Velle and was declared by Chairman Cabell to have passed by the unanimous vote of the Commission:

NOV 18 1938

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Bend Section of the Century Drive Highway in Deschutes County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said secondary state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Bend Section of the Century Drive Highway in Deschutes County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said secondary highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Deschutes County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Century Drive Highway, and lying on the westerly side of the right of way required for the reconstructed Century Drive lying south of and adjoining the City of Bend, Oregon, the beginning and ending points with reference to engineer's stations of the reconstructed highway being 40+05 on the northerly end and 63+00 on the southerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of W. E. Chandler, Division

Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and is dated November 17, 1938, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red. *

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Deschutes County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Deschutes County and beyond any responsibility or supervision by the State Highway Commission.

A letter was presented from Mr. George W. Mead, Attorney, Portland, transmitting a petition signed by 32 owners of property in the vicinity of Interstate and Webster Streets, Portland, objecting to the closing of the Webster Street intersection by the parkway on the Interstate Avenue project recently constructed, and requesting an opportunity for the property owners to be heard on this subject. The Commission expressed regrets that it is too late to hear the property owners at this session, the petition having been received too late to be considered. The Secretary was instructed to inform Mr. Mead of the circumstances and to advise him that the Commission will be pleased to hear the delegation at its next meeting if they wish to be present at that time.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Oregon-Washington Railroad and Navigation Company and the Union Pacific Railroad Company relative to the securing of right of way for the Columbia River Highway (new route) between Troutdale and Warrendale, in Multnomah County.

Map filed in Right of Way Abandonment and Retention File - No. 60

NOV 18 1938

Agreement with the Pacific Power and Light Company continuing in effect an agreement dated July 31, 1923, relative to the attachment of the pole line of the company on the Lewis and Clark River Bridge on the Oregon Coast Highway near Astoria, and the furnishing of power for the operation and lighting of such structure.

Agreement with the City of Klamath Falls relative to the maintenance of the proposed grade separation project on Main Street and East Main Street in Klamath Falls.

Agreement with Wayne W. Watson and Pearl T. Watson, husband and wife, relative to the construction of a bulkhead on the Coos Bay-Roseburg Highway, in Coos County, in front of the property of the Watsons.

Agreement with Yamhill County Court relative to the maintenance of the Sheridan-Polk County Line Section of the Sheridan-Ballston County Road after construction of the same by the state as a Federal Aid Secondary Highway Project.

Agreement with Clackamas County providing for the payment of \$500 to the county as the state's share of the cost of disposing of the claim of John F. Putnam, et al, arising out of the construction of the East Portland-Oregon City Highway across the premises of said parties.

Agreement with the Idaho Power Company relative to the furnishing of electrical energy for lighting the underpass in Ontario.

Letter directed to the United States Bureau of Public Roads, Portland, Oregon, correcting the description of Federal Aid Highway No. 39 which is without a direct connection with Federal Aid Highway No. 1 since the adoption of a new route for a portion of Federal Aid Highway No. 1

Bargain and sale deed conveying unto the Oregon-Washington Railroad and Navigation Company a strip of land of variable width containing 0.85 acre, situate in Government Lot 2, Section 33, T. 3 N., R. 8 E., W. M., Hood River County, being right of way transaction No. 6295.

Bargain and sale deed conveying unto the Southern Pacific Company for the sum of \$2,722.54 two parcels of land lying in Lots 1 to 8, inclusive, of Block 17, and in Lots 1, 2, 3, and 4 of Block 29, respectively, Hackleman's Second Addition to Albany.

Quitclaim deed conveying unto S. B. Chandler and Hattie Chandler 6.61 acres of land situate in the N.W. $\frac{1}{4}$ of Section 6, T. 37 S., R. 21 E., W. M., and in the S.W. $\frac{1}{4}$ of Section 31, T. 36 S., R. 21 E., W.M., Lake County, being right of way transaction No. 6107.

Easement conveying unto the Southern Pacific Company the right to construct, operate, and maintain a railroad wye track and appurtenances on certain state-owned property in Albany, containing 848 sq. ft., in Lot 8, Block 38, Hackleman's Second Addition to Albany.

There being no further business to come before the Commission at this time, the meeting was adjourned at 4:30 o'clock p. m.

TABLE OF CONTENTS

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1938	
8532	Dec. 19	Bids received on following projects: Grant County Line-Unity Section, surfacing and oiling; Coquille Section, crushed gravel or rock; Polallie Creek-Hood River Section, crushed rock;
8533		South Unit of Bear Canyon-State Line Section, grading and culvert construction; Crescent-Beaver Marsh Section, crushed rock; Devil's Garden-Quarts Mountain Section, grading, surfacing, oiling and crushed rock; Horse Ranch-Chewaucan Narrows Section, crushed gravel; Rough Creek-Belknap Springs Section, crushed rock.
8534		Yamhill County. Bellevue-Hopewell Secondary Highway. Installation of drainage pipe between Amity and Hopewell requested. Douglas County. North Umpqua Highway. Reconstruction of Mud Hollow Section urged in preference to road west of Dixonville. Deschutes County. Butler Market Road. Consideration to be given project in 1939 program. Central Oregon Highway. Improvement between Bend and Ontario to be considered in 1940 program.
8535		Engineer to investigate bad condition near Summit east of Buchanan where spring flows out on highway. Federal Aid funds. Judge Higgs, Harney County, inquires regarding 1940 program. Frenchglen Secondary Highway. Improvement of road with CCC forces from Malheur Lake Game Refuge suggested. Deschutes County. Cascade Lakes Forest Highway. Improvement requested from forest boundary near Bend to Elk Lake. Santiam Highway. Oiling from Suttle Lake to junction with North Santiam Highway requested. Clatsop County. Wolf Creek and Oregon Coast Hwys. Resolution accepting gift of land from Emil Lenke for wye connection.
8536		Baker County. Baker-Homestead Highway. Resolution denying everyone, except Lee A. Duncan, permission to pump water from gravel pit acquired from Mr. Duncan.
8538		Albany. Sale of buildings to Earl R. Smith and J. H. Robison approved. Buildings advertised Nov. 17; no bids received. Douglas County. Rhododendron State Park. Paul Schuttpels granted permission to maintain roadway through park. Gleneden Beach. James and Katherine Sansbury request advance of cost of right of way for relocation of Oregon Coast Hwy. Portland. City overrules state's objection to pay street assessment on state property adjacent to McLoughlin Blvd.
8539		Clatsop County. Fort Stevens Road. Engineer's report on cost of improvement. Forest highway funds. Tentative projects for 1940 program.
8540		Timberline Road. Allocation of \$100,000 of forest highway funds on condition road is placed on Forest Highway System. Portland. Improvement of Front Street as an arterial highway urged by Metropolitan Association.

Final payment to Sunset Logging Company for construction of logging railroad over highway approved. Payment of claim of Oregon American Lumber Corporation for trees taken from company's property approved.
8700		Amity-Hopewell Secondary Highway. Claim of S. E. Howard for damage to his property to be settled on cash basis. Easement to carry water through Mr. Howard's property to be secured. Benton County. Oiling of road from Corvallis-Newport Highway to Corvallis Golf Club requested by County Court.
8701		Little Nestucca Secondary Highway. Construction of three temporary bridges and rough grading and surfacing to be done this year. Additional grading and surfacing to be done next year. Wilson River Highway. State to join with contractor Charles H. Leonard in appealing case to Supreme Court regarding extra compensation to be paid laborers Pacific Highway West. Claim of Mrs. Ida B. Hadley for damage to her property reconsidered.
8702		World's Fair. Revised budget for expenditure of \$ 40,000 approved. Travel and Information Department. Action deferred on increasing membership of Advisory Board and appointing committee to study conditions affecting tourist travel. Marion County. Construction of connecting road between Scotts Mills County Road and North Santiam Highway, at Gates, requested.
8703		Wage scales. Portland Chapter of Associated General Contractors suggest modification of specifications for highway construction work pertaining to wage scales.
	Mar. 3	Timberline Lodge Road. Delegation requests Commission to keep east leg of highway open during Ski Tournament. State agrees to furnish snow-removal equipment to Forest Service and Bureau of Public Roads. State to receive credit for loan of equipment.
8704		Right of way budget. Attorney reports on status of budget for 1939.
8705		Real property. Resolution authorizing acquisition. Halsey-Sweet Home Secondary Highway. Payment of additional compensation to Elizabeth Paden for right of way approved.

<u>Page</u>	<u>Date</u>	<u>Subject</u>
8708	1939 Mar. 3	Albany. Options for right of way to be secured for project to be financed with balance of grade separation funds in northern part of city.
8709		Lane County. Exchange of properties with Carl G. Washburne along Oregon Coast Highway near China Creek authorized. McMinnville-Tillamook Highway. Happy Hollow Section. Mr. M. A. Peterson ordered to stop fence construction and to comply with provisions of option given by late Henry J. Rost for purchase of right of way. Condemnation. Resolution authorizing condemnation on following sections;
8710		West Portland-Hubbard Highway, West Portland-Tualatin Section, A. G. and L. H. Smith; Wolf Creek Highway, Manning-Davies Section, Carrie E. McGill.
8711		Oregon Coast Highway. Nelscott. Right of way of old route of highway to revert to adjacent property owners unless needed by state. Property owners then to be paid for same. Ben Hur Lampman to receive title to right of way.
8712		Tillamook County. Acquisition of property for park purposes adjacent to Oregon Coast Highway near Tillamook-Clatsop County line considered. Condemnation. Resolution authorizing condemnation of wayside strips for park purposes as follows: Tillamook County, Charles A. Fowler property; P. J. Butler property.
8714		Arch Cape Tunnel. Timber lining approved. Pacific Highway West. Multnomah County Line-Middleton Section. Options for right of way to be secured. Oyhee Reclamation Service. Engineer to construct bridges over ditches and canals excavated across state highways. Bill for same to be sent to Reclamation Service.
8715		Malheur County. Discussion of controversy with H. M. Featherstone concerning title to stock pile site adjacent to John Day Highway.
8716		Joaquin Miller Cabin. State requested to assume maintenance. Celilo Indian Village. Clean-up of village deferred pending report from Superintendent of Umatilla Indian Reservation. Nelscott. Purchase of suggested park site adjacent to Oregon Coast Highway discussed. Preference given to purchase of timber strips along Salmon River Highway. Wolf Creek Highway. Sales agreement with Oregon-American Lumber Corporation to be prepared covering purchase of wayside strips adjacent to highway. Azalea State Park. Purchase of additional 2.89 acres authorized. Devils Elbow State Park, near Heceta Head. Negotiations for purchase of 458 acres authorized.

	1939	
8717	Mar. 3	Silver Falls State Park. Purchase of a 130-acre addition approved.
		Vista House at Crown Point. Renewal of Edward L. Dimmitt's concession privilege for period of one year without compensation approved.
		Gravel. Request of George L. Govro to take gravel from Cummings Creek on Oregon Coast Highway denied.
		Curry County. Proposed park site at Floras Lake near Port Orford. Purchase of tract deferred.
8718		Deschutes County. Timber tract at intersection of McKenzie Highway and McKenzie-Bend Highway. Louis Hill interests offer to sell tract to state. Joint cruise of tract to be made.
		Honeymen State Park. Park Superintendent to write National Park Service relative to retaining CCC camp to continue work in park.
		Pictures. Display of highway department's pictures in hotel lobbies discussed.
		Program. Basic allocation, 1940 federal program and 1939 state program.
8720		Partial program of 1940 regular federal aid projects.
8721		Surveys. List of surveys ordered since last meeting.
8723		Extensions of time, as follows: Roy L. Houck, Lamb Creek-Sheep Ridge Section; R. I. Stuart & Sons, Bandon-Port Orford Section; D. L. Ashton, Shedd-Halsey Section;
8724		Mountain States Construction Co., canal and railroad roadbed in Albany; Castelloe & Stocker, installation of traffic signal system in Eugene.
8725		Contracts completed and accepted, as follows: Lamb Creek-Sheep Ridge Section, Roy L. Houck; Bandon-Port Orford Section, R. I. Stuart & Sons; Madras-Deschutes County Line Section, Fisher Brothers; Lebanon-Foster Section, A. S. Wallace.
		Agreements, et cetera, signed as follows: Ida H. Frazier, claim disposed arising out of construction of Ontario underpass; Wauna Toll Bridge Company, highway connection from the Bridge of the Gods to the Columbia River Highway at Cascade Locks; Bureau of Public Roads, reimbursement for expense in supervising P.W.A. road projects on county roads; Maude Hastings Campbell, disposing of claim arising out of construction of Union Avenue viaduct, Portland; First National Bank of Portland and Bridal Veil Timber Company, hauling road easement across property adjacent to Upper Columbia River Highway, Multnomah County; Bridal Veil Timber Company, settlement for right of way on revised location of Columbia River Highway; O.J.R.R. & N. Company and Union Pacific Company, construction of highway crossing and encroachment at Jamieson;

Agreements, et cetera, (continued):

Klamath Falls and California-Oregon Power Company, change in power lines, poles, etc., in connection with Main Street Undercrossing Project in Klamath Falls;
Union County Court, maintenance and acquisition of right of way for North Powder River County Road;
Klamath County Court, maintenance and acquisition of right of way for Poe Valley Section of Malin-Bonanza County Road;
Portland General Electric Company, et al, form of permit releasing power company and associated pole lines from liability with respect to fixtures attached by state to poles;
Frank Cornwell, construction of tile drain leading from highway to Cornwell property adjacent to Barbur Boulevard;
Teachers Retirement Fund Association, easement for Barbur Boulevard drainage tunnel in Portland;
Lewis C. Garrigus, Jr., easement for Barbur Boulevard drainage tunnel in Portland;
Bargain and sale deed conveying land in Lane County unto A. J. McDonald and wife;
Bargain and sale deed conveying unto Wm. J. Jacobs and wife land in Irvington Addition to Portland;
Bargain and sale deed conveying unto James Moore indemnity land situate in Grant County

Date for next meeting set for April 6 and 7, 1939.

8727 Mar. 21

Minutes approved of meetings held June 13, 14, and 15; June 29 and 30; July 20 and 21; August 3 and 4; August 9; August 30; September 19; September 28 and 29; October 20; November 14 to 18, inclusive; December 19 and 20, 1938; January 13; January 25, 26 and 27, 1939.

Right of way budget. Attorney's report on budget approved.
Real property. Resolution authorizing acquisition.

8730

Condemnation. Resolution authorizing condemnation on following sections:

8731

East Portland-Oregon City Hwy., Abernethy Bridge-Main St. Sec.;
Gladys Gates McEwan and C. T. Gates;
August Olson;

Cape Arago Highway. Charleston-Cape Arago Section,
John Bastendorf Heirs.

8732

Astoria. Astor Street improvement of Oregon Coast Highway.
Commission approves arrangement with Clatsop County Court for acquisition of right of way.

Pacific Highway. Purchase of L. E. Dayton property needed for right of way for revision of highway approved. Attorney to arrange for lease of building to Mr. Dayton.

Tigard. Pacific Highway West. Attorney's report on status of securing right of way options for proposed improvement.

8733

Wasco-Heppner Secondary Highway. Heppner-Rhea Creek Section.
Bureau of Public Roads objects to alignment of improvement.
Lincoln County. Attorney to negotiate with Thomas Purdy for exchange of properties at Bob Creek on Oregon Coast Highway.

	1939	
8733	Mar. 21	Pacific Highway West. Claim of Mrs. Ida B. Hadley for damage to her property at Newberg reconsidered.
8734		Wilson River Highway. Naming of bridge over Wilson River "Reeher Bridge" in honor of Reeher family approved.
		Reedsport. Umpqua Highway. Purchase of property from Umpqua Corporation for revision of highway discussed. No action.
		Capital Reconstruction Commission. Request for relief from payment of account with Highway Commission denied.
		Bend. Setting of date for public hearing regarding rerouting of Century Drive Secondary Highway deferred.
		Equipment. Engineer authorized to purchase following:
		2 large motor patrol graders;
		6 4-yd. trucks;
		1 12-yd. carry-all;
		1 RD8 tractor, specifications to include Cletrax tractor;
8735		1 crushing plant;
		10 power graders;
		10 pull-type graders;
		1 Burroughs accounting machine for Salem shops.
		Load limit. Resolution reducing load limit on John Day Hwy.
8737		Resolution lifting reduced load limits on several sections of state highways.
8738		Award of following contract approved:
		Noyes Ranch-Cove Section, Mountain States Construction Co.
		Pacific Northwest Regional Planning Conference. Selection of representative deferred.
		Log hauling. Conference to be held to revise penalty for overloading of trucks in view of passage of House Bill No. 542.
8739		Signs. Free Methodist Church of Hillsboro requests permission to erect sign on Tualatin Valley Highway. Request denied.
		Charles H. Leonard. Appeal of case to Supreme Court regarding extra compensation for laborers on Wilson River Highway contract reconsidered.
		Dallas-Coast Highway. Request for designation as primary state highway denied.
		Bicycle paths. Letter considered and ordered filed regarding construction of such paths.
		Stripe painting. State to paint and maintain stripes in following cities on condition parallel parking is approved by cities:
		LaGrande, Adams Avenue;
8740		Junction City, 5th Street, Junction City-Eugene Highway.
		Lane County. Naming of county road connecting Pacific Highway and the Junction City-Eugene Secondary Highway "Gent Drive" referred to Lane County Court.
		Erection of signs pointing out Santa Clara and Irving on said county road requested.
		Gravel. Removal of agate-bearing gravel from Oregon beaches protested. Engineer to investigate.
		Grant County. Judge Allen inquires regarding possibility of securing 1940 federal funds to finance improvement of feeder roads.

8744	Mar. 21 1939	Jessie M. Honeyman State Park. Continuance of CCC Camp for park improvement discussed. Financial statement of park maintenance funds to be furnished National Park Service in endeavor to retain CCC camp.
		Humburg State Park. Grazing privileges to be granted to stipulated sheepowners upon payment of fee.
8745		Azalea State Park. Park Superintendent to negotiate with owner regarding purchase price of addition to park. Original purchase included 2.89 acres, tract now contains 2.5 acres.
		Tillamook County. Nehalem Bay sandspit. Acquisition of property owned by Hammond Lumber Company, now reverted to county under foreclosure proceedings, discussed. Options to be secured from county.
		Extension of time, as follows: Carl Bahlburg, car storage building at Salem shops.
8746		Contracts completed and accepted, as follows: Frame storage building at Salem, Carl Bahlburg; Gilliam County Line-Ione and Hermiston projects, Clifton and Applegate.
		Agreements, et cetera, signed as follows: Southern Pacific Company, maintenance of rock wall on railroad company's property near Comstock, Douglas County; O.W.R.R. & N. Company and Union Pacific Company, easement for reconstruction of Columbia River Highway between Troutdale and Warrendale; Preston Company, easement for roadway across state park in Tillamook County; Lease from State of Oregon to Hood River County for quarry privileges in quarry acquired from Joseph D. Smullin; Bargain and sale deed conveying unto Maud H. Campbell small parcel of land in Stephens Addition to the City of Portland.

Portland, Oregon, December 19, 1938

The State Highway Commission met in regular session at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
C. B. McCullough, Asst. State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Mr. R. H. Baldock, State Highway Engineer, was present part of the time only.

Bids as follows for highway construction projects were opened and read in conformance with previously published notice:

Homer G. Johnson	21,965.00

Chairman Cabell announced that the award of contracts would be made at 3:00 o'clock p. m. in the same room.

Messrs. S. E. Howard and Lloyd Tresham, Amity, came before the Commission in regard to a drainage problem adjacent to the secondary highway, No. 153, between Amity and Hopewell, in Yamhill County. Mr. Howard alleges that highway department maintenance crews have filled up the highway ditch in front of his property and as a result water backs up over his land, causing considerable damage. He asked the Commission to remedy the situation by re-opening a part of the ditch and by installing a drainage pipe along the remainder of the section. The Commission deferred a decision in the matter pending inspection of the premises by Chairman Cabell, Maintenance Engineer J. N. Bishop, and Division Engineer F. D. Eason. It was agreed that such inspection should be made in the near future.

A delegation from Roseburg, consisting of County Judge Huron W. Clough, A. C. Marsters, W. C. Harding, and George H. Smith, representing the Board of Trustees of the Umpqua Highway Improvement District, came before the Commission in the interests of further improvements on the North Umpqua Highway. Judge Clough headed the group. They gave as their understanding that the Commission has budgeted the amount of \$20,000 of federal aid secondary highway funds for the improvement of this road west of Dixonville toward Roseburg, and asked the Commission to reconsider the allocation and reconstruct the Mud Hollow Section instead, which section extends easterly from the improvement completed this year. They declared that the Mud Hollow Section needs improvement more than any other section between Roseburg and Glide, and, notwithstanding that it will cost about \$28,000, which is \$8,000 more than the amount that the Commission has budgeted for this road, urged it, stating their willingness to furnish right of way for the project at no cost to the state. The Commission agreed to give the matter consideration and let them know as soon as possible, so the county can proceed with the acquisition of the right of way in the event the change in projects is approved.

County Commissioner William Baer, Deschutes County, came before the Commission in the interests of the Butler Market Road which extends north-easterly from Bend to a connection with the Powell Butte Secondary Highway. He was informed by Chairman Cabell that the Commission has not yet adopted its 1939 federal aid secondary highway construction program but this project will be given due consideration for the same, as was agreed when the Commission discussed the matter with the delegation at Bend on November 14, 1938.

County Judge Nelson B. Higgs of Harney County was present and inquired as to the Commission's plans for the completion of the Central Oregon Highway from Bend to Ontario. Chairman Cabell explained that the Commission is taking bids on the following day for the oiling of a 35-mile section of

DEC 19 1938

this highway between Juntura and Cairo but it does not appear possible now to allocate additional funds for this road until a program is arranged for the fiscal year 1940 federal aid funds. When such program is discussed, he said, the Commission will consider this project along with others, but no definite commitment can be made at this time. He added that it does not appear now that contracts involving 1940 federal aid funds can be awarded until next fall due to a shortage of funds with which to match the federal moneys.

Judge Higgs then asked the Commission to investigate a bad condition on the Central Oregon Highway near the summit east of Buchanan, where a spring flows out on the highway, causing damage to the highway grade. The matter was referred by the Commission to the Engineer to remedy this situation.

Judge Higgs inquired as to the Commission's program for the 1940 federal aid secondary highway funds. He was informed by Chairman Cabell that the Commission has not yet arranged a program for such funds due to the lack of state funds to match them, it being considered by the Commission advisable to take up all of the 1939 federal aid secondary highway funds before obligating the 1940 funds.

Improvement of the Frenchglen Secondary State Highway was then discussed. Judge Higgs stated that this road is badly in need of improvement and suggested that it might be possible to secure aid from the C.C.C. Camp located at the Malheur Lake Game Refuge to do this work, as was done last year when the C.C.C. graded the roadbed and the state furnished powder, culverts, and engineering. After discussion the Commission agreed to look into the matter and instructed the Engineer to contact the C.C.C. officials relative thereto and ascertain whether or not they would be willing to undertake the improvement on such basis.

Mr. Don Peoples, Secretary of the Bend Chamber of Commerce, was present relative to the improvement of the northerly end of the Cascade Lakes Forest Highway. He urged an allocation of forest highway funds for the improvement of this road beginning at the forest boundary near Bend, and extending westerly to Elk Lake. He gave as his thought that it is only fair that the northerly end of this road be improved in the next forest highway program in view of the fact that the section between Crater Lake and Diamond Lake has been completed, and Odell Lake is now served by the Willamette Highway, which has been graded to high standard to a connection with The Dalles-California Highway. He submitted a written brief in support of his oral arguments.

Mr. Peoples also asked for the oiling of the Santiam Highway westerly from the end of the present oiled section at Suttle Lake to the junction with the North Santiam Highway. Chairman Cabell advised that the Commission has not yet arranged its 1939 program for forest highway funds but will be pleased to give due consideration to the projects mentioned when such program is discussed.

The Engineer reported that Mr. Emil Lenke, who conducts a store business at the junction of the Wolf Creek Highway with the Oregon Coast Highway, in Clatsop County, has presented to the state as a gift a small tract of

land at the intersection of these two highways that will afford a much better eye connection than exists at present. He advised that Mr. Lemke has been very cooperative in furthering the Wolf Creek Highway project and gave as his thought that the Commission should recognize such service by accepting Mr. Lemke's gift with appropriate action. The Commission concurred in the Engineer's viewpoint and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, Mr. Emil Lemke has generously donated and has conveyed to the State of Oregon for public highway purposes a tract of land in Clatsop County to be used by the Highway Commission in connection with the further improvement and maintenance of the Wolf Creek Highway; and

WHEREAS, ownership of said tract of land by the State will make possible the construction and maintenance of a highway and highway connection more serviceable, more convenient and safe for the traveling public than would be otherwise possible; and

WHEREAS, the helpful and willing cooperation given by Mr. Lemke to the State Highway Commission constitutes a worthy contribution to public welfare;

THEREFORE, BE IT RESOLVED BY THE HIGHWAY COMMISSION, all members being present and participating, that the sincere appreciation of the Commission be extended to Mr. Lemke for his helpful cooperation and his valuable gift to the general public.

Reconsideration was given by the Commission to the matter of allowing water to be pumped from a certain gravel pit acquired some time ago from Lee A. Duncan of Haines, Oregon, for use in connection with the construction of the Baker-Flagstaff Hill Section of the Baker-Homestead Highway. The Commission decided not to permit water to be pumped or taken from this gravel pit by anyone other than Mr. Duncan because of the damage that might occur to Mr. Duncan's property adjacent to the pit. The following resolution in regard thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle:

WHEREAS, the State has heretofore acquired title to the following described real property, to wit:

A parcel of land lying in the North half of the Northwest quarter of Section 10, Township 9 South, Range 40 East, W. M., Baker County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Lee A. Duncan, recorded in Book 124, Page 64 of Baker County Record of Deeds; the said parcel being described as follows:

Beginning at a point which is 30 feet distant southerly from (when measured at right angles to) the relocated

center line of the Baker-Homestead Highway at Engineer's Station 114+50.2, said point also being 2604.5 feet north and 3947.1 feet west of the quarter corner common to Sections 10 and 11, Township 9 South, Range 40 East, W. M.; thence South $89^{\circ} 47'$ West parallel to and 30 feet distant from said center line a distance of 150.2 feet to a point opposite and 30 feet distant from Engineer's center line Station 113+00; thence South $0^{\circ} 13'$ East a distance of 196.6 feet; thence South $58^{\circ} 35'$ East a distance of 262.3 feet; thence South $76^{\circ} 46' 30''$ East a distance of 374.00 feet; thence North $2^{\circ} 52' 30''$ East a distance of 126 feet; thence North $67^{\circ} 10' 30''$ West a distance of 318.7 feet; thence North $41^{\circ} 37'$ West a distance of 227.4 feet to the point of beginning; containing 2.71 acres,

and

WHEREAS, said property is being used by the State for the purpose of acquiring therefrom materials for road construction purposes, and in excavating materials from said property a hole or depression was made which fills with surface or irrigation waters which drain from the adjoining property of the grantor Lee A. Duncan; and

WHEREAS, it is the belief and contention of said grantor that if the water which accumulates in the said borrow pit or depression is pumped out and conveyed to other property than the property of the grantor that irreparable damage will be done the said grantor; and

WHEREAS, the grantor has requested that by official action the Commission go on record declaring its purpose to use said above described real property for highway purposes only and to refuse to permit water to be pumped therefrom by any person other than the said grantor;

THEREFORE, IT IS HEREBY RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That it is, and hereby is declared to be, the purpose and intention of the Highway Commission to use the above described real property for highway purpose only, and that it is hereby resolved and declared by the Commission that the Commission will not voluntarily permit water which may assemble in said gravel pit or depression to be pumped or taken therefrom by any person, firm or corporation other than the said grantor Lee A. Duncan.

2. Nothing herein, however, shall be construed to in any way prevent the Highway Commission, its officers, agents or employees from pumping water from said gravel site if and when the pumping of

such water becomes necessary in the use and enjoyment of the said real property for the taking and appropriating of gravel or road-building materials therefrom.

The Attorney reported receipt of an offer from Earl R. Smith, Albany, to purchase for the sum of \$15.00 some old buildings located on the right of way acquired from Melissa J. Kitchen in Lots 5 and 6 of Block 73, Monteith's Second Addition to Albany, and the offer of J. H. Robison to purchase for the sum of \$35.00 the building located on the right of way acquired from Barbara Kinney at 805 Lyons Street, Albany. He advised that these buildings were advertised for sale at the last meeting of the Commission but no bids were received for the same and the Commission at that time authorized him to sell the buildings at private sale if he could get a satisfactory offer. He recommended acceptance of both offers. The Commission approved the recommendation unanimously.

The Attorney also reported that some time ago the Commission granted an easement to a Mr. Paul Schuttpels to construct a roadway across Rhododendron State Park, in Douglas County, so as to permit Mr. Schuttpels to have access to his property adjacent to the park. He said that Mr. Schuttpels rebuilt his roadway, but not on the location specified in the agreement, and requested instructions as to what to do about it. After discussion the Commission ordered that Mr. Schuttpels's attention be called to the fact that he has constructed his roadway in the wrong location and that he be told that he will be allowed the use and occupancy of the same by right of sufferance only, with the understanding that the Commission may require him to vacate the state's property at any time and to restore it to its original condition, also that he is not to construe the Commission's action now as vesting in him any right or permission to occupy the property on which the road has been constructed. The Commission also ordered that Mr. Schuttpels be informed that the easement which the Commission granted him is still in effect and that he is privileged to exercise his rights therein granted.

The Commission had under discussion a letter from James and Katherine Sansbury relative to their property at Gleneden Beach, Lincoln County, across which the Commission at some future date proposes to relocate the Oregon Coast Highway. The Sansburys advise that they have an opportunity to trade their property but will not do so if the Commission will advance to them a portion of the cost of the right of way, sufficient to clear the indebtedness against their property, the balance to be paid later. The Commission decided to adhere to its present policy not to acquire right of way for any project until it is ready to proceed with actual construction of the project. The Attorney was instructed to advise the Sansburys accordingly and to state further that the Commission does not have funds to purchase their property at this time, so they are at liberty to dispose of it as they see fit.

A letter was presented from the City Auditor of Portland advising that the Portland City Council has overruled the objection of the State Highway Commission to pay street assessments against certain state-owned property adjacent to McLoughlin Boulevard (East Portland-Oregon City Highway) at the

DEC 19 1938

Holgate Street intersection, and expects the state to pay such assessments the same as if the property were privately owned. The Attorney questioned the right of a city to assess state property for municipal improvements, and in view thereof the Commission referred the matter to him for further investigation and to ascertain upon what grounds the state is being charged for this expense.

The Commission had under consideration the Engineer's report on the cost to improve the county road extending from the Oregon Coast Highway, near Astoria, to Fort Stevens, but deferred action thereon until some future date.

The Commission adjourned at 11:40 o'clock a. m. and reconvened at 1:00 o'clock p. m. in the Green Room of the Congress Hotel for a conference with representatives of the U. S. Bureau of Public Roads and the U. S. Forest Service relative to programming the fiscal year 1940 forest highway funds. Present at such conference were the following: Henry F. Cabell, Chairman; E. B. Aldrich, Commissioner; R. H. Baldock, State Highway Engineer; C. B. McCullough, Asst. State Highway Engineer; and H. B. Glaisyer, Secretary, representing the State Highway Department; W. H. Lynch, District Engineer, F. E. Andrews, H. D. Farmer, and R. N. Kellogg, representing the U. S. Bureau of Public Roads; C. J. Buck, Regional Forester; and James Frankland, Regional Engineer, representing the U. S. Forest Service.

After careful study and full discussion, the following projects were tentatively selected for such program by mutual agreement of all parties concerned:

Funds Available:

F. Y. 1940 Authorization.....	\$898,443	
Less Admin. & Equipment (10% approx.)....	<u>89,443</u>	\$809,000
Savings from prior programs.....		<u>201,000</u>
Total Available for new program.....		\$1,010,000

Recommended Program: (Major Projects)

<u>Proj. No.</u>	<u>Project</u>	<u>Lengths</u>	<u>F. H. Allocation</u>	<u>Coop. (State)</u>	<u>Remarks</u>
6-E7	Alsea	.08	\$70,000	\$30,000	Reconstr. Br. & Grad.
16-K	Tiller-Trail	3.8	75,000	25,000	Grading
21-K3,L	Willamette	.4	75,000		Grading
21-E4,F4,G2, H3,I3,J4,K4,Willamette		21.3	60,000		Surf. & Bit. Surf. Trt.

37-A4	Weston-Elgin	5.4	45,000		Reconstr. Grad. & Surf.
38-D	Flora-Enterprise	1.4	100,000		Grading
46-C	Cascade Lakes	5.0	50,000		Grading
50-A	Timberline	2.0	100,000		Grad. & Surf.
	Maintenance		50,000		
	Extraordinary Maintenance		5,000		
	Location Surveys		25,000		
TOTAL			\$1,010,000	\$55,000	

The allocation of \$100,000 in this program for the improvement of the Timberline Road was approved subject to the condition that this road be placed on the Forest Highway System. The conference was concluded at 2:00 o'clock p. m., whereupon the Commission returned to the Auditorium of the Public Service Building to hear delegations and to dispose of additional routine matters, all commissioners being present and participating. Also present were the State Highway Engineer, the Assistant State Highway Engineer, the Attorney, and the Secretary.

A delegation from Portland, representing the Metropolitan Association, came before the Commission in the interests of the improvement of Front Avenue as an arterial highway route for north-bound and south-bound traffic through the Portland westside business district. The delegation was headed by Mr. Wm. F. Woodward, and included the following: Mayor Jos. K. Carson, Jr.; David B. Simpson, representing the Building Owners and Managers Association; Vernon Scott, representing the Packer-Scott Company; George Friede, Represents-

DEC 19 1936

tive in the state legislature; Robert Strong; George Lawrence; John Logan, Attorney; and others.

The members of the delegation reiterated arguments heretofore presented on behalf of this improvement, from the standpoint of both traffic and business interests. They declared that something must be done to relieve traffic congestion and gave as their thought that the improvement of Front Avenue as an arterial highway connection is the most feasible solution. They alleged that, due to the decrease in property valuations and obligations the City of Portland is required to meet, it would not be possible for the city to cooperate financially in this project. They urged the Commission to proceed with the improvement in order to take care of north- and south-bound traffic through Portland's westside district, which they declared is of vital concern. Speaking in behalf of this project were Mayor Carson and Messrs. Woodward, Simpson, Scott, Friede, Strong, Lawrence, and Logan.

Chairman Cabell advised that the Commission is glad to have the viewpoint of the members of the Metropolitan Association and that the Commission realizes that one of its obligations is to provide for traffic needs through metropolitan areas throughout the state. It is an acute problem, he said, and is just one of the problems that is growing larger as time goes on. The difficulty with the Front Avenue plan, he said, is twofold: first, its magnitude, and in this connection the Commission believes that if and when it starts this improvement it should not do an inferior job, and to do a good job will cost an enormous sum of money. The second difficulty, he said, is the cost of right of way, which is very expensive along the route of Front Avenue. He pointed out that the Commission was favorably inclined to the project at one time and indications were that construction would proceed; but the plans did not materialize because the City of Portland could not furnish the right of way, which was a prerequisite to construction. He mentioned that there are rumors that the Federal Government, through Congress, will provide funds for undertakings of this kind, including the acquisition of right of way, and advised that if Congress does provide such funds, then it would be possible to revive this project; but there is a question as to the feasibility of the project unless the state is able to secure financial assistance from some other source. He thanked the delegation for its presentation and concluded the conference by stating that the Commission will keep the project in mind and will do the best it can for it.

The Commission had under consideration at this time the matter of granting a leave of absence to the State Highway Engineer, Mr. R. H. Baldock, from December 19, 1938, to the latter part of February, 1939, to attend the Pan-American Road Congress that is to be held in Santiago, Chile, as a representative of the United States Government. Mr. Baldock, who was present, advised that he is one of three engineers in the United States who have been honored with an invitation to be a delegate to such Road Congress; also, that all of his expenses will be paid by the Federal Government, but he will not be carried on the Government's payroll. The Commission considered that the invitation extended to Mr. Baldock is a high honor and reflects credit on the State of Oregon by whom he is employed, and it was the thought of the Commission that the invitation should be accepted. In view thereof, the Commission

by unanimous vote authorized the Engineer to attend such Road Congress on full salary, provided his expenses are paid by the Federal Government.

The matter of reappointing Mr. R. H. Baldock as State Highway Engineer from the date of expiration of his last appointment, February 28, 1938, was also discussed. Motion was made by Commissioner Aldrich that Mr. Baldock be reappointed State Highway Engineer for another 4-year term commencing March 1, 1938. The motion was duly seconded by Commissioner Tou Velle and was declared by Chairman Cabell to have passed by the unanimous vote of the Commission.

The matter of appointment of the Commission's Attorney and Secretary also had the attention of the Commission. Motion was made by Commissioner Aldrich that Mr. J. M. Devers, the Commission's present Attorney, and Mr. H. B. Glaisyer, the Commission's present Secretary, be reappointed to their respective positions. The motion was duly seconded by Commissioner Tou Velle and was declared by Chairman Cabell to have passed by the unanimous vote of the Commission.

The Commission had under consideration the matter of the award of the contracts for which bids were taken at the morning session. After careful consideration of the bids, the Commission decided to award the contracts in each instance to the low bidders except that the Commission rejected all of the bids received for the furnishing of crushed rock in stock piles on the Polallie Creek-Hood River Section of the Mt. Hood Highway, in Hood River County. The following resolutions in regard to such awards were adopted by the unanimous vote of the Commission, upon motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle:

**A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE GRANT COUNTY LINE—UNITY SECTION OF THE JOHN DAY HIGHWAY IN BAKER COUNTY
DOCKET NUMBER OREGON 1373-F, UNIT F**

WHEREAS, bids received for the construction of the Grant County Line-Unity Section of the John Day Highway in Baker County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Babler Brothers, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW, THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Grant County Line-Unity Section of the John Day Highway in Baker County be and the same is hereby awarded to Babler Brothers, contractor, in the amount of Forty-six Thousand Five Hundred Thirty-eight Dollars (\$46,538.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing

DEC 19 1938

of such award by the Secretary of the Oregon State Highway Commission.

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE COQUILLE SECTION OF THE OREGON COAST AND COOS BAY—ROSEBURG HIGHWAYS IN COOS COUNTY - DOCKET NUMBER OREGON 1374-F, UNIT A

WHEREAS, bids received for the construction of the Coquille Section of the Oregon Coast and Coos Bay-Roseburg Highways in Coos County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by O. C. Yocom, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Coquille Section of the Oregon Coast and Coos Bay Highways in Coos County be and the same is hereby awarded to O. C. Yocom, contractor, in the amount of Seventeen Thousand Eight Hundred Ninety-two Dollars (\$17,892.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE CRESCENT-BEAVER MARSH SECTION OF THE DALLES-CALIFORNIA HIGHWAY IN KLAMATH COUNTY - DOCKET NUMBER OREGON 1375-F, UNIT D

WHEREAS, bids received for the construction of the Crescent-Beaver Marsh Section of The Dalles-California Highway in Klamath County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Fisher Brothers, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Crescent-Beaver Marsh Section of The Dalles-California Highway in Klamath County be and the same is hereby awarded to Fisher Brothers, contractor, in the amount of Thirteen Thousand Eight Hundred and no/100 Dollars (\$13,800.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing

of such award by the Secretary of the Oregon State Highway Commission.

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE DEVILS GARDEN-QUARTZ MOUNTAIN SECTION OF THE KLAMATH FALLS-LAKEVIEW HIGHWAY IN KLAMATH AND LAKE COUNTIES - DOCKET NUMBER OREGON 1404-F

WHEREAS, bids received for the construction of the Devils Garden-Quartz Mountain Section of the Klamath Falls-Lakeview Highway in Klamath and Lake Counties have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by J. C. Compton & Rogers Construction Company, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Devils Garden-Quartz Mountain Section of the Klamath Falls-Lakeview Highway in Klamath and Lake Counties be and the same is hereby awarded to J. C. Compton & Rogers Construction Company, contractor, in the amount of Seventy-nine Thousand Three Hundred Thirty-one and no/100 Dollars (\$79,331.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE HORSE RANCH-CHEWAUCAN NARROWS SECTION OF THE FREMONT HIGHWAY IN LAKE COUNTY DOCKET NUMBER OREGON 1375-F, UNIT E

WHEREAS, bids received for the construction of the Horse Ranch-Chewaucan Narrows Section of the Fremont Highway in Lake County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Schmeer, Williams and Gentemann, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Horse Ranch-Chewaucan Narrows Section of the Fremont Highway in Lake County be and the same is hereby awarded to Schmeer,

DEC 19 1938

Williams and Gentemann, contractor, in the amount of Twelve Thousand Four Hundred Eighty-six and 50/100 Dollars (\$12,486.50), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

**A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE ROUGH CREEK-BELKNAP SPRINGS SECTION OF THE MCKENZIE HIGHWAY IN LANE COUNTY
DOCKET NUMBER OREGON 1374-F, UNIT B**

WHEREAS, bids received for the construction of the Rough Creek-Belknap Springs Section of the McKenzie Highway in Lane County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Mountain States Construction Company, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Rough Creek-Belknap Springs Section of the McKenzie Highway in Lane County be and the same is hereby awarded to Mountain States Construction Company, contractor, in the amount of Fourteen Thousand Nine Hundred Eighty-two and no/100 Dollars (\$14,982.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

At 3:30 o'clock p. m. Chairman Cabell made the following announcement with regard to the qualifying of bids on P.W.A. projects: "It has been the custom of the State Highway Commission in the past to allow contractors to bid on several projects and to qualify their bids by stating that they would accept the award of only one contract or certain jobs bid upon, leaving the choice of the project or projects to the Commission. The requirements of the Public Works Administration will not permit such qualification to be included in the projects that are to be financed with P.W.A. money, so the Commission has included in its specifications a clause prohibiting the use of such qualification in connection with bids on such jobs. Bidders are warned, therefore, that if they bid on more than one project and qualify their bids by stating that they will accept only one contract or certain contracts, such qualification will be null and void and the bidders will have to accept all of the jobs that are awarded to them regardless of their qualifying statement."

Chairman Cabell then announced the awards of contracts as follows,

with respect to the bids that were received at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Grant County Line-Unity Section of the John Day Highway, in Baker County. 10.63 miles surfacing and oiling; also furnish 3,000 cubic yards crushed rock in stock piles. The low bid for this project was that submitted by Babler Bros., Portland, at \$46,538.00. The next low bid was that of Rogers Construction Company, Dayton, Washington, at \$47,463.00. There were 11 higher bidders. The Commission has awarded the contract to Babler Bros., the low bidders, at their bid price of \$46,538.00.

"Coquille Section of the Oregon Coast and Coos Bay-Roseburg Highways, in Coos County. Furnish 7,400 cu. yds. crushed gravel or crushed rock in stock piles. O. C. Yocom, Willamina, submitted the low bid at \$17,892.00. A. S. Wallace, Roseburg, submitted the next low bid at \$19,610.00. There were 2 higher bidders. The Commission has awarded the contract to the low bidder, O. C. Yocom, at his bid price of \$17,892.00.

"Polallie Creek-Hood River Section of the Mt. Hood Highway, in Hood River County. Furnish 6,000 cu. yds. crushed rock in stock piles. The low bid for this project was submitted by Sarton, Looney & Risley, Oak Grove, at \$13,600.00. The second low bid was submitted by Schmeer, Williams & Gentemann, Portland, at \$15,150.00. There were 2 higher bids submitted. The Commission has rejected all bids received for this job and ordered it readvertised.

"South Unit of Bear Canyon-State Line Section of the Pacific Highway, in Jackson County. 0.90 mile grading and culvert construction. 10 bids were received for this project, the low one being that of Harold Blake, Portland, at \$80,322.00. The second low bid was that of Roy L. Houck, Salem, at \$80,360.00. The Commission has awarded the contract to the low bidder, Harold Blake, at his bid price of \$80,322.00.

"Crescent-Beaver Marsh Section of The Dalles-California Highway, in Klamath County. Furnish 7,000 cu. yds. crushed rock in stock piles. Fisher Bros., Oregon City, submitted the low bid for this project at \$13,800.00. Rogers Construction Company, Dayton, Washington, submitted the next low bid at \$16,900.00. The only other bid received was that of A. S. Wallace, Roseburg, at \$17,450.00. The Commission has awarded the contract to the low bidders, Fisher Bros., at their bid price of \$13,800.00.

"Devils Garden-Quartz Mountain Section of the Klamath Falls-Lakeview Highway, in Klamath and Lake Counties. 1.45 miles grading; 8.89 miles surfacing and oiling; also furnish 3,700 cu. yds. crushed rock in stock piles. 10 bids were received for this project, the low one being that of J. C. Compton and Rogers Construction Company, McMinnville, at \$79,331.00. The second low bid was submitted by

Babler Bros., Portland, at \$89,734.00. The Commission has awarded the contract to the low bidders, J. C. Compton and Rogers Construction Company, at their bid price of \$79,331.00.

"Horse Ranch-Chewaucan Narrows Section of the Fremont Highway, in Lake County. Furnish 10,500 cu. yds. crushed gravel in stock piles. The low bid for this project was submitted by Schmeer, Williams & Gentemann, Portland, at \$12,486.50. The second low bid was submitted by Saxton, Looney & Risley, Oak Grove, at \$14,891.00. There were 2 higher bidders. The Commission has awarded the contract to the low bidders, Schmeer, Williams & Gentemann, at their bid price of \$12,486.50.

"Rough Creek-Bellmap Springs Section of the McKenzie Highway, in Lane County. Furnish 9,100 cu. yds. crushed rock in stock piles. Mountain States Construction Company, Eugene, submitted the low bid for this project at \$14,982.00. A. S. Wallace, Roseburg, submitted the next low bid at \$15,030.00. There were 3 higher bids submitted. The Commission has awarded the contract to the low bidder, Mountain States Construction Company, at its bid price of \$14,982.00."

A delegation from Lincoln County, representing the Lincoln County Park Committee, and consisting of A. M. Williams, Nelscott; G. G. Sittser, Jr., De Lake; A. F. Walker, Oceanlake; and E. C. Thayer, Portland, came before the Commission with respect to a proposed park site situate between the Oregon Coast Highway and the Pacific Ocean, a short distance north of Nelscott. Mr. Williams headed the group. He recalled that a delegation from Lincoln County appeared before the Commission some time ago and urged the Commission to acquire 120 acres at this location, which they said could be purchased for the sum of \$22,000; but the Commission refused the offer because of the amount involved. Since then, he said, a part of the property has been platted into lots and some of the lots sold, but there still remain 40 acres of timbered land which is available for state park purposes if the Commission wants it. He advised that this 40 acres, together with an irregular strip approximately 150 feet wide adjacent to the highway, can be purchased for approximately \$6,500, and urged favorable action on the matter by the Commission for the benefit of under-privileged people and others who want to enjoy the beach scenery and facilities but who have no place to go.

Mr. Sittser, Editor of the Nelscott paper, concurred in the remarks of Mr. Williams and added that the tract they are sponsoring for a state park is the only suitable area available for such purpose for a distance of 50 miles up and down the coast line. He urged the Commission to reconsider its previous decision. Mr. Thayer concurred in the remarks of the other speakers and gave as his thought that this is a most desirable tract for park purposes and that the price that is being asked for the same is very reasonable. He further stated that he approved the state park program and the expenditure of state highway funds for the acquisition of additional parks at other points throughout the state.

Chairman Cabell thanked the delegation for its presentation and

advised that the Commission is interested in their proposition but is not in a position today to make a definite decision in regard thereto because of the shortage of funds. He also said that the Commission would reconsider the matter and would discuss it with the State Parks Superintendent to ascertain whether or not the proposed area would fit in with the state park program. (The Commission discussed this matter with the State Parks Superintendent on the following day, at which time it was pointed out that the proposed park has no ocean frontage; in fact, the tract is separated from the ocean by another tract of approximately equal area, and the only access to the beach from the proposed park site is by a narrow roadway. The State Parks Superintendent gave as his thought that, if the Commission wants to purchase an oceanside park, it should be a real ocean park, fronting directly on the ocean, rather than being separated therefrom by another tract of land. After discussion, the Commission decided unanimously to refuse the offer of the Nelson committee.)

Mr. J. V. Chandler, Albany, representing R. I. MacLaughlin Company of that city, and Mr. Arthur McMahan, his attorney, came before the Commission with respect to a right of way matter arising out of the proposed Albany railroad grade crossing elimination project. Mr. McMahan was spokesman. He advised that R. I. MacLaughlin Company owns a fruit-packing plant at Albany which will have to be moved in order to make way for the proposed highway improvement, but they are unable to make a satisfactory settlement with the Commission's right of way agents, hence they are appealing to the Commission direct.

The history of the case was recited by the Commission's Assistant Attorney, Mr. J. W. DeSouza. It appears that a satisfactory settlement has been reached with respect to all matters pertaining to this transaction with the exception of one item representing damages which the company alleges it will suffer by reason of having to move its buildings from their present location to a new site. It is the company's contention that the new site is not as suitable for its purposes as the present site, having no paved street in front of the premises, no sewage facilities, and the back of the property being inaccessible due to the proposed highway grade. It also appears that the state's offer covers damages amounting to \$2,050, whereas the company is demanding the sum of \$2,769, a difference of \$719.00.

The matter was discussed at considerable length but a decision with respect thereto was deferred until later in the session. The question of when the company's buildings would have to be moved was also discussed and it was decided to give the company until January 26, 1939, to remove them from the highway right of way, this being the date on which bids are to be received for the Albany project. (This matter was reconsidered by the Commission at the evening meeting on this date, at which time the Commission instructed the Attorney to negotiate further with the company officials and endeavor to get them to reduce the amount of their demand. He was authorized by the Commission to increase the amount of his offer by 50 per cent of the difference between his previous offer and the company's demanded price, and, if absolutely necessary, to go as high as \$2,500.)

DEC 19 1939

Mr. Carl J. Knutsen, State Manager, and Mr. Lee D. Cranmer, Superintendent of Group Insurance, representing the California-Western States Life Insurance Company, came before the Commission with respect to the company's offer to furnish group insurance covering state highway department employees. Mr. Cranmer, who represents the Home Office of the company, explained in detail a plan that they have in mind. Chairman Cabell advised that the Commission has not yet had an opportunity to discuss the Attorney's report on this subject, hence is not in a position to make a decision at this time but will do so as soon as possible. (The matter was reconsidered the following day, at which time the Assistant Attorney advised that he has investigated the company and ascertained that its experience rating is satisfactory. Furthermore, that he has been advised by competent authority that the company has a good average general policy and that its plan for the furnishing of group insurance is fair and reasonable. In the discussion of the matter it was brought out that the same kind of insurance is available through numerous insurance companies, in view of which it was thought that it would be creating more or less of a monopoly if the Commission accepted the proposition of the California-Western States Life Insurance Company. The Commission did not question the benefits to the highway department employees through the policy offered but was of the opinion that the selection of the company to furnish the insurance should be made by the employees themselves. In view of the circumstances and the fact that the Commission preferred not to appear as dictating to the employees in the matter of the selection of the company, the Commission decided not to accept the company's offer.)

A delegation from Cottage Grove, consisting of Harold E. Eakin, banker; S. L. Goddard, contractor; Scholfield Stuart, plumber; L. J. McCoy, businessman; Peter Christensen, carpenter; and Vinal Randall, came before the Commission in regard to the proposed revision of the Pacific Highway through Cottage Grove. Mr. Eakin headed the group.

Mr. Eakin urged the Commission to construct the proposed revision during the year 1939 and presented oral arguments in behalf of the request. Each member of the delegation endorsed Mr. Eakin's remarks. Mr. Stuart particularly urged the construction from the standpoint of safety to school children, the present route passing in front of the public school. Mr. Goddard spoke from the standpoint of property development, stating that the development of private property in Cottage Grove is being held up to a large extent because the highway has not been rebuilt on the proposed permanent alignment.

Chairman Cabell advised that it does not appear now, on account of the shortage of funds, that the Commission could possibly place this project under contract until 1940. He explained the status of the Commission's finances and advised that it will be several months before the Commission arranges its 1940 program, but the Commission will be pleased to consider this project at that time.

Messrs. Leo Farr and F.B. Lowery, Portland, came before the Commission and requested permission to transport one load of piling 60 feet in length over state highways from the town of Clackamas to Vancouver, Washington,

the route being along the S2nd Street Highway from Clackamas to Columbia Boulevard, thence along Columbia Boulevard (Northeast Portland Secondary Highway) to Union Avenue (Pacific Highway), thence along the Pacific Highway across the Interstate Bridge to Vancouver. They stated they have only one load to haul at the present time but anticipate considerable hauling in the future if they are awarded the contract to furnish poles for the Bonneville transmission pole line. The Commission hesitated to grant the request due to the large volume of traffic on the roads over which the hauling is to be done, particularly because of the traffic on Sandy Boulevard, Portland, which must be crossed. However, the Commission authorized the movement of a trial load under observation by the Maintenance Engineer and the Traffic Engineer, representing the State Highway Department, to determine whether or not loads of such length can be transported over these roads without causing an undue hazard to other traffic. The Secretary was authorized to issue permits for the transportation of overlength loads over these highways in accordance with the recommendation of the Maintenance Engineer and the Traffic Engineer.

Mr. F. A. Cornell, City Attorney, Sweet Home, Oregon, came before the Commission with regard to the construction of a sidewalk on the highway right of way at Sweet Home. He said that the city contemplates constructing a concrete sidewalk on the south side of the Santiam Highway for several blocks in Sweet Home and would like permission from the Commission to build this sidewalk on the highway right of way notwithstanding that it is only 60 feet wide at this location and there is a possibility that it will be widened to 80 feet at some future date. He advised that, for the most part, the property owners are willing to donate land for a right of way 80 feet wide but several of them object strenuously to doing this because their homes are located too close to the present roadway; so, unless the Highway Commission will authorize the city to build its walk on the present highway right of way, the city will have to forego the walk.

The Engineer advised that the highway right of way outside of the city is now 80 feet wide but within the city limits it is only 60 feet wide and that it is planned to widen it to 80 feet width throughout as soon as funds can be spared for the purpose. If the sidewalk were constructed on the 60-foot right of way, he said, there would be a jog at the point where the width of the highway changes to 80 feet, which would present an undesirable situation. The proper thing to do, he said, would be to require that the sidewalk be constructed at the edge of an 80-foot right of way. Mr. Cornell repeated that this could not be done because there are several buildings in the way and some of the property owners object. He added, however, that if the Commission would let the sidewalk encroach $2\frac{1}{2}$ feet on the present right of way, the property owners would not object to the other $2\frac{1}{2}$ feet being constructed on their private property. He suggested such arrangement as a matter of compromise. The Engineer recommended approval of the suggestion in view of the fact that it would leave 55 feet clear width between curbs if and when a sidewalk is constructed in a similar location on the other side of the road. The Commission approved the recommendation unanimously and authorized the issuance of a permit on such basis.

Mr. James L. Conley, attorney, Portland, appeared before the

Commission in behalf of the Gearhart Park Company relative to tidelands at Gearhart that the company proposes to sell to the state. He said that when the company first offered to sell this property to the state for \$2,339.00, it was with the understanding that the county would accept the amount of the settlement as payment in full for back taxes against the company's property; but the county has now stated its unwillingness to complete the transaction on such basis because the taxes against the property exceed the amount that the state is paying for it. He stated that Mr. Taylor, of the Gearhart Land Company, was quite disappointed with the county's ruling and expressed doubt that the transaction with the state could be completed unless the state would pay an additional amount to cover the tax lien, which is \$175.00 for the tide land and only a nominal sum, as yet undetermined, for the 20-foot strip that is needed for widening the highway right of way. He inquired whether or not the Commission would pay an additional amount to cover the tax items. The Commission's decision in this matter was deferred pending investigation by the Attorney as to the exact amount that the Commission would have to pay to clear the tax lien on the property under discussion.

A delegation from Portland, representing the Hawthorne Commercial Club, came before the Commission and requested the designation of Hawthorne Avenue, Portland, as an arterial highway route into the Portland business district from Southeast Portland. Joseph A. Bradt headed this delegation, which included the following members: D. I. Cooper, of the Howard-Cooper Corporation; Frank R. Cooper; C. C. Hutchison, President of the Hawthorne Commercial Club; C. E. Willison, of the Bagdad Market; K. L. Mendenhall, Hawthorne Hardware Company; Nevin Brentright, of the Mt. Tabor News; L. M. Sammons, New Way Laundry; W. M. Heacock, Heacock Woodworking Shop; Max Sagner, Chrysler Motor Sales; Clarence E. Francis, B. B. Granning, and L. C. Newman.

They suggested the following route for this proposed traffic artery: Hawthorne Avenue from the Hawthorne Bridge to either S. E. 39th Avenue or S. E. 49th Avenue; thence southeasterly, crossing S. E. Division near Mt. Tabor Park to a connection with S. E. Powell Boulevard at its intersection with 82nd Street. They asked that this route be designated as a state highway route particularly to eliminate traffic hazards and congestion along the present route from the Southeast Portland district into Portland. They pointed out that Hawthorne Avenue has been widened for arterial traffic service from the bridge to 50th Street and that wiring has been installed for an appropriate lighting system as far as 12th Street, and advised that their main concern now is to secure an extension of the project from its present dead end to the Southeast Portland district. They said that they are not asking the Commission to make a decision today but would like to have the matter considered by the Commission for inclusion in some future construction program.

Chairman Cabell advised that because of shortage of funds the Commission is reluctant to take on any new projects while there are so many uncompleted projects in the Commission's program. However, the Commission is glad to have heard the arguments and will bear the project in mind for future consideration.

Mr. C. D. Long, business representative of the Klamath Falls Building Trades Council, appeared before the Commission in reference to the establishment of certain wage rates on highway construction work. Mr. Long stated that it was his understanding that the Highway Commission had under consideration adoption of minimum wage rates in connection with highway construction projects; and stated, further, that the rates specified in that certain agreement executed by some of the affiliates of the American Federation of Labor and certain highway contractors, members of the Associated General Contractors of America, are lower in several instances than the corresponding rates specified by the Federal Government. Mr. Long urged that, if and when the Highway Commission adopts the minimum wage rates specified in the above-mentioned agreement, or any other standard minimum wage rates, the minimum rates now in effect be retained in all cases where they are higher than those specified in the agreement.

Mr. Long was informed by the Commission that his request would be given consideration at such time as this matter is brought up for formal action on the part of the Commission.

The Commission adjourned at 5:30 o'clock p. m. to reconvene at 9:00 o'clock p. m. in the Benson Hotel.

The Commission reconvened at 9:00 o'clock p. m. in Room 204, Benson Hotel, all members being present and participating. Also present were the Assistant State Highway Engineer, the Attorney, and the Secretary.

The Commission conferred with the following members of the San Francisco World's Fair Committee of Oregon: C. T. Haas, Chairman, Portland; James W. Morris, Portland; Dr. James A. Best, Pendleton; Ray Conway, Portland; and C. C. Carlson, Executive Secretary, particularly relative to the budgeting of the sum of \$40,000 which the State Highway Commission heretofore agreed to contribute toward the cost of maintaining an exhibit at this Fair, as per general agreement dated August 10, 1938. Mr. Haas presented a proposed budget as follows, and advised that it was approved by the Committee members at a meeting held earlier in the day:

Motion Picture Film (black and white)	\$10,000
Motion Picture Film (colored)	1,000
Diorama	3,250
Motion Picture Equipment	1,500
Building, Furniture and Decorations	3,000
Two operators	4,800
Proportionate rent	<u>10,000</u>
Total	\$33,550
Ten Per Cent Contingency	<u>3,355</u>
Grand Total	\$36,905

Mr. Haas pointed out an item in the budget amounting to \$10,000 for proportionate rental on space at the Fair and asked the Commission to approve this item for payment immediately, as they have urgent need for the money at the present time as working capital. After discussion, the Commission, by

DEC 19 1938

unanimous vote, approved the budget as presented and also authorized the immediate payment of the \$10,000 item for rental.

The Assistant Attorney reported that present indications are that expenditures for right of way during the year 1938 will amount to approximately \$650,000, which is \$50,000 more than the amount that the Commission budgeted for such purpose during this period. The Commission took no action on the matter.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with prices that he recommended be paid for each. After careful study the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney brought up for discussion the question of freeway privileges and requested authority from the Commission to try out such question by including it in a condemnation proceeding for acquisition of right of way. The Commission approved the request unanimously.

The Assistant Attorney requested authority to expend a maximum of \$75.00 for providing and placing top soil materials on portions of Block 19, Hackleman's Second Addition to Albany. He explained that the Highway Department, in connection with the Albany Overcrossing Project, moved several residence buildings from the south half of Block 20 and had effected an exchange of properties without payment to the owners of any land values and, in his estimation, it is the obligation of the Highway Department to restore the yards surrounding these respective properties. In view of this explanation, the Commission approved the expenditure of a maximum sum of \$75.00, as requested.

The Attorney brought up for discussion matters pertaining to the Gault right of way problem at the intersection of Denver and Union Avenues, Portland. He said that he contacted Mr. Westerlund, the owner of the property on the west side of Union Avenue, relative to acquiring a 40-foot strip for a roadway for Mr. Gault's convenience, but Mr. Westerlund appears antagonistic and says that if the state wants any of his property it will have to take all of it and restore his facilities in accordance with his plans. The plans that Mr. Westerlund has in mind, he said, include the utilization of the roadway over which Mr. Gault now has access to his holdings, and if he carries them out Mr. Gault will be blocked from access to his property over the present route. He further advised that Mr. Gault is not satisfied with the arrangement that has been made for the roadway to his premises and accordingly is investigating another solution to his problem. In view of the report, the Commission decided to do nothing further on the matter until it is again brought up by Mr. Gault.

The Attorney requested authority to institute condemnation proceedings to acquire the following properties that are needed for various highway improvements:

Transaction No. 5119, P. A. Vaughn, owner - land required for right of way for the Marshfield-Bay Park Section of the Oregon Coast Highway. Offer for condemnation \$150.00.

Transaction No. 4739, Johnnie Gertrude Rushing, owner - land needed for right of way for the Fossil-Kinzua Junction Section of the John Day Highway. Offer for condemnation \$10.00.

(Continued on next page)

DEC 19 1938

Transactions Nos. 3785 and 6101, Sarah E. Applegate Estate, owner - land required for right of way for the Flora-State Line Section of the Lewiston-Enterprise Highway. Condemnation offer \$311.75.

After due consideration the Commission granted the Attorney's request and approved the prices recommended as offers. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Marshfield-Bay Park Section of the Oregon Coast Highway
Fossil-Kinsua Junction Section of the John Day Highway
Flora-State Line Section of the Lewiston-Enterprise Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

Marshfield-Bay Park Section of the Oregon Coast Highway
5119-P. A. Vaughn
Fossil-Kinsua Junction Section of the John Day Highway
4739-Johnnie Gertrude Rushing
Flora-State Line Section of the Lewiston-Enterprise Highway
3785-Sarah E. Applegate Estate
6101-Sarah E. Applegate Estate

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of

land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney rendered a status report on the progress that is being made relative to securing options for right of way for the proposed revision of the Pacific Highway West at Tigard. He advised that progress is being made on this matter but all of the options have not been secured, due to the fact that it was necessary to recall the right of way agent from this project so he could assist in acquiring right of way for projects on which bids were to be received at this meeting. The Commission approved the report but instructed the Attorney to complete the right of way negotiations at Tigard as soon as possible.

The Attorney brought up for discussion the controversy with Maude Hastings Campbell relative to damages that she alleges occurred to her property by reason of the Union Avenue viaduct construction on the East Portland-

DEC 19 1938

Oregon City Highway, in Portland. He advised that Mrs. Campbell has made inquiry as to whether or not the Commission is still willing to settle with her for the sum of \$700.00, which was the amount of his (the Attorney's) original offer. The Commission indicated that it would pay Mrs. Campbell \$700.00 in order to dispose of this matter, provided the payment can be supported by facts, but not otherwise. The matter was referred to the Attorney for further investigation and report.

The Commission at this time had under discussion the adoption of Maintenance and Minor Betterment Budgets for primary and secondary state highways for 1939. The Assistant Highway Engineer presented budgets as follows, bearing approval of Maintenance Engineer J. N. Bishop and State Highway Engineer R. H. Baldock:

GENERAL SUMMARY

Primary Maintenance Budget

-1939-

SECTION MAINTENANCE

Division I	\$137,060.00	
Division II	203,635.00	
Division III	310,880.00	
Division IV	321,365.00	
Division V	366,280.00	
Supervision	45,000.00	
Contingencies	<u>12,805.00</u>	
Total Section Maintenance	\$1,397,025.00	\$1,397,025.00

EXTRA GANG MAINTENANCE

Division I	\$ 94,680.00	
Division II	163,080.00	
Division III	153,700.00	
Division IV	155,480.00	
Division V	140,490.00	
Bridge Maintenance	228,590.00	
Signs	70,000.00	
Traffic Lines	92,000.00	
Traffic Signals	3,500.00	
Highway Illumination	6,000.00	
Supervision	40,000.00	
Contingencies	<u>5,455.00</u>	
Total Extra Gang Maintenance	\$1,152,975.00	<u>\$1,152,975.00</u>

TOTAL GENERAL MAINTENANCE \$2,550,000.00

DEC 19 1938

GENERAL SUMMARYPrimary Minor Betterment Budget

-1939-

Division I	\$18,825.00
Division II	18,385.00

DEC 19 1938

After careful consideration and study of the various items comprising the budgets the Commission approved them by unanimous vote, upon motion of Commissioner Aldrich which was duly seconded by Commissioner Tou Velle:

The Commission adjourned at 11:00 o'clock p. m., to reconvene on the following morning in the Auditorium of the Public Service Building.

Portland, Oregon, December 20, 1938

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in the Auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
C. B. McCullough, Assistant State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

State Highway Engineer R. H. Baldock was absent, having departed on the previous day to attend the Pan American Road Congress in Santiago, Chile, as a representative of the United States Government.

Bids as follows for highway construction projects and for sale of buildings at Oregon City were opened and read in accordance with previously published notice:

**McKENZIE, SANTIAM, McKENZIE-BEND AND CENTRAL OREGON HIGHWAYS
SISTERS AND HORSE RIDGE-BROTHERS SECTION

(Former Owner Casadero Realty Company)

Sullivan Wrecking Company	\$ 5.90
---------------------------	---------

Chairman Cabell announced that awards would be made at 2:30 o'clock p. m. in the same room.

The Commission discussed briefly matters pertaining to the proposed agreement with the Sunset Logging Company covering the matter of construction of the logging company's railroad over the Wolf Creek Highway, in Clatsop County, and particularly the matter of insurance to be furnished in connection with such agreement. The Commission deferred action on this subject pending a conference with Mr. J. R. Hulbert, President of the Sunset Logging Company, who is to come before the Commission later in the day.

The Tillamook County Court, represented by County Judge Harland M. Woods and County Commissioners E. H. Lindsey and E. G. Anderson, came before the Commission with respect to several federal aid secondary highway projects; namely, the oiling of the Fairview South Section of the Fairview-Clemens Corner Road, about 1 mile in length; the oiling of the Wilson River Loop County Road, particularly the Fairgrounds-Sollie Smith Bridge Section; and the oiling of the Netarts Summit-Netarts Section of the Netarts-Tillamook County Road. They gave as their understanding, from a letter from the State Highway Engineer, Mr. R. H. Baldock, dated March 3, 1938, that the Commission would very likely place these projects under contract during the fall of 1938; but, inasmuch as the work has not yet been contracted, they would like to know what plans the Commission has in mind in regard thereto.

The Assistant Engineer advised that the Commission's tentative 1939 budget includes an amount of \$25,000 for these projects. It was the thought of the Commission, in view of the Engineer's letter and the fact that the tentative budget for 1939 now contains amounts for the three projects under discussion, that priority should be given to these jobs over others when the 1939 construction program for federal aid secondary highway funds is arranged, so as to insure that the oiling work will be completed during the next warm weather season. This was agreeable to the County Court and it was so ordered. The Commission decided to arrange its 1939 construction program for federal aid secondary highway funds as soon as possible after the first of the year.

The matter of oiling a $\frac{1}{4}$ -mile section of the Hanks Corner County Road, just east of Tillamook, was then brought up for discussion. The

DEC 20 1938

Secretary presented a letter from the Tillamook County Court asking the State to do this oiling work at county expense when a state oiling crew is working in that vicinity. The Assistant Engineer suggested that, in order to avoid complications, the County Court make its own arrangements to have the work done by the state's contractor who will do the other oiling work in this vicinity, the same as was done last season on the Tillamook-Netarts Road. The County Court approved such arrangement.

County Commissioner Lindsey brought up the matter of reconstructing the bridge over the Wilson River at its third crossing with the Wilson River Highway, east of Tillamook. He said that the present bridge is narrow and on improper alignment, there being an abrupt turn at each end of the structure, rendering it unsuitable and unsafe for travel. He suggested the construction of a new bridge of the log type on the proper alignment, as was done at the second crossing of the Wilson River some time ago, and that the work be done as a W.P.A. project. The Assistant Engineer estimated that this structure would cost about \$23,000 and advised that it has the approval of State Highway Engineer R. H. Baldock. He further advised that the work is not eligible for W.P.A. funds and would have to be done as a contract job, and that it is in the tentative program for consideration by the Commission in the formulation of its next construction program.

Chairman Cabell advised that the Commission will give this project due consideration in the formulation of the 1939 program and hopes to be able to rebuild the bridge soon, although no definite promise or commitment can be made at this time.

Mrs. Vern Van Dyke, Medford, came before the Commission in regard to securing an extension of the lease under which she has been maintaining a cottage on the state's property known as Casey State Park, adjacent to the Crater Lake Highway and the Rogue River, north of Medford. She said that she has been ordered by a representative of the State Highway Commission to remove her building from the state's property but she does not want to do so on account of the investment she has in the building and because, in her estimation, the occupancy of the park by the said building will not detract from the park and will not interfere in any way with the use of the park by the general public. She explained that her cabin is located on a narrow strip of land between the highway and the Rogue River and occupies only a very small area, consisting mostly of rock, and that the site is not suitable for recreational purposes, except as a trail for fishermen, the main recreational area being several hundred feet upstream from this location. She declared that she entered the property in good faith under lease from the state and wants to remain there because there is no place for her to move her cabin.

The Attorney advised that some time ago the Commission gave a lease to a Mr. Lamport to maintain a cabin on this site for a 3-year period, but the lease expired and the Commission refused to renew it because it was considered that the occupancy of a state park by a private individual was undesirable, and accordingly ordered the vacation of the property. It is under the privileges of this lease, he added, that Mrs. Van Dyke is now occupying the state's property.

Chairman Cabell advised that the renewal of the lease allowing Mrs. Van Dyke to continue to occupy the state's property while refusing similar privileges to others, is a difficult matter to justify. The Commission might let the building remain on the state's property temporarily, he said, but not indefinitely, because of the precedent that would be established. If the cabin cannot be moved, he added, the Commission might consider purchasing it if it could be used advantageously for state purposes and can be purchased for a reasonable amount. After further discussion, Mrs. Van Dyke asked for an extension of time within which to remove her cabin from the park, stating that it would be a difficult proposition to move it at this time of the year. She asked for at least 90 days' time. Chairman Cabell concluded the discussion by stating that the Commission is willing to give Mrs. Van Dyke a reasonable length of time within which to remove her building, but that is the best it can do, and the Commission will let her know as soon as such time has been fixed. This matter was discussed further by the Commission after the departure of Mrs. Van Dyke, at which time the Commission decided to give Mrs. Van Dyke six months' time within which to vacate the park premises. The State Parks Superintendent was instructed to examine the building and determine the value of it for consideration from the standpoint of purchasing the building if it can be used to advantage for state purposes.

Mr. S. H. Boardman, State Parks Superintendent, was present and reported on the following park matters:

Timber strips along the Wolf Creek Highway:- The Parks Superintendent advised that he has contacted the Oregon-American Lumber Company relative to the purchase of wayside strips extending for a distance of 2.4 miles along this highway, particularly between Highway Engineer's Stations 813 and 929 and containing about 360 acres of burned-over land, situate west of the crossing of North Fork Quartz Creek, and the company has agreed to sell such strips to the state at the rate of \$5.00 per acre, or a total of \$1,800.00. Furthermore, they have agreed to assume the payment of the mortgage against the property, which amounts to more than the sum that they will receive from the state. He recommended acceptance of the offer for wayside protective purposes. The Commission approved the recommendation unanimously and authorized the Parks Superintendent to negotiate with the company for the acquisition of additional wayside strips between Stations 1062 and 1110, on the same basis. He was also authorized to acquire similar wayside strips adjacent to the highway where it passes through the Inman-Poulsen Logging Company's property, which is situate between the two strips mentioned above belonging to the Oregon-American Lumber Company, and particularly between Stations 929 and 1041, the price per acre to be the same as that which is to be paid to the Oregon-American Lumber Company, making a total of \$400 for the 80 acres involved. The Parks Superintendent was also authorized to negotiate on the same basis for the purchase of additional wayside strips through the property of the Detroit Trust Company and others.

Enlargement of Short Sand Beach State Park, near Arch Cape, in northern Tillamook County:- The Parks Superintendent recommended the purchase of the following properties for the enlargement of the present park and for the preservation of wayside timber: 7.8 acres from the Preston Company, of Ionia,

Michigan, situate in the S.E. $\frac{1}{4}$ of the S.E. $\frac{1}{4}$ of Section 6, Township 3 North, Range 10 West, W. M., purchase price \$365.00; 50 acres owned by the Nicolai-Nepach Company, Portland, and being situate in Lots 2 and 3 and in the S.W. $\frac{1}{4}$ of the N.W. $\frac{1}{4}$ of Section 6, Township 3 North, Range 10 West, W. M., approximately 1 mile south of Arch Cape Tunnel, the area to be purchased on a stumpage basis so as to preserve the timbered wayside, for a total of \$2,285.00. The Commission by unanimous vote approved the purchase of both tracts at the prices quoted.

Proposed park situate adjacent to the Oregon Coast Highway about 4 miles north of Arch Cape Tunnel:- The Parks Superintendent reported receipt of a proposal from the citizens of Cannon Beach that a 120-acre tract of land owned by Clatsop County be conveyed to the state for state park purposes. He advised that this tract is separated from the highway by privately-owned land which would have to be purchased and that the area is covered by a heavy stand of dead spruce which could not be cleared so as to make the area suitable for state park purposes for less than \$1,000 per acre. He recommended against the acquisition of the tract because it is not suitable as a state park and because, in his estimation, the project is more of local than of state-wide importance. The Commission approved the recommendation.

Wayside strips adjacent to the Columbia River Highway west of Hood River:- The Parks Superintendent reported an offer from C. L. Gorton, The Dalles, to sell to the state for park purposes, for the sum of \$1,000, an 80-acre tract of land situate adjacent to the Columbia River Highway between Mile Posts 70 and 71, being described as the S. $\frac{1}{2}$ of the N.E. $\frac{1}{4}$ of Section 4, Township 2 North, Range 11 East, W. M. He said that the tract is covered with a stand of second-growth fir and oak but is of little value from the state park standpoint, particularly because it is located at a considerable distance from the proposed new Columbia River Highway, and the fact that the old route of the Columbia River Highway will be abandoned when the new one is constructed. The Commission indicated a willingness to accept the property if it is conveyed to the state as a gift, but not otherwise.

Proposed park 4 miles east of Medford, in Jackson County:- The Parks Superintendent advised that Mr. Wm. Schmidt, Medford, is the owner of 240 acres of land at the above location and is willing to deed the entire tract to the state as a gift provided the state will grant him exclusive concession privileges on the property. He recommended against acceptance of this offer in view of the fact that the City of Medford now owns a park containing 1700 acres within 2 miles of Mr. Schmidt's property, which the city is developing with C.C.C. forces. The Commission approved the recommendation, it appearing to the Commission inadvisable to acquire a state park located so close to the city park, inasmuch as the city park is ample to accommodate all of the patronage of the Medford district.

Wild-life refuge near Cape Meares Lighthouse, in Tillamook County:- The Parks Superintendent advised that the Bureau of Biological Survey of the United States Department of Agriculture is the owner of a 140-acre tract of land located at Cape Meares, and adjoining this tract is another area consisting of 40 acres which is being used for lighthouse purposes; also, that

the Biological Bureau has issued to the State Parks Department a special permit authorizing joint administration of the area as a wild-life refuge and state park. He recommended acceptance of this permit, and development of the tract in conjunction with the Biological Bureau at some future date. The Commission approved the recommendation unanimously.

Nehalem Bay Sand Spit:- The Parks Superintendent reported that Tillamook County owns nearly all of the land on this sand spit and that the County Court has expressed a willingness to deed this property to the state if the state wants it. The balance of the area, he said, is in private ownership, which would have to be purchased unless the Commission has no objection to the state-owned area being interspersed with private property. He requested instructions as to whether or not to complete negotiations for the acquisition of the entire sand spit and recommended acceptance of the county's offer. The Commission by unanimous vote instructed the Parks Superintendent to secure the county-owned portion and authorized him to negotiate for the purchase of the privately-owned property, which will provide a recreational area consisting of approximately 800 acres.

Timber strips along the Wolf Creek Highway through the holdings of the Sunset Logging Company:- The Parks Superintendent reported briefly that he contacted Mr. J. R. Hulbert, President of the Sunset Logging Company, regarding this matter, as previously instructed by the Commission, and inquired whether or not the company would sell to the state strips on both sides of the highway on the basis of the payment of \$3.50 per thousand feet of timber, board measure, but received no encouragement, Mr. Hulbert advising that he would discuss the matter with the Commission later.

Clean-up of Celilo Indian Village, near The Dalles:- The Parks Superintendent advised that he has conferred with Mr. O. L. Babcock, Superintendent of the Umatilla Indian Reservation, who has supervision over the Celilo Indian Village, and ascertained from Mr. Babcock, who for some time has been trying to effect the clean-up of the site, that most of the land upon which the village is located is government-owned, and that whatever is to be accomplished with respect to the clean-up work must be done through the Federal Government. In view of the report, the Commission decided to secure additional information as to which governmental agency has supervision and control over this property. The matter was referred to the Parks Superintendent to secure such information and report his findings at the next meeting of the Commission.

Proposed park site near Nelascott, Lincoln County:- The Parks Superintendent recommended against the acquisition of this tract as urged by the North Lincoln Park Committee which appeared before the Commission on the previous day, because, he said, the tract does not meet the state park requirements. He pointed out that the tract is separated from the ocean by another tract of land and that the only means of access to the beach is over a narrow roadway. He gave as his thought that if the Commission wants to acquire an ocean-view park it should be a real one, fronting directly on the ocean rather than separated therefrom by privately-owned property. The Commission concurred in the viewpoint of the Parks Superintendent and decided not to purchase the property.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room with all members, the Assistant State Highway Engineer, the Attorney, and the Secretary present.

Mr. J. R. Hulbert, President of the Sunset Logging Company, was present and conferred with the Commission relative to final settlement of the excess cost incurred in constructing the company's logging railroad occasioned by the construction of the Wolf Creek Highway, which matter was covered by agreement dated March 31, 1936, between the state and the company. It appeared from the discussion that the Commission and the company are in agreement with respect to practically all items concerned in the settlement except the matter of reimbursing the company for the cost of furnishing liability and property damage insurance which the company proposes to carry in order to secure protection against additional liability by reason of the highway crossing under the railroad company's tracks, the premium for such insurance amounting to \$4,080.75. Mr. Hulbert stated that his company now carries public liability and property damage insurance in amounts that they deem sufficient for their coverage but it is not sufficient to cover the additional liability caused by the crossing of the highway under the railroad. It was his thought that the state should pay the premium on the additional insurance because the company would not have needed such additional insurance if it were not for the presence of the highway under the railroad.

In the discussion it appeared to be the opinion of the Commission that the state should pay the premium on the increased amount of insurance that was actually necessitated by reason of increased liability on the company but the question arose as to how much additional insurance is actually required. The question arose also as to the amount of the premium that should be charged for a policy that would relieve the company from liability for accidents that might occur in connection with the operation of trains over the highway. The Commission referred the matter to the Attorney for further investigation and report.

The matter of acquisition of wayside strips along the Wolf Creek Highway across the holdings of the Sunset Logging Company was then brought up for discussion. Mr. Hulbert advised that he has not had time since talking the matter over with the State Parks Superintendent to make a decision, so he has nothing to report at this time.

The matter of terminating the insurance furnished by the Oregon-American Lumber Company covering the movement of logs across the Wolf Creek Highway at Highway Engineer's Stations 813 and 845 had the attention of the Commission. The Engineer reported that all of the company's logging operations covered by the agreement between the Commission and the company at the two points indicated have been completed and that the cleaning up of the premises has been done. He recommended approval of the cancellation of the policy. The Commission approved the recommendation by unanimous vote.

The Commission considered at this time the tabulation of the bids received at the morning session for the construction of state highway projects. After careful study the Commission decided to award the contracts to

DEC 20 1938

the low bidder in each instance. The following resolutions pertaining thereto were adopted by the unanimous vote of the Commission, upon motion of Commissioner Aldrich which was duly seconded by Commissioner Tou Velle:

**A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE SISTERS SECTION ON HIGHWAYS IN THE VICINITY OF SISTERS AND HORSE RIDGE-BROTHERS SECTION OF THE CENTRAL OREGON HIGHWAY IN DESCHUTES COUNTY
DOCKET NUMBER OREGON 1375-F, UNITS B AND F**

WHEREAS, bids received for the construction of the Sisters Section on Highways in the vicinity of Sisters and Horse Ridge-Brothers Section of the Central Oregon Highway in Deschutes County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Chester T. Lackey, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Sisters Section on Highways in the vicinity of Sisters and Horse Ridge-Brothers Section of the Central Oregon Highway in Deschutes County be and the same is hereby awarded to Chester T. Lackey, contractor, in the amount of Twenty-three Thousand One Hundred Thirty-four and no/100 Dollars (\$23,134.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

**A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE BUTTE CREEK SUMMIT-BRANSON CREEK AND FLAT CREEK-JOHN DAY SECTIONS OF THE JOHN DAY HIGHWAY IN WHEELER AND GRANT COUNTIES
DOCKET NUMBER OREGON 1373-F, UNITS B AND D**

WHEREAS, bids received for the construction of the Butte Creek Summit-Branson Creek and Flat Creek-John Day Sections of the John Day Highway in Wheeler and Grant Counties have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Saxton, Looney & Risley, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Butte Creek Summit-Branson Creek and Flat Creek-John Day Sections of the John Day Highway in Wheeler and Grant Counties be and the same is hereby awarded to Saxton, Looney & Risley, contractor,

in the amount of Thirty-five Thousand Two Hundred Twenty-six and 20/100 Dollars (\$35,226.20), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE LAKEVIEW SECTION OF THE FREMONT AND KLAMATH FALLS-LAKEVIEW HIGHWAYS IN LAKE COUNTY - DOCKET NUMBER OREGON 1375-F, UNIT A

WHEREAS, bids received for the construction of the Lakeview Section of the Fremont and Klamath Falls-Lakeview Highways in Lake County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Saxton, Looney & Risley, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Lakeview Section of the Fremont and Klamath Falls-Lakeview Highways in Lake County be and the same is hereby awarded to Saxton, Looney & Risley, contractor, in the amount of Sixteen Thousand Nine Hundred Eighty-six and no/100 Dollars (\$16,986.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE GREENLEAF-CHESHIRE SECTION OF THE SIUSLAW HIGHWAY IN LANE COUNTY DOCKET NUMBER OREGON 1374-F, UNIT C

WHEREAS, bids received for the construction of the Greenleaf-Cheshire Section of the Siuslaw Highway in Lane County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Eugene Sand & Gravel Company, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Greenleaf-Cheshire Section of the Siuslaw Highway in

DEC 20 1938

Lane County be and the same is hereby awarded to Eugene Sand & Gravel Company, contractor, in the amount of Twenty-three Thousand Seven Hundred Eighty-seven Dollars (\$23,787.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE JUNTURA-CAIRO SECTION OF THE CENTRAL OREGON AND JOHN DAY HIGHWAYS IN MALHEUR COUNTY - DOCKET NUMBER OREGON 1373-F, UNIT E

WHEREAS, bids received for the construction of the Juntura-Cairo Section of the Central Oregon and John Day Highways in Malheur County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Chester T. Lackey, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Juntura-Cairo Section of the Central Oregon and John Day Highways in Malheur County be and the same is hereby awarded to Chester T. Lackey, contractor, in the amount of Fifty-three Thousand Five Hundred Six and 40/100 Dollars (\$53,506.40), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE SHAW JUNCTION-GATES PROJECT ON THE SILVER CREEK FALLS AND NORTH SANTIAM HIGHWAYS IN MARION COUNTY, - DOCKET NUMBER OREGON 1372-F, UNIT D

WHEREAS, bids received for the construction of the Shaw Junction-Gates Project on the Silver Creek Falls and North Santiam Highways in Marion County have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Edwin C. Gerber, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Shaw Junction-Gates Project on the Silver Creek Falls

and North Santian Highways in Marion County be and the same is hereby awarded to Edwin C. Garber, contractor, in the amount of Thirty-two Thousand Five Hundred Seventy-four Dollars (\$32,574.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

A RESOLUTION AWARDING THE CONTRACT FOR THE CONSTRUCTION OF THE GILLIAM COUNTY LINE-IONE AND HERMISTON PROJECTS ON THE OREGON-WASHINGTON HIGHWAY IN MORROW AND UMATILLA COUNTIES
DOCKET NUMBER OREGON 1373-F, UNITS A AND C

WHEREAS, bids received for the construction of the Gilliam County Line-Ione and Hermiston Projects on the Oregon-Washington Highway in Morrow and Umatilla Counties have been duly opened and read, in accordance with published notice, and compared,

AND WHEREAS, the bid submitted by Clifton & Applegate, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW, THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Gilliam County Line-Ione and Hermiston Projects on the Oregon-Washington Highway in Morrow and Umatilla Counties be and the same is hereby awarded to Clifton & Applegate, contractor, in the amount of Twenty Thousand One Hundred Sixty-one and no/100 Dollars (\$20,161.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

At 2:30 o'clock p. m. Chairman Cabell announced the award of contracts and sale of buildings as follows, bids for which were received at the morning session, the awards having been previously approved by the Commission by unanimous vote:

"Sisters and Horse Ridge-Brothers Section of the McKensie, Santian, McKensie-Bend, and Central Oregon Highways, in Deschutes County. Furnish 6,600 cubic yards crushed gravel and 12,700 cubic yards crushed rock in stock piles. Chester T. Lackey, Ontario, submitted the low bid for this project at \$23,134.00. A. S. Wallace, Roseburg, submitted the second low bid at \$24,642.00. There were 6 higher bidders. The Commission has awarded the contract to the low bidder, Chester T. Lackey, at his bid price of \$23,134.00.

"Butte Creek Summit-Branson Creek and Flat Creek-John Day

DEC 20 1938

Sections of the John Day Highway, in Grant and Wheeler Counties. Furnish 10,500 cubic yards crushed rock and 9,500 cubic yards crushed gravel in stock piles. 6 bids were received for this project, the low one being that of Saxton, Looney & Risley, Oak Grove, at \$35,226.20. The next low bid was submitted by R. O. Dail and Warren Bros., Inc., Portland, at \$35,794.00. The Commission has awarded the contract to Saxton, Looney & Risley, the low bidders, at their bid price of \$35,226.20.

"Lakeview Section of the Fremont and Klamath Falls-Lakeview Highways, in Lake County. Furnish 9,900 cubic yards crushed rock in stock piles. The low bid for this project was submitted by Saxton, Looney & Risley, Oak Grove, at \$16,986.00. The second low bid was submitted by E. C. Hall Company, Eugene, at \$17,340.00. The only other bid was submitted by Homer G. Johnson, Portland, at \$22,285.00. The Commission has awarded this contract to the low bidders, Saxton, Looney & Risley, at their bid price of \$16,986.00.

"Greenleaf-Cheshire Section of the Siuslaw Highway, in Lane County. Furnish 10,500 cubic yards crushed rock or crushed gravel in stock piles. Two bids were received for this project, the low one being that of Eugene Sand & Gravel Company, Eugene, at \$23,787.00, and the other one being that of Homer G. Johnson, Portland, at \$28,755.00. The Commission has awarded the contract to the low bidder, Eugene Sand & Gravel Company, at its bid price of \$23,787.00.

"Juntura-Cairo Section of the Central Oregon and John Day Highways, in Malheur County. 34.52 miles oiling; also furnish 16,600 cubic yards crushed rock and crushed gravel in stock piles. Chester T. Lackey, Ontario, submitted the low bid for this project at \$53,506.40. Morris Bros., Burlington, Washington, submitted the second low bid at \$54,295.20. There were 10 higher bidders. The Commission has awarded the contract to the low bidder, Chester T. Lackey, at his bid price of \$53,506.40.

"Shaw Junction-Gates Section of the Silver Creek Falls and North Santiam Highways, in Marion County. 1.8 miles grading; 1.8 miles surfacing; 5.58 miles oiling; and furnish 5,000 cubic yards crushed rock or crushed gravel in stock piles. The low bid for this project was submitted by Edwin C. Gerber, Oregon City, at \$32,829.00 based on the use of road oil, and \$32,574.00 based on the use of tar. The second low bid was submitted by R. O. Dail and Warren Bros., Inc., Portland, at \$38,434.00 based on the use of road oil and \$38,316.20 based on the use of tar. There were 3 higher bidders. The Commission has awarded the contract to Edwin C. Gerber, the low bidder, at his bid of \$32,574.00 based on the use of tar.

"Gilliam County Line-Ione and Hermiston Sections of the Oregon-Washington, Columbia River, Old Oregon Trail, Stanfield-Pendleton and Lexington-Echo Highways, in Morrow and Umatilla Counties.

Furnish 5,500 cubic yards crushed rock and 6,700 cubic yards crushed gravel in stock piles. 7 bids were received for this project, the low one being that of Clifton & Applegate, Spokane, Washington, at \$20,161.00. The next low bid was that submitted by A. S. Wallace, Roseburg, at \$20,899.50. The Commission has awarded the contract to the low bidders, Clifton & Applegate, at their bid price of \$20,161.00."

Buildings in Oregon City

"Building No. 3918, formerly owned by D. L. Trullinger. The Commission received 3 bids for the purchase of this building, the high one being that of C. H. Walter, Aurora, at \$139.00. The next high bid was that of M. E. and T. T. Barlow, Gladstone, at \$80.00. The Commission considers the offer of C. H. Walter satisfactory and accordingly has sold the building to him for \$139.00.

"Building No. 3042, formerly owned by Casadero Realty Company. The only bid received for this building was that of Sullivan Wrecking Company, Portland, at \$5.90. The Commission considers this offer satisfactory and accordingly has sold the building to the Sullivan Wrecking Company for \$5.90."

The Engineer reported on the proposed connection of the county road with the Mt. Hood Highway at a place known as Fike's Corner, south of Hood River, in Hood River County. He said that the County Engineer investigated several alternate routes for such connection and that the County Court has adopted what is known as Alternate Route No. 1, which connects with the present Mt. Hood Highway a short distance south of the existing connection, regardless of the state's plans for the construction of the proposed revision of the Mt. Hood Highway. The County plans, he said, to take a small quantity of material from the Mt. Hood Highway right of way in order to improve the sight distance at this curve. Chairman Cabell inquired if the construction of the county road on such alignment would increase the highway hazard and was informed by the Engineer that, in his estimation, the traffic hazard would not be increased. The Commission thereupon approved the Engineer's report and indicated that it would have no objection to the county proceeding with its plans for this new road.

The Secretary presented a letter from Mr. Lewis A. McArthur, President of the Oregon Historical Society, with respect to the request of the Eulalia Chapter, D. A. R., Klamath Falls, for permission to erect a monument on The Dalles-California Highway at old Fort Klamath, pointing out the location of this historical spot. It was Mr. McArthur's thought that the request of the D. A. R. should be approved and that the proposed location for the monument on the highway right of way, opposite the old fort barracks, should also be approved. In view of Mr. McArthur's recommendation, the Commission decided unanimously to permit the D. A. R. to erect its monument upon the

DEC 23 1938

location requested. The Secretary was instructed to inform Mrs. Ida O'Dell, Regent of the Eulalona Chapter, of the action taken. The Engineer was authorized to expend approximately \$300 to fill in the area in front of the monument to provide a parking place for automobiles off the traveled roadway.

The Attorney reported on his investigation of the ownership of the tunnels on the Robinette Secondary State Highway, as previously ordered by the Commission. He said that such investigation revealed that Baker County acquired the tunnels by deed from the railroad company when the railroad line between Robinette and Homestead was abandoned, but the county has not reconveyed them nor the balance of the right of way that it acquired from the railroad company, to the state. He gave as his thought, notwithstanding the fact that the county has not transferred its title to the state, that the state is responsible for the maintenance of the tunnels in view of the fact that the old railroad grade has been designated and is being maintained by the State Highway Department as a secondary state highway and that the state would be liable in the event that an accident occurred as a result of the use of the tunnels by the general public. In view thereof the Commission decided unanimously to barricade what is known as the Oxbow Tunnel so that it cannot be used by the public. The Engineer was accordingly instructed to erect suitable barricades and appropriate signs prohibiting the use of the tunnel and thereby relieving the Commission from responsibility in case of accidents.

The Engineer brought up for discussion the matter of snow removal on the North Santiam Highway. He recalled that the Commission at the previous meeting approved an expenditure for the removal of snow from the Santiam Highway between Suttle Lake and the junction with the North Santiam Highway and also approved similar operations on the North Santiam Highway from said junction point to the North Santiam River Bridge, a distance of about 6 miles, and beyond such point to Detroit, in the event that was necessary, and provided the cost would be paid by Marion County. However, since then the Marion County Court has asked the Commission to take full charge of the work of removing the snow on that portion of the North Santiam Highway that it is responsible for; that is, the 6-mile section just north of the Santiam Highway junction, because the county does not have suitable equipment to handle the work and has agreed to reimburse the state for the cost thereof. He gave as his thought that such arrangement is satisfactory and recommended approval of the same by the Commission. After discussion the Commission approved the arrangement as reported but ordered that the matter should be covered by appropriate agreement.

Consideration was given by the Commission to the matter of surfacing and oiling the Santiam Highway. The Engineer advised that the last contract for grading on this highway has been awarded and, in his estimation, provision should be made in the 1940 budget for surfacing and oiling, inasmuch as the road carries a large volume of traffic and, in the vicinity of Cascadia, is dangerous to travel in the summer because of the dust, which hazard will increase as soon as the entire road is opened for general public use. It was his thought that the surfacing work should start at Foster and proceed easterly, and accordingly he requested authority to resurvey the section from Foster to Bryant Hill, a distance of about 15 miles, in order

to determine approximately what it will cost to surface and oil this section. He estimated that such survey could be made for about \$7,500. The Commission approved the request by unanimous vote.

The Commission discussed the matter of renewing its agreement with Mr. F. C. Brown, Crystal, Oregon, relative to snow removal operations on the Klamath Lake Secondary State Highway, in Klamath County. The Commission, by unanimous vote, approved the renewal of this agreement on the same basis as heretofore.

The Engineer reported the award of the following contracts, bids for which were taken on November 17 and 18, 1938, the bids having been referred to him at that time with power to award the contracts to the low bidders when certain conditions were satisfied:

State Hospital-Ash Street Unit of the Pendleton Landscaping Project. Bids taken November 17, 1938, contract awarded on November 21, 1938, to Leonard & Slate, Multnomah, Oregon, who submitted the low bid therefor;

Rock production project on the Powers Ranch-Jacksonville Section of the Williams and Medford-Provolt Secondary Highways, in Jackson County. Bids taken November 18, 1938, contract awarded on November 23, 1938, to R. I. Stuart & Sons, Medford, who submitted the low bid therefor.

The Commission, by unanimous vote, confirmed the award of these contracts as reported.

The Commission considered and ordered filed in the department records a certificate received from the Copyright Office of the United States of America pertaining to the State Highway Department's bulletin entitled "Highway Spirals".

The Engineer requested authority to purchase the following equipment:

One $1\frac{1}{2}$ -yard power shovel to replace an old power shovel of the same size which is to be traded in as part payment on the new shovel - estimated cost to the state, \$15,000;

Six engineer's transits to replace six old transits that are approximately 20 years old, the old ones to be traded in as part purchase price on the new ones - estimated net cost to the state, \$2,100.

After discussion, the Commission approved the request by unanimous vote.

The Commission discussed and approved arrangements heretofore effected with the U. S. Forest Service for the removal of snow from the Timberline Lodge road leading from the Mt. Hood Highway, near Government Camp, to

DEC 20 1938

Timberline Lodge. An agreement with respect thereto was signed by the Commission later in the session.

The Attorney reported receipt of a request from Mr. Lester Rickard, Waldport, Oregon, for a permit authorizing him to maintain a sidewalk on state property just north of the sea wall at Waldport. He said that Mr. Rickard has already constructed his sidewalk and would like permission to let it remain on the state's property if the state does not object. He gave as his thought that it would be satisfactory to let Mr. Rickard maintain the walk in its present location as a temporary proposition until such time as the state needs the property for other purposes, and advised that the State Parks Superintendent, who is familiar with this matter, offers no objection thereto. The Commission thereupon approved Mr. Rickard's request and ordered that the matter be covered by an appropriate agreement or letter, the provisions of which Mr. Rickard is to accept in writing.

The Commission considered and denied the request of the Oregon Piling Company for permission to transport piling along a 2-mile section of the Wolf Creek Highway between Sunset Camp and the crossing of Wolf Creek. This action was taken by the Commission in view of its policy not to grant special privileges for hauling on this road until this section of the road has been opened for general public use, which it is anticipated will be some time in January of 1939.

The Commission considered and granted the request of Mr. E. S. Schwantes, Mosier, Oregon, to truck logs directly across the Columbia River Highway at its intersection with Center Street, in Mosier, provided Mr. Schwantes will maintain flagmen on the highway when logs are being hauled across, and will comply with the Commission's other standard rules and regulations with respect to such operations.

The Commission had under consideration the revised offer of the United States of America to contribute P.W.A. funds to aid in financing the construction of buildings at Suntex Junction and Brothers.

After discussion of the offer of the United States of America to aid by way of grant in financing the construction of the Suntex Junction and Brothers buildings, the following resolution, entitled "A Resolution Accepting the Offer of the United States to the State Highway Commission of the State of Oregon to Aid by Way of Grant in Financing the Construction of State Highway Buildings (Three Units at Brothers in Deschutes County and Three Units at Suntex in Harney County) and the Acquisition of Necessary Lands and Rights of Way Therefor", was proposed by Commissioner Tou Velle and read in full:

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF STATE HIGHWAY BUILDINGS (THREE UNITS AT BROTHERS IN DESCHUTES COUNTY AND THREE UNITS AT SUNTEX IN HARNEY COUNTY) AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the state highway buildings (three units at Brothers in Deschutes County and three units at Suntex in Harney County) and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 86013-45

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

Washington, D. C.,
Dated: Dec 8 1938
Docket No. Ore. 1245-F

"State Highway Commission of the
State of Oregon

Salem, Oregon.

"1. Subject to the Terms and Conditions (PWA Form No.230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of state highway buildings (three units at Brothers, Deschutes County, and three units at Suntex, Harney County), including the acquisition of necessary land (all herein called the "Project"), by making a grant to the State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$18,000.

"2. By acceptance of this Offer the Applicant covenants to complete the Project with all practicable dispatch, and in any event by March 6, 1939.

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

DEC 20 1938

"4. The acceptance of this Offer by the Applicant shall effectuate a cancellation of the contract created by the acceptance of the Offer dated July 19, 1938, made by the United States of America to the Applicant: Provided, that the cancellation of such contract shall not impair or vitiate any acts performed or proceedings taken thereunder prior to such cancellation, but such acts or proceedings may be continued under the contract created by the acceptance of this Offer.

"UNITED STATES OF AMERICA

Federal Emergency Administrator
of Public Works

By (Sgd.) H. A. Gray
Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all Terms and Conditions relating to such grant, a copy of which Terms and Conditions were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible, but in no event later than twelve weeks from the date of this Offer; and to complete the work with all practicable dispatch, and in any event by March 6, 1939.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon, be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

The resolution was duly seconded by Commissioner Aldrich and was adopted with the following voting "Yes":

Chairman Henry F. Cabell
Commissioner E. B. Aldrich
Commissioner F. L. Tou Velle

The Chairman thereupon declared said resolution carried.

The Engineer requested authority for Division Engineer F. D. Eason to attend, at state expense, the Annual Meeting of the Asphalt Institute which

DEC 20 1938

is to be held in Los Angeles, California, in February 1939. He explained that Mr. Eason has been asked to read a paper on bituminous macadam construction at this meeting. The Commission approved the request by unanimous vote subject to confirmation by the Governor.

The Engineer also requested authority for Mr. Harold B. Say to go to Los Angeles during the early part of January, 1939, at state expense, to supervise cutting and editing of the Highway Department's motion picture film which is to be used at the Oregon exhibit at the San Francisco World's Fair, and for general publicity purposes throughout the nation. He estimated Mr. Say's expense for this trip would not exceed \$150.00. The Commission approved the request by unanimous vote, subject to confirmation by the Governor.

The Engineer reported receipt of information from Mrs. Jessie M. Honeyman, President of the Oregon Roadside Council, to the effect that the council expects to secure funds from the Rockefeller Foundation with which to finance some landscaping work along state highways, and has asked the State Highway Commission to assist in the matter. He advised that the money, if and when received, could be spent to good advantage for landscaping work along the Oregon Coast Highway, and suggested that the matter be followed up and the money accepted if the conditions of the grant are satisfactory. The Commission approved the suggestion by unanimous vote.

A letter was presented from County Commissioner E. G. Anderson, Tillamook County, urging the widening of the bridge on the Oregon Coast Highway at East Beaver Cheese Factory, 13 miles south of Tillamook, as a traffic safety measure. The Engineer advised that there has been included in the 1939 Minor Betterment Budget an item of \$2,500 for the widening of this structure for a 26-foot roadway. The Commission thereupon approved the project and ordered that Commissioner Anderson be so informed, and advised that the work will be done during the next construction season.

A letter from W. A. Johnson, Corbett, Oregon, relative to the sale of merchandise by the concessionaire in the Vista House, at Crown Point, was considered by the Commission and referred to the State Parks Superintendent for investigation and report.

A petition was presented from the Affiliated Clubs of the Peninsula, Portland, and a letter from the Board of County Commissioners of Multnomah County, endorsing the same, in which the Commission was asked to grant the Affiliated Clubs a hearing on the matter of paving the parking strips on both sides of Lombard Street, in Portland. The Commission instructed the Secretary to inform the petitioners that the Commission will be glad to grant them a hearing at its next regular meeting. The Engineer was instructed to prepare an estimate of cost to do the work requested.

The Commission considered and denied the request of County Judge Hugh McLain, Coos County, for the state to furnish powder in connection with the improvement of the county road which extends northerly from the end of the Coos River Secondary Highway, at Golden Falls State Park, in Coos County.

DEC 20 1938

A petition was presented from residents of Pendleton requesting that the flashing-type traffic signals that have been installed at the intersections of Main and Blaine Streets with East Court Street in Pendleton be changed to the "stop"- and "go"-type signals. The Traffic Engineer advised that the type of signal now installed meets the national standards for roads and streets carrying the volume of traffic that East Court Street carries, and, in his estimation, the extra expense of installing "stop" and "go" signals at this time is not justified. He recommended denial of the request, at least until such time as the existing signals have been given a thorough trial. The Commission approved the recommendation unanimously.

A petition was presented from citizens of Yamhill and Washington Counties requesting the construction of a surface binder on State Road No. 219 (Secondary State Highway No. 140) between the end of the present hard-surfaced section north of Newberg to a connection with State Road No. 210, at Scholls. The Engineer advised that this section is about 8 miles in length and that it would cost about \$36,000 to construct an oil surface on the same, as requested. He further advised that the alignment of the road is satisfactory for a road of this class; furthermore, the road is eligible for federal aid secondary highway funds. In view of the report, the Commission decided to give the project consideration in the formulation of its program for federal aid secondary highway funds.

The Commission discussed the letter from Mr. George Hibbert, City Manager, Milton, Oregon, urging the Commission to make provision in its 1939 construction program for the widening of the Oregon-Washington Highway through the town of Milton. The Commission ordered that this project also be included in the list of those for consideration in the formulation of the 1939 construction program.

The Secretary presented a letter from Mr. F. W. White, Eugene, urging the designation of the old Pacific Highway route between Junction City and Eugene as U. S. Highway No. 99E and the designation of the new route of the Pacific Highway between these points as U. S. Highway No. 99W. The Secretary was instructed to advise Mr. White that the designation of U. S. highway routes is made by the American Association of State Highway Officials and that it is contrary to the policy of such association to approve the designation of alternate routes for U. S. numbered highways, hence it is necessary to deny his request.

Letters were presented from Jewell Grange No. 876, Jewell, Oregon, and Vernonia Grange No. 652, Birkenfeld, Oregon, urging the Highway Commission to budget sufficient funds in its 1939 construction program for surfacing and oiling the Nehalem Secondary Highway between Jewell and Mist. The Engineer advised that the tentative construction program for 1939 contains an item of \$71,000 for the oiling of this highway between the points mentioned and it is his thought that such amount would finance the improvement from Jewell to approximately Birkenfeld. Furthermore, the Commission has also tentatively budgeted for 1939 expenditure an item of \$30,000 for the Mist-Clatskanie Secondary State Highway. The Secretary was instructed by the Commission to convey

such information to the petitioners and to advise them further that that is all the money the Commission is able to allocate to that district this year.

A letter was presented from Mr. Karl L. Janouch, Forest Supervisor, Rogue River National Forest, requesting permission to construct a footbridge across Union Creek on the Crater Lake Highway right of way in Jackson County. In the discussion of this matter the question arose whether or not the type of the proposed footbridge would harmonize with the aesthetic features of the highway and if the location of the proposed structure is satisfactory from the highway standpoint. In view of this, the Commission deferred its decision pending reports from the Bridge Engineer and the State Parks Superintendent. The Engineer was instructed to secure such reports for consideration at the next meeting.

The Commission considered and denied the claim of George F. Kufner, Portland, for reimbursement for the cost of certain pavement construction in front of his premises on Interstate Avenue, Portland. Mr. Kufner alleges that Interstate Avenue was paved full width in front of his premises a number of years ago, whereas certain strips adjacent thereto were left unpaved. It was his thought that the Commission should reimburse him for his expense because of the fact that the state has paid for the paving of the unpaved portions under a recent contract. The Commission considered that it is under no obligation to reimburse Mr. Kufner for his expense, hence denied the request.

A letter was presented from Mr. J. H. Hildreth, Scio, Oregon, requesting that the old bridge on the Albany-Lyons Secondary State Highway, in Linn County, known as the Schindler Bridge, which is being replaced by a new structure, be left in place for his personal use when the new bridge is completed. This matter was discussed by the Commission at considerable length and the Commission finally decided to grant the request in the event that Linn County will assume the responsibility for maintaining the old structure, and liability in case accidents should occur on the same. Further, in the event the county will not assume such obligations, then the bridge is to be taken down in accordance with the original plan, and the old road abandoned as a state highway. The Engineer was instructed by the Commission to ascertain the attitude of the Linn County Court in regard thereto.

A letter was presented from Mr. Charles D. Vail, President of the Western Association of State Highway Officials, suggesting the scheduling of contract lettings in the month of March, 1939, so as not to interfere with the annual meeting of the American Road Builders Association which is to be held March 7 to 10, 1939. The Secretary was instructed to inform Mr. Vail that the Commission will be glad to consider his request and comply with same if at all possible.

The Commission discussed a letter from Mr. Edwin Ingles, Comptroller, Pacific University, in which request is made for permission to attach finger-board signs on certain highway department signposts in Forest Grove, directing the traveling public to Pacific University, which is located nearby.

The Traffic Engineer advised that he could see no objection to granting this request if the state made the signs. The Commission thereupon approved the request and instructed the Engineer to contact Mr. Ingles in regard thereto.

The Commission discussed the claim of Mr. H. U. Martin, The Dalles, arising out of an accident which occurred on the Pacific Highway at its junction with the North Albany County Road. It appears that Mr. Martin drove his car onto the Pacific Highway from the county road without stopping and, unfortunately, had a collision with a car on the Pacific Highway, causing damages amounting to \$1,040.06. Mr. Martin alleges that the "stop" sign at the junction of the county road with the highway was hidden by weeds and brush and he was not aware that it was necessary for him to stop before entering the highway, and for this reason it is his belief that the state should reimburse him for his expense, it being his contention that he was not properly warned. The Engineer advised that the conditions at the scene of the accident have been thoroughly investigated and it was found that the "stop" sign referred to by Mr. Martin is in excellent condition and is not hidden as alleged by him. Furthermore, there is approximately 1,000 feet sight distance on the highway in each direction from the county road junction. He gave as his thought that the state is in no way to blame for the accident and that Mr. Martin's claim should be denied. After considerable discussion, in which it was brought out that the conditions at the intersection are exactly the same as they were before the accident occurred, indicating clearly that the "stop" sign was not hidden from view, the Commission denied the claim.

Letters were presented from Messrs. Ira Young and W. E. Watson, Scio, Oregon, requesting the oiling of the Albany-Lyons Secondary State Highway to allay the dust that creates a hazard during the dry season. The Engineer advised that it will cost approximately \$25,000 to oil the 2.7-mile section of this highway between the Santiam Highway junction and Crabtree, which is the section that the petitioners particularly have in mind. The Commission decided to consider this project in the formulation of its federal aid secondary highway program.

The Commission considered a letter from Mr. W. S. Nelson, Manager of The Dalles Chamber of Commerce, requesting state cooperation in the filling-in of the low ground between the Columbia River Highway and the site of the city's proposed civic building near the west city limits of The Dalles, which filling-in will require approximately 500 cubic yards of material. The Engineer advised that there are no fill materials available in this vicinity and if the Commission should desire to approve this request it would be necessary to haul materials from considerable distance, which would be quite costly. The Commission thereupon denied the request.

Numerous letters from city officials and others of Pendleton, Milton, Weston, Walla Walla (Washington), and vicinity, requesting the oiling of the Weston-Elgin Secondary State Highway between Weston and Langdon Lake, had the attention of the Commission. The Secretary was instructed to inform the petitioners that an amount of \$45,000 has been set up in the 1939 Forest Highway Program for the oiling of the section west from Langdon Lake to the Forest

Boundary and that the Commission will consider a further allocation in the formulation of its 1939 construction program, although such consideration does not carry with it a definite commitment or promise.

A petition was presented from residents of Jrescent Lake and vicinity, Klamath County, requesting improvement of the county road extending south-erly from the Willamette Highway to Crescent Lake. The Secretary was in-structed to inform the petitioners that a tentative allocation of \$50,000 of forest highway funds has been made for the construction of a section at the north end of the Cascade Lakes Forest Highway, of which highway the Crescent Lake Road is a unit, and that the Commission feels that such allocation is all that it can make to this particular highway this year, so the improvement requested will have to be deferred until some future date.

A letter was presented from Mr. Loyal M. Graham, Forest Grove, urg-ing the Commission to adopt the proposed new route of the Tualatin Valley Highway on "B" Street, in Forest Grove, and to adopt also the route for the proposed highway connecting the Tualatin Valley Highway, at Seventh Street, with the Gales Creek Road; also, to acquire right of way for such projects. The Secretary was instructed to inform Mr. Graham that the Commission regrets its inability at the present time to comply with his request, due to shortage of funds, it being strictly contrary to the Commission's established policy to select routes or acquire rights of way for the same until the Commission is ready to construct them.

The Commission considered and ordered filed a letter from the Klam-ath County Chamber of Commerce recommending certain projects for the fiscal year 1940 forest highway program. (Projects recommended were considered by the Commission in its discussion with the government officials on the previous day relative to programming of the forest highway funds.)

A letter was presented from the City of Lakeview requesting the placing of warning signs or lights at the crossing of the Klamath Falls-Lakeview Highway with the railroad at the west entrance into Lakeview. A let-ter was also presented from the City of Grants Pass requesting the installa-tion of sodium vapor lights at certain street intersections. Due to the late-ness of the hour and the importance of this subject, the Commission deferred its decision until the next meeting.

A petition was presented from residents of Tillamook County request-ing the construction of a sidewalk on the bridge over Trask River, located on the Oregon Coast Highway about 2 miles south of Tillamook. The Assistant Engineer explained that when this bridge was constructed brackets were in-stalled to facilitate sidewalk construction at some future date. He estimat-ed the cost to build the sidewalk at \$1,600, and recommended the expenditure. The Commission approved the recommendation by unanimous vote and ordered that the expense be charged against the Primary Highway Betterment Budget.

The Secretary presented a resolution from the Deschutes County Court offering county cooperation in the amount of \$5,000 as an aid in

financing the improvement of the Butler County Road northeasterly from Bend, in Deschutes County. The Commission took no particular action on this matter except to reaffirm its willingness to give this project consideration in the formulation of its next federal aid secondary highway program.

The Commission considered and denied the request of residents of Umatilla County for the construction of a stock driveway along the Weston-Elgin Secondary Highway from the junction with the Linneton Mountain County Road, 16 miles east of Weston, to the intersection of the government stock driveway, 1/2 mile west of the Tollgate Ranger Station, it being the experience of the Commission that such stock driveways are not of much value in view of the fact that the movement of stock in large numbers takes place during the seasons of the year when it would not be possible to use the driveways were they provided, necessitating the use of the highway as if no stock driveway existed.

The Secretary presented a resolution from the Seaside City Council urging the acquisition of right of way needed for the proposed rerouting of the Oregon Coast Highway on an extension of Roosevelt Drive in the southern part of Seaside, so as to expedite the rerouting of this highway. The Engineer advised that the Commission has already acquired right of way across the property owned by the City of Seaside and Clatsop County, but there is considerably more to be purchased from private owners, which will cost the state a considerable sum of money in view of the fact that the properties have been improved. Due to the expense involved, the Commission decided not to acquire this right of way at the present time, funds available to the Commission being more urgently needed for other purposes.

The Commission had under discussion a letter from the Wallowa County Court inquiring as to the possibilities of effecting arrangements with the state for snow removal on the county road which extends from the Wallowa Lake Hotel to the homes of the employees of the Pacific Power and Light Company, a distance of approximately 1/2 mile. It appears that unless the state will assume the responsibility of such snow removal operations, the company's employees will not have ingress to and egress from their homes during the winter season. The Commission expressed regrets that it could not help out in this matter due to its established policy, which will not permit the use of state equipment for such purposes. Furthermore, the Commission does not have legal authority to perform such operations on county roads at state expense.

The Commission had under discussion the matter of adoption of standards for service driveways connecting with state highways, and, in this connection, the Assistant Highway Engineer presented drawings showing typical entrance driveways of this type, together with instructions, as follows, which he suggested should apply hereafter to all applications for such driveways:

The following instructions apply to all new applications for service drives on state highway rights of way for those types of business located adjacent to the highways which are engaged in serving the motoring public. The highways fall in the following categories:

1. Highways which have been recently constructed or are now under construction and which are now being or have been landscaped. Particular attention should be given to see that the following instructions are immediately complied with on highways of this category.

2. Highways alongside which service stations and other wayside stands have been built to conform with the Commission's setback ruling providing that the service to the public be made entirely off the highway right of way. In many cases the entrance drives are not built in conformity to these standards and plans should be undertaken, after discussion with the Division Engineer, to correct these conditions within a reasonable period of time.

3. On the older highways there are many service stations and wayside stands fronting directly upon the highway, in which case the vehicles being serviced occupy the right of way. Under such circumstances, it is impossible to make the corrections in the driveways illustrated by the attached diagrams. However, if and when plans are made for the erection of new structures, the owners should be contacted and required to conform with the standard plan.

If any difficulty develops with the property owners relating to conforming with these standards, please take the matter up immediately with the Division Engineer.

Driveways will be allowed on state highway R/W when approved by the Engineer, but such driveways shall conform to the following restrictions:

1. Each driveway or entrance shall be confined within the boundaries of a 25' maximum distance measured parallel to the highway center line and between lines drawn at right angles to the said center line and tangent to the turnout curves.

In no case shall more than one-half ($12\frac{1}{2}'$) of the 25' area lie in front of the adjacent property.

2. In the selection of drive entrances from state highways into private properties, considerable care should be used to protect the existing highway as concerns maintenance and roadside beauty.

3. Drive entrances should logically fall, as nearly as possible, equally between existing trees so that the root growth of the trees will not be smothered by fills or roadway construction, or so that the upper branches of the trees are not endangered by trucks and other equipment using the drives in question.

DEC 20 1938

4. In the case of a single entrance drive, the minimum radius shall be 10' and the maximum radius 15'.

5. In the case of a service station or other double entrance driveway, the inside radius shall be a 10' minimum and the outside radius variable up to a 25' maximum.

6. In the case of a single entrance on two streets or highways (triangles and intersections) the minimum and maximum radii shall be the same as in the case of the double entrance described above.

7. No rocking will be permitted on areas other than the approved drive areas. The areas not rocked are to be improved by plantings as the landscape engineer may arrange on sections of highways which have been landscaped. Specific instructions will be given in other locations.

8. The construction of driveways when approved shall be performed by the owner of the property, or at his expense, and shall conform to the grades and lines to be set by the Highway Commission representative. Adequate provision shall be made for drainage. No wood plank boxes or bridges will be permitted. Standard concrete or corrugated iron culverts shall be installed of a size necessary to meet the needs, but in no case less than 12" diameter pipe. When long lengths of pipe are installed, concrete catch basins of a standard design will be mandatory, if in the opinion of the engineer, they are needed to collect and carry off the surface water.

The Assistant Engineer explained that the drawings and instructions have been approved by Mr. R. H. Baldock, State Highway Engineer, Mr. John Beakey, Traffic Engineer, and Mr. George Otten, Landscape Engineer, and that it was Mr. Baldock's recommendation that they be adopted by the Commission as standards for the State Highway Department. After discussion and careful study, the Commission approved and adopted such drawings and instructions as standard for such class of construction.

The Engineer brought up for discussion the matter of installing traffic signals on Interstate Avenue and on Sandy Boulevard, in Portland. He estimated the cost of such installation on Sandy Boulevard at \$12,785.77, of which the state's share would be 50 per cent, or \$6,392.89; and that on Interstate Avenue at \$11,173.88, of which amount the state's share would be 50 per cent, or \$5,586.94, making a total of \$11,979.83 as the state's share for both projects. The estimate for Sandy Boulevard, he said, includes the installation of lights from 16th Street to 42nd Street, and that on Interstate Avenue includes the lighting of this street throughout its entire length. In addition to such expense, he added, there would be an item of \$1,600 for the construction of safety islands on Sandy Boulevard, of which the state's share

would be approximately \$800.00. He suggested also the installation of signals on East Burnside Street from Union Avenue to 12th Avenue, which would cost about \$15,500, of which the state's share would be 50 per cent, or \$7,750.00.

In the discussion of this matter it was brought out by Chairman Cabell that the Commission, when it agreed to cooperate with the City of Portland to pay one-half the cost of installing traffic signals on Portland city streets, did not intend that all of the work should be done in one year or at any one time, so there is a question as to how far the Commission should go now. It was his thought that, whatever is done, the state should have charge, rather than the city, and that the entire matter should be covered by appropriate agreement between the city and the state. After further discussion, the Commission by unanimous vote tentatively approved the plans for the installations and decided that the work should be done by contract, although no contract will be awarded until a satisfactory agreement has been made with the City of Portland with respect thereto. The Assistant Engineer was instructed to confer further with the city officials on this subject in an endeavor to iron out certain differences.

The matter of authorizing the termination of the insurance furnished by the Oregon-American Lumber Corporation covering its logging operations across the Wolf Creek Highway, at Highway Engineer's Stations 813 and 845, had the attention of the Commission. The Assistant Engineer advised that the company has completed its operations and that the cleaning up of the premises, as provided in the agreement between the company and the state, has been done by state forces, and the company has been billed for such expense. He recommended, in view of the circumstances, that the company be allowed to terminate the insurance on its anniversary date, January 19, 1939. The Commission approved the recommendation unanimously.

The Assistant Engineer reported that, in accordance with authority previously granted by the Commission, he has ordered certain surveys since the last meeting. He submitted a list of such surveys and asked the Commission to approve them. After due consideration, Commissioner Aldrich moved that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Location	-	1-2812 - Flagstaff Hill-Middle Bridge Section, Baker-Homestead Highway	1st authorization \$6,100.00
Plans	-	1-2814 - Summit-Baker-Unity Junct. Section, Baker-Unity Highway	1st authorization \$600.00
Bench Marks	-	2-2815 - Corvallis-Monmouth Section, Pacific West Highway	1st authorization \$ 75.00
Plans	-	107-2816 - Willamette River Bridge, Corvallis-Eastside Sec. Hwy.	1st authorization \$400.00

DEC 20 1938

Location - 102-2814 - Wren-Pedee Section, Kings Valley Secondary Highway
2nd authorization \$1,320.00
Total to date \$3,120.00

Location - 203-2818 - Timberline Lodge-Mt. Hood Highway Section, Timberline Road.
1st authorization \$2,500.00

Location - 3-2801 - Oregon City Section, Pacific East Highway
6th authorization \$5,400.00
Total to date \$14,400.00

Section Ties - 4-2817 - Wolf Creek and Hamlet Junct., Oregon Coast Highway
2nd authorization \$ 135.00
Total to date \$ 285.00

Bridge - 4-2822 - Black Bridge over Necanicum River, Oregon Coast Hwy.
1st authorization \$ 100.00

Right of Way - 5-2814 - Warren-Scappoose Section, Columbia River Highway
1st authorization \$2,000.00

Bridge and Right of Way - 7-2808 - Crooked Creek-Prineville Section, Ochoco Highway
2nd authorization \$ 200.00
Total to date \$ 800.00

Plans - 9-2822 - Horse Ridge-Brothers Section - Central Oregon Highway
1st authorization \$ 200.00

Roadside Improvement - 10-2823 - N. Entrance to Roseburg, Pacific Highway
1st authorization \$ 300.00

Location and Plans - 11-2807 - Blalock-Arlington Section, Columbia River Highway
2nd authorization \$1,500.00
Total to date \$2,500.00

Quarry - 12-2812 - Flat Creek-John Day Section, John Day Highway
2nd authorization \$ 250.00
Total to date \$ 570.00

Quarry - 13-2806 - Buchanan Ranch-Juntura Section, Central Oregon Hwy.
1st authorization \$ 500.00

Quarry - 14-2812 - Cold Springs Creek-Neil Creek Section, Mt. Hood Hwy
2nd authorization \$ 75.00
Total to date \$ 425.00

Location - 14-2810 - Hood River-Mosier Section, Columbia River Highway
4th authorization \$ 700.00
Total to date \$12,400.00

Bridge - 217-2808 - Waldo-Happy Camp Junction, Waldo-Holland County Rd.
1st authorization \$ 600.00

Bridge - 217-2808 - Waldo-Happy Camp Junct., Waldo-Holland County Road
 2nd authorization \$ 400.00
 Total to date \$1,000.00

Plans - 218-2825 - Poe Valley Section, Bonanza-Malin County Road
 2nd authorization \$1,200.00
 Total to date \$2,700.00

Bridge - 18-2832 - Olene-Dairy Section, Klamath Falls-Lakeview Highway
 1st authorization \$ 300.00

Plans - 18-2833 - Devils Garden-Quarts Mountain Section, Klamath
 Falls-Lakeview Highway-1st authorization \$1,000.00

Location - 220-2832 - Walton-Veneta Section, Eugene-Florence, Route "F"
 1st authorization \$9,800.00

Recon. - 20-2831 - Salt Creek-Lookout Point Section, Willamette Highway
 3rd authorization \$ 500.00
 Total to date \$2,000.00

Plans - 20-2833 - Aubrey-Eugene Section - Pacific Highway
 1st authorization \$ 700.00

Right of Way - 21-2825 - Ocean Lake-Taft Section, Oregon Coast Highway
 1st authorization \$ 900.00

Plans - 121-2826 - Newport Junction-Siletz Section, Siletz Secondary
 Highway
 1st authorization \$ 800.00

Quarry and Stock Pile - 22-2817 - Lebanon-Foster Section - Santiam Highway
 1st authorization \$ 150.00

Right of Way - 122-1965 - Brownsville Section, Halsey-Sweet Home Secondary
 Highway
 1st authorization \$ 240.00

Recon. - 23-2816 - Baker County Line-Ontario Section, Old Oregon
 Trail
 1st authorization \$1,000.00

Plans - 124-2814 - Shaw Junction-Gates Section, North Santiam Highway
 2nd authorization \$ 500.00
 Total to date \$ 600.00

Plans - 24-2820 - Salem Shops -
 1st authorization \$ 100.00

Drainage - 224-2820 - Deaf School Section -
 1st authorization \$ 100.00

Location and Plans - 224-2821 - McNary Junction-Keiser School, Wheatland Ferry
 County Road
 1st authorization \$1,200.00

DEC 20 1938

Plans	- 127-2813 - Independence Section - Independence Secondary Hwy.	1st authorization \$ 50.00
Quarry	- 28-2805 - Moro-Wasco County Line Section, Sherman Highway	2nd authorization \$ 175.00
	Total to date \$ 375.00	
Plans	- 232-2806 - Enterprise-Joseph Section, Hurricane Creek County Road	2nd authorization \$ 365.00
	Total to date \$1,535.00	
Plans	- 34-2820 - Onion Flat Section, Pacific Highway West	1st authorization \$ 250.00
Signals	- 36-2821 - Tillamook Junction, Pacific West and McMinnville-Tillamook Highways	1st authorization \$ 200.00
Plans	- 36-2816 - Lafayette Section - Pacific West Highway	2nd authorization \$ 25.00
	Total to date \$3,625.00	

The motion was duly seconded by Commissioner Tou Velle and was declared by Chairman Cabell to have carried by the unanimous vote of the Commission.

The Engineer also reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each survey listed thereon. After due consideration, the Commission approved the respective surveys as reported, and adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying location map file numbers, as shown in the map filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highway involved:

<u>File No.</u>	<u>Prefix</u>	<u>County</u>	<u>Type of Survey</u>	<u>Section</u>	<u>Highway</u>
5B7-2	204-2816	Clatsop	Reconn.	Saddle Mountain	Saddle Mt. Park Rd.
5B15-1	4-2803	Clatsop	Location	Astor St.-Comm'l St.	Oregon Coast (Astoria)
5B19-20	6-2810	Coe	Location	Marshfield-Coquille	Oregon Coast
5B18-24	106-2811	Coe	Location	Charleston-Cape Arago-Cape Arago	Secondary
5B11-22	7-2803	Crook	Location	Mill Cr.-Marks Cr.	Ochoco Highway
5B18-2	8-2808	Curry	Location	Brookings	Oregon Coast
5B18-2	8-2809	Curry	Location	Brookings	Asalea Park Rd.
5B18-3	10-2817	Douglas	Prelim. Survey	Oakland-Roseburg	Pacific
5B11-21	12-2811	Grant	Location	John Day	John Day
8C26-18	4-2818	Clatsop	Reconn.	Cannon Beach Junct.-Cannon Beach	Oregon Coast
5B19-11	15-2817	Jackson	Location	Bear Canyon-State Line	Pacific
* * *	16-2806	Jefferson	Location	Madras-Terrebonne	The Dalles-California
5B19-8	17-2802	Josephine	Location	Grants Pass-Green Cr.	Pacific
5B18-23 & 5B13-11	18-2815	Klamath	Location	Crooked Cr.-Modoc Pt.	The Dalles-California
5B20-8	20-2831	Lane	Reconn.	Salt Cr.-Lookout Pt.	Willamette
5B20-9	25-2806	Morrow	Location	Boardman-Stanfield	Old Oregon Trail
5B12-10	226-2830	Multnomah	Location	Lombard St.-Killingsworth St.	Columbia Blvd.
5B20-10	30-2819	Umatilla	Location	Pilot Rock	Oregon-Washington
* 5B18-10 & 11 * 5B19-4 & 5 * 5B18-22					

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

DEC 20 1938

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Roy L. Houck, Contract No. 2014, for grading, surfacing, and construction of bituminous macadam on the North Powder-Muddy Creek Section of the Old Oregon Trail, in Baker County, requested an additional extension of time, from September 20 to October 7, 1938, within which to complete this job. He gave no reasons for failure to complete the job within the extended time limit. The Engineer advised that the contract provided for the completion of this job by August 31, 1938, but it was extended by the Commission without penalty to September 20, 1938, because of delays resulting from the destruction of the contractor's plant by fire. He further advised that there is no good reason why the contractor could not have finished the project within the extended time limit if he had moved his crushing plant onto the project earlier, the facts being that several months elapsed after the award of the contract before actual crushing work was commenced. He recommended, in view of the circumstances, that the extension now requested be granted but that the contractor be charged for the engineering costs incurred by the state subsequent to September 20, 1938. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

Harold Blake, Contract No. 2035, for paving the Ross Station-Arward Section of the Pacific Highway, in Lane County, requested an additional extension of time, from August 13 to October 17, 1938, within which to complete this job. His failure to complete the project within the previously-extended time limit, he said, was due to the necessity of replacing certain panels in the concrete pavement. The Engineer advised that the original date of completion specified in the contract was July 31, 1938, but it was extended by the Commission to August 13, 1938, under the condition that the contractor reimburse the state for engineering expense incurred subsequent to the specified date of completion. He further advised that the contractor's statement as to the necessity for the additional extension of time is correct. He recommended, in view of the fact that the contractor was put to heavy expense in replacing the defective pavement, which was done without cost to the state, that the extension now requested be granted without further penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

River Bend Sand & Gravel Company, Contracts Nos. 2064 and 2069, for landscaping the Pringle Creek-Taylor Creek Section of the Pacific Highway, in Marion County, and the landscaping of the McMinnville Section of the Pacific Highway West, in Yamhill County, respectively, requested extensions of time until December 15, 1938, within which to complete both of these jobs. They alleged that

their failure to complete the projects within the specified time limit was due to the fact that there was insufficient moisture in the ground for the planting of shrubbery, and conditioning of the ground for the planting of grass; also to the necessity for the placement of top soil on the shearboard slopes. The Engineer advised that the reasons given by the contractor for failure to complete both contracts within the specified time limits are correct, the weather being dry, which prevented the seeding and planting work in accordance with instructions of the Landscape Engineer. He recommended, in view of the circumstances, that the extensions of time requested for both contracts be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

E. H. Itschner, Contract No. 2070, for grading and oiling the Baker-Flagstaff Hill Section of the Baker-Homestead Highway, in Baker County, requested an extension of time of 12 days, from September 30 to October 12, 1938, within which to complete this job. He gave no reasons for his failure to complete the project within the specified time limit but alleged that the delay was caused by conditions beyond his control. The Engineer advised that the contractor's failure to complete this project on time was solely a result of his not starting the work soon enough after the contract was awarded. He recommended, in view thereof, that the extension now requested be granted but that the contractor be required to reimburse the state for the extra engineering expense incurred subsequent to the specified date of completion. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

M. C. Lininger & Son, Contract No. 2074, for landscaping the Bear Creek-Ashland Section of the Pacific Highway, in Jackson County, requested an extension of time from October 31 to November 15, 1938, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to dry weather conditions which made it unsuitable for the planting of shrubbery. The Engineer advised that the contractor completed all of the work in connection with this project except the planting, before October 1, 1938, but, on account of the dryness, the planting of the shrubs had to be deferred until later. He recommended, in view of the fact that the contractor was not responsible for the delay, that the extension of time now requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

Kern & Kibbe, Contract No. 2096, for paving the Sandy Boulevard Section of the Columbia River Highway, in Multnomah County, requested an extension of time from September 30 to October 19, 1938, within which to complete this job. They alleged that their failure to complete the job within the specified time limit was due

DEC 20 1938

to interference caused by the Portland railway busses. The Engineer advised that all of the work contemplated in the contract, except the placing of the asphaltic resurface, was completed within the specified time limit and the reason that the resurfacing work was not completed sooner was because the contractor was considerably handicapped by the large amount of traffic on this street. He further advised that the delay did inconvenience traffic to some extent and the state incurred some extra expense for engineering supervision. Nevertheless, he recommended that the extension of time requested be granted subject to the condition that the contractor reimburse the state in an amount equal to the amount of the extra engineering expense incurred subsequent to the specified date of completion. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Contracts Nos. 1949, 2014, 2064, 2069, 2070, 2074, 2096, 2104, and 2107, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 1949, with Coos Bay Construction Company, for grading the Elsie-Nehalem River Section of the Wolf Creek Highway, in Clatsop County. Completed October 1, 1938.

Contract No. 2014, with Roy L. Houck, for grading, surfacing, and bituminous macadam on the North Powder-Muddy Creek Section of the Old Oregon Trail Highway, in Baker County. Completed October 7, 1938.

Contract No. 2064, with the River Bend Sand & Gravel Company, for roadside improvement on the Pringle Creek-Taylor Creek Section of the Pacific Highway, in Marion County. Completed November 14, 1938.

Contract No. 2069, with River Bend Sand & Gravel Company, for roadside improvement on the McMinnville Section of the Pacific Highway West, in Yamhill County. Completed November 29, 1938.

Contract No. 2070, with E. H. Itschner, for grading and oiling and producing crushed gravel in stock piles on the Baker-Flagstaff Hill Section of the Baker-Homestead Highway, in Baker County. Completed October 12, 1938.

Contract No. 2074, with M. C. Lininger & Son, for roadside improvement on the Bear Creek-Ashland Section of the Pacific Highway, in Jackson County. Completed November 9, 1938.

Contract No. 2096, with Kern & Kibbe, for paving the Sandy Boulevard Section of the Columbia River Highway, in Multnomah County. Completed October 19, 1938.

Contract No. 2104, with Erwin E. Batterman, for remodeling a portion of the State Office Building, in Salem, Marion County. Completed October 31, 1938.

Contract No. 2107, with the Mountain States Construction Company, for paving the Molalla Section of the Woodburn-Mt. Hood Secondary Highway, in Clackamas County. Completed November 12, 1938.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission had under consideration the setting of a date for its next regular meeting for the receiving of bids on highway construction projects, and decided to hold such meeting on Thursday, January 26, 1939. It was also decided to hold a special meeting of the Commission, for the disposal of routine matters, in Salem, on Friday, January 13, 1939. The Secretary was instructed to make the usual arrangements to hold the January 26th meeting in the Auditorium of the Public Service Building, Portland.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Pacific Power and Light Company extending previous agreement dated March 10, 1921, relative to maintenance of company's poles on the Youngs Bay Bridge on the Oregon Coast Highway at Astoria, and the furnishing of electric service for the operation of said bridge.

Agreement with Southern Pacific Company, et al, relative to Lobert Overcrossing, in Klamath County.

Agreement with U. S. Forest Service regarding snow removal on Timberline Road.

Agreement with City of Albany regarding rest rooms under Albany Bridge.

Stipulation relative to securing a 10-acre stockpile site adjacent to Coos Bay-Roseburg Highway.

Application for patent to 40 acres of land containing fossil beds adjacent to John Day Highway, in Grant County.

Agreement with O. W. R. R. & N. Company with respect to the construction of the Corbett Station-Rooster Rock Section of the Upper Columbia River Highway, in Multnomah County.

Agreement with F. G. Brown, Crystal, Oregon, covering snow removal operations on the Klamath Lake Secondary Highway, in Klamath County.

Bargain and Sale Deed conveying unto Martha E. Dodels 10,800 sq. ft. of land situate in Lots 3, 4, 5, and 6, Block 19, Hackleman's Second Addition to Albany - Right of Way Transaction No. 4966.

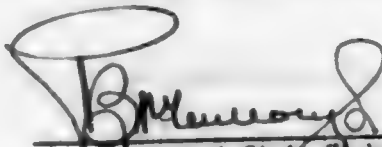

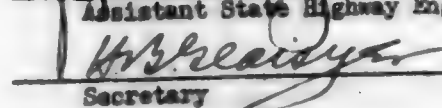

Bargain and Sale Deed conveying unto J. G. Snyder 3,360 sq. ft. of land situate in Lots 7 and 8, Block 19, Hackleman's Second Addition to Albany - Right of Way Transaction No. 4965.

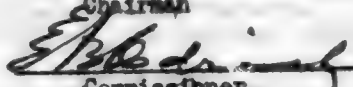

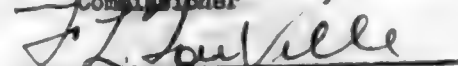

Bargain and Sale Deed conveying unto H. D. Rohde and wife 5,460 sq. ft. of land situate in Lots 7 and 8, Block 19, Hackleman's Second Addition to Albany - Right of Way Transaction No. 4964.

Bargain and Sale Deed conveying unto H. D. Rohde and wife 3 parcels of land containing 3,780, 6,875, and 6,875 sq. ft., respectively, situate in Block 19, Hackleman's Second Addition to Albany - Right of Way Transactions Nos. 4964 and 5151-A.

Bargain and Sale Deed conveying unto Standard Oil Company of California 2,090 sq. ft. of land situate in Lot 7, Block 98, Monteith's Second Addition to the City of Albany - Right of Way Transaction Nos. 5138 and 5139.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:00 o'clock p. m.

Assistant State Highway Engineer

Secretary

Chairman

Commissioner

Commissioner

Salem, Oregon, January 13, 1939

The State Highway Commission met in regular session at 10:00 o'clock a. m. in the office of the State Highway Engineer, Room 325, State Office Building. Present were:

Henry P. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
C. B. McCullough, Assistant State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Senator U. S. Balentine, and Lloyd R. DeLap, Klamath Falls, came before the Commission on behalf of Mr. Paul V. Kelley, Prineville, whose permit for the hauling of logs on state highways in the vicinity of Prineville has been temporarily suspended because of the loading of his trucks in excess of the statutory load limit and the 1500-lb. tolerance authorized by the Commission. Senator Balentine advised that Mr. Kelley is a new operator in this class of business, and, before commencing his operations, consulted with the local state police officer relative to loads, in an endeavor to ascertain the size of loads that could be hauled without violating the statutes. He further advised that Mr. Kelley thought that he was loading his trucks in conformance with the information obtained from the police officer, but evidently he was not, because, when the trucks were weighed, they were found to be overweight, and, as a result, the truck drivers were arrested and the P. U. C. plates picked up, requiring the suspension of operations. He said that Mr. Kelley did not intentionally overload his trucks and honestly thought that he was operating within the law, having consulted the state police officer before commencing operations. Senator Balentine accordingly urged the Commission to restore the P.U.C. plates to Mr. Kelley immediately so as to permit him to resume his logging operations. Otherwise, he said, it will necessitate the closing down of the mill which is being supplied with logs by Mr. Kelley, and the throwing a lot of men with families out of employment. He said that the operators were arrested on Monday, January 9, and that the P.U.C. permit was suspended for a period of 10 days, being a first violation on the part of Mr. Kelley's men. Also, that if the Commission will allow Mr. Kelley to go back to work, he will be extremely careful in the future so as not to overload his trucks again.

Chairman Cabell explained the reasons that forced the Commission to adopt strenuous rules and regulations relative to the trucking of logs on state highways. The Commission, he said, realizes the importance of the logging industry in the state and does not want to do anything to interfere with it, but it must have the cooperation of the operators; otherwise, the promiscuous overloading of trucks will cause a breakdown of the highways where log hauling is being carried on. The Commission has given this matter much thought, he added, and has tried to work it out with the logging industry, but it seems that the desired cooperation could not be secured, so the Commission had to force compliance with the law by the adoption of stringent rules and regulations which, he explained, were decided upon after consulting with the

JAN 13 1939

Superintendent of the Department of State Police, the Public Utilities Commissioner, and a representative of the logging industry.

After further discussion and it appearing to the Commission that Mr. Kelley made an honest effort to comply with the legal requirements and did not intentionally violate the provisions thereof, the Commission ordered the immediate release of Mr. Kelley's P.U.C. plates.

The County Court of Benton County, represented by County Commissioners W. H. Malone and O. B. Kyle, came before the Commission in the interests of the county road which extends in a southerly direction from the Corvallis-Newport Highway, about 3 miles west of Corvallis, to the Corvallis Golf Club, a distance of about one-half mile. Mr. Claude Ingalls, Corvallis, was also present in regard to this matter and acted as spokesman for the group. They asked that this road be placed on the state secondary highway system and that it be improved with an oil surface so as to alleviate the dust nuisance which obtains during the dry season. They gave as their thought that this road meets the secondary highway requirements, inasmuch as it passes through a thickly populated district, there being 14 homes served by the road at the present time, and several more to be established during the coming summer. They pointed out that the state owns considerable land adjacent to the road, which is another reason, in their estimation, that would justify the improvement as a state project.

County Commissioner Malone stated that Benton County does not have oiling equipment to do the work, hence is not in a position to improve the road as desired. It was his thought that the road should not only be oiled but that a center-line stripe should be painted thereon also. Mr. Ingalls advised that this road carries a large volume of traffic, much of which is tourist traffic, and there are many visitors who desire to make use of the country club.

Commissioner Aldrich indicated that he would approve this project, particularly in view of the fact that the county has no oiling equipment with which to do the work and because of advantages that would accrue to the users of the road, especially to the strangers who want to make use of the golf club facilities. Chairman Cabell questioned the advisability of taking the road over as a state project but agreed to take the matter under advisement for a decision later. The Engineer was instructed to investigate the road and report his findings at the next meeting, including an estimate of cost.

Representative Burt Snyder, Lakeview, came before the Commission in the interests of the Klamath Falls-Lakeview Highway and urged the early completion of this road to modern standards. The Commission's plans for the reconstruction of this road were explained to Mr. Snyder by Chairman Cabell and appeared to be satisfactory to him.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful study, the Commission approved

the request and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Mecanicum-Elsie Section - Wolf Creek Highway</u>

The Attorney brought up for discussion the matter of re-establishing the school building in the town of Manning, Washington County. He explained that the Wolf Creek Highway passes very close to the front of this school building necessitating the moving of the same back from the highway on the

present school property or to an entirely new location. The moving of the building back on the present site, he said, will require considerable excavation because of the fact that there is a steep side hill immediately back of the building. He suggested, as a more desirable solution of this problem, the moving of the building to a site on the opposite side of the highway and he recommended the adoption of such alternate, notwithstanding that it is the more expensive of the two, because it would eliminate the necessity for school children to cross the highway in going to and from school. In this connection he explained that there are some 40 or 50 students who attend this school, most of whom live on the opposite side of the highway from the present school building, and it was his thought that the extra expense of moving the building to a location that will eliminate the crossing hazard for the school children would be justified. The Commission concurred in the viewpoint of the Attorney and after considerable discussion authorized the continuance of negotiations with the school district officials in accordance therewith.

The Engineer reported receipt of a communication from County Judge J. B. Wilkerson of Columbia County offering to sell to the State Highway Department a certain toolhouse at Mist, Oregon, for the sum of \$250.00. He said that the Highway Department has been using this toolhouse for some time without charge but the county is now desirous of disposing of the building permanently. He recommended acceptance of the county's offer in view of the fact that a toolhouse of some sort will be needed at Mist for several years, although it has not yet been determined whether or not a permanent patrol headquarters will be established at this place. The Commission approved the recommendation unanimously.

The Attorney brought up for discussion the matter of acquiring right of way for the proposed revision of the Oregon Coast Highway through Neskowin, in Lincoln County. He advised that the recent storm on the Coast wrecked some of the facilities at this beach resort and Mr. W. S. Walton, Sale., the owner of the same, has inquired whether or not the Commission would care to reconsider the matter of purchasing the right of way for the highway improvement now, before he goes to the expense of re-establishing such facilities. In the discussion of this matter it was brought out that the Commission is not in a position to proceed with the proposed highway improvement in its entirety at this time but is willing to consider a project to cut off the rock point opposite the Neskowin Hotel and, if the Commission should decide to do that part of the work, it would need right of way across the Neskowin picnic ground on which to deposit the rock material. In view of this possibility, the Commission instructed the Attorney to ascertain from Mr. Walton his plans for the re-establishment of his buildings. He was also instructed to ascertain from Mr. Walton whether or not he would agree not to obstruct the proposed highway right of way north of the Neskowin Store if the Commission will purchase from him a right of way across his holdings south of his store and will cut off the rock point referred to above, the Commission being unable financially to undertake the major highway improvement at this time.

The Engineer reported receipt of information to the effect that several logging companies are making plans to log privately-owned timber along the Santiam Highway when the grading operations on this highway have been

JAN 13 1939

completed. He advised that this highway traverses some very fine forest land and, in his estimation, everything should be done to preserve the timber, particularly adjacent to the highway right of way. He inquired whether or not it would be advisable to contact the United States Forest Service officials relative to securing an exchange of the privately-owned timber lands for the government-owned lands of the same class. The Commission referred the matter to the State Parks Superintendent for investigation and report.

Consideration was given by the Commission to the request of Thomas Purdy, Yachats, to repurchase from the state about one-quarter acre of land that he sold to the state for right of way purposes, the same being located adjacent to the Oregon Coast Highway at Bob Creek, in Lincoln County. It appears that Mr. and Mrs. Purdy operate a restaurant and campground at this location and wish to enlarge their business, including the establishment of a service station, which will necessitate the acquisition of the one-quarter acre of ground under discussion. Further, that they are willing to pay a reasonable sum for the land which, they allege, was deeded to the state under a misapprehension along with the highway right of way.

The Engineer advised that the tract in question has been graveled and is being used for park purposes and as an entrance way to the creek bottom from the highway. He gave as his thought that it would be inadvisable to dispose of the property in view of the fact that it is now being used for public purposes to good advantage and for the further reason that it may be needed for future highway requirements that cannot be foreseen. He recommended that the property be not sold. The Commission approved the recommendation unanimously.

The Attorney reported briefly on the matter of insurance to be furnished for the benefit of the Sunset Logging Company because of the construction of the Wolf Creek Highway under the company's railroad tracks, in Clatsop County. The Commission deferred action on the matter until the next meeting.

The Engineer reported the need to establish a speed limit of 15 miles per hour for trucks operating over the Nehalem River Bridge on the county road between Elsie and Jewell, which road is being maintained by the State Highway Department as a temporary highway route pending completion of the Wolf Creek Highway. He requested authority to post this bridge for such speed limit. The Commission approved the request and, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, the bridge crossing the Nehalem River at Mile Post 11.70 on the county road between Elsie and Jewell is a public bridge being maintained by the State of Oregon and is a bridge under the jurisdiction and control of the State Highway Commission; and

WHEREAS, the State Highway Commission has, after due investigation, determined and found that it is the judgment of the Commission that the said structure cannot with safety to itself withstand vehicles traveling at the speeds permissible under Section 55-2201, Oregon Code, 1935 Supplement; and

JAN 13 1939

WHEREAS, it is the opinion and judgment of the State Highway Commission that maximum speeds in excess of fifteen miles per hour cannot with safety to such structure be maintained thereon and it is the judgment and opinion of the State Highway Commission that the maximum permissible speed of any vehicle traveling over and across said bridge should be limited to fifteen miles per hour;

NOW, THEREFORE, IT IS HEREBY ORDERED that the total maximum permissible speed over the said bridge crossing the Nehalem River at Mile Post 11.70 on the county road between Elsie and Jewell be and the same hereby is reduced to fifteen miles per hour.

IT IS FURTHER ORDERED that these rules and regulations, as made and found by the State Highway Commission under the provisions of Section 55-2205, Oregon Code, 1935 Supplement, shall be in full force and effect from the 13th day of January, 1939, until rescinded, modified, or revoked by order of the State Highway Commission.

IT IS FURTHER ORDERED that a notice be posted in a conspicuous manner and place at each end of the above named bridge structure so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED that a certified copy of this order be furnished to the County Clerk of the county in which the said bridge is located and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

The Engineer also reported the need to post the Alsea River Bridge, on the Alsea Highway, for a maximum load of 15 tons and the Willamette River Bridge, on the Corvallis-Eastside Secondary Highway, at Corvallis, for a maximum of 10 tons. He requested authority to post these bridges for such loads. The Commission approved the request and, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, the roads or highways hereinafter named have been designated and declared to be and are State Highways and have been improved and are being maintained by the State Highway Commission, pursuant to the laws of the State of Oregon as state highways;

AND WHEREAS, on each of the said state highways and on all of them there are located certain bridge structures which, in the judgment of the State Highway Commission, are incapable of safely carrying the traffic to which they are being subjected, and in order to protect said bridge structures against damage and injury and in order to safeguard traffic over said bridge structures it is deemed and is the judgment of the Highway Commission and said Commission

JAN 13 1939

finds that it will be for the best interests of the said bridge structures and each of them and of the traffic which uses the said bridge structures that the maximum weights now permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has, after due investigation, determined and found and it is the judgment of the Commission that the maximum gross loads which shall be permitted upon any single span of any of the said structures at any time shall be reduced and fixed as in this order provided;

NOW THEREFORE, the premises being in part as above stated and the State Highway Commission having as a result of due investigation found that the bridge structures above referred to and hereinafter designated are incapable of safely sustaining or supporting a total gross load in excess of that specified hereinbelow;

IT IS HEREBY ORDERED, that the total gross weight of combined load and vehicle which at any one time shall be permitted upon any single or individual span of the bridge structures shall not exceed the limits given and set forth hereinbelow. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle. This combined gross weight shall not exceed the limits given hereinbelow, to wit:

ALSEA HIGHWAY 27-07.22	Alsea River Bridge	15 tons
CORVALLIS-EASTSIDE SECONDARY HIGHWAY 210-00.13	Corvallis Bridge	10 tons

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 83 of Chapter 360, Oregon Laws 1931, Section 55-2707 Oregon Code 1935 Supplement, shall be in full force and effect from the thirteenth day of January, 1939, until rescinded, modified, or revoked by order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named bridge structures, so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county in which any of said highways are located, and that a certified copy of said order be furnished the Superintendent of the Department of State Police for his information.

JAN 13 1939

Reconsideration was given by the Commission to the request of Karl L. Janouch, Forest Supervisor, Rogue River National Forest, for permission to construct a footbridge alongside the highway bridge over Union Creek on the Crater Lake Highway, in Jackson County. The Engineer advised that, as instructed by the Commission at a previous meeting, he has investigated this request and finds that the proposed footbridge is to consist of one large log with appropriate timber hand rails that would fit in satisfactorily with the surroundings. He recommended approval of the request, provided the main log is not less than 4 feet in diameter and the cross logs which are to support the hand rails are not less than 6 inches in diameter. The Commission approved the recommendation unanimously.

The Engineer reported on the cost to pave the unpaved portions of Lombard Street in Portland between Vancouver Avenue and Union Avenue and between Union Avenue and the west end of Northeast Portland Secondary State Highway, as ordered by the Commission at the previous meeting. He estimated that such pavement work would cost about \$17,000. The Commission deferred action on this matter pending personal inspection of the project by Chairman Cabell.

The Engineer also reported on the matter of securing the improvement of the Frenchglen Secondary Highway, in Harney County, with C.C.C. forces, as was done last year. He said that the officials in charge of the C.C.C. camp at Malheur Lake were contacted relative to the improvement of another section of this road but it appears that they will not be able to do more this year than complete the 2-mile section upon which they are now working at the Narrows, although there is a possibility that they will be able to assist further next year. The Engineer gave as his thought that it would be advisable, if C.C.C. cooperation can be secured next year, to improve, as the next project on this road, the section between the Narrows and Wright's Point, a distance of about 12 miles. In view of this report, the Commission decided to proceed with the preparation of plans for such project, and thereupon authorized the Engineer to conduct a location survey of the section.

The Commission reconsidered the request of J. R. Hildreth, Scio, Oregon, that the old bridge known as Shindler Bridge, on the Albany-Lyons Secondary Highway, which is being replaced by a new structure, be left in place for his use when the new structure is completed. The Engineer advised that he contacted the Linn County Court relative to this matter, as previously instructed by the Commission, and was assured that the county will assume jurisdiction over this bridge if it is not taken down, and will relieve the Highway Commission from liability for any accident that might occur with respect to it. In view of this report, the Commission decided not to dismantle the old bridge but to abandon it and the approaches thereto as a state highway, in favor of Linn County. The Attorney was instructed by the Commission to prepare an appropriate resolution covering the matter for adoption at its meeting on January 26. The Engineer was instructed to barricade the bridge structure so that traffic cannot use it, if the county has not formally accepted the responsibility for the structure by the time that the falsework that is now supporting the bridge goes out during the high-water period.

JAN 13 1939

The Engineer reported on the request of Sherman County Court that the federal aid secondary highway moneys heretofore temporarily allocated by the Commission for the construction of the Moro-Hay Canyon project be reallocated to the Erskine Road. He recalled that the Commission tentatively allocated \$10,000 for the improvement of the Moro-Hay Canyon Road as a federal aid secondary highway, but since the allotment was made the County Court has expressed preference for the improvement of the Moro-Erskine Road and the reallocation of the funds to such project. Inspection of the Erskine Road, he said, was made by Division Engineer Wm. E. Chandler and Office Engineer Oscar Cutler on January 5, 1939, in company with two members of the County Court, and it is the opinion of these engineers that this road qualifies as a federal aid secondary highway, but, if improved as such, will provide a road of much higher standard than is needed by the territory that it serves. They also reported, he said, that, in their estimation, the county will benefit more by the improvement of the Moro-Erskine Road than by the improvement of the Moro-Hay Canyon Road, although eventually the latter road will very likely serve more people and will be the better road of the two from a state-wide standpoint. He further advised that the right of way of the Moro-Erskine Road is only 40 feet wide, whereas a 60-foot width right of way will be required generally, and in a few places it should be 80 feet wide. He recommended the reallocation of the funds to the Moro-Erskine Road if the county will acquire a right of way of proper width. After considerable discussion, the Commission approved the Engineer's recommendation by unanimous vote and instructed the Engineer to so inform the County Court.

The matter of transferring the funds heretofore tentatively allocated to the Oak Hill-Veneta Section of the Oak Hill-Veneta County Road (Route "F" Highway) in Lane County, had the attention of the Commission. The Engineer advised that the Commission had previously set up a tentative allocation of federal aid secondary highway funds amounting to \$55,000 for this project. He pointed out in this connection that this section crosses the site of the proposed Fern Ridge Reservoir, which is a part of the Willamette Valley Flood Control Project. The additional cost of this unit by virtue of the construction of the Fern Ridge Reservoir will amount to approximately \$30,000 because of the necessity of building the highway at a higher grade and the necessity for providing longer drainage structures. The Engineer further pointed out that the Army Engineers had tentatively agreed to reimburse the State Highway Commission for the above extra cost in the event that the Willamette Valley Flood Control Project is authorized. In view of the fact that no definite appropriation has been made for this flood control project, the Engineer suggested that consideration be given to an alternate project.

After considerable discussion, the Engineer was requested to consider estimates for alternate projects, and to contact the County Court of Lane County relative thereto.

The Commission adjourned at 12:10 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room with all Commissioners, the Assistant State Highway Engineer, the Attorney, and the Secretary present.

JAN 13 1939

The Commission considered but deferred action on numerous requests for improvement of certain county roads as federal aid secondary highways, there being insufficient time remaining to give this subject proper consideration. The Engineer was instructed to bring these projects to the attention of the Commission at its next meeting, together with estimates of cost to construct them. The Secretary was instructed to advise the sponsors of the various projects the reason for the Commission's delayed action.

The Commission discussed a resolution from the Union County Court relative to the improvement of the North Powder River County Road. The County Court gave as its understanding that the Commission has allocated \$15,000 for grading, graveling, and oiling a 1½-mile section of this road as a federal aid secondary highway, and asked the Commission to change its plans in regard thereto so as to provide for the grading and graveling only of a 5-mile section of this road, at an estimated cost of \$20,000, which improvement, they allege, would be more beneficial to the traveling public and the residents of the North Powder community. A letter from Charles H. Reynolds, Chairman of the Roads and Highways Committee of the La Grande Commercial Club, approving the County Court's request, was also presented. After considerable discussion the Commission tentatively decided to spend the \$15,000 for grading and surfacing work only, as far as such sum will allow, and to let the oiling work go until some future time. This matter, however, is to be reconsidered by the Commission at its meeting on January 26.

The Commission had under consideration the selection of projects for contracting at the next few meetings of the Commission. The Engineer presented a list of projects which have heretofore been approved by the Commission for construction, from which the Commission, by unanimous vote, selected the following:

PROJECTS FOR CONTRACTING ON JANUARY 26, 1939

Polallie Creek-Hood River, Rock Production	PWA	\$ 10,000
Necanicum-Nehalem River, Surf. & Bit. Mac.	38 FA	164,000
Oregon City, North Unit, Grad. & Pav.	38 FA	77,000
Abernethy Creek Bridge, Structure	38 FA	22,000
Albany Grade Separation, Grading	38 GS	140,000
Albany Grade Separation, Structure	39 GS	181,000
Nehalem River Bridge, Structure	39 FA	124,000
Tudor Ranch-Blue Mt. Pass, Grading	39 FLH	<u>\$100,000</u>
		\$818,000

PROJECTS FOR CONTRACTING IN MARCH, 1939

Bunker Hill Section, Grad & Pav.	38 FA	\$124,000
Interstate Avenue (Portland), Lighting	38 FA	45,000
Malin-Bonanza, Grad. & Surf.	38 FAS	24,000
Vale-Adrian, Grad., Surf., & Oil.	38 FAS	15,000
North Powder-N. Powder River, Surf. & Oil.	38 FAS	15,000
Lobert Grade Separation, Grading	39 GS	50,000
Mist-Clatskanie, Surf. & Oil	39 FAS	30,000
Hood River Secondary, Widen., Surf., & Oil.	39 FAS	38,000
Cove Road, Grade, Surf., & Oil	39 FAS	<u>35,000</u>
		\$376,000

JAN 13 1939

The Engineer was authorized to advertise these projects in accordance with the usual practice.

The Engineer discussed with the Commission the matter of planting suitable grasses along the Silver Lake Section of the Fremont Highway, in Lake County, so as to prevent soil erosion and the depositing of sand on the highway right of way. He explained that the blowing sand from the dry lake bed is causing extremely high maintenance costs, and unless something is done to prevent this condition, it will eventually be necessary to reconstruct the highway roadbed. He advised that a C.C.C. camp is now being maintained near Silver Lake and gave as his thought that perhaps the services of the men employed at this camp could be secured in the planting of grasses for the elimination of the sand-blow. Early action on the matter, he said, is necessary, because, as he understands it, this camp has about completed its present assignment and will be discontinued soon. He recommended filing an application with the proper authorities to secure the services of this C.C.C. Camp in this work, and particularly to conduct an investigation into the feasibility of seeding the bed of Silver Lake, which would not only stop sand from blowing onto the highway but would also do much good in restoring the old lake bed to productivity. He further stated that he has conferred with Wm. A. Schoenfeld, Dean and Director of the School of Agriculture and the Agricultural Experiment Station at Corvallis, Oregon, relative to the matter, and it is Dean Schoenfeld's thought that a project of this kind is feasible. After considerable discussion, the Commission approved the Engineer's recommendation and instructed the Secretary to file such application in accordance with the ideas expressed by the Engineer.

The Commission considered the request of the John Day Highway Improvement Association for the reconstruction of the bridge over Mule Shoe Creek on the John Day Highway, and particularly the letter of Mr. E. R. Fatland, President of the Association, who advises that the existing bridge presents a hazard to the traveling public in view of the fact that it is an unsafe structure and crosses the creek at an angle with the highway alignment. The Engineer advised that the present bridge is in poor condition and is not on permanent alignment, but there is a question whether or not it should be repaired or an entirely new structure erected on permanent location. He presented four alternates for the solution of this problem, the first being the construction of a temporary timber trestle on the present alignment, which would cost about \$2,500; second, construct a temporary timber trestle on improved temporary alignment and the shortest possible approaches thereto from the existing highway. Such project, he estimated, would cost about \$5,500. Third, construct a new, permanent bridge on permanent alignment and grade, surface and oil temporary connections with the existing highway. He estimated that such project would cost about \$18,000. The fourth alternate is to construct a new, permanent bridge on permanent alignment, and grade, surface, and oil permanent connections with the existing road. Such project he estimated would cost about \$23,000.

The Commission discussed this matter at some length but deferred final action thereon until its March meeting.

JAN 13 1939

The Commission considered briefly numerous requests for the installation of flashing beacons, traffic signals, and flood lights at the following locations on the state highway system: west end of the St. Johns Bridge, Portland; Interstate Avenue, Portland; Sandy Boulevard, Portland; East Burnside Street, Portland; intersection of Main and Bridge Streets, in Sheridan; intersection of North Front and Broadway, in Marshfield; intersection of Salem-Dallas Highway and Dallas-Coast Secondary Highway, in Dallas; intersections of Fifth Street at Trade Street and Nursery Street, in Amity; intersection of the Oregon Coast Highway and the east approach of the Avenue "U" Bridge, in Seaside; main line crossing of the Southern Pacific Railroad, in Grants Pass; crossing of the Klamath Falls-Lakeview Highway with the railroad at the west city limits of Lakeview; Pacific Highway between Sellwood Bridge and Oswego; intersection of McLoughlin Boulevard and Ochoco Avenue, just south of the city limits of Portland.

The Commission denied the requests for the installations in Amity and Seaside, it appearing to the Commission that they are unwarranted at the present time, and indicated that it would not approve any installation that is not recommended by the Engineer. Action on the remaining requests was deferred by the Commission for consideration at the next meeting, there being insufficient time to give this important matter proper consideration at this meeting. The matter of the adoption of a policy with respect to installations of this kind was deferred pending further discussion of the subject. The Engineer was instructed to bring to the Commission's attention at its next meeting a complete list of the requests for highway lighting projects.

The Engineer brought up for discussion matters pertaining to the P.W.A. project being sponsored by the Malheur County Court for the improvement of county roads in Malheur County and for the construction of a county shop building at Vale. It appeared from the Engineer's report that the time limit within which work on these projects must commence expired on the 31st day of December, but that the project had been kept alive thus far by the continuance of certain force account work. It also appears that there is a question as to the validity of the county's bond issue by means of which the county contemplates raising the necessary funds to match the P.W.A. grant, this matter now being in the hands of the Supreme Court for decision. The Engineer requested instructions in view of the circumstances as above outlined. He suggested approval of a 5-mile road project in order to show good faith with the county, and that the force account work on such project be continued so as to meet the P.W.A. requirements. After discussion, the Commission approved the Engineer's suggestion and authorized him to approve the county's plans for such project and to prepare specifications for the same so that it will be ready for contracting if and when the Supreme Court sustains the validity of the county's bonds.

The Commission discussed the Attorney's written opinion on the authority of the State Highway Commission to construct and maintain roads that are not on the state highway system. According to such opinion "this question has never been adjudicated by the Oregon Supreme Court and there are no express statutory provisions to which we may point for direct authority. However, the legislative command to the Highway Commission, which is expressed

JAN 13 1939

in two or three different statutes, and by which the Commission is told 'to enter into all contracts and agreements with the United States Government relating to the maintenance of roads to carry out the cooperation contemplated and provided for' by the Federal Aid Road Act, may be broad enough to authorize the Highway Commission to assume responsibility for the maintenance of such projects.

"In my opinion, however, should the Highway Commission assume such responsibility it should protect itself by taking from the City and/or the County a definite agreement to reimburse the State for any funds which the State may be called upon to disburse in making good its agreement with the Federal Government."

After discussion, the Commission approved the opinion and ordered the continuance of the present practice with respect to the construction of county road projects, which now provides for the taking of agreements from the counties covering the matter of reimbursing the state for funds advanced by the state in connection with such projects.

The Engineer reported that, in conformance with authority previously granted by the Commission, he awarded to the Colonial Construction Company, Spokane, on December 30, 1938, the contract for the construction of the Corbett Station-Rooster Rock project on the Columbia River Highway, in Multnomah County, bids for which were received by the Commission on November 18, 1938, the Colonial Construction Company being the low bidders for this project and the conditions of the award having been satisfied. The Commission by unanimous vote approved the award of this contract as reported.

A letter was presented from Mr. Herman Amos, Rickreall, Oregon, complaining of the condition of the Salem-Dallas Highway at the curve a short distance west of the Oak Knoll Golf Course. Mr. Amos alleges that a very dangerous condition exists at such curve and that numerous accidents have occurred at this location. He urged the elimination of this danger spot by the straightening of the highway. The Engineer advised that investigation has been made of the conditions existing at this point and everything possible has been done, including the erection of appropriate signs, to prevent the recurrence of accidents and to make the road as safe for travel as is possible without reconstructing the highway. The Commission thereupon approved the report and ordered the communication filed.

The Engineer requested authority to purchase 4 radio receiving sets at an estimated total cost of \$240. One of these sets, he said, is needed on the sanding truck that operates at night in the North Portland area. The others are for replacements during periods when other sets are being overhauled. The Commission approved the purchase by unanimous vote.

The Commission also unanimously approved the purchase of 50,000 gallons of traffic line lacquer at an estimated total cost of \$55,000 for the 1939 requirements.

The Engineer reported that 25 light-type trucks assigned to the

Wilson River Highway W.P.A. work have reached the stage where it is no longer economical to keep them in repair or operation. He recommended the purchase of 25 new trucks and that the old ones be traded in as part purchase price on 25 new trucks, which would reduce the net total cost of the new trucks to about \$22,500. The Commission approved the recommendation by unanimous vote and ordered that the purchase be made through the State Purchasing Agent in the usual manner.

The matter of selling an old "V"-type snow plow now being stored at the Klamath Falls Shops had the attention of the Commission. The Engineer advised that this is an obsolete type of plow and that it has not been used for 10 years. Further, that all usable parts of the same have been salvaged and used in other equipment so that at this time there remains only the steel "V". He further stated that Mr. F. G. Brown, of Crystal, Oregon, who has an agreement with the Commission for the removal of snow from the Klamath Lake Secondary Highway, in Klamath County, has made inquiry regarding the purchase of this plow and indications are that he will pay \$100.00 for the same, although, as junk, it probably is not worth more than half of that amount. He recommended sale of the snow plow to Mr. Brown, at private sale, for \$100.00. The Commission approved the recommendation.

The Commission had under consideration the revised offer of the United States of America to contribute P.W.A. funds to aid in financing the construction of the Klamath Falls Maintenance Building, P.W.A. Docket Number Oregon 1177-F.

After discussion of the offer of the United States of America to aid by way of grant in financing the construction of the Klamath Falls Maintenance Building, the following resolution, entitled "A Resolution Accepting the Offer of the United States to the State Highway Commission of the State of Oregon to Aid by Way of Grant in Financing the Construction of a Storage and Office Building and Storage Shed near Klamath Falls, Klamath County, Including Landscaping and the Acquisition of Necessary Land Therefor", was proposed by Commissioner Aldrich and read in full:

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF A STORAGE AND OFFICE BUILDING AND STORAGE SHED NEAR KLAMATH FALLS, KLAMATH COUNTY, INCLUDING LANDSCAPING AND THE ACQUISITION OF NECESSARY LAND THEREFOR.

Be it resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of a storage and office building and storage shed near Klamath Falls, Klamath County, including landscaping and the acquisition of necessary land therefor, a copy of which offer reads as follows:

(See next page)

JAN 13 1939

"P. W. 86635-1

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

Washington, D. C.,
Dated: Jan 7 1939
Docket No. Oreg. 1177-F

"State of Oregon, by and through the
State Highway Commission,

Salem, Oregon.

"1. Subject to the Terms and Conditions (PWA Form No. 230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of a storage and office building and storage shed near Klamath Falls, Klamath County, including landscaping and the acquisition of necessary land (all herein called the "Project"), by making a grant to the State of Oregon, by and through the State Highway Commission (herein called the "Applicant"), in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$10,797.

"2. By acceptance of this Offer the Applicant covenants to complete the Project with all practicable dispatch, and in any event by February 2, 1939.

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

"4. The acceptance of this Offer by the Applicant shall effectuate a cancellation of the contract created by the acceptance of the Offer dated June 27, 1938, made by the United States of America to the Applicant: Provided, that the cancellation of such contract shall not impair or vitiate any acts performed or proceedings taken thereunder prior to such cancellation, but such acts or proceedings may be continued under the contract created by the acceptance of this Offer.

JAN 13 1939

"UNITED STATES OF AMERICA

"Federal Emergency Administrator
of Public Works"By (Sgd.) H. A. Gray
Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all Terms and Conditions relating to such grant, a copy of which Terms and Conditions were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be commenced as early as possible; and to complete the work with all practicable dispatch, and in any event by February 2, 1939.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon, be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

The resolution was duly seconded by Commissioner Tou Velle and was adopted with the following voting "Yes":

Chairman Henry F. Cabell
Commissioner E. B. Aldrich
Commissioner F. L. Tou Velle

The Chairman thereupon declared said resolution carried.

The Commission had under consideration the matter of approving a supplementary, cooperative W.P.A. project on the Wilson River Highway, in which Tillamook County is to contribute a part of the funds. It was explained by the Engineer that this project will supersede projects now in force on the Wilson River Highway and will also increase the work to be performed to the extent of approximately \$360,000; also, that the reason that a project is being presented at this time is that the funds for several of the projects now operating will become exhausted before the first of May and it is necessary to submit this project to Washington as early as possible in order that work may continue after the first of May. The Engineer recalled that the Commission has included in its 1939 budget the amount of \$150,000 for cooperative

JAN 13 1939

state expenditure on this highway and advised that this new project has been prepared accordingly and will not increase the amount included in said budget. This project, he said, is a consolidation of all of the projects heretofore undertaken on the Wilson River Highway and represents a total estimated cost of \$952,598.00, of which amount the state's share is approximately \$152,000.00 and the county's share \$32,300.00, the balance being W.P.A. funds; further, that it is expected that the project will operate throughout the calendar year 1939. After discussion, the Commission approved the project and authorized the Engineer to execute the project proposal on behalf of the Commission.

A letter was presented from the Consolidated Freight Lines, Inc., requesting permission to move three truck and trailer combinations, each having an overall length of 55 feet, over state highways from the state line, opposite Weiser, Idaho, to Portland and return. They explained that these outfits are now being operated through southern Idaho into San Francisco, but have to be rebuilt, and they prefer to have the work done in Portland, if they can obtain permission to move them over the Oregon highways. Otherwise, they allege, it will be necessary for them to have the work done in San Francisco. The Engineer recommended granting the request as a temporary proposition. After discussion, the Commission approved the recommendation by unanimous vote subject to the condition that the equipment shall not be moved over the Columbia River Highway between The Dalles and Portland, but shall be routed via the Wapinitia Highway and the Mt. Hood Highway into Portland. The Secretary was instructed to advise the company of the action taken and to suggest that the trailers be moved over the Central Oregon Highway rather than the Old Oregon Trail, inasmuch as there is less traffic and fewer sharp curves on the Central Oregon Highway.

A petition was presented, signed by 57 residents of Portland, urging the Commission to take action as may be necessary to safeguard pedestrians who are obliged to cross Interstate Avenue at its intersection with Wheeler Place, in Portland, in order to reach street cars and trolley busses that operate on Interstate Avenue. The Engineer advised that investigation has been made of the situation at this intersection and it has been found that a real hazard does exist for people who have to cross the street in order to board the southbound busses, the facts being that the sight distance for northbound traffic is quite short and that traffic passes this point in excess of 30 miles per hour. Most of the pedestrians concerned, he said, are grain handlers, longshoremen, et cetera, which indicates that the heavy movement of pedestrians is confined to certain hours of the day, which, unfortunately, coincides with the time of the greatest volume of vehicular traffic, making it difficult for the pedestrians to cross the street through the rapidly moving vehicles. He estimated the volume of vehicular traffic at approximately 19,000 cars per day. As to remedial measures, he said, it does not appear possible to relieve the condition by the use of signs or signals, but an arrangement might be worked out whereby pedestrians could board the busses at North Tillamook Street, which is only one block from the point where they now take the busses, where the sight distance is much longer. It was his thought that this is a city problem and accordingly suggested that the petitioners be requested to consult the city officials with regard thereto. The Commission approved the recommendation unanimously.

A letter was presented from the Oregon-American Lumber Corporation claiming damages in the amount of \$777.00 for timber taken from its lands by W.P.A. Forces working on the Wolf Creek Highway, and used as fuel in connection with camp operations. The Commission deferred action on this matter pending the return of the State Highway Engineer, Mr. R. H. Baldock, from South America. The Attorney was instructed to investigate the claim in the meantime, and report his findings.

A letter was presented from County Judge David F. Graham of Malheur County, on behalf of Mr. Robert Blayden, requesting permission to transport 6 buildings, 18' x 24' in dimension, over the John Day Highway from Ukity to Vale, a distance of about 65 miles. The Commission denied the request in view of its established policy not to permit movements that will take up the entire width of the roadway and will interfere with the free use of the highway by other traffic.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Marion County covering the matter of snow removal from the North Santiam Highway.

Agreement with Castle Films, Inc., covering the national distribution of a two-reel motion picture entitled "The New Oregon Trail".

Agreement with J. L. Worth, providing for the elimination of a cattle pass at Mile Post 18.2 on the John Day-Burns Highway, in Grant County.

Agreement with the State Game Commission relative to the declaring of lakes along the Junction City-Eugene Section of the Pacific Highway wild bird and game reserves.

Letter directed to the United States Bureau of Public Roads, Portland, requesting that the road extending from the Mt. Hood Highway, near Government Camp, to Timberline Lodge, be officially designated a forest highway.

Agreement with the Board of Water Commissioners of the City of Medford, providing for the lease of surplus water from the Medford water supply for use in the Highway Department's maintenance building, in Medford.

Bargain and Sale Deed, conveying unto H. D. Rohde a parcel of land containing 5,460 sq. ft., situate in Lots 7 and 8, Block 19, Hackleman's Second Addition to Albany, being Right of Way Transaction No. 4964. (This deed is to be substituted for a similar deed signed by the Commission on December 20, 1938, because Mrs. Rohde, who was one of the grantees in the previous deed, has died in the meantime.)

JAN 13 1939

Bargain and Sale Deed conveying unto H. D. Rohde 3 parcels of land, containing 3,780, 6,875, and 6,875 sq. ft., respectively, situate in Block 19, Hackleman's Second Addition to Albany, being Right of Way Transactions Nos. 4964 and 5151-A. (This deed is to be substituted for a similar deed signed by the Commission on December 20, 1938, because Mrs. Rohde, who was one of the grantees in the previous deed has died in the meantime.)

Bargain and Sale Deed, conveying unto Reedsport School District for the sum of \$15.00, 3,278 sq. ft. of land situate in Lots 6 and 7, and the vacated portion of the alley in Block 57, all in Railroad Addition to Reedsport, being Right of Way Transaction No. 2837.

The Commission discussed the matter of the date for its next regular meeting following the meeting scheduled for January 26, and decided to hold such meeting on Thursday, March 2, 1939, in Portland. The Secretary was instructed to make the usual arrangements to hold this meeting in the Auditorium of the Public Service Building.

The meeting was adjourned at 4:15 o'clock p. m.

Assistant State Highway Engineer

Secretary

Chairman

Commissioner

Commissioner

JAN 13 1939

Portland, Oregon, January 25, 1939.

The State Highway Commission met in regular session at 8:30 o'clock p. m. in Room 1205, Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
C. B. McCullough, Assistant State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Mr. Alfred A. Hampson, attorney, Portland, conferred with the Commission relative to a bill that certain oil companies propose to introduce in the Oregon Legislature, now in session, providing recompense to dealers in motor vehicle fuel for losses that it is alleged they incur in complying with the provisions of the Oregon Gasoline Tax Law. Mr. Hampson alleged that these dealers incur losses in excess of 1 per cent of their sales on account of compliance with such law, being represented by overhead expense, uncollectable credit sales, evaporation, et cetera, and it was his thought that their claim for reimbursement for such losses is fully justified. He advised that there are 38 states that now recognize such losses, 11 of which make allowances of from 1 to 4 per cent. He presented a compilation in support of his contention and asked the Commission not to oppose the bill.

Chairman Cabell informed Mr. Hampson that the Highway Commission wishes to be fair in this matter and will give the compilation careful study, but the Commission is not in a position at the present time to state whether or not it will oppose the bill. Funds available to the Commission, he said, are limited and must be conserved as much as possible because every dollar that can be obtained is needed for highway purposes.

The State Parks Superintendent, Mr. S. H. Boardman, was present in regard to the following park matters:

Preservation of timber along the McKensie Highway, in Lane County:-
Mr. Boardman particularly referred to the letter received from the Eugene Chamber of Commerce, in which the Commission is asked to direct a communication to the members of the Oregon delegation in Congress urging them to support a bill that is to be presented by Congressman James W. Mott requesting a special appropriation of \$423,000.00 of federal funds with which to finance the purchase of some 18,899 acres of privately-owned timber land along this highway so as to preserve the natural scenery, this road being one of Oregon's most scenic highways, paralleling the McKensie River, a nationally known fishing stream. The Secretary presented the Chamber of Commerce letter referred to. It was the thought of the Commission that the preservation of timber along this highway is a worthwhile project and a fine thing to do, and that it would be proper to endorse the bill requesting a special appropriation of federal funds to finance the purchase of the same inasmuch as there are not sufficient state funds available to handle the matter. The Secretary was thereupon instructed to write the letters requested by the Eugene Chamber of Commerce.

JAN 25 1939

Preservation of timber along the Santiam Highway east of Cascadia:- The Parks Superintendent advised that the majority of the timber holdings fronting on this highway are owned by the Louis W. Hill interests and that the United States Forest Service is now working on a plan for an exchange of government-owned timber tracts for the same. He pointed out that there are two things that have a direct bearing on the matter of preserving the timber, one being the location and construction of the dam that is proposed in connection with the Willamette Valley Flood Control Project, and the other the permanent location of the highway. It was his thought that until these two projects are properly defined, the acquisition of the timber will have to be held in abeyance. After discussion, the Commission ordered that Mr. C. J. Buck, Regional Forester, United States Forest Service, be informed that the Commission is very anxious that the timber along this highway be preserved, and endorses any plan that the Forest Service may have in mind to that end, particularly within the national forest boundaries, but the Commission is not in a position at the present time to make any definite commitment as to the timber located outside of the national forest boundaries, because it does not know where the highway will be permanently located and because the Commission has only a very limited amount of money to spend for purchase of timber tracts.

Publication of booklets containing information relative to outstanding trees located at various points throughout the state:- The Parks Superintendent advised that Professor T. J. Starker of the School of Forestry, Oregon State College, has compiled a list of outstanding trees throughout the state and has made inquiry as to whether or not the Highway Commission is interested and would assume the cost of publishing a booklet describing such trees and informing the general public where they may be seen. It was the thought of the Commission that the dissemination of such information would be of considerable interest to the public if it were limited to trees that are located within a reasonable distance of state highway rights of way. Further, that if the information were so limited, it could be contained in a small pamphlet to be distributed at small expense, as are similar pamphlets, through the Travel and Information Department. The Parks Superintendent was thereupon instructed to consult with Professor Starker and the Director of the Travel and Information Department in regard thereto.

Preservation of timber strips along the Salmon River Highway:- The Parks Superintendent advised that the Miami Corporation, owner of timber in which the Commission has previously been interested, has offered to sell strips along this highway on the basis of payment of \$4.00 per MFBM, the purchase price to be paid within a 3-year period without interest being charged on the unpaid amounts. He said that this company owns timber both east and west of the tract that the state already owns in the vicinity of a place known as Boyer. In the discussion of this matter it was brought out that a considerable portion of the timber on the strips to the west of the property that the state now owns has been cut, but that is not true of the timber on the strips lying to the east of the state-owned property. Chairman Cabell gave as his thought that the Commission does not have sufficient funds to finance the acquisition of both tracts and suggested that negotiations be carried on with the company for the acquisition of the tract that lies east of the property that the state now owns. The suggestion was approved by Commissioners Aldrich

and Tou Velle, whereupon the Parks Superintendent was authorized to negotiate with the company for the same.

Concession in the Vista House, at Crown Point:- The Parks Superintendent advised that he has investigated the complaint of W. A. Johnson, Corbett, Oregon, who conducts a restaurant at Crown Point, that the concession in the Vista House is being operated in direct competition with him in the sale of tobacco, cigars, candy, etc., and that it is Mr. Johnson's thought that such competition is unfair because the concessionaire in the Vista House does not have to pay taxes, the property in which he is operating being state-owned. He further advised that he has not as yet been able to contact Mr. Dimmitt, who holds the concession in the Vista House, so cannot report his views of the matter. It was the Commission's thought that the sale of tobacco and candy in the Vista House is a convenience to the public and that Mr. Dimmitt should be allowed to continue the same. The Parks Superintendent was instructed to ascertain definitely just what commodities Mr. Dimmitt sells and whether or not it would be possible and advisable to continue the concession on the same basis as in the past.

Timber strips along the Wolf Creek Highway:- The Parks Superintendent stated that Mr. J. R. Hulbert, President of the Sunset Logging Company, with whom he has been carrying on negotiations for the past six months to acquire wayside strips along the Wolf Creek Highway, advises that the company will not accept less than \$5.10 per MFBM for its timber. The Commission considered this price too high and indicated that it is not interested in acquiring the strips on such basis.

The Commission had under consideration the matter of authorizing Mr. C. B. McCullough, Assistant State Highway Engineer, to sign applications and other papers required by the Federal Government in connection with P.W.A. projects, during the absence of State Highway Engineer R. H. Baldock. The following resolution in regard thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle:

WHEREAS, the Highway Commission has heretofore by resolution designated and appointed R. H. Baldock, the appointed, qualified and acting State Highway Engineer, to sign applications and other papers required in connection with funds made available by the Federal Government through the Public Works Administration for highway construction and other projects in the State of Oregon; and

WHEREAS, the said R. H. Baldock is temporarily absent from the State of Oregon, and C. B. McCullough, Assistant State Highway Engineer, is, during the absence of said R. H. Baldock, acting in his stead;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission, all members being present and affirmatively participating, as follows:

JAN 25 1939

1. That C. B. McCullough, Assistant State Highway Engineer, and now Acting State Highway Engineer, be and he hereby is authorized to sign applications and other papers required by the Federal Government in connection with funds made available through the Public Works Administration for highway construction and other public projects in Oregon.

2. That applications and other papers heretofore signed by said C. B. McCullough in connection with P.W.A. projects hereby are ratified and affirmed.

3. That this resolution be entered in the records and minutes of the Commission as of the twenty-fifth day of January, 1939.

The Commission discussed numerous requests as follows for federal aid secondary highway improvements:

Request of the Sherman County Court for the substitution of the Erskine Road for the Moro-Hay Canyon project to which the Commission has tentatively allocated the amount of \$10,000.00:- The Engineer reported receipt of a letter from the Sherman County Court to the effect that Sherman County cannot finance the acquisition of the right of way needed for the Erskine Road, so has decided to withdraw its request for the substitution of projects and will now be satisfied with the improvement of the Moro-Hay Canyon Section, in accordance with the original plan. He accordingly recommended the retention of the Moro-Hay Canyon project in the Commission's program. The Commission approved the recommendation unanimously.

Construction of the Oak Hill-Veneta County Road Project, in Lane County:- The Engineer advised that the Lane County Court has approved the elimination of this project from the federal aid secondary highway program and the substitution therefor of another section, as was tentatively proposed by the Commission at the previous meeting. The Commission thereupon authorized such substitution of projects if such substitution should become necessary, but agreed to transfer the 1938 PAS allotments on this road to the 1939 PAS program in order to afford more time in which to ascertain the plans of the Army Engineers for the construction of the Willamette Valley Flood Control Dam which is proposed at this location.

Request of Tillamook County Court for the oiling of the following county roads in Tillamook County:- Tillamook-Netarts Road, Wilson River Loop Road, and Fairview-Clemens Corner Road. The Commission by unanimous vote confirmed its previous decision to retain these projects in the federal aid secondary highway program, for construction during 1939.

Request of Douglas County Court for the improvement of an additional section of the North Umpqua County Road easterly from the section that was completed last season, rather than the improvement of a section westerly from such completed section, as was originally proposed. The Engineer advised that the Commission has tentatively budgeted \$20,000.00 of federal aid secondary highway funds to finance a project on this road toward Roseburg from the project that was completed last year. To construct the project requested by the County Court, he said, will cost about \$28,000.00. He recommended approval of the Court's request, notwithstanding the fact that that is a more expensive

project, because it will eliminate the worst section of the present road between Roseburg and Glide. The Commission approved the recommendation unanimously.

Petition requesting the oiling of the Albany-Lyons Secondary Highway in Linn County, between Reiley's Corner and Scio:- The Commission deferred its decision with respect to this project until the Fiscal Year 1940 Federal Aid Secondary Highway Program is arranged.

Request of Union County Court for change in plans for the improvement of the North Powder River Road, in Union County, to provide for the grading and surfacing of a 4- or 5-mile section of this road rather than the oiling of a 1½-mile section, for which the sum of \$15,000 has previously been budgeted:- The Commission by unanimous vote approved the change and also decided to increase the budgeted amount to \$20,000 if the entire section can be graded and surfaced for such sum, but not otherwise.

Request for the completion of the improvement of the Little Nestucca Secondary Highway, in Tillamook County:- The Engineer advised that to complete the reconstruction of this highway to modern standards, including bridges, will cost approximately \$300,000.00. In view of the expense involved, the Commission decided not to consider this project now. (This matter was discussed with the Tillamook County Court on the following day, at which time the Commission ordered an investigation of the project to ascertain whether or not the road could be put in passable condition for traffic at small cost.)

Request of Wasco County Court for substitution of the Lower Fifteen Mile Creek Road for the Chenoweth Road in the Commission's federal aid secondary highway program for Wasco County:- The Engineer recommended such substitution of projects because, he said, the most important section of the Chenoweth Road has already been constructed and, in his estimation, more benefits would be derived from the improvement of the northerly end of the Lower Fifteen Mile Creek Road than from the improvement of an additional section of the Chenoweth Road. In view of the report, the Commission approved such substitution of projects by unanimous vote.

Request of The Dalles Chamber of Commerce for improvement of the secondary state highway between Condon and Wasco, in Gilliam and Sherman Counties:- The Commission deferred action on this matter for the time being. (A delegation appeared before the Commission on the following day in regard to this project.)

Request of Deschutes County Court for the improvement of the Butler Market Road northeasterly from Bend:- The Commission decided to give this project priority over others in the formulation of its construction program for Fiscal Year 1940 Federal Aid Secondary Highway Funds.

Resolutions from several Clatsop and Columbia County granges urging additional improvements to Nehalem Secondary Highway between Jewell and Mist:- The Engineer pointed out that the Commission has already tentatively budgeted \$71,000.00 for oiling on this section, which should pay for oiling from Jewell

JAN 25 1939

to approximately Birkenfeld. He further stated that the oiling of the Birkenfeld-Mist Section involves considerable high-cost reconstruction, which the Commission previously decided to defer because of lack of funds to finance the work. The Commission decided unanimously to adhere to its previous decision with respect to this road for reasons stated by the Engineer, it being the Commission's thought that it could not allocate additional funds to this district now without being unfair to the other districts of the state.

Requests for the improvement of the Hillsboro-Silverton Secondary Highway from Scholls to a connection with the improved portion north of Newberg:- The Commission deferred a decision with respect to this project.

Request for the improvement of the Weston-Elgin Secondary Highway in Umatilla County:- The Commission decided that the \$45,000 of Forest Highway funds that have been allocated for the oiling of a 5-mile section of this road west from Langdon Lake is all that it can provide for this road at the present time; however, the oiling of an additional section is to be given consideration in the formulation of a construction program for fiscal year 1940 federal aid secondary highway funds.

Request of Union High School District, Estacada, for improvement of the Woodburn-Mt. Hood Loop Secondary Highway in front of the high school building in Estacada: The Engineer was instructed by the Commission to make further investigation of this project and report his findings at the next meeting.

Request of the Businessmen's Club of Mt. Angel for the construction of a new connection of the Hillsboro-Woodburn Secondary Highway with the Pacific Highway, in Woodburn:- The Commission deferred action on this matter until its 1940 budget for secondary highway projects is arranged.

Request of the Clackamas County Court for elimination of the oiling project on the Canby-Marquam Road from the federal aid secondary highway program and the reallocation of the funds set up therefor, amounting to \$25,000, to pay for additional oiling work on the Eagle Creek-Dover County Road, thereby providing for a project on this road costing \$40,000:- The Engineer advised that the Clackamas County Court has plans for the improvement of the Canby-Marquam Road with county forces and prefers that the state spend its money for the improvement of the Eagle Creek-Dover Road. He recommended such transfer of funds, in view of the fact that there is a possibility that the state secondary highway will be routed along such road at some future date. The Commission approved the recommendation unanimously.

The Commission discussed and by unanimous vote approved revisions as follows in the several federal aid programs in order to take up the balances remaining in each:

1936 WPGS PROGRAM

Add to this program the Lobert grade separation project, structure only, to take up the balance of \$35,000.00.

JAN 25 1939

1938 FAS PROGRAM (State Highways)

Add to this program the following projects to take up the balance of \$100,000:

Williams Secondary Highway, surfacing and oiling	\$30,000
Cape Arago Secondary Highway, grading, surfacing and oiling	40,000
Little Butte Creek Secondary Highway, grad., Surf., oil.	30,000

1938 FAS PROGRAM (County Roads)

Transfer from this program to the 1939 FAS program for county roads the Oak Hill-Veneta grading project, \$30,000, and substitute therefor from the 1939 FAS program for county roads the grading, surfacing, and oiling of the Falls City Road - \$27,000.00.

1939 FAS PROGRAM (State Highways)

Give final approval to the following projects to complete this program:

Hood River Secondary Highway, grading, surfacing, oiling	\$38,000
Kings Valley Secondary Highway, " " "	30,000

1939 FAS PROGRAM (County Roads)

Give final approval to the following projects to complete this program:

Millsboro-Cornelius Pass, grading, surfacing, and oiling	\$20,000
Section Line-Hosner, surfacing and oiling	46,000
Silverton Road, grading and paving	37,000
Walke-Holland, bridge	12,000
Butte Falls Road, surfacing and oiling	20,000
Moro-Hay Canyon Road, grading and surfacing	10,000
Oak Hill-Veneta Road, grading	25,000
Oak Hill-Veneta grading, transferred from 1938 FAS program	30,000

Transfer from this program to the 1938 FAS Program for county roads the grading, surfacing, and oiling of the Falls City County Road	27,000
--	--------

Eliminate from this program the following projects:

Canby-Marquam Road, oiling	25,000
Chenoweth Road, grading, surfacing, and oiling	16,000

Increase allocations for the following projects:

Eagle Creek-Dover, surf. and oil., increase from \$15,000 to	40,000
North Umpqua Highway, grad., surf., oil, " " \$20,000 "	28,000

JAN 25 1939

(1939 FAS Program, County Roads, continued)

Substitute for the Chenoweth Road Project, in Wasco County,
the surfacing and oiling of the Lower Fifteen Mile Creek
Road, \$16,000

1939 FEDERAL AID PROGRAM

Give final approval to the following roadside improvement
projects:

Astoria	\$ 4,000
Awbrey-Eugene	12,000
Roseburg	3,000
Medford	4,000
Summer Lake	5,300
Stanfield-Pendleton	3,000
North Powder-Muddy Creek	4,800

The Engineer was authorized and instructed to submit such revised
programs to the United States Bureau of Public Roads for final approval.

Consideration was given by the Commission to the selection of proj-
ects to be contracted at its next meeting, scheduled to be held on March 2,
1939. After discussion, the Commission, by unanimous vote, approved the
projects that were selected at the meeting held on January 13, 1939, with the
following changes:

The taking of bids for the Interstate Avenue lighting project in
Portland was deferred.

Plans for the North Powder-North Powder River Road, in Union
County, were changed to eliminate the oiling work and to extend
the surfacing work as far as possible with the \$15,000 heretofore
allocated for such work. The Commission also approved increasing
the allotment to this project to \$20,000 in the event that the in-
creased amount will finance the entire surfacing project.

The amount of \$35,000 previously set up for grading, surfacing and
oiling the Cove Road, in Union County, was increased to \$38,000 in
order to finance a short extension of this project through the
town of Cove.

The Engineer was authorized by the Commission to advertise such
projects for bids to be received on March 2, 1939, it being understood, how-
ever that other projects heretofore approved by the Commission for construc-
tion may be substituted for some in this list, if that is deemed advisable.

The Commission discussed briefly the selection of projects for the
fiscal year 1940 federal aid secondary highway funds, but deferred action

JAN 25 1939

thereon for a future meeting. The Secretary was instructed to keep a list of all of the projects that have been requested for this program, for consideration by the Commission at such time.

The Commission had under discussion requests for the following miscellaneous improvements:

Letter from Ed W. Miller, Manager, Oregon Coast Highway Association, urging the improvement of the Oregon Coast Highway between North Bend and Marshfield as a priority project when the Bunker Hill Section and the Coal-bank Slough Bridge, just south of Marshfield, have been completed:- The Secretary was instructed to list this project along with others for consideration by the Commission when the next program for federal aid projects is arranged.

Request of the John Day Highway Improvement Association for the reconstruction of the Mule Shoe Creek Bridge Section of the John Day Highway:- The Engineer estimated that it would cost about \$22,000 to reconstruct the highway on permanent alignment and to erect a new bridge structure thereon. The Commission indicated that it would place this project in the construction program for the fiscal year 1940 federal aid funds, and instructed the Secretary to list it along with others for consideration when such program is arranged. The Engineer was instructed to make immediate repairs to the existing bridge structure so as to make it safe for travel in the meantime.

Request of the city of The Dalles for state aid in filling in the right of way of the Columbia River Highway in front of the city's proposed civic building and natatorium near the west city limits:- The Commission instructed the Engineer to make a thorough investigation of this matter and report at the next meeting.

Request of the Marion County Court for the construction of a railroad grade elimination project on the county road known as the River Road, south of Salem:- Action on this matter was deferred by the Commission for the reason that its current program for projects of this kind has already been prepared and funds are not available to finance additional projects in such program. Furthermore, the first unallocated money which could be used for additional projects is the fiscal year 1940 funds, which are quite limited. In this connection, the Engineer pointed out that it would be possible to eliminate this crossing and another one on the Oregon Electric line at Orville by changing the alignment of the highway so as to keep the road entirely on the west side of the railroad between these crossings. He was instructed to convey such information to the Marion County Court and to advise the Court also the reason that the Commission is unable to consider its project at the present time.

Request for the paving of the unpaved portions of Lombard Street, Portland, between Vancouver Avenue and the west end of the Northeast Portland Secondary Highway:- Action on this matter was deferred pending personal inspection of the project by Chairman Cabell.

JAN 25 1939

Improvement of the Oregon-Washington Highway through the town of Milton, in Umatilla County, and the elimination of the curve at the south entrance of the highway into this town:- The Engineer estimated that it would cost about \$15,500 to widen the pavement on Main Street (state highway route) for the 5 or 6 blocks requested, and to widen the present 20-foot surfacing from the end of Main Street to Freewater Street, which work would include the construction of curbs. The project would cost about \$9,000, he said, if the curbs were eliminated. He further advised that it would cost about \$7,000 to improve the curve at the south entrance to Milton. The Commission deferred action on these projects for the time being and instructed the Secretary to include them in the list of projects for consideration when the next construction program is arranged.

Request of the Klamath County Chamber of Commerce for improvement of the road which extends south from the Willamette Highway, near Odell Lake, to Crescent Lake:- The Engineer advised that the Chamber of Commerce is asking that a portion of the \$50,000 of Forest Highway funds that have been budgeted for the construction of the north end of the Cascade Lakes Forest Highway be transferred to finance improvement of the road leading to Crescent Lake from the Willamette Highway. The Commission denied the request for the immediate improvement of this road because the Forest Highway Program has already been arranged and it is too late now to change it, and for the further reason that there are no funds available to finance the project.

Request of the town of Halsey for continuance of the reconstruction of the Pacific Highway into and through the town of Halsey:- The Engineer advised that when the reconstruction of the said Halsey section of this highway was commenced it was planned to make a continuous yearly appropriation until the improvement had reached Harrisburg, but the Commission has been unable to adhere to this plan because of lack of funds to finance the work. He estimated that the minimum project that could be economically constructed at this point would cost about \$60,000. The Commission deferred action on this project pending the formulation of its construction program for the fiscal year 1940 federal aid funds. The Secretary was instructed to list this project along with others for consideration by the Commission at that time.

The Engineer reported that the Mills Bridge over the Wilson River on the Wilson River Highway, 5.8 miles east of Tillamook, was severely damaged recently by an overhanging load on a logging truck, rendering it unsafe for traffic. This bridge, he said, is an old structure which was moved from the Nestucca River a number of years ago by Tillamook County, and inspection of the same reveals that it has been damaged by traffic several times in the past; in fact, that there is an old break in the structure which raises the question whether or not it could be repaired and restored to a condition for unrestricted loads. A temporary 3-ton load limit, he said, has been placed on the bridge and will be maintained until all temporary repairs are finished. He gave as his thought that the expense of reconditioning the bridge for legal limit loads is not justified, in view of the large volume of traffic that the road will eventually carry and the heavy log hauling that is now being carried on over this road. He recommended, therefore, that an entirely new structure be built at once, on permanent alignment. He estimated that such permanent

structure would cost about \$75,000, and that it would cost an additional \$10,000 to grade, surface, and oil the approaches to the existing road. After considerable discussion, the Commission approved the Engineer's recommendation by unanimous vote and authorized him to advertise this project for bids to be received as soon as plans can be prepared for the same. Funds to finance the project are to be temporarily transferred from the \$150,000 of 1939 federal aid funds which heretofore have been tentatively budgeted by the Commission to finance paving work on the Clackamas County Line-Hubbard Section of the West Portland-Hubbard Secondary Highway.

In this connection the Engineer also recommended the adoption by the Commission of a 15-mile per hour speed limit across the existing bridge, and, in addition thereto, that appropriate signs be posted on the structure requiring one-way traffic for all trucks. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

**ORDER REDUCING MAXIMUM SPEED LIMIT ON THE WILSON RIVER BRIDGE
EAST OF TILLAMOOK AND PROVIDING ONE-WAY TRAFFIC FOR TRUCKS**

WHEREAS, the highway known and designated as the Wilson River Highway is a state highway and therefore a highway under the jurisdiction and control of the State Highway Commission; and

WHEREAS, said highway crosses Wilson River at a point 5.8 miles east of Tillamook, across which river there has been constructed and is being maintained and used a bridge; and

WHEREAS, the State Highway Commission, after due investigation, has determined and found that said structure cannot with safety to the traveling public sustain vehicles traveling at speeds permitted under Section 55-2201, Oregon Code 1935 Supplement; and

WHEREAS, it is the judgment of the Commission that because of the condition of said bridge the maximum speed permitted on said bridge should be fixed at fifteen miles per hour and it is further the opinion of the Commission that a one-way traffic regulation for trucks using said bridge should be established;

NOW, THEREFORE, IT IS HEREBY ORDERED that the maximum speed permitted for motor vehicles crossing the bridge over Wilson River at a point approximately 5.8 miles east of Tillamook shall be and is fifteen miles per hour.

IT IS FURTHER ORDERED that trucks using said bridge shall be confined to one-way traffic during the period for which this order is in effect.

IT IS FURTHER ORDERED that the restrictions and regulations fixed in this order shall be in full force and effect from the 25th day of January, 1939, until rescinded, modified, or revoked by order of the State Highway Commission.

JAN 25 1939

IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named bridge structure so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED that a certified copy of this order be furnished to the County Clerk of the county in which the said bridge is located and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

The Engineer brought up for discussion the complaint of the Kirkpatrick Advertising Agency relative to the handling of publicity matters in connection with the Highway Commission's Travel and Information Department. It appears that this agency feels that it has been discriminated against in the matter of handling the Highway Department's publicity affairs and alleges that it has not been given an opportunity to submit an offer to handle this work, and that Botsford, Constantine & Gardner were employed to handle this feature without any consideration being given to other agencies. The Engineer advised that the allegations of the Kirkpatrick Advertising Agency are not based on fact because the matter of selecting an advertising agency to handle the Commission's advertising work was given careful consideration by the Advisory Committee at the time of its annual meeting, several agencies being discussed, and it was decided at that time to let Botsford, Constantine & Gardner handle it for another year, when the matter is to be reconsidered. He stated further that the Kirkpatrick Agency wants to discuss this matter with the Highway Commission. After discussion, the Engineer was instructed to take this matter up with the individual members of the Advisory Committee, inasmuch as the committee as a whole will not meet for some time and because the Commission relies entirely on this Committee for advice concerning publicity matters. The Commission indicated that it would approve any action that the Advisory Committee may take on the matter.

In this connection suggestion was made by Commissioner Aldrich that the membership of the Advisory Board be enlarged to include, possibly, a representative of the Oregonian, Portland, and of the Corvallis Gazette-Times. Chairman Cabell and Commissioner Tou Velle concurred, whereupon the matter was referred to the Engineer for handling.

The Commission discussed with the Attorney the provisions of a proposed bill that is to be presented to the Oregon Legislature, now in session, which has for its purpose the codifying of the Oregon highway laws. The proposed bill was approved by the Commission by unanimous vote, subject to minor revisions.

The Commission adjourned at 12:00 o'clock midnight, to reconvene on the following morning in the auditorium of the Public Service Building.

JAN 25 1939

Portland, Oregon, January 26, 1939

The State Highway Commission reconvened at 9:00 o'clock a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
 E. B. Aldrich, Commissioner
 F. L. Tou Velle, Commissioner
 C. B. McCullough, Assistant State Highway Engineer
 J. M. Devers, Attorney
 H. B. Glaisyer, Secretary

Bids as follows for highway construction projects and for the sale of buildings were opened and read in conformance with previously published notices:

SALE OF BUILDING IN OREGON CITY

Building No. 6468
(Known as Pope Property)

V. M. Howard	\$70.00
Sullivan Wrecking Company	58.89
Glenn E. Dale	40.00

SALE OF BUILDING AT GLENEDEN BEACH

Building No. 5739 (Former Owner I. F. Raymond)	
W. A. Alexander	\$42.00

JAN 26 1939

Chairman Cabell announced that the award of contracts and the sale of the buildings would be made at 3:00 o'clock p. m. in the same room.

The following members of the Clackamas County Planning Board were present in regard to the mooring of boats in the Willamette River at the foot of 8th Street and 10th Street, in Oregon City: Wallace R. Telford, Chairman of the Board, and W. F. Haberslach, Member, and J. E. Coleman, President, of the Clackamas County Sportsmen's Association. Mr. Telford was spokesman for the group. He advised that salmon fishing in the Willamette River opposite Oregon City is a very popular sport, engaged in by hundreds of fishermen during the salmon fishing season, and that these fishermen have for years moored their boats along the waterfront between 8th and 11th Streets, but recently were ordered by a representative of the State Highway Commission to discontinue this practice. He urged the Commission to reconsider its action and to allow the present moorage facilities to be continued because there is no other place along the waterfront within a reasonable distance where boats can be tied. He also asked the Commission to provide some means for the fishermen to cross underneath Water Street, which is the new state highway route, at 8th Street and between 10th Street and 11th Street, so that pedestrians may cross this highway in going to and from the docks without being subjected to the dangers of highway traffic. He explained that they propose to maintain, if possible, a floating dock with locker and boat moorage facilities for the benefit of the fishermen, and would like to have an underpass between 10th Street and 11th Street with convenient steps leading to the floating dock. The crossing at 8th Street, he said, would be a simple matter because the plans of the Commission call for a viaduct at such location and it would not be necessary to arrange for a special crossing at such place.

Chairman Cabell advised that the Commission has gone on record as being opposed to the granting of moorage rights to squatters and individuals. However, it might be justified in granting such rights for a public convenience. He explained that the Commission does not own the moorage rights at the foot of 8th Street, although it does own such rights between 10th and 11th Streets. Mr. Telford stated that they are particularly interested in securing the moorage right in order that fishermen may continue to enjoy the salmon fishing sport.

After considerable discussion, the Commission referred the matter to the Engineer with instructions to investigate the feasibility of constructing pedestrian ways under and across the highway right of way, and to report his findings at the earliest opportunity. The Engineer was also instructed to look into the matter of the feasibility of permitting the present floating dock to be used for one more fishing season, provided it does not interfere with the highway construction work that is contemplated under the contract that is to be let today. Mr. Telford presented a resolution adopted by the Clackamas County Planning Board and a petition signed by the Clackamas County Sportsmen's Association and numerous citizens of Oregon City in support of the oral request.

The matter of reconstructing the 82nd Street highway between Pope Hill and Oregon City was also brought up for discussion. Mr. Telford urged

JAN 26 1939

the Commission to place this project in the program for construction in 1939. He was informed by Chairman Cabell that it would not be possible to rebuild this section this year because there are no funds available to finance it, and that the earliest moneys that could be used for such purpose are 1940 federal aid funds, for which no program has been arranged because there are no state moneys to match them. The Commission will be pleased to consider this project, he added, along with others at the proper time. Mr. Telford advised that they are particularly anxious to secure this project because it will eliminate two dangerous railroad crossings where numerous fatal accidents have occurred. He also stated that they are not urging the construction along any particular route but will be satisfied with any route that the Highway Commission selects.

A delegation consisting of County Judge A. R. Bowman, of Crook County; County Judge W. R. Cook, of Jefferson County; County Judge Nelson B. Higgs, of Harney County; and County Commissioner William Baer, of Deschutes County, was present. Judge Cook asked for additional improvements on the Warm Springs Highway in the vicinity of He He Butte, and also for the construction of the Madras-Prineville Section of such highway. He was informed by Chairman Cabell that the Commission has it in mind to construct another section of this road north of Warm Springs Agency, particularly from the junction of the Shinnasha Road to the junction with the Bear Springs Road, but cannot state definitely at this time when the work will be placed under contract, as it is a matter of availability of funds to finance the work. He explained that this road is not on the federal aid highway system and so is not eligible for federal aid funds, and the only funds available to the Commission for this project, other than state funds, are those provided by the Federal Government for improvement of roads across public lands; and, due to the fact that such funds are very limited this year, it does not appear that the Commission can put on a very large project. The same condition obtains, he said, with respect to the road between Madras and Prineville. The Commission is now securing suggestions for the 1940 funds, he added, and will be glad to consider this project along with others in the formulation of the program for the same, but that is all the encouragement that can be given today.

Judge Bowman also urged an allocation of federal aid secondary highway funds for the improvement of the road between Madras and Prineville, particularly the section north from Prineville to the railroad overcrossing.

Judge Cook then asked the Commission to surface the 2-mile section of the Warm Springs Highway from the end of the present surfacing contract to the Deschutes River Bridge, which work was left out of the contract completed last season and is all that is needed to complete the surfacing on this road from Madras to the Deschutes River. Chairman Cabell advised that the Commission will be pleased to keep this project in mind but is not in a position today to make any definite commitment thereto because of the shortage of funds.

Judge Higgs inquired as to the plans of the Commission for the construction of an oasis in honor of the late William Hanley. He said that the people of Burns who are particularly interested in this project are not satisfied with the naming of the oasis at Brothers in honor of Mr. Hanley, and that

JAN 26 1939

they prefer one located along the highway between Burns and Lakeview. Chairman Cabell explained that the Lakeview-Burns Highway is not a federal aid highway, hence is not eligible for federal aid funds, with which the Commission planned to finance the "William Hanley Oasis". In view thereof, and for the further reason that the Central Oregon Highway location does not meet with approval, it was decided to defer for the time being the definite selection of a site for such oasis.

Judge Higgs then asked for the continued improvement of the Buchanan-Juntura Section of the Central Oregon Highway. He was informed by Chairman Cabell that the Commission has this project in mind and will be pleased to consider it in the formulation of its next program.

The question of proper drainage on the Central Oregon Highway where a spring emerges on the right of way near Buchanan, was brought up by Judge Higgs. The matter was referred to the Engineer for investigation.

County Commissioner Baer inquired as to the plans of the Commission for the improvement of the Butler Market Road. He was informed by Chairman Cabell that the Commission is considering this project for the 1940 fiscal year federal aid secondary highway funds, with the idea of placing it at the head of the list of such projects, in view of the fact that the county is co-operating in the cost of the improvement.

Mr. J. R. Hulbert, President of the Sunset Logging Company, was present in regard to the sale to the state of some timber strips along the Wolf Creek Highway. He advised that his company is positive that their timber on these strips can be liquidated for \$5.10 per MFBM, which is the price for which he previously offered to sell the tracts to the state, and accordingly cannot reduce the amount of its offer. Chairman Cabell advised that the moneys available to the Commission are public moneys and the Commission must be very careful in the expenditure of the same, in view of which the Commission is not interested in the acquisition of these timber strips at the present time unless they can be purchased at the rate of \$3.50 per MFBM for the timber standing thereon.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room, with all Commissioners, the Assistant State Highway Engineer, the Attorney, and the Secretary present.

During the noon hour the Commission conferred with A. B. Harr, Chairman, Labor and Wage Committee, Associated General Contractors, and E. A. Denmore, Executive Secretary, Allied Heavy Construction and Highway Crafts Union, in Chairman Cabell's office in the Failing Building, relative to the insertion of a clause in all highway contracts establishing a unit wage scale in conformance with the wage scale adopted by the Associated General Contractors in collaboration with the A. F. of L. The matter was discussed at considerable length but no decision was reached. Mr. Harr filed with the Commission a copy of the agreement between the Associated General Contractors and certain unions, together with Supplement No. 1 thereto. He was informed by Chairman Cabell

that the Commission would take the matter under advisement and would give him an answer as soon as possible.

At 2:00 o'clock p. m. a delegation from Hood River County appeared before the Commission relative to the completion of the oiling of the Hood River Secondary Highway between Dee and Hood River. Members of the delegation were County Judge C. D. Nickelsen and County Commissioners R. W. Perry and R. Waldo Arens, representing Hood River County Court; Rory Collins and Ray Hazeltine, representing the Hood River Progressive Club. They asked for the completion of the oiling of this section at the earliest possible time. They were informed by Chairman Cabell that the Commission has budgeted an amount of \$38,000 for this project and expects to award a contract for the work at the March meeting of the Commission unless something should develop in the meantime to require its postponement.

County Commissioner Perry inquired as to the Commission's plans for the construction of the proposed revision of the Mt. Hood Highway at Fike's Corner. Chairman Cabell explained the status of the Commission's finances and advised that it seems impossible to place this project in the program for early construction, but the Commission will be glad to consider it in the formulation of the 1940 program. Commissioner Perry then asked for the improvement of the county road which extends westerly from the Mt. Hood Highway through the town of Odell to a connection with the Hood River Secondary Highway, and advised that this project is the County Court's first choice for the next federal aid secondary highway funds that are allotted to Hood River County. He was informed that the Commission would keep this project in mind.

Mr. Dewey Gault, Portland, came before the Commission in regard to the construction of an approach road from his property located east of the Pacific Highway at the junction of Union and Denver Avenues, Portland. He asserted that he must have an outlet from his property and would be obliged to construct a direct approach to the highway unless some other solution can be found. He indicated that he would resort to legal process in order to secure the same, if necessary. Chairman Cabell advised that the Commission has plans for a traffic separation project at this location but the construction of the same involves more money than the Commission has to spare at the present time; so, of necessity, the Commission has to defer it. A direct approach to the highway, he said, will cause too great a hazard to traffic on the Columbia River Highway; but, if Mr. Gault intends to resort to legal proceedings in order to secure the same, that is his prerogative and the Commission cannot stop him, but will offer objections thereto when the case comes up for trial.

Mr. Gault gave as his thought that he is entitled to an outlet from his premises and suggested that the Commission approve a direct connection with the highway as a temporary proposition until such time as the Commission constructs its traffic separation project, when he will change his roadway to pass underneath the highway at the underpass that is included in the plan. The Attorney advised that from a legal standpoint and as a general rule the abutting property owner has right of access to the highway for his personal use, providing the roadway is constructed in a reasonable location. However, it is a different matter if the roadway is not to be used exclusively by the owner and if an undue hazard is created.

JAN 26 1939

After further discussion, and in view of the Attorney's opinion, the Commission decided to secure additional information before definitely passing on the matter. The Engineer was instructed to have Construction Engineer Smith and Traffic Engineer Beakey contact Mr. Gault and endeavor to work out a solution to this problem that would not require a direct connection of the approach road with the highway. However, the Commission indicated that it would approve a direct connection if that is absolutely necessary. Chairman Cabell was given full power to act in the matter by Commissioners Aldrich and Tou Velle.

A delegation from Portland, representing the Moreland Community Club and the McLoughlin Chamber of Commerce, came before the Commission and requested the construction of a ramp leading northerly from the east end of the Bybee Avenue viaduct to McLoughlin Boulevard, for the benefit and convenience of north-bound traffic from southeast Portland. Mr. L. M. Lepper, Director of the Eastside Commercial Club, Portland, was spokesman for the group, which included the following: L. G. Apperson, City Engineer of Portland; Fred Jarvis, Secretary of the McLoughlin Chamber of Commerce; and others. They pointed out that the city of Portland has already constructed an approach to McLoughlin Boulevard (East Portland-Oregon City Highway) from the west end of Bybee Avenue viaduct for the benefit of south-bound highway traffic; but it appears that the connection is being used also by north-bound traffic, which has to cross McLoughlin Boulevard in order to get into the proper lane, thus creating a hazard on this heavily traveled thoroughfare which will eventually result in serious traffic accidents. They urged the construction of a ramp on the east side of the viaduct in order to avoid a situation of this kind.

In the discussion of this matter it was pointed out that the Portland City Planning Commission and the Portland city officials have had under discussion for some time the matter of providing a connection to the highway from southeast Portland, and that Bybee Avenue has been considered along with Reedway and other points for such connection; further, that this matter was the subject of a conference between members of the City Planning Commission and representatives of the State Highway Department some time ago when it was agreed that a thorough study of all possible connections was to be made. It appears that such study has not been made because of a misunderstanding as to whether the city or the state should do the work. The Engineer suggested that a comprehensive plan of all connections should be made before anything definite is decided.

Objections to the construction of the proposed ramp at Bybee Avenue were offered by Messrs. H. G. Niemans and O. C. Shankle. Mr. Niemans stated that he represents 50 merchants of Westmoreland, who are dependent to a large degree upon the business that they secure from the Eastmoreland district. The construction of a ramp as proposed, he said, would be an inducement for people to trade in downtown Portland and would seriously affect the business of these merchants. He strenuously opposed the construction of the ramp from such standpoint. Mr. Shankle also opposed the construction of such ramp for similar reasons.

After further discussion Chairman Cabell advised that the Highway Commission is not in a position today to make any definite decision with reference thereto but will withhold same until a study has been made of the entire situation. The Engineer was thereupon instructed to make such investigation and comprehensive survey of all possible connections and to render a report thereon as soon as convenient.

Mr. Victor V. Tengwald, attorney, Medford, appeared before the Commission in regard to the claim of Frank Forth for damages arising out of the construction of the Pacific Highway (new route) across Mr. Forth's property in the Siskiyou Mountains, south of Ashland. A decision in this matter was deferred by the Commission pending full investigation and report by Mr. R. H. Baldock, State Highway Engineer, when he returns from South America.

The Commission had under consideration the bids received at the morning session for highway construction projects and sale of buildings and decided unanimously to award the contracts to the low bidder in each instance, with the following exceptions:

It was decided to defer the award of the contracts for the Albany Overcrossing projects, including both the grading and the overcrossing structure, for the time being, and to refer the bids received therefor to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

It was pointed out that contractor Leonard & Slate, who submitted the low bid for the grading and paving of the North Unit of the Oregon City Section of the Pacific Highway East, submitted identical bids on the use of road oil and tar. The Commission decided to defer the award of this contract until public announcement has been made of the other awards, and to decide then the kind of material by the flip of a coin in the presence of the contractor.

The contract for the Polallie Creek-Hood River Rock Production Project was awarded to A. S. Wallace, Roseburg, the second-low bidder, because of an irregularity in the low bid submitted by Van Cleave and Van Cleave, this contractor having failed to execute the bidder's bond. The following resolution in regard to the award of the Polallie Creek-Hood River Rock Production Project was adopted by the Commission by unanimous vote, upon motion of Commissioner Aldrich, which was duly seconded by Commissioner Tou Velle :

A RESOLUTION AWARDED THE CONTRACT FOR THE CONSTRUCTION OF THE POLALLIE CREEK-HOOD RIVER SECTION OF THE MT. HOOD LOOP HIGHWAY IN HOOD RIVER COUNTY, DOCKET NUMBER OREGON 1375-F, UNIT C

WHEREAS, bids received for the construction of the Polallie Creek-Hood River Section of the Mt. Hood Loop Highway in Hood River County have been duly opened and read, in accordance with published notice, and compared,

JAN 26 1939

AND WHEREAS, the bid submitted by A. S. Wallace, contractor, is the lowest responsible bid received and is within the funds available for the construction of the said project,

NOW THEREFORE, Be It Resolved by the State Highway Commission of the State of Oregon that the contract for the construction of the Polallie Creek-Hood River Section of the Mt. Hood Loop Highway in Hood River County be and the same is hereby awarded to A. S. Wallace, contractor, in the amount of Eleven Thousand Ninety Dollars (\$11,090.00), and

Be It Further Resolved that this award shall not be effective until the successful bidder has been notified in writing of such award by the Secretary of the Oregon State Highway Commission.

At 3:00 o'clock p. m. Chairman Cabell publicly announced the following awards of contracts and sale of buildings for which the Commission received bids at the morning session, such awards and sales having been previously approved by the Commission by unanimous vote:

"North Unit of Oregon City Section of the Pacific Highway East, in Clackamas County. 0.44 mile grading and paving. Leonard & Slate, Multnomah, submitted the low bid for this project at \$53,974.50, based on the use of road oil, and an identical amount based on the use of tar. Mountain States Construction Company, Eugene, submitted the second low bid at \$54,194.00, based on the use of tar. It did not submit a bid based on the use of road oil. Jacobsen-Jensen Company, Portland, with no bid on the use of tar and a bid of \$54,605.00 based on the use of road oil, was the third low bidder. There were 4 higher bidders. The low bid of Leonard & Slate is satisfactory to the Commission and the contract will be awarded to this contractor. However, a decision as to the type of material, either tar or road oil, will be made on the flip of a coin in the presence of the contractor immediately following the announcement of the awards of the other contracts. (Mr. Charles H. Leonard was called to the platform immediately following the announcement of the other awards and a coin was flipped in his presence by Chairman Cabell, which resulted in the alternate, based on the use of tar, being selected. Chairman Cabell thereupon announced the Commission's decision.)

"Abernethy Creek Bridge on the Pacific Highway East, in Oregon City, Clackamas County. Nine bids were received for this project, the low one being that of Odom Construction Company, Oregon City, at \$18,801.00. The second low bid was submitted by Contracting & Sales Company, Inc., Portland, at \$19,205.00. The Commission has awarded the contract to the low bidder, Odom Construction Company, at its low bid of \$18,801.00.

"Bridge over Nehalem River on the Wolf Creek Highway, in

Clatsop County. Mountain States Construction Company, Eugene, submitted the low bid for this project at \$111,420.00. Kuckenberg Construction Company, Portland, submitted the second low bid at \$121,480.00. There were 5 higher bidders. The Commission has awarded the contract to the Mountain States Construction Company at its low bid of \$111,420.00.

"Necanicum-Nehalem River Section of the Wolf Creek Highway, in Clatsop County. 12.3 miles surfacing and bituminous binder course and 11.1 miles bituminous macadam wearing surface; also furnish 5,100 cubic yards crushed rock in stock piles. The low bid for this project was submitted by Edwin C. Gerber, Oregon City, at \$123,187.50 based on the use of road oil. He did not submit a bid based on the use of tar. The second low bid was submitted by McNutt Bros., Eugene, at \$125,573.80 based on the use of road oil, and \$125,908.40 based on the use of tar. There were 12 higher bidders. The Commission has awarded the contract to Edwin C. Gerber at his low bid of \$123,187.50 based on the use of road oil.

"Polallie Creek-Hood River Section of the Mt. Hood Highway, in Hood River County. Furnish 6,000 cubic yards crushed rock in stock piles. Van Cleave & Van Cleave, Hoovet, submitted the low bid for this project at \$8,340.00. A. S. Wallace, Roseburg, submitted the second low bid at \$11,090.00, and the third low bid was submitted by R. O. Dail and Warren Bros., Inc., Portland, at \$11,950.00. There were 2 higher bidders. The bid of Van Cleave & Van Cleave was disqualified in that the bond was not signed by the contractor. The Commission, therefore, has awarded the contract to the second low bidder, A. S. Wallace, at his bid of \$11,090.00.

"Albany Overcrossing on the Pacific Highway East, at Albany, in Linn County. The low bid for this project was submitted by Mountain States Construction Company, Eugene, at \$135,970.00. The second low bid was submitted by K. L. Goulter, Seattle, at \$137,250.80. There were 11 higher bidders. The Commission has referred all bids received to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Albany Overcrossing Section of the Pacific Highway East, in Linn County. Grading approaches to overcrossing structure and paving work on intersecting streets. Eighteen bids were received for this project, the low one being that of Roy L. Houck, Salem, at \$113,461.50, and the second low bid being that of Slate Construction Company, Albany, at \$121,261.00. The Commission has referred all bids received to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Tudor Ranch-Blue Mountain Pass Section of the I.O.N. Secondary Highway, in Malheur County. 22.06 miles grading. M. L. O'Neil & Son, Eugene, submitted the low bid for this project at \$86,628.75.

H. E. Cornell, Boise, Idaho, submitted the second low bid at \$88,645.00. There were 11 higher bidders. The Commission has awarded the contract to the low bidder, M. L. O'Neil & Son, at their bid price of \$86,628.75."

Building in Oregon City

"Building No. 6468, known as Pope Property. The Commission received 3 bids for this building, the high one being that of V. M. Howard, Oregon City, at \$70.00, and the second high one being that of Sullivan Wrecking Company, Portland, at \$58.89. The Commission considers the offer of V. M. Howard satisfactory and accordingly has sold the building to him for \$70.00."

Building in Gleneden Beach

"Building No. 5739, formerly owned by I. F. Raymond. The only bid received for the purchase of this building was that of W. A. Alexander, Gleneden Beach, at \$42.00. The Commission considers this offer satisfactory and accordingly has sold the building to him for \$42.00."

A delegation representing the Chambers of Commerce of Newberg and Yamhill was present in the interests of the secondary state highway between Newberg and Yamhill. Members of the delegation were as follows: C. H. Baynard, Secretary of the Newberg Chamber of Commerce; Mayor George Layman of Newberg; S. L. Parrett and C. A. Morris, also of Newberg; J. H. Teegarten, Mayor of Yamhill; Chester P. Walker, C. W. Eustice, and George Zimmerman, also of Yamhill, and Mr. M. F. Corrigan, of McMinnville. The County Court of Yamhill County, represented by County Judge Wm. O. Powell and County Commissioners Thos. Bockes and Harry F. Williams, was also present and spoke in behalf of this road. Mr. Baynard headed the delegation and introduced the speakers.

Judge Powell said that the present highway is practically worn out, that the drainage is poor and that the road needs improvement immediately; otherwise it will be necessary to reconstruct it throughout. County Commissioner Bockes urged the improvement to eliminate the rough condition of the present road, which, he said, is the worst feature. However, he urged the oiling of the road to alleviate the dusty condition that obtains during the dry season. County Commissioner Williams concurred in the remarks of the other speakers and added that the improvement of the road would be of great benefit to that particular end of Yamhill County.

Messrs. Parrett, Zimmerman, Walker, Teegarten, and Morris each spoke briefly in behalf of this improvement. Mr. Walker pointed out that the distance from Yamhill to Newberg is only 11 miles by this road; but, in most cases, people prefer to travel a circuitous route via McMinnville, which is 7 miles longer, because of the rough condition of the Yamhill-Newberg road. Mr.

Corrigan stated that he resides in McMinnville but he is glad for the opportunity to endorse this project on behalf of the people directly concerned.

Chairman Cabell thanked the delegation for its presentation and advised that the project will be given due consideration in the formulation of future construction programs.

The County Court of Tillamook County, represented by County Judge Harland M. Woods and County Commissioners E. H. Lindsey and E. G. Anderson, was present and urged completion of the Little Nestucca Secondary Highway between Dolph and Meda. Also present in behalf of this road were Dr. H. L. Toney and M. F. Corrigan, of McMinnville; Mr. and Mrs. L. C. Muscott, of Dolph; and Mr. and Mrs. A. H. Fox, also of McMinnville. Judge Woods headed the delegation. Speaking on behalf of this project were Judge Woods, County Commissioner Anderson, Dr. Toney, Mr. Corrigan, and Mr. Muscott. Dr. Toney suggested the improvement as a P.W.A. or W.P.A. project in the event that the Commission is unable to finance it in any other way. He pointed out that there would be a considerable saving in mileage to Neskowin and Pacific City via this highway, when constructed, and urged the improvement from such standpoint. Mr. Anderson said that this is a much needed road and, in his estimation, an expenditure for the improvement of same is fully justified, particularly in view of the fact that the state already has an investment of \$100,000 in the present road and there is only a short distance remaining to be built.

Mr. Corrigan declared that the improvements made to date are of no value and will be of no value to the public until the road is made passable throughout its entire length. He alleged that the road is in worse condition now than it was 35 years ago and asserted that wagons could be driven over it then, whereas now traffic cannot get through except on foot or horseback. He advised that the road serves a large dairying community and in connection therewith it is necessary to truck hay in from Portland. He urged the construction of the road from such utility and commercial standpoint and that it be done as a W.P.A. project as suggested by Dr. Toney. He alleged that the road will provide a saving of 30 miles in a round trip from Neskowin to Portland and gave as his thought that it is unfair to leave the road in its present condition when it would only cost a comparatively small amount to fix it up for year-round travel.

Judge Woods spoke for the improvement from the tourist standpoint. Mr. Muscott stated that he resides in the district served by the road and the main thing at the present time as far as he is concerned is the building of a bridge and the rebuilding of a 1-mile section that is absolutely impassable. He also said that the children of the district are unable to attend school because of the condition of the road and that many people who own property in the district cannot reach their holdings because of the road condition. Mr. Corrigan presented a petition signed by numerous residents and tax payers of Tillamook, Yamhill, Marion, and Polk Counties urging the completion of the road at the earliest possible time.

Chairman Cabell explained the status of the Commission's finances and advised that, while the Commission is not able today to make a definite

JAN 26 1939

decision, it is glad to have the viewpoint of the delegation and will give the project due consideration in future programs.

Mr. F. C. Knapp, President of the Knapp Company, Portland, appeared before the Commission later in the session and presented additional petitions on behalf of this project.

County Judge George A. Potter, of Sherman County, headed the delegation which came before the Commission and urged the improvement of the secondary highway between Condon and Wasco. Others in the delegation were County Judge James D. Burns and County Commissioners Earl P. Hoag and Glen Richards, of Gilliam County; County Judge G. G. Shults, of Wasco County; County Commissioner David R. Reid, of Sherman County; Frank E. Whitcomb, Manager of the Port of The Dalles, and W. S. Nelson, Manager of The Dalles Chamber of Commerce; George Kaseberg, A. K. York, R. M. Regan, J. S. Burres, and C. P. Edwards, all of Condon; Bart Burrell, Walt May, and W. F. McLeod, all of Moro; and John T. Pope, of Portland. They urged the improvement of this road at the earliest opportunity, from the commercial standpoint. Judge Potter also asked the Commission to extend the secondary highway from its terminus at Fulton Canyon to a connection with the Sherman Highway at Wasco.

Speaking in behalf of this improvement were Judge Burns, who pointed out that a saving of from 40 to 60 miles could be made between Condon and Portland by this secondary highway; Judge Shults, who stated that improvement of the Condon-Wasco Road will be of great benefit to Wasco County because it will reduce the mileage considerably from the district served by the road to the Port of The Dalles; Mr. Nelson, who referred to the report of the State Highway Engineer written in 1934 on the subject of the alternate routes from the John Day Valley to Portland, from which he quoted statistics relative to savings in freight rates that will accrue by reason of the construction of the Bonneville Dam, and further statistics pertaining to the amount of produce that is being shipped out of this territory; Mr. Whitcomb, who gave additional statistics on the matter of reduced freight rates and particularly pointed out the great savings that the ranchers would realize by reason of being able to deliver their products to market by truck rather than by rail; Mr. Burres, who spoke for the project from the standpoint of reduced freight rates; Messrs. Kaseberg, Reid, and Richards, who endorsed the remarks of the other speakers; Mr. York, who alleged that the John Day Highway was originally laid out through Wasco and Condon, and who urged the securing of P.W.A. or W.P.A. funds to finance construction, and even the use of prison labor if the work could be expedited thereby; Mr. McLeod, hotel owner, Moro, who spoke for the improvement from a military standpoint as well as from the commercial standpoint; and Mr. Edwards, who spoke for the improvement from the standpoint of benefits to local people generally, and declared that the road would add to the net income of these people who are permanent residents and taxpayers.

Judge Potter urged the Commission to give this matter serious consideration and to do something about it at the earliest possible time. Chairman Cabell thanked the delegation for its appearance and presentation.

Mr. James. L. Conley, attorney, of Portland, appeared before the

Commission in behalf of the Gearhart Park Company, relative to the sale to the state of tidelands and right of way at Gearhart, which matter has had attention by the Commission on previous occasions. He advised that, since conferring with the Commission previously with respect to this matter, he has ascertained that the additional taxes that would have to be paid before the company could transfer these properties to the state are as follows: extra tax for the right of way, \$150.02; extra tax for the tidelands, \$134.35; making a total of \$284.37. He offered, on behalf of the Gearhart Park Company, to pay half of this additional tax if the state will assume payment of the balance. After discussion, the Commission accepted the offer and ordered that the matter be terminated on such basis.

The County Court of Clatsop County, represented by County Judge Guy Boyington and County Commissioners James Elliott and John Slotte, was present. Judge Boyington stated that the county owns about 150 feet of river frontage at the foot of 8th Street, Astoria, which location has been considered as a possible future site for the Columbia River ferry, and that the county has received an offer to purchase the lower 50 feet of this tract, all of which lies downstream from the foot of 8th Street; but does not want to close the deal until it knows definitely whether or not the state needs the property in connection with the ferry operation. Chairman Cabell advised that the Commission is not in a position at the present time to give him a definite answer but will ascertain the facts and will let the Court know as soon as possible.

Judge Boyington also inquired as to whether or not the state needs any of the county's property for revision of the Columbia River Highway at the east city limits of Astoria. He explained that the county has received offers to purchase some of this property but will not sell if the state needs it. The Engineer was instructed to investigate this matter and report.

Commissioner Elliott inquired as to whether or not the Commission has acquired all of the right of way that it needs across the county's property for the proposed Astor Street revision in Astoria. The Attorney advised that the right of way has not all been acquired for this project as yet. He was instructed by the Commission to let the County Court know just how much more of the county's property is needed for this proposed improvement.

County Judge J. J. Barrett, of Linn County, appeared before the Commission and particularly urged continued improvements on the South Santiam Highway so as to make this road available for traffic throughout, at the earliest possible time. He was informed that the Commission is doing the best that it possibly can for this road and anticipates that the grading work will all be completed this year except certain revisions west of Cascadia, to eliminate excessive curvature in the present road, for which surveys are now under way.

Chairman Cabell brought up for discussion a number of bills that have been introduced in the Legislature affecting the State Highway Department. He gave as his thought that he probably will be called upon to appear before the highway committees with respect to these bills, and, if so, should be in a position to express the Commission's viewpoint in regard to them.

JAN 26 1939

The bills were then considered and a decision with respect to each determined.

The Attorney brought up for discussion the claim presented by Mr. W. H. Kellogg for overtime work that he alleges he was required to perform in connection with his duties with the State Highway Department. It appears that Mr. Kellogg was employed in the Planning Survey Department and that his duties required him to contact people after 5:00 o'clock in the evening and that he believes he is entitled to double pay for such time, notwithstanding the fact that he was not required to work during regular office hours on the days that he worked during the evening and was given instructions to that effect. The Attorney advised that, in his estimation, there is no justification for Mr. Kellogg's claim but Mr. Kellogg wants a hearing before the Commission in regard thereto. The suggestion was made that the Commission designate someone to hear what Mr. Kellogg has to say and that his testimony be taken, in writing, and a transcript thereof delivered to the Commission, upon which to base its decision. The Commission approved the suggestion.

The Engineer brought up for discussion the application of Wauna Toll-bridge Company for a permit authorizing the construction of an overcrossing and highway connection from the Bridge of the Gods to the Columbia River Highway at Cascade Locks. He advised that the company proposes to build this connection at its own cost and expense. Further, that he has checked the plans and believes that they meet the state highway requirements, except that provision should be made for traffic islands to properly direct traffic entering and leaving the intersection, and provided, further, that provision is made for at least 30 feet of horizontal clearance over the highway at all times. He recommended approval of the company's request subject to the condition that the company will provide for the traffic islands and the necessary horizontal clearance and will arrange to carry on construction work so that highway traffic will not be interrupted or endangered; and provided, further, that all work is done to the entire satisfaction of the State Highway Commission. The Commission approved the recommendation unanimously.

The Commission had under discussion the matter of authorizing the Assistant State Highway Engineer, Mr. C. B. McCullough, to attend a meeting of the American Concrete Institute, which is to be held in New York City March 1 to 3, 1939. The Commission approved by unanimous vote Mr. McCullough's attendance at such meeting at state expense, subject to the condition that the expense is also approved by Governor Charles A. Sprague. The matter was referred to Chairman Cabell to discuss with Governor Sprague.

The Engineer presented a letter from County Judge J. J. Barrett, of Linn County, stating that Linn County will accept responsibility for the future maintenance of that portion of the Albany-Lyons Secondary Highway (old route) known as the Schindler Bridge Section, including the old bridge structure, which is to be abandoned as a state highway when the new bridge and approaches thereto are completed. In view of this letter the Commission decided not to dismantle the old bridge when the new one is completed, as was originally intended. The following resolution abandoning the section of the old highway was adopted by the Commission by unanimous vote:

JAN 26 1939

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Albany-Lyons Highway in Linn County; and

WHEREAS, by reason of said relocation and the reconstruction of said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part of the old location, which included the Schindler Bridge over Thomas Creek, and which section or part of the highway abandoned is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said state highway as formerly located, improved and used; and

WHEREAS, in connection with the abandonment of said section of said highway, including said bridge, affirmative action should be requested of the County Court of Linn County with respect to the further maintenance of and responsibility for said bridge by Linn County;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Fleming Ranch-Schindler Bridge Section of the Albany-Lyons Highway in Linn County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Linn County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Fleming Ranch-Schindler Bridge Section of the Albany-Lyons Highway and lying southerly of the right of way required for the reconstructed Albany-Lyons Highway, the beginning

JAN 26 1939

and ending points with reference to the engineer's stations of the new constructed highway being Station 217+90 on the westerly end and Station 287+30 on the easterly end, all in Sections 11 and 12, Township 10 South, Range 1 West, W. M., Linn County, Oregon.

The location of said abandoned right of way and bridge may be more definitely and particularly ascertained and determined by reference to the map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Acting State Highway Engineer, and is dated the 26th day of January, 1939, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red. *

2. That the County Court of Linn County be requested to take official action and record in its records such action with respect to the acceptance of said abandoned section of highway, including said bridge, and the assumption of responsibility therefor by the County.

3. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old abandoned road or bridge, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly constructed and dedicated section of said highway, but it is further ordered and resolved that in the event Linn County accepts the said abandoned section of highway and the said bridge and agrees to become responsible for the safe maintenance of the same, then and in such event no barricade shall be maintained by the Engineer at said bridge or at the points of connection between said abandoned section of highway and the new highway.

4. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Linn County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Linn County and beyond any responsibility or supervision by the State Highway Commission.

* Map filed in Right of Way Abandonment and Retention File - No. 61

The Commission adjourned at 6:00 o'clock p. m., to reconvene at 9:00 o'clock a. m. on the following day in the Benson Hotel to dispose of routine matters. Commissioner Aldrich was excused from being present at such meeting.

Asst. State Highway Engineer

Secretary

Chairman

Commissioner

Commissioner

Portland, Oregon, January 27, 1939

The State Highway Commission reconvened at 9:00 o'clock a. m. in Room 203, Benson Hotel. Present were:

Henry F. Cabell, Chairman
F. L. Tou Velle, Commissioner
C. B. McCullough, Assistant State Highway Engineer
H. B. Glaisyer, Secretary
J. W. De Souza, Assistant Attorney

The Engineer requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful study, the Commission approved the request and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby

JAN 27 1939

are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Mecanicum-Elsie Section - Wolf Creek Highway</u>				
6454-Smith, John, Estate	Stock Pile	0.6667	\$100 per a.	McChesney
6454-Waterhouse, David Thorp	"	0.3333	\$100 per a.	"
<u>Otis-Boyer Section - Salmon River Highway</u>				
6206-Yocom, O. C.	Stock Pile	0.993	\$250 per a.	McChesney

<u>Oregon City Section - East Portland-Oregon City Highway</u>				
3051-Willamette Tribe #6 Improved Order of Redmen	R/W	5348 sq.ft. at \$0.2804 sq.ft.		Parker

A letter was presented from Ed W. Miller, Manager of the Oregon Coast Highway Association, inquiring whether or not the Commission would lease to Mr. Thomas Purdy one-quarter acre of land situate adjacent to the Oregon Coast Highway at Bob Creek, in Lincoln County, which property Mr. Purdy desires to use in connection with a service station business that he proposes to conduct at this location. The Secretary explained that at a previous meeting the Commission denied Mr. Purdy's request to purchase this property and that such information was transmitted to Mr. Miller, who made the request on behalf of Mr. Purdy, and that Mr. Miller's present request is simply a follow-up to ascertain whether or not the Commission would be willing to lease the property rather than sell it outright. It was the thought of the Commission that its object in refusing to sell the property to Mr. Purdy would be defeated if it were now leased to him, and accordingly the request was denied.

The Commission discussed the matter of acquiring additional right of way that is needed for the Skipanon-Seaside Section of the Oregon Coast Highway across the property of John Albertson, in Clatsop County. It was explained that this matter was previously considered by the Commission on January 18, 1935, at which time the Commission ordered that negotiations for the same be discontinued in view of the expense involved and the fact that the reconstruction of the highway at this point was not contemplated for the near future. It was further explained that the right of way in front of the Albertson property is only 40 feet wide, whereas along the adjoining sections it is 80 feet wide, and that it is contemplated to provide an 80-foot width right of way throughout, which will necessitate the taking of a 20-foot strip off the front of Mr. Albertson's land, which he is willing to sell for \$827. It was also explained that Mr. Albertson proposes to improve his property and to construct a fence along the present right of way line, which is only about 10 feet from the traveled roadway; so, if the Commission intends to widen the highway here to correspond with the adjoining sections, the extra right of way should be acquired now, because, undoubtedly, it will cost considerably

JAN 27 1939

more later on after Mr. Albertson completes his improvements. It appeared to the Commission that immediate action on this matter is necessary, hence the Attorney was authorized and instructed to negotiate for the acquisition of this right of way at once.

The Commission discussed briefly, but took no action on, the matter of insurance required by the Sunset Logging Company in accordance with the agreement between the company and the Commission, dated March 31, 1936, covering the matter of the construction of the company's logging railroad over the Wolf Creek Highway, in Clatsop County. In this connection the Engineer advised that all of the work in connection with such overcrossing structure has been completed in a satisfactory manner and that the Sunset Logging Company has asked for reimbursement for advancing the cost of its share of the work, amounting to in excess of \$10,000. He recommended the payment of \$9,000 at this time and retention of the balance by the Commission until the insurance matter has been brought to satisfactory conclusion. The Commission approved the recommendation unanimously.

The Engineer reported receipt of information to the effect that the U. S. Army Engineers have apparently changed their minds with respect to the proposed cooperative project for the use of dredged materials from the Columbia River in the construction of the new highway up the Columbia River Gorge, because they now feel that such cooperative contract would be complicated and unsatisfactory and that the calling for alternate bids would introduce too many complications into their work. The suggestion was made by Major Weaver, he said, that the state arrange with the Government's dredging contractor for the placement of the dredged materials in the highway fill. After discussion, and in view of the fact that the arrangement suggested by Major Weaver would not permit the state to take competitive bids for this work, the Commission decided that it would be advisable to confer further with Major Weaver in regard thereto. The matter was thereupon referred to Chairman Cabell, the Assistant Highway Engineer, and the Construction Engineer to take up with Major Weaver.

The question of completion of the Enterprise-Lewiston Highway in Wallawa County to the Washington State Line had the attention of the Commission. The Engineer advised that he discussed this matter with Lacey V. Murrow, Director of Highways in the State of Washington, and ascertained that the Washington Highway Department is programming its portion of the project in the State of Washington so that it will be entirely completed in about 3 years; whereas, the Oregon portion under the present plans will be finished, as far as the grading work is concerned, in 1940. In view of this report, the Commission decided to do everything possible to have the work in both states completed simultaneously, and to that end ordered that the matter be referred to Mr. R. H. Baldock, State Highway Engineer, to discuss with Mr. Murrow at the earliest opportunity, after his return from South America.

The Commission had under consideration the adoption of a policy with respect to traffic light installations of various types within the corporate limits of cities and towns. In the discussion of this matter it was pointed out that the Commission's present policy with respect to the

installation of flashing signals is to install them at state expense on state highway routes, and that for the installation of what is known as the "stop" and "go" signals is to install them at the joint expense of the city and the state, 50 per cent of the cost being paid by each. It was also brought out that the Commission has not as yet established a policy with respect to the installation of flood lights on highway routes within cities. It was the thought of the Commission that the present policy with respect to the flashing beacons and "stop" and "go" signals should be continued, and it was so ordered subject to confirmation by Commissioner Aldrich.

It was also the thought of the Commission that the state should assume the expense and cost of installing and maintaining the flood lights, but that the cities should pay the cost of the electricity needed to operate them. Such arrangement was approved by the Commission as its policy to be followed hereafter in connection with installations of this kind, subject, however, to confirmation by Commissioner Aldrich. It was also decided that a written agreement should be entered into with the cities before the installations are made.

In this connection the Engineer advised that numerous requests have been received from cities throughout the state for traffic light installations. He predicted that as time goes on the Commission will receive many more such requests, involving the expenditure of a considerable sum of money, and accordingly suggested that the Commission budget annually a certain amount for such purpose. The Commission approved the suggestion by unanimous vote and instructed the Engineer to submit a budget for 1939 for consideration by the Commission at either the April or the May meeting.

Consideration was then given by the Commission to the following requests for traffic light installations:

Request of the Board of Commissioners of Multnomah County for the installation of an overhead flashing beacon on the Lower Columbia River Highway at the west end of the St. Johns Bridge, in Portland:- The Commission approved this installation, which is estimated to cost \$200.

Request of the City of Sheridan for the installation of a traffic-actuated signal at the intersection of Main and Bridge Streets, in Sheridan:- The Engineer gave as his thought that an overhead flashing beacon would be more appropriate at this location and recommended installation of such type of signal, which he estimated would cost about \$100. The Commission approved the recommendation.

Request of the City of Marshfield for installation of a flashing beacon at the intersection of North Front Street and Broadway, in Marshfield:- The Engineer recommended approval of this installation, which he estimated would cost \$100. The Commission approved the recommendation unanimously.

Request of the City of Dallas for installation of a flashing beacon at the intersection of the Salem-Dallas Highway and the Dallas-Coast Secondary Highway, in Dallas:- The Engineer recommended approval of this request.

JAN 27 1939

He estimated that this installation would cost about \$250, the intersection being a wide one, requiring 3 beacons. The Commission approved the recommendation.

Request of the City of Grants Pass for the installation of a floodlight at the crossing of the Pacific Highway (6th Street) with the Southern Pacific main line tracks, in Grants Pass:- The Engineer recommended approval of this installation, which he estimated would cost about \$200. The Commission approved the recommendation unanimously, subject to the condition that the city will agree to pay for the electricity needed to operate it.

Request of the City of Lakeview for the installation of a floodlight at the crossing of the Klamath Falls-Lakeview Highway with the railroad at the west city limits:- The Commission approved this installation, which is estimated to cost \$200.

Request of Messrs. Price and Peters for the installation of a floodlight at the intersection of Southeast McLoughlin Boulevard and Ochoco Avenue, Portland:- The Commission approved this installation, which was recommended by the Engineer, and estimated by him to cost \$100.

Request of the City of Portland for the installation of "stop" and "go" traffic signals on a number of city streets that are state highway routes, particularly the following:

Sandy Boulevard
East Burnside Street from Union Avenue to 12th Street
Interstate Avenue
Southwest 4th Avenue between Jefferson and Burnside Streets
Intersection of Southwest 4th Avenue and Sheridan Street
Southwest 6th Avenue, Morrison Street to Pine
West Burnside Street, from Broadway to 9th
Southeast Powell Boulevard and Morrison Street
Union Avenue, from Columbia Boulevard to Clay Street

The Engineer estimated that the state's share of such installations would be \$53,870.41, based on the city paying one-half the cost. In view of the expense involved, the Commission decided that it could not finance all of these installations this year. After considerable discussion, the Commission authorized the installation of the signals on Sandy Boulevard, East Burnside Street, and Interstate Avenue, the state's share of which is estimated to cost \$21,000, provided the project is also approved by Commissioner Aldrich, it being considered that these are the most important signal installation projects in Portland.

In this connection the Engineer advised that the City of Portland wishes to use signal controllers of one manufacture but is not particular as to what company furnishes the signal heads and pedestals. He pointed out that in order to conform with the city's wishes it will be necessary for the state to either make an outright purchase of the controllers from the company designated by the city or permit the city to purchase the controllers and turn them over to the state for installation, the cost of the same to be credited

to the city's participation in the entire cost of the project. The cost of the controllers, he said, represents about 50 per cent of the cost of the project, and in view thereof he suggested that the city purchase the controllers and turn them over to the state, which would preserve the Commission's past policy in the matter of purchases and would avoid the necessity of turning over any cash to the city. He also gave as his thought that the state should have full charge of the installation. After considerable discussion the Commission decided to let the city do as it pleases with respect to the purchase of the controllers, the city to be given credit for its expenditure on its share of the installation costs; and to advertise for bids for the equipment and material that is to be furnished by the state. The Engineer was instructed to discuss the matter further with the city officials and explain the action taken and also that the Commission will insist that the installations be made under state supervision. A final decision with regard to the matter was deferred by the Commission pending concurrence by Commissioner Aldrich and the return of Mr. R. H. Baldock, State Highway Engineer, from South America.

The matter of payment for electrical energy used in operating the floodlight previously installed at the Kinney Spur railroad crossing with the Pacific Highway, in Roseburg, was discussed. It appears that the Public Utilities Commissioner's order with respect to this crossing provides that the floodlight shall be installed by the State Highway Commission and connected to the street-lighting circuits of the city of Roseburg, but that the current needed to operate the lights, and the maintenance of the lights, is to be the obligation of the city. It also appears that the city has refused to assume this expense and has billed the state for the same, which is neither in conformance with the P.U.C. order nor the newly adopted policy of the Commission with respect to flood lights. The Commission, after discussion, ordered that a communication be directed to the Roseburg City Council pointing out the facts in the case and inquiring what the city intends to do about it, the idea being that the Commission will govern its future action with respect to this light according to the reply received.

The Engineer requested authority to purchase the following equipment:

- 1 portable welding outfit for use in connection with reconstruction of bridge portals - estimated cost \$300
- 2 25-ton ratchet-type jacks for emergency use in connection with bridge repairs - estimated total cost \$75.60

The Commission approved the request by unanimous vote.

The Engineer reported that there are a number of highways throughout the state that are not sufficiently stable to carry heavy traffic during the spring breakup following the winter freeze and that it will be necessary to post them for reduced load limits upon short notice. He requested authority from the Commission to erect appropriate signs on such sections, as occasion demands, without first going through the formality of securing the Commission's approval. The Commission approved the request by unanimous vote and ordered

JAN 27 1939

that the postings shall be confirmed by the Commission by appropriate resolution at its first meeting following the posting of the roads.

The matter of furnishing a water supply for the new W.P.A. camp that is being established by the Works Progress Administration near Manning, on the Wolf Creek Highway, had the attention of the Commission. The Engineer advised that the W.P.A. authorities have investigated the possibility of securing a water supply and have found that wells that have been drilled at a number of places in this vicinity are not very satisfactory; furthermore, they have not been successful in making satisfactory arrangements to secure water from the town of Banks, but it appears that a satisfactory supply can be secured from the spring located on property owned by Rex E. Rose, who is demanding the payment of \$5.00 per month for the same. He further advised that the W.P.A. regulations will not permit an expenditure of W.P.A. funds to pay for a water supply under an agreement or easement, so the W.P.A. officials have asked the state to pay this expense. The Engineer recommended approval of the request during the lifetime of the camp, in view of the fact that the value of the materials, buildings, and other supplies that will be left at the camp when the W.P.A. work is concluded will be considerably more than enough to reimburse the state for the cost of the water. The Commission approved the recommendation unanimously.

The Commission considered and approved for payment the bill presented by the American Association of State Highway Officials, in the amount of \$350.00, covering the dues of the State of Oregon in such association for the year 1939.

The Commission discussed and referred to Mr. R. H. Baldock, State Highway Engineer, letters from H. E. Debolt, Albert Backman, Jr., and W. H. Bailey, all of Carlton, opposing any change in the state herd laws that would place the Panther Creek District of Yamhill County in open range territory.

The Commission referred to Mr. Lewis A. McArthur, President of the Oregon Historical Society, a letter from Mrs. Jennie Reeher, Forest Grove, requesting that the bridge to be constructed over the Wilson River on the Wilson River Highway, near the old Reeher homestead, be named "Reeher Bridge" in honor of the Reeher family who were pioneers of this district.

The Commission discussed but deferred action on a letter from Mr. F. N. Finch, General Manager, Union Pacific Railway Company, offering to furnish a "jump wire" to highway patrolmen operating in the Columbia River Gorge so they can report dangerous conditions existing along the railroad and the highway, in case of emergency. The Commission requested additional information from the Engineer and the Attorney regarding this matter before rendering a decision.

A letter was presented from Mr. W. L. Finley, Portland, urging the Highway Commission's support in the matter of preserving the fish and wild game life along the streams in the Willamette Valley that are included in the Willamette River Flood Control District. The Engineer was instructed to prepare a letter for the Chairman's signature outlining the Commission's attitude

with respect to this matter, as conveyed to Colonel T. M. Robins of the U. S. Engineers' Department, by letter dated March 19, 1937.

The Commission considered and ordered filed letters from the North Tillamook Chamber of Commerce and Coos River Grange No. 701 opposing the proposal of the League of Oregon Cities to secure \$800,000 of state highway funds to finance the construction and maintenance of city streets.

A resolution was presented from Rickreall Grange No. 671 alleging that a dangerous condition exists for traffic at the curve on the Salem-Dallas Highway just west of the Oak Knoll Golf Course, and demanding that the Highway Commission take steps as may be necessary to remedy this condition at once. The Secretary was instructed to inform the Grange that the Highway Commission is cognizant of the fact that there are numerous places on the state highway system where conditions are not the best for travel, and is doing the best that it possibly can with the funds available to improve these conditions, but all cannot be undertaken at the same time because of the cost involved. Further, that appropriate signs and warning signals have already been installed at the curve referred to, which should help considerably until the Commission is financially able to reconstruct the highway to eliminate this curve. He was also instructed to advise the Grange that the Commission will consider this project in the formulation of its next construction program, although it is not in a position at this time to make a definite promise in regard thereto.

A letter was presented from Smith-Wood Products, Inc., Coquille, requesting sidewalk construction along the Oregon Coast Highway from the city limits of Coquille to its plant located nearby. The Commission referred this matter to the Engineer for investigation and report.

The Commission discussed an inquiry from Mrs. Mary H. Clark, Portland, as to when the Commission expects to make a definite decision with respect to the adoption of a permanent route for the Pacific Highway West, through Tigard. The Secretary was instructed to inform Mrs. Clark that the Commission regrets the delay in reaching a decision in this matter but is doing all that it can to secure information on which to base its decision and hopes to be able to decide the matter in the near future. The Commission ordered a report from the Attorney for its next meeting, on the status of the right of way options.

The Commission discussed an inquiry from the Oregon Piling Company as to when the Commission expects to allow the truck hauling of logs on a 2-mile section of the Wolf Creek Highway just west of Sunset Camp. The matter was referred to the Engineer for investigation and report at the next meeting.

The Commission considered and ordered filed a letter from the Southwest Portland Community Club to City Commissioner O. R. Bean, of Portland, relative to the proposed construction of the westerly approach to the Ross Island Bridge, in Portland.

The Commission discussed a letter from the Canby Kiwanis Club requesting permission to erect a Kiwanis Club Sign in a prominent location along

JAN 27 1939

the Pacific Highway, either within or without the city limits of Canby. A decision in this matter was deferred by the Commission pending a report from the Engineer as to what has been done about ridding the highways of advertising signs of all kinds, including signs of civic organizations.

The Commission discussed a letter from Santa Clara Grange No. 746, Eugene, suggesting that the old and new Pacific Highway routes between Junction City and Eugene be designated U. S. Highway No. 99E and U. S. Highway No. 99W, respectively. The Commission denied the request in view of the fact that the American Association of State Highway Officials, which is the official body that approves U. S. numbered routes, is opposed to the designating of alternate routes by the same number. The Commission ordered that the Grange be so informed and that Mr. F. W. White, Eugene, who also has requested such designation, be likewise informed.

The Secretary presented a letter from the Asphalt Institute, Pacific Coast Division, San Francisco, suggesting the scheduling of the Highway Commission's contract lettings in the latter part of February and the first part of March, 1939, so as not to interfere with the attendance of engineers, contractors, and producers at its meeting which is to be held in Los Angeles during the week of February 27, 1939, and the conventions of the American Road Builders and of the Associated General Contractors which are to be held in San Francisco during the following week. It was brought out in the discussion that the Commission has already scheduled its March meeting so as to fit in with the meetings of the Associated General Contractors and the Western Association of State Highway Officials, in San Francisco, and it is now too late to make any change, particularly in view of the fact that to advance the contract letting that has been scheduled for March 2 would not give sufficient time to prepare the projects, and the postponement of the letting would disrupt the Commission's plans for the season's construction work. The Secretary was instructed to so inform the Manager of the Asphalt Institute.

The Commission considered and ordered filed a petition signed by numerous residents of the city of Portland urging the construction of a ramp extending from the east approach of the Bybee Avenue viaduct, Portland, north-erly, to a connection with McLoughlin Boulevard, for the convenience of north-bound traffic from southeast Portland.

The Commission also considered and ordered filed a letter from Mr. O. C. Shankle, opposing such ramp construction.

A resolution from the Yamhill County Farmers' Union favoring the distribution of one-third of the highway revenues to the counties of the state on the basis of source of revenue and road mileage had the attention of the Commission. The Commission took no action on the matter.

A letter was presented from the Fremont Highlanders Ski Club, Lakeview, requesting the construction of snow fence along a short section of the Warner Valley Secondary State Highway near its junction with the Fremont Highway north of Lakeview, as an aid in keeping this highway free from snow blockades. The Engineer advised that to comply with this request would

require the construction of about 500 lineal feet of permanent type snow fence, and that the total cost of the same, including acquisition of necessary right of way, would amount to about \$400. He explained, however, that, while the fence would aid considerably in controlling the drifting snow during ordinary winter conditions, it would not be of much value during extremely bad weather; nevertheless, he recommended installation of the fence because it will do some good and will not cost a large sum. The Commission approved the recommendation unanimously.

The Engineer reported briefly on investigations that have been made at the request of Benton County Court for the improvement of the county road which extends from the Corvallis-Newport Highway to the Corvallis Golf Club. The Commission deferred its decision in this matter until all Commissioners are present.

The Engineer reported that construction work on the I.O.N. Secondary Highway, between Jordan Valley and Rome, has been completed and the road opened to general public use, so it is no longer necessary for traffic to be routed over the old county road through Danner, which road has been maintained by the state as a temporary highway detour during construction operations. He suggested, in view thereof, that the Commission take action as may be necessary to return the old road to Malheur County for maintenance, and particularly the old bridge that crosses Jordan Creek, near Danner, which is in bad condition and is now posted for maximum loads of 5 tons. He gave as his thought that it would not be necessary for the Commission to adopt a formal resolution abandoning the old county road as a state highway, inasmuch as it was not included in the secondary highway designation, but was used simply as a convenient detour during construction of the state highway. After discussion, and in view of the Engineer's report, the Commission instructed the Secretary to notify the Malheur County Court by letter that this county road is no longer needed by the state for detour purposes and that the Highway Commission no longer assumes any responsibility for the same but expects Malheur County hereafter to assume such responsibility, as in the past, before it was used as a state highway detour.

The Commission considered briefly the Oregon Electric Railway Company's claim for damage that it alleges occurred to its property adjacent to Barbur Boulevard, Portland, by reason of the installation of improper drainage facilities when the highway was reconstructed. The Commission referred this matter to the Attorney for additional information and report.

The Engineer reported that Contracts Nos. 2029, 2092, 2101, 2102, 2105, 2106, and 2133, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

JAN 27 1939

Contract No. 2029, with Rogers Construction Company, for furnishing crushed rock for the Kamela-LaGrande Section of the Old Oregon Trail Highway, in Union County. Completed July 12, 1938.

Contract No. 2092, with Harold Blake, for paving the Columbia Boulevard-Harding Avenue Section of the Pacific Highway West, in Multnomah County. Completed December 12, 1938.

Contract No. 2101, with Leonard & Slate, for highway roadbed and concrete bridge construction on the Fleming Ranch-Schindler Bridge Section of the Albany-Lyons Secondary Highway, in Linn County. Completed January 5, 1939.

Contract No. 2102, with D. L. Ashton, for roadside improvement on the Shedd-Halsey Section of the Pacific Highway East, in Linn County. Completed December 10, 1938.

Contract No. 2105, with Fisher Bros., for grading and surfacing the Bend Section of the Century Drive Secondary Highway, in Deschutes County. Completed October 17, 1938.

Contract No. 2106, with Angelo Doveri, for construction of a frame building at Klamath Falls, in Klamath County. Completed January 7, 1939.

Contract No. 2133, with Rogers Construction Company, for furnishing crushed rock for the Moro-Wasco County Line Section of the Sherman Highway, in Sherman County. Completed January 23, 1939.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Quitclaim deed clarifying the county deed record with respect to property owned by Frank D. Baird, Baker County.

Easement granting to Washington County authority to construct and maintain a road across state-owned property for temporary use during the lifetime of the newly-established W.P.A. camp on the Wolf Creek Highway.

Easement agreement with the Menasha Wooden Ware Company

JAN 27 1939

providing for maintenance of a reservoir and pipe line on the company's property, in connection with the Umpqua Lighthouse State Park, in Douglas County.

Bargain and Sale Deed, conveying unto the Southern Pacific Company property located in Lots 4, 5, 6, 7, and 8 of Block 20, Hackleman's Second Addition to the City of Albany, in Linn County.

Permit authorizing Morrison-Knudsen Company, contractors, to maintain a temporary trestle roadway over the new Columbia River Highway right of way at Onion Rock.

There being no further business to come before the Commission at this time, the meeting was adjourned at 12:15 o'clock p. m.

Asst. State Highway Engineer

Secretary

Chairman

Commissioner

Portland, Oregon, March 2, 1939

The State Highway Commission met in regular session at 9:00 o'clock a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Before the reading of the bids on the projects advertised for this meeting, Chairman Cabell announced that since the Jericho Lane-Bloucher project on the Hood River Secondary Highway, in Hood River County, was advertised for bids, it was discovered that an error had been made in the preparation of the specifications and that the item "hauling base materials" was listed as 100,000 cubic yards, whereas it should have been listed as 100,000 yard miles. He said that, while the Commission feels that probably this item was understood by the contractors bidding on this work, there is a possibility that there is a question in the minds of some of the bidders, so the Commission has decided not to open the bids on this particular project at this meeting and has instructed the Secretary to return the bids to the respective bidders unopened. He added that the project would be readvertised for bids to be received at the next regular meeting of the Commission.

MAR 2 1939

Bids as follows for highway construction projects and for the sale of a building at Marshfield were then opened and read in conformance with previously published notice:

**WIST-CLATSKANIE SECONDARY HIGHWAY
CLATSKANIE-SUMMIT SECTION - SURFACING, OILING, CRUSHED ROCK**

	<u>Using Road Oil</u>	<u>Using Tar</u>
Mountain States Construction Company	\$27,815.00	\$ - - - -

SALE OF BUILDING IN MARSEFIELD

Building No. 5097-8
(Occupied by H & H Secondhand Store)

Elmer I. Newton	\$126.00
Adams, Wyatt & Cuper	30.00

Chairman Cabell announced that the award of contracts would be made at 2:00 o'clock p. m. in the same room.

The Commission had under consideration approval of a site on the right of way of the East Portland-Oregon City Highway, in Oregon City, for a large-scale bust of Dr. John McLoughlin which certain people of Oregon City desire to erect at this historical spot. The Engineer advised that the site tentatively selected by the sponsors is near the intersection of the highway with 10th Street, although they are still considering a site near the old McLoughlin house at the top of Singer Hill. He gave as his opinion that the erection of the monument on the highway would not be objectionable from the highway standpoint and recommended approval of the site if the sponsors finally decide to locate it there. He pointed out that the state's contractor is now constructing this section of the highway, in view of which the Commission should know very soon just where the sponsors are going to erect this monument so, if the highway site is definitely selected, arrangements can be made to prepare it. The Commission approved the recommendation unanimously.

The Engineer reported on the cost to construct a pedestrian underpass under the East Portland-Oregon City Highway at 11th Street, in Oregon City, for the benefit of fishermen, as has heretofore been requested by the Clackamas County Planning Board and the fishermen's association. He advised that it would cost about \$3,472 to build this underpass, and gave as his thought that the expense is not justified because he did not believe it would be used to any great extent. He suggested, in lieu thereof, the construction of steps leading from the highway to the municipally-owned boat moorage in the Willamette River if and when such moorage is constructed; also, that fishermen be allowed to use the existing steps and privately-owned moorage facilities during the present fishing season providing no interference is caused the state's contractor. After discussion, the Commission approved the Engineer's

MAR 2 1939

recommendation unanimously, with the understanding that as soon as the present fishing season ends the existing privately-owned moorage facilities shall be discontinued and permission to operate such facilities at this location hereafter shall not be granted unless the facilities are municipally owned.

The Engineer reported that, in accordance with previous instructions from the Commission, the complaint of County Judge Nelson B. Higgs, of Harney County, concerning the condition of the Central Oregon Highway near Buchanan has been investigated and it appears that Judge Higgs's complaint does not particularly concern the spring that flows onto the highway at this point but is a request for the surfacing of a 3-mile section of the highway which becomes very soft and muddy during the spring breakup and during wet periods. The condition that Judge Higgs complains of, he said, cannot be remedied by maintenance. The Engineer was instructed by the Commission to have Division Engineer W. C. Williams contact Judge Higgs and explain to him fully the Commission's plans for the surfacing of this section and the difficulty of taking care of the situation of which he complains.

The Commission discussed the Engineer's report on the cost to construct a sidewalk along the Coos Bay-Roseburg Highway from the city limits of Coquille to the plant of the Smith Wood Products Company. The Engineer advised that this section is about 1800 feet long and to grade and construct an oiled footpath $4\frac{1}{2}$ feet wide thereon would cost about \$1100. Further, that the City of Coquille has offered to cooperate in the project by constructing the portion within the city limits, about 115 feet in length. He estimated that there are about 1000 pedestrians who use this road daily between the town and the mill, all of whom are required to walk on the pavement because the shoulder is too narrow. He gave as his thought that the construction of sidewalks in cases of this kind is fully justified and accordingly recommended approval of the project under discussion. The Commission approved the recommendation by unanimous vote.

In this connection, the Commission considered the adoption of a policy with respect to the construction of sidewalks along state highway rights of way and decided hereafter to build such sidewalks or footpaths at state expense, in the event that investigations, including pedestrian traffic counts, justify the improvement.

The Commission considered and signed a petition directed to the County Court of Marion County requesting the vacation of streets in the platted subdivision known as Silver Falls City, Marion County, which subdivision is now owned by the state and is included in Silver Falls State Park.

Mr. Frank Z. Howard, County Engineer of Klamath County, came before the Commission at this time in regard to a number of highway projects in Klamath County. He presented a resolution from the Klamath County Court requesting that the Modoc Point-Klamath Agency Section of The Dalles-California Highway, which no longer will be of value as a primary state highway when the new highway north of Modoc Point is completed, be retained by the state as a secondary state highway when the new highway is opened for public use. The matter was discussed at considerable length and the Commission's final decision

was to designate this road as a secondary state highway when the new road has been completed.

Mr. Howard inquired whether or not it would be possible to secure the oiling of a $1\frac{1}{2}$ -mile section of the county road extending from Chiloquin to the Chiloquin Mill this summer when the state is doing other oiling work in this vicinity. He explained that the county does not have the equipment required to do the oiling work and that the County Court thought it might be possible to have this work done by one of the state's oiling contractors who might be working in that vicinity this summer, thus avoiding the high costs that would undoubtedly occur if the job were contracted alone. He was informed that the Commission has no objection to the county arranging with the state's contractor to do this work in connection with the state's job; but, of course, the state work would have to be done first. However, the possibility that the state will have any oiling work in this vicinity this year is very remote; in fact, it does not appear now that it would be possible to contract any oiling work in this vicinity until the fall of 1939, at the earliest.

Mr. Howard then inquired as to the possibility of securing the reconstruction of a short section of the Klamath Falls-Lakeview Highway at Dairy, to eliminate several sharp curves in the existing road. He was informed that, while this project is short in length, it is a very costly one and it does not now appear that the Commission will be able to finance it this year. However, the Commission will bear it in mind.

Mr. Howard also asked for the improvement of the Klamath Lake Secondary Highway. He advised that Klamath County is cooperating with the U. S. Forest Service in the construction of a forest development road extending from this highway to the "Lake of The Woods" and they now have a pretty good road leading into this district, but their main trouble is the condition of the state secondary highway which they would like very much to have improved from the Lake of The Woods junction to the end of the existing oiled section. He was informed that the Commission does not have sufficient funds available to finance such improvement this year but the project will be kept in mind for future consideration.

The improvement of the road extending south from the Willamette Highway to Crescent Lake was also brought up for discussion by Mr. Howard, who urged the improvement as a forest highway project. He was informed that the forest highway program for this year has already been arranged and cannot be changed, so that the earliest that the project could be considered for such program would be in programming of the 1940 funds. He was also informed that there are no state funds available with which to finance this project this year.

Mr. George Hibbert, City Manager of Milton, came before the Commission in the interest of the Oregon-Nashington Highway through Milton. He particularly urged a revision to eliminate the curve in the present road at the south city limits, and the widening and paving from the south city limits northerly to the point where the proposed new highway will leave the present

MAR 2 1939

road. He gave as his thought that the City of Milton would assume the obligation of acquiring the right of way for the elimination of the curve. He explained that concrete curbs have already been constructed along their main street and that the street is 80 feet wide but there are strips 5 feet wide on each side of the highway pavement, which they would like to have paved. The Engineer advised that investigations to date of this section consist merely of a reconnaissance survey. He suggested, inasmuch as the present highway at the south city limits of Milton must be used for many years to come, that a location survey be conducted at this time to determine the permanent location and to ascertain how much it would cost to eliminate the curve referred to by Mr. Hibbert and to widen the existing pavement from this point up to the place where the new highway will connect with the present road. The Commission approved the suggestion and thereupon authorized him to make such location survey. Mr. Hibbert advised that he would ascertain immediately upon his return to Milton whether or not the city would acquire the right of way for this improvement.

A delegation from Umatilla County, consisting of County Judge Carl W. Chambers; County Commissioners Wm. P. Meiners and Wm. Switzer; Roy Ritner, representing the Pendleton Chamber of Commerce; W. L. Rayburn, and S. A. Barnes, both of Weston, Oregon, came before the Commission in the interests of the Weston-Elgin Secondary Highway. Judge Chambers headed the group. They particularly asked for the oiling of the section between Weston and Tollgate. Speaking on behalf of the improvement were Messrs. Chambers, Ritner, and Barnes. They reiterated arguments previously presented on behalf of this project.

Judge Chambers stated that this project is the County Court's first choice of projects for the Federal Aid Secondary Highway Program, in Umatilla County. Chairman Cabell advised that the fiscal year 1940 federal aid secondary highway funds are very limited, and accordingly projects must be curtailed to a large extent, so the Commission probably will not be able to undertake this entire improvement at one time. He inquired which section the delegation prefers constructed first, so that the Commission can have such information when arranging the program for the 1940 funds. Judge Chambers replied that, in their estimation, it would be desirable to commence at the east end of the uncoiled section where it joins the forest highway section that is to be oiled this year; however, they are not particular and any section that the Commission prefers will be satisfactory to them. The Commission made no definite commitments or promises relative to this project. In this connection the Secretary presented a letter from the Weston Chamber of Commerce urgently requesting the oiling of this road.

Mr. R.E. Baker, representing the Oregon Piling Co., Portland, came before the Commission and inquired when the Commission proposes to allow the truck-hauling of piling on a 2-mile section of the Wolf Creek Highway immediately west of Sunset Camp. The Engineer advised that rocking operations are under way on this section and, in his estimation, the hauling of logs or piling thereon should not be allowed until these operations are completed, which he thought would be about May 1, 1939. The Commission concurred in the Engineer's viewpoint and told Mr. Baker that he could make his plans for

operations on the highway about May 1, although the Commission cannot make any definite promise at this time that the highway will be open by then, but the Commission will open it to travel as soon as possible. The Commission referred the matter to the Engineer for final decision.

This matter was reconsidered by the Commission later in the session, when the Engineer advised that inquiry has also been made by the Sunset Logging Company as to when the Commission expects to allow the truck-hauling of logs from Sunset Camp to a point in Tillamook County where they are carrying on logging operations. He pointed out that a large fill is under construction at the county line and gave as his thought that logging trucks should not be allowed to operate over this fill until it is completed and rocked, which would probably be a considerable length of time after rock has been placed on the balance of the section. He recommended, therefore, the modification of the Commission's previous instructions so as to include the entire section from Sunset Camp to this big fill, in other words, that the Commission approve log-hauling operations over the entire section from Sunset Camp to the big fill as soon as the W.P.A. forces have completed the rocking operations and when, in his opinion, the hauling of logs over the same will not be injurious to the roadbed. The Commission approved the recommendation unanimously and instructed the Secretary to so inform the Sunset Logging Company.

A delegation from Deschutes County, consisting of County Commissioner Wm. Baer; Don Peoples, Secretary of the Bend Chamber of Commerce; and J. W. Elliott, Superintendent of the Warm Springs Indian Reservation, was present in regard to a number of highway projects in Deschutes County. Mr. Baer asked the Commission to authorize some excavation work at the intersection of The Dalles-California Highway with the Tumalo-Deschutes Market Road so as to improve the sight distance at such location. He said that the highway at this point is constructed in a deep rock cut and that traffic approaching the highway from the market road does not have a clear view of the highway until within a very few feet of the highway pavement. He asked the Commission to investigate this condition and to take steps as may be necessary to alleviate the same.

The Commission agreed to inspect this intersection the next time it is in the vicinity of Bend. The Engineer was instructed to investigate the condition in the meantime and to render a report thereon. Mr. Baer filed with the Commission a petition bearing the names of numerous citizens of Deschutes County supporting his oral request.

Mr. Peoples presented a request on behalf of County Judge W. R. Cook, of Jefferson County, for the surfacing of the Warm Springs Highway easterly from the Deschutes River crossing to the end of the section that was surfaced last year. He also asked for the construction of a bridge over the Warm Springs River on the Warm Springs Highway, near He He Butte. He was informed that the Commission has these projects in mind but can make no definite statements or promises regarding them at this time because of the question of funds. Chairman Cabell stated that it might be possible to do the surfacing project this fall in the event that the state obtains additional P.W.A. funds but the Commission has no definite assurance at this time that it will be able

MAR 2 1939

to secure such funds. The construction of the Warm Springs River bridge, he said, is a federal lands highway project which the Commission proposes to finance with public lands funds. However, the Government has reduced greatly the appropriation for this purpose, so it does not seem possible now to build the bridge this year, although the Commission plans to do some grading work near the bridge this season. Chairman Cabell also advised that, while the Commission cannot make any definite commitments or promises in regard to this project now, it will bear it in mind and will endeavor to contract the work if at all possible.

Mr. Elliott presented a resolution from the Jefferson County Chamber of Commerce urging the completion of the surfacing of this highway from the end of the present surfacing to Warm Springs Agency and also urging the Commission to grade additional sections of the Warm Springs Road between Warm Springs Agency and the Wapinitia Cutoff in preference to any work on The Dalles-California Highway south of Madras.

The Commission adjourned at 12:00 o'clock noon and reconvened at 2:00 o'clock p. m. in the same room, with all members present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Chairman Cabell announced the following awards of the contracts, and sale of building at Marshfield, bids for which were received at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Clatskanie-Summit Section of the Mist-Clatskanie Secondary Highway, in Columbia County. 6.46 miles surfacing and oiling; also furnish 600 cu. yds. crushed rock in stock piles. The low bid submitted for this project was that of the Mountain States Construction Company of Eugene, at \$27,815.00, based on the use of road oil. They submitted no bid based on the use of tar. The next low bid was that of R. O. Dail & Warren Bros., Inc., Portland, at \$30,027.80 based on the use of road oil, and \$29,969.60, based on the use of tar. There were 7 higher bidders. The Commission has awarded this contract to the Mountain States Construction Company at their low bid of \$27,815.00, using road oil.

"Lobert Section of The Dalles-California Highway, in Klamath County. 0.50 mile grading. Roy L. Houck, Salem, submitted the low bid for this project at \$19,718.00. McNutt Bros., Eugene, were the second low bidders with their bid of \$23,327.00. There were 6 higher bidders. This contract is awarded to Roy L. Houck, the low bidder, at \$19,718.00.

"Poe Valley Section of the Bonanza-Malin County Road, in Klamath County. 2.99 miles grading and surfacing. Clifford A. Dunn, Klamath Falls, submitted the low bid on this job at \$22,720.00. E. C. Hall Company, Eugene, submitted the next low bid at \$28,534.50. There were 2 higher bidders. The Commission rejects all bids received and has ordered the project readvertised.

"North Powder-Davis Ranch Section of the North Powder River County Road, in Union County. 4.65 miles grading. The low bid received for this job was that of C. E. Silbaugh Company, Pendleton, at \$16,270.00. The next low bid was that of Leonard & Slate, Multnomah, at \$16,576.00. There were 5 higher bidders. The Commission awards this job to C. E. Silbaugh Company, the low bidders, at their bid of \$16,270.00.

"Noyes Ranch-Cove Section of Cove Secondary Highway, in Union County. 5.5 miles grading, surfacing, and oiling; also furnishing 1,500 cu.yds. crushed gravel in stock piles. The low bid submitted for this project was that of Mountain States Construction Company, Eugene, at \$38,738.50. The next low bid was that of Leonard & Slate, Multnomah, at \$39,790.00. There were 6 higher bidders. The Commission has referred all bids received to the Engineer with power to award the contract to the low bidder, the Mountain States Construction Company, when certain conditions have been fulfilled."

Building in Marshfield

"Building No. 5097-8 (occupied by H & H Secondhand Store). The Commission received 2 bids for the purchase of this building, that of Elmer I. Newton, Marshfield, at \$126.00 being high. The other bid was that of Adams, Wyatt & Cuper, North Bend, at \$30.00. The Commission has sold this building to the high bidder, Elmer I. Newton, at his bid of \$126.00."

A delegation from Coos County, consisting of Ed W. Miller, Manager, Oregon Coast Highway Association; Dr. J. H. Bennett, representing the Marshfield Chamber of Commerce; and Messrs. Joe Larson, George Landrith, and Ben Hahaffey, came before the Commission and requested the oiling of the Coos River Secondary Highway between the town of Eastside and the Enegren Ferry. Mr. Miller headed the group and introduced the speakers.

Dr. Bennett advised that the Marshfield Chamber of Commerce has gone on record as endorsing this project. This is a heavy-traffic road, he said, carrying more traffic than any other road of its class in the southwestern part of the state, and is badly in need of repair at the present time. He filed with the Commission a petition signed by numerous taxpayers residing in the Coos River Valley, who urged this improvement. Mr. Larson concurred in the remarks of Dr. Bennett and also urged the improvement from the recreational road standpoint.

Mr. Miller pointed out the possibilities of this road as a loop highway from Marshfield, past Golden Falls State Park and Loon Lake, to a connection with the Umpqua Highway near Scottsburg; thence to Reedsport and North Bend. He also asked the Commission to give serious consideration to other projects along the Oregon Coast Highway and mentioned completion of this highway in the northern part of Tillamook County and lesser projects through the small towns of Curry County. It was his thought that, while the Highway Commission's funds are at a low ebb, these small projects could be disposed of

MAR 2 1939

so that when a large project suddenly arises the Commission would not be handicapped by lack of funds in undertaking it.

Chairman Cabell mentioned the projects that the Commission is now undertaking in Coos County, including the Catching Slough Bridge, the improvements to the Cape Arago Secondary Highway, and the proposed improvement of the Oregon Coast Highway through the Bunker Hill District, in Marshfield, for which bids are to be received April 6. Notwithstanding these projects, he said, the Commission will be glad to give careful consideration to the Coos River Secondary Highway project but no definite commitments or promises can be made at this time in regard thereto.

A delegation from Crook County, consisting of County Judge A. R. Bowman; W. B. Morse, Mayor of Prineville; D. W. Graham, City Attorney of Prineville; Frank Folsom, W. L. Forsythe, C. W. Woodruff, and H. Baldwin, came before the Commission in regard to construction of the Warm Springs Secondary Highway between Prineville and Madras. Judge Bowman headed the group and introduced the speakers. He urged the Commission to construct the Prineville-Jefferson County Line Section of this highway as soon as possible and advised that this project is the County Court's first choice of projects for federal aid secondary highway funds that are allotted to Crook County. He alleged that the development of their county is being held up by reason of the fact that this road has not been constructed, and urged the Commission to give it consideration for early construction.

Chairman Cabell advised the status of the Commission's finances and pointed out that, because of the present shortage of funds, the Commission is obliged to curtail expenditures and to defer some projects. He also advised that the Commission has not yet formulated its program for 1940 federal aid secondary highway funds, but when that matter comes up for discussion the Commission will give serious consideration to this project. He gave as his understanding that the section from Prineville northwesterly to the Jefferson County line is the County Court's first choice for such funds and that the county's first choice of federal aid primary projects is the improvement of the Ochoco Highway west from Prineville. Judge Bowman confirmed the Chairman's understanding of this matter and added that, if the Commission cannot possibly finance the improvement of the entire section of the Warm Springs Highway between Prineville and the county line, it would help a lot if the Commission would build the section immediately north of Prineville to the railroad overhead crossing at the Pine Products Company's mill.

Mayor Morse brought up for discussion the proposed rerouting of the Warm Springs Highway in Prineville. He urged a decision in this matter so that contemplated developments in their town may proceed. He was informed that the Commission has not as yet made a decision in this matter but will endeavor to do so at its next meeting and will then hold a public hearing in Prineville on the subject, as is required by statute. The Engineer was instructed to render a report on this matter at the meeting to be held in April.

Mr. Graham brought up for discussion Senate Bill No. 99 that is now

before the Oregon Legislature and which provides a method for the determination of the weight of a load of logs by log scale rather than by actual weighing. He asked the Commission not to oppose this bill because, in his estimation, it will provide a convenient method of determining the weight of a load of logs, which is a very difficult thing to do under present weight restrictions, there being no way to determine the actual weight when the trucks are loaded in the woods. It is a very difficult matter, he said, for operators to load their trucks in the woods so as not to exceed the statutory limits as to weight, and sometimes when the trucks are weighed on the Highway Department's scales they are found to be overloaded, with the result that fines are imposed, and, in addition thereto, the trucks are suspended from operation for a period of time designated by the State Highway Commission. The operators do not object to the payment of a fine, he said, but they do object to their trucks being taken out of service. He cited several cases of this kind in the vicinity of Prineville, which, he declared, have created a very unfavorable condition and threaten to close down the mills operating in this locality.

Chairman Cabell advised that the Commission has a lot of sympathy for logging operators and recognizes the importance of the logging industry. However, it is the obligation of the Commission to protect the interests of the general public. The Commission would not be fulfilling that obligation, he said, if it did not oppose the passage of Senate Bill No. 99. He explained that the Commission feels that if this bill becomes a law it would only result in the continuous overloading of trucks in log-hauling service and that eventually the highways would be pounded to pieces and the lives of the traveling public would be endangered. He further explained that the Commission is of the firm belief that a limit in pounds is absolutely essential in order that the roads may be properly designed by the engineers. A law which would allow operators a 10 per cent tolerance, he said, would probably be favored by the Commission but a law that does not set a weight limit would be objectionable for reasons stated.

In the discussion of this matter Mr. Graham alleged that a number of the trucks which supply the mills at Prineville have been suspended from operating because of overloads that did not exceed 300 pounds, which, as he understands it, is under the tolerance heretofore authorized by the Commission. The Secretary was instructed to check the records in regard thereto.

Messrs. L. C. Smith and L. C. Sanford, of Newport, came before the Commission in regard to a right of way matter at Newport. They advised that they are developing their property adjacent to the Oregon Coast Highway a short distance north of the Yaquina Bay Bridge and in connection therewith propose to construct a sidewalk on the highway right of way, but they are handicapped by reason of the fact that the right of way at this point is 20 feet wider than that on the adjoining sections; and, if they are required to build their sidewalk at the right of way line, it will result in a jog at each point where the right of way narrows. They alleged that when the right of way was acquired by the state an extra 20-foot strip was taken from their property for slope protection, for which they made no charge. It was their thought that this extra 20-foot strip is of no value to the state and asked that it be deeded back to them so that they can proceed with their improvements, as

MAR 2 1939

contemplated, including the construction of a sidewalk on alignment that will conform with the sidewalk on the adjoining sections.

The Engineer advised that the Commission acquired this extra width right of way with the idea in mind of landscaping it and improving the appearance of the roadside. Chairman Cabell advised that the Commission is reluctant to deed back property that once has been acquired. Mr. Sanford stated that they would be satisfied to let title to this strip remain with the state if the state will permit the sidewalk to be constructed at the same distance from the center of the highway as it is along the narrower sections and if the state will landscape the extra width in front of their premises. The sidewalk will have to be constructed in the near future, he said, because there is so much pedestrian traffic, to and from the bridge, which now has to use the pavement. Furthermore, he and Mr. Smith cannot proceed with the development of their properties until they know just what the state will permit them to do. Chairman Cabell reiterated that the Commission is reluctant to deed away any land that once has been acquired. However, the Commission will look over the premises the next time it is in that vicinity, although it is making no commitments or promises relative thereto now. It was his thought that a definite answer would be given by the first of April.

Mr. L. C. Smith filed with the Commission letters from L. G. English, District Attorney, Lincoln County, and James F. Baird, Mayor of Newport, in support of their oral request.

Mr. Thomas Tongue, attorney, Hillsboro, headed a large delegation from Tigard and vicinity, which conferred with the Commission in regard to the proposed relocation of the Pacific Highway West through Tigard. Others in the delegation were: Peter Potwin, Ray Christensen, A. Zwiener, Hans Goorde, F.W. Winkel, W. E. Upshaw, John Panck, J. C. Bilyeu, Emil A. Johnson, H. P. Virsulye, George H. Jackson, Leonard Gamroth, W. M. Evans, C. Christensen, Charles Thompson, F. L. Mitchell, C. L. Grant, J. A. Mensies, Albert Hoffarber, H. G. Doriot, Dan Berdar, and G. Bustrom, all of Tigard; W. I. Lacey, E. R. Ritter, and C. L. Chilson, all of Portland; County Judge H. D. Kerkman, of Washington County; and County Commissioners James Lewis and J. W. Hughes.

These people presented arguments in behalf of the most northerly of the routes under consideration. Mr. Tongue stated that practically all of the businessmen in Tigard favor the northerly route because the adoption of any other route would be detrimental to their town. He mentioned the towns of Sherwood and Tualatin as examples of towns which were badly hurt when the highway was constructed a considerable distance away from them.

The Engineer gave figures, as follows, for construction of the two routes that have been considered; namely, the northern route and the southern route. Right of way cost on the northerly route, he said, is estimated at \$95,000, and that along the southerly route at \$56,000. The construction of the northern route, he said, is estimated to cost about \$249,000, as compared to \$265,000 for the southerly route, making a total estimated cost for the northerly route of \$344,000, and \$321,000 for the southerly route, or a difference of \$23,000 in favor of the southerly route.

Speaking on behalf of the northerly route were the following:

County Judge H. D. Kerkman, who stated that the County Court is unanimously in favor of the northerly route; also, that Washington County will cooperate in the construction of the railroad grade separation project and will contribute to this project funds that would have been spent for right of way for the Garden Home grade separation project, which is no longer in the Commission's program;

County Commissioners James Lewis and J. W. Hughes, who confirmed the remarks of Judge Kerkman;

W. M. Evans, banker, and Charles Thompson, Chairman of the School Board, who stated that the School Board feels that the highway in its present location would be better from the standpoint of the school transportation system because it would obviate the necessity of rearranging their bus routes. The present road, he said, goes directly in front of the school buildings and has never been considered as a hazard to the school children; rather, that it has been an advantage. He added that the School Board is opposed to the adoption of the southerly route and is unanimously in favor of the retention of the present route, but, if a change has to be made, the Board favors the northerly route;

Mr. Hoffarber, service station and garage owner, who stated that he favors the northern route because it will not seriously affect his business;

Mr. Zwiener, who stated that he resides along the so-called southerly route but objects to the adoption of such route because it will ruin his home. He favored the northerly route;

Mr. Chilson, who stated that he owns a $1\frac{1}{2}$ -acre tract of land along the southerly route, which bisects his property. He also said that he is opposed to the adoption of the southerly route because he does not want to subject his children to the hazard of fast-moving highway traffic; furthermore, his tract is small enough now without being divided by the highway.

One of the delegates, who did not give his name, stated his preference for the northerly route because the highway would then go in front of their school. It was his thought that this was a good thing because teachers would then be able to give the school children close supervision when they cross the highway, whereas such supervision could not be given were the highway located some distance away from the school. Mr. Upshaw stated that he represents the Tigard Lions Club, which has gone on record as being unanimously in favor of the northerly route.

Messrs. R. H. Clarke and Claude I. Scoffins, Portland, also appeared before the Commission in regard to this matter. Mr. Clarke stated that he has no preference as to route but is very much concerned in securing immediate

MAR 2 1939

action by the Commission because while the present uncertainties exist people cannot develop or improve their properties. Mr. Scoffins stated that he owns what is known as the Tigard Highway Tracts, which are located along the southerly route, and expressed regrets that there is any necessity to change the present routing of the highway. He spoke in favor of the adoption of the southerly route, particularly because such route would take the highway away from the high school, grade school, and St. Anthony private school. He referred to a petition previously filed with the Commission signed by 38 residents of Tigard, endorsing the southerly route.

Chairman Cabell stated that from the expressions received it is apparent that the delegation appearing before the Highway Commission today represents people of Tigard who are in favor of the northerly route. There may be others, he said, who favor the southerly route, and, inasmuch as he has previously informed a number of people from Tigard that the Commission would give the numerous factions a chance to be heard on the matter before a decision is rendered, he believed that that is the thing to do. The Commission, he added, will be glad to hear the arguments of the proponents of the southern route and he asked Mr. Scoffins to notify these people to that effect. He explained the policy of the Highway Commission with respect to the routing of main highways by stating that where there are alternate routes under consideration, the Commission must consider primarily a route that will best serve the general public interest. Where there are two routes, he said, either of which would be satisfactory, and the local interests are greatly benefited by one, and the general traveling public would be equally well served by that route, or at least not greatly inconvenienced by it, then the Commission is inclined to favor the local interests; but, where one route is overwhelmingly more practical and beneficial from the standpoint of the general traveling public, then the local interests have to be sacrificed. He thanked the delegation for its presentation and advised that the Commission will consider the arguments presented and will make its decision as soon as possible.

Mr. Tongue filed with the Commission a petition signed by numerous bona fide businessmen and property owners of Tigard, urging the Highway Commission to lay out and establish a new route for the Pacific Highway West immediately north and west of the business section of said town.

Mr. C. M. Hulburt, Blachly, Oregon, headed a delegation from Junction City and vicinity, which urged improvements to the Siuslaw Highway, and particularly the construction of a tunnel to eliminate sharp curves and excessive grades in the present highway, near Triangle Lake. Others in the delegation were: Claude Washburne, banker, of Junction City; Lawrence Bauman, representing the Triangle Lake Lumber Company; Carol Hult and J. P. Hult, representing the Hult Lumber Company; Ray Condon, merchant, of Horton; Bob Slater, merchant, of Blachly; Wm. Russell, lumber merchant, of Eugene; and R. Board, representing the Shell Oil Company, Junction City. Speaking on behalf of this improvement were Messrs. Washburne, Bauman, and Hult.

Chairman Cabell advised that the Commission appreciates the fact that the present Siuslaw Highway is in need of improvement to eliminate the curves and excessive grades, but it does not appear possible for the Commission

to make these improvements at the present time because of the shortage of funds with which to finance the work. The Commission is not in position at the present time, he said, to make any promises or commitments to this project, but will give it due consideration in the formulation of future construction programs. Mr. Washburne filed a petition, signed by 747 citizens of Lane County, urging this improvement. He also filed with the Commission a letter from the Lions Club of Junction City endorsing the project.

A delegation from Clackamas and Multnomah Counties, headed by Wallace R. Telford, Chairman of the Clackamas County Planning Board, came before the Commission in behalf of the early reconstruction of the Cascade Secondary Highway (82nd Street Road) between Pope Hill and Oregon City. Others in the delegation were William Haberlach, member of the Clackamas County Planning Board; T. J. Armentrout, Joe Luding, Harry Black, S. C. Williams, Nelson H. Scott, L. Mathiesen, Charles H. Johns, Axel Kildahl, and L. M. Lepper, all from Portland and representing the Southeast Portland Chamber of Commerce. Mr. Armentrout introduced the speakers.

Mr. Williams urged the improvement on behalf of the Southeast Portland Chamber of Commerce and 12 other organizations of eastside Portland. He said that all of these clubs are wholeheartedly and enthusiastically in favor of the improvement of the 82nd Street highway. He alleged that this improvement has been promised by the Highway Commission heretofore but construction has been postponed from time to time and they feel that they are entitled to it at an early date. He said they are not particular which route the Commission selects but they positively want the improvement during the year 1939, on a 4-lane highway basis. He gave four reasons supporting his request: first, 6 miles of this road are now constructed to military standards but will be of very little service to the people until this highway is connected by standard improvement to the "Super Highway" at Oregon City. Second, three-fourths of the people of Portland live on the east side of the Willamette River and are entitled to some of the benefits of tourist travel. Third, the highway will be of great benefit to tourists as it will provide a bypass route away from the eastside business district. Fourth, this highway will make direct connections with the proposed new highway up the Columbia River, with the Lombard Street bypass to the St. Johns Bridge, and with Sandy Boulevard, the present Columbia River Highway route. He presented a letter from the Board of Commissioners of Multnomah County urging that serious consideration be given by the Highway Commission to the reconstruction of this road to modern standards at the earliest possible time.

Messrs. Mathiesen, Lepper, and Telford also spoke on behalf of this project. Mr. Lepper quoted from a letter that he has received from W. H. Lynch, District Engineer, Bureau of Public Roads, in which Mr. Lynch advises that the Federal Government is ready to approve the project whenever the Highway Commission is ready to construct the same. He confirmed Mr. Williams's statement to the effect that they are not particular where the highway is located but they want the improvement very soon. It was his thought that the sale of highway bonds to finance the work is justified if that is necessary. This concluded the conference.

MAR 2 1939

The Commission adjourned at 5:00 o'clock p. m., to reconvene at 7:30 o'clock p. m. in the Benson Hotel.

Portland, Oregon, March 2, 1939

The State Highway Commission reconvened in regular session at 7:30 o'clock p. m. in Room 301 of the Benson Hotel. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
P. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

A letter was presented from the Canby Kiwanis Club requesting permission to place a Kiwanis sign at some prominent place along the Pacific Highway, either within or without the city limits of Canby. The Attorney advised that the Commission does not have control over the erection of signs within the limits of incorporated cities and towns but it does have control of such matters outside of such limits. In view of this advice, the Commission decided to deny the request in so far as it pertains to that portion of the highway that is under its control. The Secretary was instructed to so inform the Kiwanis Club.

In the discussion of this matter, the Engineer recalled that the Commission previously ordered that the various civic service clubs and like organizations be contacted relative to the removal of their signs from highway rights of way. These instructions, he said, have been carried out, and in response thereto some of the clubs have removed their signs, but there are many still being maintained on the state's property. He suggested that it might be advisable to bring this matter to the attention of the Oregon Roadside Council and to request their assistance in connection with their roadside cleanup program. The Commission approved the suggestion and instructed the Engineer to bring the matter to the Roadside Council's attention. The Commission also instructed the Engineer to contact the various service clubs again in a month or two with respect to the removal of their signs.

The Commission considered and denied the request from Mr. C. G. Bradley, Portland, to purchase 2 truckloads of gravel from the state-owned stock pile adjacent to the Mt. Hood Highway near Brightwood, it being strictly contrary to the Commission's established policy to permit state-owned material to be given or sold for use in private undertakings.

The Commission also considered and denied the request of the City of Echo to use a state-owned gravel pit near the Columbia River Highway as a city garbage dump, this pit being needed as a source of material for future highway construction; and, in addition thereto, its use as a dumping place would create a very unsightly condition.

MAR 2 1939

A letter was presented from W. H. Lynch, District Engineer, Bureau of Public Roads, suggesting that, inasmuch as the state-wide planning survey is now sufficiently advanced to provide the factual data required in the selection of a federal aid secondary highway system, that such system be selected and approved prior to any commitment as to the fiscal year 1940 federal aid secondary highway funds. After discussion, the Commission instructed the Engineer to prepare a list of roads eligible for such system (the smallest list that will meet the present requirements of the Federal Government) for consideration by the Commission at its next regular meeting in April.

The Engineer requested authority to purchase the following equipment:

- 2 - 10-ton road rollers for use of oiling crews, 2 obsolete rollers to be traded in as part purchase price. Total net cost \$8,000.
- 1 - 6-ton tandem roller for paving crew, 1 old roller purchased in 1929 to be traded in as part purchase price. Estimated total net cost \$3,300.
- 12 - light-weight trucks, 12 old trucks to be traded in as part purchase price. Estimated net total cost \$10,800.
- 1 - pickup truck, 1 old pickup truck that has been driven 120,000 miles to be traded in as part purchase price. Estimated net cost \$700.
- 10 - asphalt heaters to replace a like number of heaters that are worn out and obsolete. Total estimated cost \$6,500.
- 6 - mowing machines. Estimated total cost \$7,200.
- 12 - light-type cars, 12 old cars that have been driven at least 100,000 miles each to be traded in as part purchase price. Estimated net total cost \$9,000.
- 1 - integrating dynamometer. Estimated cost \$125.
- 1 - accounting machine and special card carrier together with filing equipment for use in connection with the new system of inventory control that is being installed at the Salem Shops. Estimated cost \$3,000.

The Commission by unanimous vote approved the purchase of this equipment and instructed the Engineer to order same through the State Purchasing Agent in accordance with the usual practice.

The Engineer reported receipt of several offers to purchase at \$3.00 per cord approximately 200 cords of wood that have been salvaged from the Oxbow Tunnel on the Robinette-Homestead Secondary Highway, which wood is now piled near the tunnel portal. He advised that the wood is of no value for

MAR 2 1939

state highway purposes, and recommended sale of the same at such rate. The Commission approved the recommendation unanimously.

The Commission had under discussion the damage claim of the Oregon Electric Railroad Company arising out of the construction of the Barbur Boulevard Section of the Pacific Highway West, in Portland. The company alleges that when this highway was built by the state improper drainage facilities were provided and as a result a slide occurred on the adjacent railroad property, causing the company considerable expense, for which reimbursement is requested. The Engineer advised that this matter has been thoroughly investigated and it has been determined that the slide was not the result of faulty highway construction and was not due to any condition for which the Highway Commission or the state can be held responsible; furthermore, it is the opinion of the Commission's Attorney, who has gone into the facts of the case, that the railroad company's claim is one for which the Highway Commission is not legally obligated. In view of this report the Commission denied the claim by unanimous vote.

The Engineer reported that, in accordance with authority previously given him by the Commission, he has awarded contracts as follows, bids for which were received by the Commission at its meeting on January 26, 1939:

Grading Albany Overcrossing Section of the Pacific Highway East, in Linn County. Contract awarded January 31, 1939, to Roy L. Houck, Salem, the low bidder.

Construction of an overcrossing structure on the Pacific Highway East, in Albany. Contract awarded January 31, 1939, to Mountain States Construction Company, Eugene, the low bidder.

The Commission, by unanimous vote, confirmed the award of these contracts as reported by the Engineer.

Reconsideration was given by the Commission to the request of Wallowa County Court for snow removal on a 1/4-mile section of the county road which extends from Wallowa Lake to the homes of some of the employees of the Pacific Power and Light Company. The Engineer recalled that the Commission denied this request at a previous meeting, it being understood at that time that the county was asking the state to do this work at state expense. However, it now develops that the county is willing to pay the cost involved. He recommended, in view of the circumstances, that the request be approved subject to the condition that the county will pay for the work in monthly installments as bills are rendered. The Commission approved the recommendation unanimously.

The Commission discussed and by unanimous vote confirmed the action taken at the meeting on January 27, 1939, with respect to the establishment of a policy to be followed hereafter in connection with the installation of traffic lights along state highway routes within incorporated cities and towns.

The Engineer requested authority to make a reconnaissance survey

MAR 2 1939

for a proposed revision of the Lower Columbia River Highway between Goble and Rainier. He estimated that such survey would cost \$500. The Commission approved the request unanimously.

The Commission had under consideration the revised offers of the United States of America to contribute P.W.A. funds to aid in financing the construction of the Umpqua River Bridge, on the Pacific Highway, in Douglas County; the construction of a maintenance building at Albany, in Linn County; and the construction of the Richland-Halfway Section of the Baker-Homestead Highway, in Baker County.

After discussion of such revised offers, the following resolutions were proposed by Commissioner Tou Velle and read in full:

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE UMPQUA RIVER BRIDGE AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be It Resolved by the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the Umpqua River Bridge and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 87270-15

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.,
Dated: Feb 2 1939
Docket No. Oreg. 1298-F

"State Highway Commission of the
State of Oregon

Salem, Oregon

"1. Subject to the Terms and Conditions (PWA Form No. 230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of a highway bridge with approaches, including the acquisition of necessary land and rights of way (herein called the "Project"), by making a grant to the State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 per cent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$59,551.

MAR 2 1939

"2. By acceptance of this Offer the Applicant covenants to complete the Project with all practicable dispatch, and in any event by October 1, 1939.

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

"4. The acceptance of this Offer by the Applicant shall effectuate a cancellation of the contract created by the acceptance of the Offer dated September 12, 1938, made by the United States of America to the Applicant: Provided, that the cancellation of such contract shall not impair or vitiate any acts performed or proceedings taken thereunder prior to such cancellation, but such acts or proceedings may be continued under the contract created by the acceptance of this Offer.

"UNITED STATES OF AMERICA

Federal Emergency Administrator
of Public Works

By (Sgd.) E. W. Clark
For the Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all Terms and Conditions relating to such grant, a copy of which Terms and Conditions were annexed to the Government's offer and made a part thereof. It is hereby covenanted that the work on the project described in the offer will be completed with all practicable dispatch, and in any event by October 1, 1939.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in

MAR 2 1939

connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE ALBANY MAINTENANCE BUILDING IN LINN COUNTY AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it Resolved By the Oregon State Highway Commission:

Section 1. That the offer of the United States of America to the State Highway Commission of the State of Oregon to aid by way of grant in financing the construction of the Albany Maintenance Building in Linn County and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 87435-1

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.

Dated: Feb 8 1939

Docket No. Oreg. 1282-F

"Oregon State Highway Commission,
Salem, Oregon

"1. Subject to the Terms and Conditions (PWA Form No. 230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of a highway maintenance building, including grading, landscaping and fencing of site, and the acquisition of necessary land (herein called the "Project"), by making a grant to the Oregon State Highway Commission (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$6,852.

"2. By acceptance of this Offer the Applicant covenants to complete the Project with all practicable dispatch, and in any event by March 18, 1939.

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval,

MAR 2 1939

or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

"4. The acceptance of this Offer by the Applicant shall effectuate a cancellation of the contract created by the acceptance of the offer dated August 27, 1938, made by the United States of America to the Applicant: Provided, that the cancellation of such contract shall not impair or vitiate any acts performed or proceedings taken thereunder prior to such cancellation, but such acts or proceedings may be continued under the contract created by the acceptance of this Offer.

"UNITED STATES OF AMERICA
Federal Emergency Administrator
of Public Works

By (Sgd.) H. A. Gray
Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all Terms and Conditions relating to such grant, a copy of which Terms and Conditions were annexed to the Government's offer and made a part thereof. It is hereby covenanted to complete the work with all practicable dispatch and in any event by March 18, 1939.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

A RESOLUTION ACCEPTING THE OFFER OF THE UNITED STATES TO THE STATE HIGHWAY COMMISSION OF THE STATE OF OREGON TO AID BY WAY OF GRANT IN FINANCING THE CONSTRUCTION OF THE RICHLAND-HALFWAY SECTION OF THE BAKER-HOMESTEAD HIGHWAY IN BAKER COUNTY AND THE ACQUISITION OF NECESSARY LANDS AND RIGHTS OF WAY THEREFOR.

Be it Resolved By the Oregon State Highway Commission:

Section 1. That the offer of the United States of America

MAR 2 1939

to the State Highway Commission of the State of Oregon, to aid by way of grant in financing the construction of the Richland-Halfway Section of the Baker-Homestead Highway in Baker County and the acquisition of necessary lands and rights of way therefor, a copy of which offer reads as follows:

"P. W. 87633-5

"FEDERAL EMERGENCY ADMINISTRATION OF PUBLIC WORKS

"Washington, D. C.,
Dated: Feb 20 1939
Docket No. Oreg. 1294-F

"State Highway Commission of the
State of Oregon

Salem, Oregon

"Subject to the Terms and Conditions (PWA Form No. 230, as amended to the date of this Offer), which are made a part hereof, the United States of America hereby offers to aid in financing the construction of highway improvements, including the acquisition of necessary land and rights of way (herein called the "Project"), by making a grant to the State Highway Commission of the State of Oregon (herein called the "Applicant") in the amount of 45 percent of the cost of the Project upon completion, as determined by the Federal Emergency Administrator of Public Works (herein called the "Administrator"), but not to exceed, in any event, the sum of \$28,099.

"2. By acceptance of this Offer the Applicant covenants to complete the Project with all practicable dispatch, and in any event by November 29, 1939.

"3. This Offer is made subject to the express condition that, if the Administrator shall determine at any time that the Applicant has paid or agreed to pay, whether directly or indirectly, a bonus, commission or fee to any person, firm or corporation for attempting to procure an approval of the Applicant's application, or for alleged services in procuring or in attempting to procure such approval, or for activities of the nature commonly known as lobbying performed or agreed to be performed in connection with the application, then the Administrator shall have the right, in his discretion, to rescind this Offer and any agreements resulting herefrom, and, in the event of such rescission, the United States of America shall be under no further obligation hereunder.

"4. The acceptance of this Offer by the Applicant shall effectuate a cancellation of the contract created by the acceptance of the Offer dated September 12, 1938, made by the United States of America to the Applicant: Provided, that the cancellation of such contract shall not impair or vitiate any acts performed or

MAR 2 1939

proceedings taken thereunder prior to such cancellation, but such acts or proceedings may be continued under the contract created by the acceptance of this Offer.

"UNITED STATES OF AMERICA

Federal Emergency Administrator
of Public Works

By (Sgd.) E. W. Clark
For the Assistant Administrator"

be and the same is hereby in all respects accepted.

Section 2. That the State Highway Commission of the State of Oregon and the State of Oregon agree to abide by all Terms and Conditions relating to such grant, a copy of which Terms and Conditions were annexed to the Government's offer and made a part thereof. It is hereby covenanted to complete the work with all practicable dispatch, and in any event by November 29, 1939.

Section 3. That J. M. Devers, Assistant Attorney General for Oregon, and Attorney for the State Highway Commission of the State of Oregon be and he is hereby authorized and directed forthwith to send to the Federal Emergency Administration of Public Works three certified copies of this Resolution and three certified copies of the proceedings of this Commission in connection with the adoption of this Resolution, and such further documents or proofs in connection with the acceptance of said offer as may be requested by the Federal Emergency Administration of Public Works.

Motion was made by Commissioner Tou Velle that the resolutions be adopted. The motion was duly seconded by Commissioner Aldrich and was adopted with the following members voting "Yes":

Chairman Henry F. Cabell
Commissioner E. B. Aldrich
Commissioner F. L. Tou Velle

The Chairman thereupon declared such resolutions carried by unanimous vote.

The Engineer reported the need to establish reduced load limits on certain highways; namely, a reduction of 25% on the Fremont Highway from Silver Lake to Lakeview, Lake County, and on the Klamath Falls-Lakeview Highway from its junction with The Dalles-California Highway to Lakeview; a reduction of 50% on the following highways: Pendleton-John Day Highway between Nye Junction and Long Creek; Mt. Hood Highway, between Hood River and junction with Cloud Cap Inn Road; The Dalles-California Highway between Bend and Klamath Falls; Central Oregon Highway between Bend and Burns; Lakeview-Burns Highway between Valley Falls and junction with the Central Oregon Highway; Wallawa Lake Highway between Elgin and Rock Creek; Crater Lake Highway between Medford

MAR 2 1939

and Crater Lake National Park boundary. He recommended the adoption of appropriate resolutions and the posting of these roads in accordance therewith. After discussion the Commission approved the Engineer's recommendation and by unanimous vote adopted the following resolutions with respect thereto:

WHEREAS, the following roads or highways have been duly designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to-wit:

FREMONT HIGHWAY
KLAMATH FALLS-LAKEVIEW HIGHWAY

AND WHEREAS, the said above-named state highways are in the judgment of the State Highway Commission being subjected to a kind and character of traffic which is damaging and injuring the said highways, and in order to protect said highways against such damage and injury, it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the roads above mentioned and hereinafter designated are being damaged and injured on account of the kind and character of traffic now being hauled over and upon said roads, and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said roads,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named roads shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highways, to-wit:

FREMONT HIGHWAY from Silver Lake to Lakeview, in Lake County

KLAMATH FALLS-LAKEVIEW HIGHWAY from the junction with The Dalles-California Highway to Lakeview, in Klamath and Lake Counties

shall be restricted to the following weights: the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles shall not exceed the product of four hundred fifty (450)

MAR 2 1939

multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed seventy-five (75) per cent of the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Chapter 360 of the laws of Oregon for 1931, shall be in full force and effect until modified, annulled or voided by order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above named highways and at important crossroads on said highways, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county in which any portion of said highways are located, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

WHEREAS, the following roads or highways have been designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to-wit:

PENDLETON-JOHN DAY HIGHWAY
MT. HOOD HIGHWAY
THE DALLES-CALIFORNIA HIGHWAY
CENTRAL OREGON HIGHWAY
LAKEVIEW-BURNS HIGHWAY
WALLOWA LAKE HIGHWAY
CRATER LAKE HIGHWAY

AND WHEREAS, the said above-named state highways are in the judgment of the State Highway Commission being subjected to a kind and character of traffic which is damaging and injuring the said highways, and, in order to protect said highways against such damage and injury, it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having, as a result of due investigation, found that the roads above mentioned and hereinafter

MAR 2 1939

designated are being damaged and injured on account of the kind and character of traffic now being hauled over and upon said roads; and, by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said roads,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named roads shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highways, to-wit:

PENDLETON-JOHN DAY HIGHWAY from Nye Junction, in Umatilla County, to Long Creek, in Grant County;

MT. HOOD HIGHWAY from Hood River, in Hood River County, to Cloud Cap Inn, in Hood River County;

THE DALLES-CALIFORNIA HIGHWAY from Bend, in Deschutes County, to Klamath Falls, in Klamath County;

CENTRAL OREGON HIGHWAY from Bend, in Deschutes County, to Burns, in Harney County

LAKEVIEW-BURNS HIGHWAY from Valley Falls, in Lake County, to the junction with the Central Oregon Highway, in Harney County;

WALLOWA LAKE HIGHWAY from Elgin, in Union County, to a point five miles west of Wallowa (Rock Creek), in Wallowa County;

CRATER LAKE HIGHWAY from Medford, in Jackson County, to the west boundary of Crater Lake National Park, in Jackson County,

shall be as follows: the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

MAR 2 1939

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Chapter 360 of the laws of Oregon for 1931, shall be in full force and effect until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highways and at important crossroads on said highways so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county in which any part of said highways are located, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

In this connection the Engineer reported that, in conformance with authority granted him by the Commission at a previous meeting, he posted additional sections of state highways, as follows, for 50% reduced load limits: The Dalles-California Highway between Maupin and Bend; McKenzie-Bend Highway between Sisters and Bend; McKenzie Highway between Sisters and Redmond; Ochoco Highway between Redmond and a point 6 miles east of Prineville; it appearing that such postings were necessary in order to preserve these roads during the period of thaw. However, the conditions requiring such postings have now improved to such an extent that the reduced limits are no longer needed, so he has had the signs taken down. The Commission, by unanimous vote, confirmed the action taken by the Engineer on this matter.

The Engineer brought up for discussion the matter of maintaining the reduced load limit that has been in effect for some time past on the Clarno Bridge over the John Day River on the Shaniko-Fossil Secondary Highway. He explained that the present reduced limit was established because of the condition of the floor system of this bridge but the floor has now been replaced and the reduced limit is no longer necessary. He recommended, in view thereof, that the legal weight limit for this bridge be restored but that the bridge be posted for a maximum speed limit of 15 miles per hour and that the bridge be further limited to one-way traffic. The Commission approved the Engineer's recommendation and by unanimous vote adopted the following resolutions with respect thereto:

WHEREAS, on the 18th day of November, 1932, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway bridge structure:

Clarno Bridge No. 291-23.8 over the John Day River

MAR 2 1939

at Clarno on the Shaniko-Fossil Secondary Highway
No. 291, in Wasco and Wheeler Counties.

WHEREAS, subsequent to the passage of said resolution the said bridge structure has been reinforced and repaired so that it is now capable of sustaining or supporting loads weighing up to the limit specified by law; and

WHEREAS, the Commission finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said Clarno Bridge, but that it is necessary, because of the narrowness of the bridge roadway, to post said bridge for one-way traffic for trucks;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

Clarno Bridge No. 291-23.8 over the John Day River
at Clarno on the Shaniko-Fossil Secondary Highway
No. 291, in Wasco and Wheeler Counties,

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said bridge structure hereafter shall be the maximum load limit provided by law; however, on account of the narrowness of the structure and the hazard that would be created by reason of trucks passing on the same, the said bridge shall be posted for one-way traffic for trucks and such posting shall consist of signs bearing the following words: "NARROW BRIDGE ONE-WAY TRAFFIC FOR TRUCKS", one of such signs to be erected at each end of said bridge structure.

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished to the County Clerks of Wasco and Wheeler Counties, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

WHEREAS, the highway known and designated as the Shaniko-Fossil Secondary Highway is a state highway and therefore a highway under the jurisdiction and control of the State Highway Commission; and

WHEREAS, said highway crosses the John Day River between Wasco and Wheeler Counties, across which river there has been constructed and is being maintained and used a bridge; and

WHEREAS, the State Highway Commission, after due investigation, has determined and found that said structure cannot with safety to the traveling public sustain vehicles traveling at speeds permitted under Section 55-2201, Oregon Code 1935 Supplement; and

MAR 2 1939

WHEREAS, it is the judgment of the Commission that because of the condition of said bridge the maximum speed permitted on said bridge should be fixed at fifteen miles per hour and it is further the opinion of the Commission that a one-way traffic regulation for trucks using said bridge should be established;

NOW, THEREFORE, IT IS HEREBY ORDERED that the maximum speed permitted for motor vehicles crossing the bridge over the John Day River between Wasco and Wheeler Counties shall be and is fifteen miles per hour.

IT IS FURTHER ORDERED that trucks using said bridge shall be confined to one-way traffic during the period for which this order is in effect.

IT IS FURTHER ORDERED that the restrictions and regulations fixed in this order shall be in full force and effect from the date of this order until rescinded, modified, or revoked by order of the State Highway Commission.

IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named bridge structure so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED that a certified copy of this order be furnished to the County Clerks of Wasco and Wheeler Counties and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

The Commission considered the advisability of sending a representative to the Annual Meeting of the Western Association of State Highway Officials which is to be held in San Francisco during the week of March 6. It was decided to let Division Engineer F. D. Eason represent the Highway Department at such meeting, inasmuch as Mr. Eason is now attending the Annual Meeting of the Asphalt Institute in Los Angeles and it would be convenient for him to stop off in San Francisco on his return to Oregon.

The Commission discussed and referred to the Engineer for investigation and report the complaint relative to flood conditions adjacent to the Oregon-Washington Highway in Riverside Addition to Pendleton.

The Commission had under consideration the following requests for primary highway improvements:

Request of the Rainier Commercial Club for improvement of the Lower Columbia River Highway between Rainier and Prescott:- The Secretary was instructed to inform the club that the Commission has

already ordered a reconnaissance survey of this section but is not in a position at the present time to make any commitment of funds to finance construction.

Request of the Reedsport Chamber of Commerce for improvement of the "L" Street Section of the Umpqua Highway, in Reedsport.

Request of the Klamath County Chamber of Commerce and the Klamath County Court for additional improvements on the Willamette Highway.

Request of T. B. Watters, Chairman of the Highway Committee of the Klamath Falls Chamber of Commerce, for the reconstruction of a short section of the Klamath Falls-Lakeview Highway at the railroad overcrossing at Dairy.

Request of the St. Johns Businessmen's Association for the improvement of North Ivanhoe Street from Philadelphia Street to Richmond Avenue, Portland, as a state highway connection to the St. Johns Bridge.

The Commission instructed the Secretary to keep a list of these projects for consideration in the formulation of future construction programs.

The Commission also considered the following requests for secondary state highway improvements:

Request of Charles Enegren, Marshfield, for the improvement of the Coos River Secondary Highway just east of the north fork ferry on Coos River:- The Engineer advised that the highway is in rather poor condition at this point and should be improved at least to a standard equal to the adjoining sections; further, that investigation has been made by Division Engineer K. D. Lytle, who estimates that to do the work that Mr. Enegren has in mind will cost approximately \$9,000, the section being about one-half mile in length. In view of the costs involved the Commission denied the request for the time being but instructed the Secretary to make note of it for consideration in the formulation of the next secondary highway program.

Petition from the Woodburn Community Chamber of Commerce for the hard-surfacing of the Woodburn-Mt. Hood Loop Secondary Highway in Marion County during the year 1939:- The Engineer advised that this is a meritorious project and estimated that it would cost about \$55,000. He was instructed by the Commission to keep it in mind for earnest consideration in the preparation of the budget for 1940 funds.

Request for the oiling of the Williams Secondary State Highway, in Josephine County, to a point 4 miles south of the town of Williams:- The Engineer advised that the Commission has \$30,000 budgeted for a standard oiling project on this road between Provolt and Williams, particularly to the Williams schoolhouse, which is as far as

MAR 2 1939

the road is in condition to receive standard oil treatment. To extend the improvement the extra four miles with a light oil treatment, he said, would cost an additional \$2,500. After discussion, the Commission approved the standard oil construction from Provolt to the Williams schoolhouse, as a Federal Aid Secondary Highway project and the application of a light oil treatment beyond such point as far as the road is in condition to receive the same, using state money to finance the work.

Request of Union High School District No. 6, Estacada, Oregon, for the improvement of the secondary state highway in front of the school property, by improving the drainage ditch and the shoulders adjacent to the pavement so as to provide safer parking facilities and traffic benefits as well as for the sake of appearance:- The Engineer estimated that it would cost \$2,500 to do this work. The Commission deferred action pending further investigation and report by the Engineer.

Resolution from Long Tom Grange No. 866, Junction City, for the improvement of the Territorial Secondary Highway between Cheshire and Ferguson, in Lane County:- The Commission referred this request to the Engineer for investigation and report.

Request of the Crook County Court for the improvement of the Warm Springs Secondary Highway between Prineville and Madras, particularly between Prineville and the Pine Products Company's mill:- The Engineer was instructed to investigate this request and report thereon at the next meeting.

The following requests for county road, forest highway, and miscellaneous improvements had the attention of the Commission:

Letter from Blaine B. Coles, Vice President, First National Bank, Portland, requesting improvements to certain county roads in the vicinity of Northeast 111th Avenue, Portland:- The Secretary was instructed to inform Mr. Coles that the roads to which he refers are county roads under the jurisdiction of the Board of County Commissioners of Multnomah County, and to suggest to him that he file his request with such board.

Request of the Klamath County Chamber of Commerce for the improvement of the Cascade Lakes Forest Highway from its junction with the Willamette Highway to Crescent Lake:- In the discussion of this project it was pointed out that the forest highway program for this year has already been prepared and sent to Washington, D. C. for approval, so it is now too late to make any change. The Engineer was instructed to bring this project to the Commission's attention in the formulation of the next forest highway program.

Petitions and resolutions requesting sidewalk construction along a $1\frac{1}{2}$ -mile section of the Medford-Provolt Secondary Highway immediately

west of Medford, in Jackson County, for the benefit of school children:- The Engineer was instructed to investigate this project, in line with the newly-established policy covering sidewalk construction, and to render a report thereon, including estimates of cost, at the next meeting.

Request of the City of The Dalles for the filling-in of the highway right of way where it fronts on the site of the city's proposed civic building and natatorium at the west city limits of The Dalles:- The Engineer recommended approval of this request, which he estimated would cost about \$1,145. The Commission approved the recommendation unanimously.

The following communications had the attention of the Commission:

Letter from Mrs. Adrian Ford, Astoria, requesting permission to erect a monumental marker on the right of way of the Oregon Coast Highway at Astoria at the point where her son recently lost his life in an automobile accident. The Commission denied the request as a matter of policy and instructed the Secretary to convey such information to Mrs. Ford in an appropriate sympathetic letter.

Letter from the City of Eugene requesting the erection of appropriate signs directing truck traffic through that city in accordance with the routing designated by the Eugene City Council:- It was explained that what the city wants is for the state to erect signs directing truck traffic over other city streets than those selected for general traffic using the Pacific Highway. The Attorney advised that the Commission has authority to furnish and erect necessary directional signs as the Commission desires. In view thereof the Commission authorized the Engineer to erect such signs provided the Commission, in so doing, does not assume any responsibility for the maintenance of the streets and that it will be clearly understood that the erection of the signs by the Commission will not be deemed as a selection of streets for a state highway route and that the Commission's responsibility will extend no further than simply furnishing and erecting the signs as may be requested by the city.

Letter from County Judge Earl B. Day, of Jackson County, requesting right of way fence construction along the Sams Valley Secondary Highway between Gold Hill and Sams Valley:- The Commission denied this request as a matter of policy.

Communication from the Associated Chambers of Commerce of Southwestern Idaho and Eastern Oregon expressing appreciation for the progress that is being made toward the completion of the I.O.N. Highway, and urging additional improvements thereon:- The Commission ordered the communication filed.

Resolution from Jefferson County Chamber of Commerce requesting

MAR 2 1939

that investigation be made of the possibilities of using the Deschutes River Canyon as a location for a highway connecting Central Oregon and the port of The Dalles:- The Commission ordered the communication filed.

The Commission also considered and ordered filed a letter from L. M. Lepper, Director of the Eastside Commercial Club, Portland, relative to roads in the Warm Springs Indian Reservation; a letter from C. T. Haas, Chairman of Oregon's World's Fair Commission, relative to the Oregon exhibit at the San Francisco World's Fair; and a letter from Wesley Vandercook, Vice President of the Longview Bridge Company, stating that company's position relative to the establishment of toll-free bridges across the Columbia River.

Mr. L. H. Mills, Portland, representing the Miami Corporation, appeared before the Commission at this time relative to the sale to the state of some of the company's timber along the Salmon River Highway, particularly strips at both ends of the strip now owned by the state, which contain fine stands of virgin timber. The Commission appeared favorably inclined to the acquisition of these tracts if it could be financed. The suggestion was made that the state acquire strips on both sides of the highway at the east end of the state-owned tract, particularly between Highway Engineer's Stations 487+50 and 536+70, and the timber on the south side of the highway at the west end of the state-owned property, particularly between Highway Engineer's Stations 625+06 and 772+25, the purchase of the timber on the north side of the highway at this location to be deferred until later. The State Parks Superintendent estimated that there are about 12 million feet of timber involved, and recommended approval of such suggestion.

Mr. Mills advised that the company is asking \$4.00 per thousand for its timber but he thought that the company would be willing to accept payment in three annual installments. He also stated that he believed the company would be willing to defer the cutting of the timber on the north side of the highway at the west end of the state's property until the state has paid for the balance of the timber.

Chairman Cabell gave as his thought that the Commission would be justified in acquiring these timber strips on the basis outlined, in view of the fact that the Salmon River timber is one of the very few pieces of virgin timber left adjacent to a state highway in this part of the state. After considerable discussion, the Commission voted unanimously to purchase this timber on the basis of such offer; i. e., the timber on both sides of the highway at the east end of the state-owned property and the timber on the south side of the highway at the west end of the state-owned property is to be acquired at once at the rate of \$4.00 per M-FBM, payment to be made in three annual installments, without interest being paid on the balances; further, if the state still wishes to acquire the timber on the north side of the highway at the west end of the state-owned property when the other timber has been paid for, the state may have it at that time at the same rate; namely, \$4.00 per M-FBM, and the Miami Corporation will agree not to cut the timber on such tract before that time. Mr. Mills stated that it would be necessary to have this offer confirmed by the Chicago Office of the company, which he would do at once.

It was agreed that a joint cruise should be made at once of the timber on the tracts that the state is now acquiring and that the total amount that the state is to pay for such timber shall be based upon such cruise. It was also agreed that the state shall take over and assume the obligation of a certain lease that the Miami Corporation has given to a third party to occupy a part of the company's property involved in this transaction.

The Commission discussed an inquiry from County Judge Guy Boyington of Clatsop County as to whether or not the state would need all of the county-owned property on the down-stream side of 8th Street in Astoria for use in connection with the establishment of a Columbia River ferry landing at such point. In the discussion of this matter it was brought out that the present ferry dock is at the foot of 14th Street and there is a question whether or not this should be changed. In view of the circumstances, the Commission deferred its decision in the matter pending additional investigation and report by the Engineer.

In this connection the Assistant Attorney reported on his dealings with Clatsop County for the acquisition of county-owned property that is needed for right of way for the proposed Astor Street revision of the Oregon Coast Highway in Astoria. He advised that he contacted County Commissioners James Elliott and John Slotte with regard to this matter and reached an understanding whereby the county would convey to the state all of the county-owned properties along the proposed alignment provided that, after the completion of all of the right of way transactions, the state will reconvey to the county all portions lying outside of the standard width right of way which have not been used for exchange purposes in acquiring right of way from private owners. He further explained that some of the properties are now under tax foreclosure proceedings by the county and that title to these properties will not become final until February or March of 1940. After discussion the Commission instructed the Attorney to arrange a settlement with the county for all of the right of way that is needed. He was also authorized by the Commission to acquire the right of way across the privately-owned properties which are necessary for this project.

The Engineer reported on the cost to improve the county road which extends from the Oregon Coast Highway to Fort Stevens, in Clatsop County. He advised that this project consists of three units; namely, Unit No. 1, which extends from the Skipanon River Bridge northerly a distance of 1.1 mile and is known as the west leg of the wye connection; Unit No. 2, which begins at a point on the Oregon Coast Highway, about a mile and a half east of Unit No. 1, and extends northerly and westerly a distance of 1.7 miles, to a connection with the north end of Unit No. 1, and is known as the east leg of the wye connection; and Unit No. 3, which commences at the junction of Units 1 and 2 and extends northerly and westerly a distance of 3.15 miles to Fort Stevens. He estimated the cost to improve Unit No. 1 at \$9,000, that to construct Unit No. 2 at \$26,500, and that to construct Unit No. 3 at \$34,800, or a total of \$70,300, and suggested, if the Commission decides to proceed with this improvement, that Unit No. 1 and the southerly part of Unit No. 3 should be constructed first. The Commission considered this project to be of considerable importance and decided to give it serious consideration in

MAR 2 1939

the formulation of its 1940 federal aid secondary highway program, although no definite commitment of funds was made thereto. It was decided, however, that the entire project could not be constructed at one time because of the cost involved, hence preference is to be given to the construction of Unit No. 1 and a portion of Unit No. 3, as suggested by the Engineer. The Secretary was instructed to inform the sponsors of this project that the Commission will proceed with the construction of the same if and when there is money available to finance it and provided the county will cooperate therein by acquiring rights of way and by paying other costs that cannot be paid with federal moneys.

The Attorney reported on the status of his investigations relative to the securing of liability insurance to protect the Sunset Logging Company in the event that accidents should occur by reason of the operation of the company's logging railroad over the Wolf Creek Highway, in Clatsop County. He said that the Ohio Casualty Company has offered to write public liability and property damage insurance in an amount satisfactory to protect the Sunset Logging Company for accidents that may occur at the exact point where the railroad crosses over the highway, and is asking a premium of \$1,900 for such a policy to cover a 6-year period, with provision for extending the policy another year, if necessary. He further advised that Mr. J. R. Hulburt, President of the Sunset Logging Company, is not satisfied with such policy because it is not written by the same company that wrote their other insurance and would necessitate two policies covering the same operations. Mr. Hulburt, he said, has offered to consider the matter closed if the Commission will pay the Sunset Logging Company the sum of \$1,500 cash and let the company purchase its own insurance. The Commission considered this a fair proposition and thereupon authorized the payment of such sum to the Sunset Logging Company as full and complete satisfaction of its claim for insurance. The Attorney then suggested that it would be in order for the Commission to authorize payment of the final amount to the Sunset Logging Company for constructing its railroad over the highway at this point in accordance with the agreement dated March 31, 1936. He said that there is due and payable on this account the sum of \$2,774.35. The Commission by unanimous vote authorized the payment of such amount to the company as complete and final payment for such undertaking, making a total amount of \$4,274.35 due the company at this time.

The Commission had under consideration the claim of the Oregon American Lumber Corporation for payment for trees that were taken from the company's property by W.P.A. workers on the Wolf Creek Highway for use as camp fuel and roof shakes, which claim is in the amount of \$777, and represents trees as follows that were taken and used for the above-mentioned purposes:

- 2 fir trees averaging 4' in diameter
- 12 fir trees averaging 6' in diameter
- 5 fir trees averaging 7' in diameter
- 3 cedar trees averaging 5' in diameter
- 1 cedar tree averaging 6' in diameter

The Company alleges that this timber was worth \$3.50 per M-FBM and estimates the board measure content of the trees at 222 M-FBM. The Commission

MAR 2 1939

by unanimous vote approved the payment of the company's claim on such basis.

The Commission discussed the complaint of Mr. S. E. Howard arising out of the improvement of the Amity-Hopewell Secondary State Highway, in Yamhill County. Chairman Cabell advised that he inspected Mr. Howard's premises in company with Maintenance Engineer J. N. Bishop and District Maintenance Superintendent I. A. De France on February 1 and is of the belief that Mr. Howard had just cause for complaint, although the state was not directly responsible for conditions as they exist. It appears that water from nearby canyons originally flowed in a southwesterly direction and crossed the secondary highway at a point about 1/4 mile east of Amity, but that at some time in the past the water was diverted from its natural channel by the construction of a ditch through a small ridge and was taken directly south to the present highway. Also, that before the highway was taken over by the state as a state secondary highway, Yamhill County allowed the water to be diverted westerly for approximately a mile along the north side of the road in a deep drain, thence south across the highway through a box culvert. When this road was taken over as a state secondary highway it was found that this arrangement was very unsatisfactory because, during storms and periods of heavy runoff, the drain was unable to care for the water, and, as a consequence, it flowed down the center of the road, causing ruts to form and the shoulders of the road to be washed away, leaving the road practically impassable. To remedy such condition a culvert was installed across the highway in the natural channel, with the result that the water flowed across Mr. Howard's field and caused considerable damage to his crops. It also appears that Mr. Howard never experienced any difficulty with water in his fields until the Highway Department's forces made this change in the drainage setup.

The Commission's Attorney advised that, in view of the circumstances, the Commission is legally liable for damages to Mr. Howard's property. The Commission decided, after discussion, that it would be advisable to settle with Mr. Howard on a cash basis rather than to attempt to settle on the basis of correcting the drainage system. Accordingly, the Engineer was instructed to negotiate with Mr. Howard on such cash basis and to secure an easement to carry water through his property, if possible.

Reconsideration was given by the Commission to the request of Benton County Court for the oiling of the county road which extends from the Corvallis-Newport Highway to the Corvallis Golf Club, a distance of about .6 mile. The Engineer advised that this road has been inspected and it is estimated that the cost to improve it by regrading and widening the roadbed and by resurfacing and oiling 20 feet in width would amount to about \$10,500. Mr. Tom Davis, Highway Engineer, Bureau of Public Roads, was present and stated that he did not believe that this road would meet the federal aid secondary highway requirements.

After considerable discussion, suggestion was made that perhaps Benton County Court would be willing to pay for the oiling of this road with county funds if the state would construct some other road in Benton County. The Engineer was instructed to contact the County Court relative thereto and to advise the court that the state will arrange for the improvement of the

MAR 2 1939

golf club road, because the county is not properly equipped for such work, but the Commission will expect the county to reimburse the state for such expense.

The Engineer reported the result of investigations to determine the minimum expense that would be required to place the Little Nestucca Secondary Highway, in Tillamook County, in serviceable condition for local residents, as instructed by the Commission at a previous meeting. He estimated such expense at \$74,500, which would include grading at \$40,000, surfacing at \$12,500, 2 temporary bridges at \$5,000, and 1 permanent bridge at \$17,000; but he suggested that it might be possible to construct all three bridges of a temporary type, which would reduce the total expense to \$60,000. The Commission considered that the traffic carried by this road does not justify such a large expenditure. In the discussion that followed it was brought out that there has accumulated to the credit of Tillamook County the sum of \$8,000 of secondary state highway funds. The suggestion was then offered that the state build 3 bridges of the temporary type and do a certain amount of rough grading and clearing work this year to take up the \$8,000 obligation, and to spend Tillamook County's share of the next allotment of state secondary funds for additional grading and surfacing work next year. The Commission approved the suggestion unanimously and instructed the Engineer to proceed accordingly.

The Engineer brought up for discussion the litigation that is pending in connection with Chas. H. Leonard's contract for the construction of the Jordan Creek Section of the Wilson River Highway, in Tillamook County, Contract No. 1754. He explained that laborers employed on this job are under the impression that they were not properly classified and accordingly about 40 of them have sued the contractor for additional compensation; further, that the case has been tried and the court has ordered payment of the claims, notwithstanding the fact that the classifications have been examined and approved by the engineers of the state highway department and the Bureau of Public Roads. The contractor, he said, is inclined to pay the claims and let the matter drop, because the claims do not aggregate a large amount; but, in his estimation, from the state's standpoint, an appeal should be taken to the Supreme Court, because a principle is involved and there is a possibility that the decision of the judge pro tem will have a bearing on the prices that contractors bid on future highway work. He gave as his thought that probably the state should join with the contractor in appealing the case; also, that the Associated General Contractors should join in such appeal because that organization is also concerned. The Commission's Attorney concurred with the view of the Engineer in this matter.

After considerable discussion the Commission decided to join with the contractor in making this appeal to the Supreme Court, provided the Associated General Contractors will also cooperate. The Engineer was instructed to contact the Associated General Contractors in regard thereto and report further to the Commission.

Reconsideration was given by the Commission to the claim of Mrs. Ida B. Hadley arising out of the reconstruction of the Pacific Highway West in front of her premises, in Yamhill County. In the discussion, Right of Way Agent Clare Parker suggested a possible compromise settlement of this

controversy. He advised that a Mr. Maxwell, who owns property at the intersection of a county road nearby, has plans for the construction of a service station at this intersection, which will involve considerable filling. It was his thought that it would be advantageous to both Mr. Maxwell and Mrs. Hadley if Mr. Maxwell were allowed by the Commission to secure his fill materials from the highway right of way in front of the Hadley property, which would automatically dispose of the Hadley claim. The Engineer suggested that it might be well to look into this suggestion, whereupon the Commission instructed him to have Mr. Parker and Division Engineer E. A. Collier inspect the premises and contact Mrs. Hadley and Mr. Maxwell in regard thereto.

The Commission also reconsidered the budget heretofore approved at its meeting on December 19, for the expenditure of \$40,000 of state highway funds in connection with the Oregon exhibit at the San Francisco World's Fair. The Engineer advised that the amounts set up in this budget for the various items were partially based upon known costs and partially upon estimated outlay; but since then Mr. C. T. Haas, Chairman of Oregon's World's Fair Commission, has suggested a revised budget which will increase the item of rent and the estimate of salaries of personnel to be employed, but will not increase the total amount of the budget. He presented such revised budget as follows, which the Commission approved by unanimous vote and ordered entered in the Commission's records:

	<u>Agreed Original Estimate</u>	<u>Revised Estimate</u>
Motion Picture Film (black and white)	\$ 10,000	\$ 10,000
Motion Picture Film (colored)	1,000	1,000
Diorama	3,250	3,250
Motion Picture Equipment	1,500	1,250
Building, Furniture and Decorations	3,000	4,448
Two operators	4,800	8,750*
Proportionate Rent	<u>10,000</u>	<u>10,000</u>
Total	\$ 33,550	\$ 38,698
10% Contingency	<u>3,355</u>	
Grand Total	\$ 36,905	

* six people

The Commission discussed briefly the matter of increasing the membership of the Advisory Board on Publicity matters and the appointment of a committee to study Oregon conditions tending to affect tourist travel. It was decided to defer action on these matters pending consultation with Governor Charles A. Sprague. The Commission also decided to discuss with Mr. Robert W. Sawyer, Bend, the next time it is in the vicinity of Bend, the matter of the appointment of the committee to study Oregon conditions tending to affect tourist travel. The Engineer was instructed to advise Mr. Sawyer accordingly.

The Commission considered and referred to Chairman Cabell for report to Governor Sprague, a petition urging the construction of the 7-mile gap connecting the Scotts Mills County Road with the North Santiam Highway, at Gates, in Marion County. In the discussion of this matter it was brought out that

MAR 2 1939

this project does not fit in with the highway construction program for early undertaking, it being the belief of those present that the Commission should concentrate on the reconstruction of the North Santiam Highway before undertaking an entirely new project, and for the further reason that there is a question whether or not the Scotts Mills route is the proper location for a short road between the North Santiam Highway and Portland.

The Engineer discussed briefly with the Commission the proposal made by the Portland Chapter of the Associated General Contractors that the specifications for Oregon state highway construction work be modified so as to provide for wage scales conforming with those agreed upon by certain members of the Associated General Contractors and the American Federation of Labor. It was decided to defer a decision in this matter pending a conference with Governor Charles A. Sprague, which is to be arranged after the legislature adjourns.

The Commission adjourned at 10:45 o'clock p. m., to reconvene at 9:30 o'clock on the following morning in the Benson Hotel.

Portland, Oregon, March 3, 1939

The State Highway Commission reconvened at 9:30 o'clock a. m. in Room 204, Benson Hotel, with all members present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

A delegation consisting of Mr. Dale Cowen, President of the Oregon Winter Sports Association; Fred McNeill, President of the Cascade Ski Club; Berger Underdahl, Chairman of the National Tournament Commission for the Olympic Sports Tryouts; and Mr. George Henderson, Assistant Town Director of the Olympic Sports Tryouts, came before the Commission in regard to the road which extends from the Mt. Hood Highway to Timberline Lodge. Mr. Cowen headed the group. They advised that ski tryouts for the next Olympic Games are to be held on Mt. Hood on April 1 and 2, this year, which will attract a large number of contestants and spectators; in fact, many more than it will be possible to care for by existing road facilities at Timberline Lodge. They further advised that they have given the road problem considerable thought and the only solution that they can find for this difficulty is in some way to secure the opening of the west leg of the road leading from the highway to the lodge. They also advised that they have contacted the U. S. Forest Service relative thereto and were informed by Mr. C. J. Buck, Regional Forester, that if some agency would assume the responsibility for keeping the east leg of the road from the highway to the lodge open, then the Forest Service would open up the west leg and would assume the responsibility of keeping that portion open during the period of the tournament. They urged the Highway Commission to assume such responsibility for the east leg, which, they said, would be only until the conclusion of the tournament, or a matter of about 30 days. They estimated that the east leg could be properly maintained during this period for not more than \$2,000, but that it would cost considerably more than such sum to open up and maintain the westerly leg, which obligation would be assumed by the Forest Service if the state took

MAR 2 1939

over the east leg. In the discussion of this matter it was pointed out that the Timberline Road is not on the state highway system, hence the Commission is without legal authority to spend state highway funds thereon. However, the Commission indicated a willingness to cooperate in the undertaking if that can be done legally without designating the road as a state highway. A decision in the matter was therefore deferred pending a conference with representatives of the U. S. Forest Service.

Mr. F. N. Brundage, Acting Regional Forester, and Mr. James Frankland, Regional Engineer, appeared with this delegation later in the session. Chairman Cabell advised that the State Highway Commission is favorably inclined to cooperating in this undertaking provided a way is found to do so legally without placing the road on the state highway system. He suggested that the Commission might spend an extra \$2,000 of state highway funds on some other forest highway project if the Forest Service would assume full responsibility for keeping both legs of the Timberline Road open to travel for the period requested. Furthermore, the Commission would be willing to loan some of its snow-fighting equipment as an aid if it can be spared from other projects.

Mr. Frankland gave as his thought that the matter could be worked out satisfactorily on some such basis. After further discussion it was mutually agreed that the Forest Service and the Bureau of Public Roads would assume the responsibility for opening and maintaining both legs of the road during the period under discussion and the state would furnish the snow-removal equipment needed for the work; also, that the Forest Service will keep a record of the cost involved and the state is to be given credit for the loan of equipment, for which no charge is to be made by the state until accumulated rentals reach the sum of \$2,500. It was understood that the arrangement should be covered by written agreement. The State Highway Engineer was instructed by the Commission to arrange for equipment as may be necessary as soon as notified by the Forest Service.

The Assistant Attorney reported on the status of the right of way budget for 1939. He advised that the Commission budgeted an amount of \$550,000 for right of way purchases during such period, and that, to date, he has on hand commitments involving approximately \$260,000. The Commission approved the report and ordered it filed.

The Engineer requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful study the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

MAR 2 1939

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney presented a request from Elizabeth Paden for additional compensation on a settlement for right of way acquired for the Brownsville Section of the Halsey-Sweet Home Secondary Highway, in Linn County. He said that when Mrs. Paden was approached relative to the acquisition of this right of way the right of way agent was of the opinion that the grade of the highway would be level with Mrs. Paden's property, but it was discovered later that the superelevation of the highway at this point was not considered and that the plans actually called for a considerable fill in front of Mrs. Paden's property, which worked to her disadvantage. It was his thought that an injustice has been done to Mrs. Paden and that the case should be reopened and an additional amount paid to her as damages. He estimated that a satisfactory settlement could be reached at a cost not to exceed \$200 and recommended payment of such amount if necessary. The Commission approved the recommendation unanimously.

The Commission discussed matters pertaining to the Albany grade separation project. In this connection the Engineer advised that of the 1939 federal aid allotment for this project there still remains a balance of \$158,000 which, according to the approved program, is to be used to finance an additional contract in the northern part of Albany before fall. He gave

MAR 2 1939

as his thought that right of way for this project should be secured now so as to avoid delays in contracting the work that might be attributed to right of way difficulties, it being indicated by past experience in purchasing right of way in Albany that it is going to be quite a slow matter to complete negotiations for property lying within the city limits. He requested authority for the Attorney to commence the securing of options for this right of way at once. The Commission approved the request unanimously.

The Engineer brought up for discussion the matter of an exchange of properties with Mr. Carl G. Washburne, Eugene, along the Oregon Coast Highway, near China Creek, in Lane County. He explained that the state owns a stock pile site that is entirely surrounded by Mr. Washburne's property and that Mr. Washburne is seriously handicapped in the development of his property by reason thereof. Mr. Washburne, he said, would like to obtain this stock pile site and has stated his willingness, if the state will deed it to him, to deed to the state a strip of land of uniform width for the widening of the highway right of way from China Creek to the north line of his property. The Engineer advised that this particular stock pile site is not needed and it would be desirable to accept Mr. Washburne's proposition because the present right of way is only 60 feet wide and should be widened to 80 feet before expensive development takes place in this section. The Commission concurred in the viewpoint of the Engineer and thereupon authorized such exchange of properties.

The Attorney brought up for discussion the controversy with Mr. M. A. Peterson, arising out of a settlement for right of way needed for the Happy Hollow Section of the McMinnville-Tillamook Highway, in Tillamook County. It appears that the property in question was originally owned by a Mr. Henry J. Rost, who was Mr. Peterson's father-in-law, and that Mr. Rost gave to the state an option to purchase the same; but before the Highway Commission had an opportunity to exercise the option Mr. Rost died, and Mr. Peterson, who now owns the land, refuses to give the state a deed. In fact, he has constructed a fence along the original right of way line. The Attorney advised that this land is needed in order to obtain a standard width right of way for this highway, and requested instructions as to further procedure. After discussion, the Commission instructed the Attorney to secure an injunction estopping Mr. Peterson from building any more fence on this land and requiring him to comply strictly with the provisions of the option.

The Attorney reported the need to institute condemnation proceedings in order to acquire right of way needed for the West Portland-Tualatin Section of the West Portland-Hubbard Highway, across the lands of A. G. and L. H. Smith, and for the Manning-Davies Section of the Wolf Creek Highway across the lands of Carrie E. McGill. He suggested payment of \$30 per lot for the Smith property, or a total of \$180 for such right of way, and \$850 for the land needed from Mrs. McGill. The Commission unanimously approved the prices recommended for these properties and authorized the Attorney to proceed with condemnation if the owners refuse the same. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

West Portland-Tualatin Section of the West Portland-Hubbard Hwy.
Manning-Davies Section of the Wolf Creek Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

West Portland-Tualatin Section of the West Portland-Hubbard Hwy.
File 5476 - A. G. Smith and L. H. Smith
Manning-Davies Section of the Wolf Creek Highway
File 6268 - Carrie E. McGill

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included

MAR 2 1939

within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney brought up for discussion the complaint of Ben Hur Lampman relative to state-owned property that lies between the Oregon Coast Highway and his property at Nelscott, in Lincoln County. It appears that when the Oregon Coast Highway at this location was straightened a number of years ago, the standard width right of way did not take in all of the old highway, and subsequently the Commission adopted a resolution signifying its intention to retain such portions for state use, which was contrary to the understanding of Mr. Lampman and others in this vicinity, who believed that such portions would be allowed to revert to the adjacent property owners, and they are demanding title from the state to such portions. The Attorney advised that the Commission's resolution of intention to retain the sections of the old road outside of the new standard width right of way was not adopted by the Commission until a lapse of several years after the completion of the new highway, so that in the meantime property owners were perfectly within their rights in thinking that the old highway had reverted to them.

The Commission indicated concurrence in the Attorney's viewpoint and accordingly instructed the Attorney to prepare a modification of the original resolution to eliminate therefrom the section of the old road that fronts on Mr. Lampman's property and is outside of the standard width right of way. He was also instructed to check over this project and ascertain the names of the other property owners who are similarly affected, it being the thought of the Commission that the sections of the old road that are not needed by the state for highway purposes should be turned back to the adjacent property owners without charge; but, if there are parcels that are needed for highway purposes, or, if a reasonable doubt exists, then such parcels shall

be retained by the state but the adjacent property owners shall be paid a reasonable sum for the same.

The State Parks Superintendent was present and discussed with the Commission matters pertaining to the acquisition for wayside purposes of property owned by P. J. Butler, in Tillamook County, being described as the W $\frac{1}{2}$ of the SW $\frac{1}{4}$ of Section 5, T. 3 N., R. 10 W., W.M., and a 300-foot strip situate in the NE corner of the NE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Sec. 6, T. 3 N., R. 10 W., W.M., which said properties are located adjacent to the Oregon Coast Highway near the Tillamook-Clatsop County line. The Parks Superintendent advised that these tracts are badly needed in order to fill out the state park at this location; also, that he has offered Mr. Butler \$5,000 for his property but the offer was refused. After considerable discussion and in view of the desirability of the tract for park purposes, the Commission authorized condemnation of the same provided Mr. Butler refuses to accept the maximum price offered by the state. The Commission referred the matter to Chairman Cabell to set such maximum price. (This property included in resolution authorizing condemnation of the Charles Fowler property immediately following.)

The Parks Superintendent also brought up for discussion the matter of instituting condemnation proceedings to acquire timbered wayside strips from Mr. Charles A. Fowler, near the Tillamook County line, in Clatsop County. He said that Mr. Fowler owns 40 acres of land in this vicinity, described as the SE $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Sec. 31, T. 4 N., R. 10 W., W.M., which are needed to fill out the state park at this location, but Mr. Fowler, for some reason, will not reply to letters on the subject, hence his request for authority to condemn the property. The Commission instructed the Attorney to negotiate with Mr. Fowler for acquisition of his property, and authorized him to commence condemnation proceedings in the event the property cannot be acquired by mutual agreement. The following resolution authorizing such condemnation proceedings to acquire Mr. Fowler's property and also authorizing condemnation of the P. J. Butler property, if necessary, was adopted by the Commission by unanimous vote:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire land or ground necessary for the development, maintenance and operation of parks, parking places, automobile camps, camp sites, public squares, recreational grounds or resorts and land for the preservation of trees or timber growing thereon; and

WHEREAS, in the judgment and opinion of the State Highway Commission it will be for the convenience and is for the best interests of the general public that there be acquired for public purpose, to wit: for the purpose of developing and maintaining a park, recreational ground and/or resort, and for the purpose of preserving the timber growing thereon the following described parcels of land, to wit:

Charles A. Fowler property:

All of the Southeast quarter of the Southwest quarter of Section 31, Township 4 North, Range 10 West, W.M., Tillamook

MAR 2 1939

County, Oregon, containing 34.62 acres, exclusive of highway right of way,

and

P. J. Butler property:

All of the West one-half of the Southwest quarter of Section 5, Township 3 North, Range 10 West, W.M., Tillamook County, Oregon, containing 64.83 acres, exclusive of highway right of way.

Also:

A parcel of land lying in the Northeast quarter of the Southeast quarter of Section 6, Township 3 North, Range 10 West, W.M., said parcel being described as follows:

Beginning at the East one-quarter corner of said Section 6; thence south along the east line of said Section 6 a distance of 560 feet; thence North 45° West a distance of 792 feet to the east and west center line of said Section 6; thence east along said east and west line a distance of 560 feet to the point of beginning, containing 3.6 acres.

NOW, THEREFORE, BE IT RESOLVED that the said parcels or tracts of land be and the same hereby are declared by this resolution to be necessary for the purpose herein stated; and

BE IT FURTHER RESOLVED that title to the said parcels or tracts of land be acquired by the State of Oregon, by and through its State Highway Commission, for the above specified public use and purpose.

BE IT FURTHER RESOLVED that the best interests and conveniences of the general public require that title to the said tracts or parcels of real property be acquired for the purpose of developing and maintaining the same for a park, recreational ground or public resort and for the purpose of preserving the timber growing thereon, and for the further purpose of making said parcels of land available for the use and enjoyment of the general public.

BE IT FURTHER RESOLVED that I. H. Van Winkle, Attorney General, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to negotiate further with the owners of said property and endeavor to acquire said property by agreement, and in the event that said properties cannot be acquired by agreement, then the said I. H. Van Winkle, Attorney General, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, are hereby requested to institute and prosecute such condemnation proceedings or other suits or actions as may be necessary to acquire the said real property or such parcels as cannot be acquired by agreement.

BE IT FURTHER RESOLVED, that in such suits, actions or procedure as may be prosecuted for the acquisition of said real property provision be made whereby title in fee simple shall be acquired in the name of the State of Oregon, by and through its State Highway Commission.

The Engineer brought up for discussion the matter of lining the Arch Cape Tunnel, on the Oregon Coast Highway, in Clatsop County. He suggested, in order to minimize the cost of such project, that a timber lining be substituted for the concrete lining for the time being, notwithstanding that it will be necessary to reduce the width of the sidewalk in the tunnel to 3 feet. The timber lining, he said, will serve the purpose for a number of years and can be replaced with a concrete lining when that will be necessary. The Commission approved such substitution by unanimous vote and authorized the Engineer to proceed accordingly.

The Attorney brought up for discussion the matter of acquiring additional right of way for the Multnomah County Line-Middleton Section of the Pacific Highway West, in Washington County. He explained that he has information to the effect that some of the property in this vicinity which will be needed for the new highway right of way has been subdivided into lots and has been placed on the market for sale, and the question now arises whether or not it would be advisable to acquire the right of way at this time while it is in single ownership rather than to postpone the purchase until such time as it would be necessary to deal with separate individuals. The particular property affected, he said, is that owned by Mr. E. T. Hunter just west of Roamer's Rest. After considerable discussion the Commission decided that it would be advisable to secure options for this property, and instructed the attorney accordingly.

The Commission had under discussion the controversy between the United States Reclamation Service and the Highway Commission concerning ditches and canals which the Government claims must be constructed beneath the surface of the highway in connection with the Owyhee Reclamation Project. The Attorney reported that he had requested Senator McNary to give consideration to legislation which would impose the cost of the construction of such ditches on the Government, and Senator McNary reported that the Federal Reclamation Service in Washington is opposed to such procedure. The Attorney stated that there is a possibility that some cooperative agreement can be worked out through the state and the Reclamation Service and he recommended that negotiations be opened up with that in mind. The Commission approved the recommendation and instructed the Attorney to arrange a conference with Mr. Newell of the Reclamation Service to discuss the matter. Pending satisfactory conclusion of this matter the Engineer was instructed to construct bridges over the ditches and canals that may be excavated across state highways by the Reclamation Service, so as to avoid interruption of traffic, and to bill the Reclamation Service for such expense.

The Commission adjourned at 12:00 o'clock noon and reconvened at 1:30 o'clock p.m. in the same room with the same persons present and participating.

MAR 2 1939

The Attorney brought up for discussion the controversy with H. M. Featherstone, Vale, Oregon, concerning title to a stock pile site situate in Section 22, T. 18 S., R. 45 W., W. M., Malheur County. He advised that on April 8, 1927, Malheur County executed to the State of Oregon a quitclaim deed covering this stock pile site which is located adjacent to the John Day Highway at Mile Post 283.83, and that the deed was recorded on May 14, 1927; also, that subsequently the county executed another deed conveying a larger subdivision, of which the stock pile site in question is a part, to Mr. Featherstone, who now claims that his title is superior to that of the state, and alleges that the county did not transfer title to the state in compliance with the laws pertaining to transfer of property that was acquired by the county under tax foreclosure proceedings. He gave as his opinion that Mr. Featherstone is not in a position to contest the state's title because, first, the Attorney General ruled many years ago that in the conveyance of property from one governmental board or commission to another, it was not necessary to comply with the statutes relative to advertising and sale; and, second, because the legislature, by Chapter 204, Oregon Laws 1935, authorized any county court or board of county commissioners to convey unto the State of Oregon, by and through its State Highway Commission, lands for various-named state highway purposes, specifically including stock pile sites, notwithstanding the provisions of any other law. He suggested that the controversy might be terminated by deeding to Mr. Featherstone the north half of the stock pile site, which, according to information received from the Division Engineer, is not absolutely needed for the state's use, if Mr. Featherstone will convey to the state a parcel of land of equivalent area fronting on the highway and adjoining the south half of the tract under discussion. He requested instructions.

After discussion, the Commission decided that it does not have authority to quitclaim anything to Mr. Featherstone without adequate consideration. The Attorney was instructed to so inform Mr. Featherstone and to endeavor to reach a satisfactory agreement with him on the basis of his suggestion.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Suggestion of P. F. Chandler, Canyon City, that the state take over and assume the maintenance of Joaquin Miller cabin, near Canyon City:- The Parks Superintendent advised that the cabin under discussion was built in the year 1860 by Joaquin Miller, who lived in it for about 5 years. Local Canyon City people, he said, are now caring for the cabin because of its historical background and its relation to the early days of Grant County, but the cabin needs attention and it appears that the responsibility is too great for the local people to handle, so they have suggested that the Highway Commission take it over as a state matter. He added that the building houses some old relics, none of which, however, were ever owned by Joaquin Miller, and if the state took it over it would be necessary to maintain a caretaker there constantly. He also stated that the sponsors of this project want to talk it over with the Commission personally, in view of which the Commission decided to defer action until it has had an opportunity to hear what these people have to say about it.

Report on the matter of cleaning up the Indian Village adjacent to the Columbia River Highway at Celilo, Wasco County:- The Parks Superintendent presented a form of resolution pertaining to the cleaning-up of these premises but the Commission deferred action thereon in view of a report from Commissioner Aldrich to the effect that he has been informed by Mr. O. L. Babcock, Superintendent of the Umatilla Indian reservation, who has supervision over the Indian Village at Celilo, that a movement is under way for a general clean-up of this village. It was the thought of the Commission that further action on this matter should be deferred until it is known what can be accomplished by the movement referred to by Mr. Babcock.

Suggested state park adjacent to the Oregon Coast Highway, near Nelscott, in Lincoln County:- The Parks Superintendent advised that he had further conversation with the sponsors of this park during which he pointed out that the Commission has only a limited amount of funds budgeted for purchases of this kind, and if it purchased the Nelscott tract it would not be possible to finance the purchase of timber strips along the Salmon River Highway. In view of the circumstances, he said, these people expressed a strong preference for the acquisition of the Salmon River timber.

Purchase of wayside strips adjacent to the Wolf Creek Highway through the holdings of the Oregon-American Lumber Corporation:- The Parks Superintendent advised that the strips in question have been burned over but have not been logged and that the corporation has stated its willingness to sell the strips to the state, after the timber has been removed, at the rate of \$5.00 per acre, and is willing to enter into a sales agreement with the state at this time to that effect, although it may be a matter of 10 years before the state can secure a deed to the property. He recommended execution of such agreement. The Commission approved the arrangement and authorized the Attorney to prepare a sales agreement in accordance therewith. However, the agreement is to be approved by the Commission before it is presented to the company for execution.

Purchase of an addition to Azalea State Park at Brookings, in Curry County:- The Parks Superintendent requested authority to purchase 2.89 acres as an additional unit to this park. He advised that the owners, the Brookings Land and Townsite Company, are asking \$100 per acre for this land plus an additional \$40, which represents the amount that they paid out to have the property surveyed for a prospective purchaser, or a total of \$329. The Commission approved the purchase of this tract by unanimous vote.

Proposed addition to Devils Elbow State Park adjacent to the Oregon Coast Highway, near Heceta Head, in Lane County:- The Parks Superintendent recommended the purchase of 58 acres at this location, described as Lot 1 and the N.W. $\frac{1}{4}$ of the N.W. $\frac{1}{4}$ of Sec. 34, T. 16 S., R 12 W., W.M., from the owner, Mr. Rufus Stonefield. He said that this property is needed to protect the present state park at this location, Lot 1 being particularly desirable because it will prevent the commercialization of the area on the east side of the highway at the north end of the Cape Creek Bridge, and will round out the present park on the east side of the highway. The N.W. $\frac{1}{4}$ of the N.W. $\frac{1}{4}$, he said, consists of a high promontory overlooking the ocean and lies just north of the Heceta Head

Lighthouse. Furthermore, it joins the property of Mr. Carl G. Washburne, Eugene, who plans to donate his property to the state for park purposes. This promontory, he said, is the main background of the lighthouse setting as viewed from the Sea Lion Caves located about 1 mile south of this point. He gave as his thought that this property can be purchased for \$3,500 and strongly recommended the purchase. The Commission by unanimous vote authorized negotiations for the purchase of this property at such figure.

130-acre addition to Silver Falls State Park, in Marion County:- Mr. Boardman advised that this area is situate in the lower end of the Silver Creek Canyon and is an intervening tract between two areas that have already been acquired to fill in this park. Further, that the tract is timbered and would be very useful in affording protection to other timbered areas in this park and is also needed for the building of trails, which, under present conditions, cannot be built without encroaching upon private property. He advised that the entire acreage, which is described as the S.W. $\frac{1}{4}$ of the N.E. $\frac{1}{4}$, the N $\frac{1}{2}$ of the N.W. $\frac{1}{4}$, and 10 acres situate in the S.E. $\frac{1}{4}$ of the N.W. $\frac{1}{4}$, all in Sec. 10, T. 8 S., R. 1 E., W.M., can be purchased from the owner, a Mr. K. W. Merrifield, for the sum of \$2,600, which is at the rate of \$20 per acre. The Commission approved the purchase by unanimous vote.

Concession at the Vista House at Crown Point:- The Parks Superintendent brought up for discussion the advisability of granting to Mr. Edward L. Dimmitt, who has had the concession privilege at this place for the past 23 years under Multnomah County's supervision, a continuation of his concession privilege. He presented a statement from Mr. Dimmitt showing that his yearly expense for maintaining the concession amounts to \$2,491. After discussion, the Commission authorized the renewal of the concession to Mr. Dimmitt for a period of one year without compensation, provided he will act as caretaker of the property and will maintain the premises to the satisfaction of the state; and provided, further, that he will confine his sales to candy, gum, cigarettes, ice cream, soft drinks, and cigars, and nothing else, the intention being that Mr. Dimmitt shall not conduct a restaurant business in opposition to Mr. W. A. Johnson who conducts such a business on privately-owned property nearby.

Sale of gravel from Cummings Creek on the Oregon Coast Highway, in Lane County:- The Parks Superintendent advised that a Mr. George L. Govro, of Yachats, has requested permission to take gravel from this creek, which is located within the boundaries of the property recently acquired from Mrs. Pratt for state park purposes. He recommended that the request be denied. The Commission approved the recommendation.

Proposed park site at Floras Lake near Port Orford, in Curry County:- The Parks Superintendent advised that the Blacklock Sandstone Company of San Francisco owns 1400 acres at this location, which commences at Floras Lake and extends down the coast in Sections 18, 19, 30, and 31, of T. 31 S., R. 15 W., W. M., for which the company is asking the sum of \$10 per acre, or \$14,000 for the entire acreage. He gave as his thought that this would be a wonderful buy if the Commission could finance it. In view of the present shortage

of funds the Commission decided not to purchase this tract now, it being the Commission's belief that the money required to acquire this tract could be spent to much better advantage in acquiring tracts that would fit in better with the state parks system.

Timber tract at the intersection of the McKenzie Highway and the McKenzie-Bend Highway just east of the town of Sisters:- The Parks Superintendent advised that this tract is owned by the Louis Hill interests, who have offered to sell it to the state at the rate of \$4.00 per thousand for the timber standing thereon. A cruise by the Hill interests, he said, indicates that there are 444,000 board feet of timber on the tract, whereas the state's cruise indicates 143,000 board feet; also, that on account of this difference, a third cruise was made by the U. S. Forest Service, which indicates that the tract contains 374,000 board feet. He advised that, due to the variance, he has arranged with Mr. David Mason, who represents the Hill interests, for a joint cruise of the tract so as to make it possible to come to a mutual understanding as to the correct stumpage. The Commission approved the report.

Woahink Lake C.C.C. Camp:- The Parks Superintendent advised that the Federal Government is about to abandon the C.C.C. camp that has been located at Woahink Lake and has been doing good work in Jessie Honeyman State Park. He said that there is much work yet to be done in this park, and requested authority from the Commission to write to the National Parks Service objecting to the removal of this camp. The Commission by unanimous vote approved the request and instructed Mr. Boardman to send copies of his letter to the members of Oregon's delegation in Congress.

Display of Highway Department's pictures in hotel lobbies:- The Parks Superintendent reported conversation with the manager of one of the hotels in Portland regarding the use of some of the Highway Department's pictures of Oregon scenes for display purposes in the lobby of his hotel. He requested information as to whether or not he should encourage such display of pictures that have been made by the Highway Department's official photographer. In the discussion of this matter the question arose whether or not commercial photographers would object to the use of state-owned pictures for such purpose and to what extent other hotels throughout the country would ask for the same privilege. The Parks Superintendent was instructed to confer with Mr. Harold B. Say, Director of the Travel and Information Department, relative thereto.

The Commission had under consideration the matter of providing a basic allocation for the 1940 Federal Aid Funds and for the 1939 State Funds; also, the selection of projects for a partial program for the 1940 Regular Federal Aid Funds. After considerable discussion and careful consideration, the Commission by unanimous vote approved the following basic allocation for such funds and the following projects for such partial program, it being understood that the basic allocation is tentative only and that it is essential to adopt the partial program at this time if the projects listed therein are to be placed under contract this year. The Engineer was authorized and instructed to submit such partial program to the Federal Bureau of Public Roads for approval.

MAR 2 1939

BASIC ALLOCATION, 1940 FEDERAL PROGRAM AND 1939 STATE PROGRAM

Program	Total (100%)	Divisions 1 & 2 *(47.0%)	Division 3 (18.0%)	Division 4 (14.5%)	Division 5 (20.5%)
1940 Regular Federal Aid	\$2,900,000	\$1,363,000	\$522,000	\$420,500	\$594,500
1940 Feeder Road Projects on State Hwys.,	215,000	101,000	38,700	31,200	44,100

MAR 2 1939

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them and the amounts authorized for each. After due consideration, motion was made by Commissioner Tou Velle that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized for survey expenditures are as follows:

Mile Post - - -	Baker-Idaho Line Section, Old Oregon Trail Highway, Baker County	1st authorization - \$240.00
Plans - - - -	Canby-Marquam Section, County Road, Clackamas County	1st authorization - \$1,050.00
Location - - -	Zig Zag-Rhododendron Section, Mt. Hood Highway, Clackamas County	1st authorization - \$1,400.00
Bridge - - - -	Cannon Beach Junction-Mecanicum Junction Section, Oregon Coast Highway, Clatsop County	1st authorization - \$100.00
Plans - - - -	Jewell-Banser Bridge Section, Nehalem Secondary Highway, Clatsop County	3rd authorization - \$300.00
	Total to date - \$3,550.00	
Right of Way -	Mist Section, Nehalem Secondary Highway, Columbia County	1st authorization - \$100.00
Location - - -	Crooked River-Prineville Section, Ochoco Highway, Crook County	3rd authorization - \$500.00
	Total to date - \$1,300.00	
Reconn. - - -	Divide-Oakland Section, Pacific Highway, Douglas County	2nd authorization - \$200.00
	Total to date - \$1,160.00	
Location - - -	Prairie City Section, John Day Highway, Grant County	2nd authorization - \$250.00
	Total to date - \$650.00	
Reconn. - - -	Prairie City-Austin Junction Section, John Day Highway, Grant County	1st authorization - \$1,000.00
Plans - - - -	Cinder Butte-Wagontire Section, Lakeview-Burns Highway, Harney County	1st authorization - \$1,500.00
Plans - - - -	Okerman Ranch-Sage Hen Hill Section, Central Oregon Highway, Harney County	1st authorization - \$1,400.00
Plans - - - -	Wright Point-Narrows Section, Frenchglen Secondary Highway, Harney County	1st authorization - \$1,500.00
Plans - - - -	Buchanan Ranch-Nigger Flat Section, Central Oregon Highway, Harney County	1st authorization - \$800.00
Plans - - - -	Baker Gulch-Lick Creek Section, Little Butte Highway, Jackson County	1st authorization - \$250.00

Plans - - - - Provolt-Williams Section, Williams Secondary Highway, Josephine County 1st authorization - \$100.00

Location - - - U.S.R.S. Flume, M.P. 293.66, The Dalles-California Highway, Klamath County 2nd authorization - \$550.00
Total to date - \$900.00

Plans - - - - Mac's Store-Merrill Section, The Dalles-California Highway, Klamath County. 2nd authorization - \$2,600.00
Total to date - \$2,800.00

Location - - - Silver Lake-Picture Rock Pass Section, Fremont Highway, Lake County 1st authorization - \$700.00

Location - - - Eugene-Walker Section, Pacific Highway, Lane County 1st authorization - \$25,680.00

Right of Way - Toledo-Olalla Creek Section, Corvallis-Newport Highway, Lincoln County 1st authorization - \$50.00

Right of Way - Otis-Yamhill River Section, Salmon River Highway, Lincoln Co. 1st authorization - \$1,370.00

Test Holes - - Albany Section, Pacific Highway East, Linn County 1st authorization - \$150.00

Location - - - Foster-Bryant Hill Section, Santiam Highway, Linn County 1st authorization - \$7,500.00

Plans - - - - Brogan-Jamieson Section, John Day Highway, Malheur County 1st authorization - \$1,950.00

Plans - - - - Sandy Boulevard (Unit 2), Columbia River Highway, Multnomah County 2nd authorization - \$1,200.00
Total to date - \$2,200.00

Location - - - Bybee Avenue Connection, Pacific Highway East, Multnomah County 1st authorization - \$200.00

Plans - - - - Fern Corner-Falls City Section, County Road, Polk County 1st authorization - \$675.00

Right of Way - Neahkahnie Mountain-Short Sand Beach Section, Oregon Coast Highway, Tillamook County 1st authorization - \$500.00

Bridge - - - - Tillamook-Washington County Line Section, Wilson River Highway, Tillamook County 1st authorization - \$150.00

Plans - - - - Mills Bridge Section, Wilson River Highway, Tillamook County 1st authorization - \$260.00

Plans - - - - Cove-Island City Section, Cove Secondary Highway, Union County 2nd authorization - \$500.00
Total to date - \$2,000.00

Plans - - - - Hillsboro-Airport Section, County Road, Washington County 2nd authorization - \$600.00
Total to date - \$1,200.00

The motion was duly seconded by Commissioner Aldrich and was declared by Chairman Cabell to have carried by the unanimous vote of the Commission.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Roy L. Houck, Contract No. 1979, for grading the Lamb Creek-Sheep Ridge Section of the Santiam Highway, in Linn County, requested an additional extension of time, from November 1 to November 17, 1938, within which to complete this project. He alleged that he would have completed the job within the previously-extended time limit had it not been for the fact that wet weather interfered seriously with his work, and the work was further delayed by reason of the occurrence of numerous slides. The Engineer advised that the completion date specified in the contract was December 15, 1937, but, because of numerous large slides, the contractor was unable to complete the project within that time, hence the Commission approved extending the time limit to November 1, 1938, with the understanding that Mr. Houck would be required to reimburse the state for engineering expense incurred subsequent to October 1, 1938. Additional slides occurred, he said, which prevented the completion of the project within the extended time limit, and examination of the final quantities reveals that Mr. Houck removed 280,000 cu. yds. of material, which is an increase of 41 per cent over the estimated amount and is 11 per cent in excess of the quantity estimated at the time of the first extension. This would automatically allow the contractor, he said, an extension of time, without penalty, of 94 days subsequent to July 20, 1938, when the work was resumed after the winter shutdown, or until October 23, 1938. He recommended, therefore, that the extension now requested be granted subject to the condition that the contractor shall reimburse the state for engineering expense incurred subsequent to October 23, 1938, instead of subsequent to October 1, 1938. He advised that such recommendation is made notwithstanding that the Bureau of Public Roads will not concur therein and will not reimburse the state for this expense. After discussion, the Commission by unanimous vote approved the Engineer's recommendation.

R. I. Stuart & Sons, Contract No. 2061, for furnishing crushed rock in stock piles for the Bandon-Port Orford Section of the Oregon Coast Highway, in Coos and Curry Counties, requested an additional extension of time, from October 15 to November 27, 1938, within which to complete this job. They gave no reason for their failure to complete the project within the specified time limit. The Engineer advised that the date of completion specified in the contract was August 31, 1938, but was extended by the Commission to October 15, 1938, with the understanding that the contractor would reimburse the state for the engineering expense incurred subsequent to September 4, 1938. He recommended granting this additional extension of time subject to the same penalty. The Commission approved the recommendation unanimously.

D. L. Ashton, Contract No. 2102, for construction of a roadside improvement project on the Shedd-Halsey Section of the Pacific Highway East, in Linn County, requested an extension of time from October 31 to December 15, 1938, within which to complete this job. The Engineer advised that weather conditions were not favorable to the planting of trees and shrubs prior to November 15 and it was not until the latter part of November that the contractor was permitted to proceed with this part of the work. He recommended, in view of the circumstances, that the extension now requested be granted without penalty and presented a letter from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

Mountain States Construction Company, Contract No. 2110, for the construction of a canal and railroad roadbed on the Pacific Highway East, in Albany, Linn County, requested an extension of time from December 31, 1938, to June 1, 1939, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was occasioned by the fact that they were ordered to shut down their work on December 30, 1938, and that their operations were delayed by the failure of the railroad company to perform certain work in connection with this job. The Engineer advised that the contractor was handicapped in his operations by reason of the failure of the railroad company to perform certain work that it was obligated to do in connection with this project and also because of the noncompletion of the revision of the city's water main which had to be coordinated with the contract work. He further stated that because of adverse weather conditions he ordered the contractor to close down the work through the winter months. It was his thought, in view of the circumstances, that the contractor is entitled to the extension of time without penalty and he so recommended. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

Castellote & Stocker, Contract No. 2112, for installation of a traffic signal system in the city of Eugene, Lane County, requested an extension of time from November 30, 1938, to January 25, 1939, within which to complete this project. They attributed their failure to complete the project within the specified time limit to delay in receiving some of the signal equipment required for the work. The Engineer advised that the reason given by the contractor for failure to complete this project within the specified time limit is correct and accordingly recommended that the extension requested be granted without penalty. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 1979, 2061, 2119, and 2124 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the

MAR 2 1939

above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 1979, with Roy L. Houck, for grading the Lamb Creek-Sheep Ridge Section of the Santiam Highway, in Linn County. Completed November 17, 1938.

Contract No. 2061, with R. I. Stuart & Sons, for furnishing crushed rock in stock piles for the Bandon-Port Orford Section of the Oregon Coast Highway, in Coos and Curry Counties. Completed November 27, 1938.

Contract No. 2119, with Fisher Brothers, for furnishing crushed rock for the Madras-Deschutes County Line Section of The Dalles-California Highway, in Jefferson County. Completed February 15, 1939.

Contract No. 2124, with A. S. Wallace, for furnishing crushed rock for the Lebanon-Foster Section of the Santiam Highway, in Linn County. Completed February 11, 1939.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Ida H. Frazier disposing of her claim against the State Highway Commission arising out of the construction of the Ontario underpass.

Agreement with Wauna Toll Bridge Company covering the matter of highway connection from the Bridge of the Gods to the Columbia River Highway at Cascade Locks.

Agreement with Bureau of Public Roads covering reimbursement for expense in supervising P.W.A. road projects on county roads.

Agreement with Maude Hastings Campbell disposing of her claim arising out of the construction of Union Avenue viaduct, Portland.

Agreement with the First National Bank of Portland and the Bridal Veil Timber Company providing for a hauling-road easement across certain property adjacent to the Upper Columbia River Highway, Multnomah County.

Agreement with Bridal Veil Timber Company covering settlement for right of way on revised location of the Columbia River Highway.

Agreement with O.W.R.R. & N. Company and Union Pacific Company covering the construction of a highway crossing and encroachment at Jamieson, Oregon.

Agreement with the City of Klamath Falls and the California-Oregon Power Company relative to changes in power lines, poles, and facilities in connection with Main Street Undercrossing Project in Klamath Falls.

Agreement with Union County Court covering maintenance and acquisition of right of way for the North Powder River County Road.

Agreement with Klamath County Court providing for maintenance and acquisition of right of way for the Poe Valley Section of the Malin-Bonanza County Road.

Agreement with Portland General Electric Company et al relative to form of permit releasing the power company and associated pole lines from liability with respect to fixtures which the state may attach to the company's poles.

Agreement with Frank Cornwell covering construction of an 8-inch tile drain leading from the state highway to Mr. Cornwell's property adjacent to Barbur Boulevard.

Confirm the signing of agreements with the Teachers Retirement Fund Association, Multnomah County, and Lewis C. Garrigus, Jr., and wife, providing for easements for Barbur Boulevard drainage tunnel in Portland.

Bargain and Sale Deed conveying 0.366 acre of land adjacent to Siuslaw Highway, Lane County, to A. J. McDonald and wife.

Bargain and Sale Deed conveying unto William J. Jacobs and wife 37,621 square feet of land situate in Irvington Addition to the city of Portland.

Bargain and Sale Deed conveying unto James S. Moore 40 acres of indemnity land situate in Grant County.

The Commission discussed the setting of a date for its next regular meeting to receive bids on highway construction projects, and decided to hold

MAR 2 1939

such meeting on Thursday and Friday, April 6 and 7, in Portland. The Secretary was instructed to make the usual arrangements for the use of the auditorium in the Public Service Building.

There being no further business to come before the Commission at this time, the meeting was adjourned at 3:00 o'clock p. m.

Robert M. ...
State Highway Engineer
H. B. Glaisyer
Secretary

Henry F. Cabell
Chairman
E. B. Aldrich
Commissioner
F. L. Tou Velle
Commissioner

Salem, Oregon, March 21, 1939

The State Highway Commission met in special session at 10:30 o'clock a. m. in the office of the State Highway Engineer, Room 325, State Office Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
F. L. Tou Velle, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of its meetings held on June 13, 14, and 15; June 29 and 30; July 20 and 21; August 3 and 4; August 9; August 30; September 19; September 28 and 29; October 20; November 14 to 18, inclusive; December 19 and 20, 1938; January 13; January 25, 26, and 27, 1939.

The Assistant Attorney entered a brief report on the right of way budget. He pointed out that said budget for 1939 contains an item of \$550,000 for acquisition of right of way and other real property, exclusive of state parks, and that to date he has received commitments totalling \$286,000. The Commission approved the report.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration the Commission approved the Engineer's request and by unanimous vote adopted the following resolution in regard thereto:

MAR 21 1939

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney requested authority to institute condemnation proceedings to acquire the following properties:

McEwan and Gates property needed as right of way for the Pacific Highway East, in Oregon City. He recommended an offer of \$11,000 for this property.

August Olson property needed as right of way for the Pacific Highway East, in Oregon City. He recommended an offer of \$9,500 for this property.

John Bastendorf property needed as right of way for the Charleston-Cape Arago Section of the Cape Arago Secondary Highway. He recommended payment of \$200 for this property.

After discussion, the Commission approved the offers recommended for such properties and by unanimous vote adopted the following resolution authorizing condemnation if they are refused:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

MAR 21 1939

Abernethy Bridge-Main Street Section of the Pacific Highway East

Charleston-Cape Arago Section of the Cape Arago Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

Abernethy Bridge-Main Street Section of the Pacific Highway East

5304-Gladys Gates McEwan and C. T. Gates
6489-August Olson

Charleston-Cape Arago Section of the Cape Arago Highway
6729-John Bastendorf Heirs

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I, H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be

paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Assistant Attorney reported results of his contact with the County Court of Clatsop County relative to the acquisition of county-owned land that is needed for right of way for the proposed Astor Street improvement of the Oregon Coast Highway, in Astoria. He advised that the County Court has stated a willingness to deed this property to the state provided the state, in turn, will deed back to the county the areas that lie outside of the standard width highway right of way, and provided, further, that the state will reimburse the county for the taxes that the county has paid to the state treasurer on the property that is taken for right of way. The Commission approved such arrangement by unanimous vote.

The Assistant Attorney brought up for discussion the advisability of acquiring the L. E. Dayton property at Grants Pass, a portion of which is needed as right of way for the proposed revision of the Pacific Highway just south of Grants Pass. He explained that Mr. Dayton owns land fronting on the present highway, on which he conducts a store business and that the relocated highway will take in most of this property. Mr. Dayton, he said, has a bona fide offer of a tenant who wishes a new building at this location, but Mr. Dayton does not want to erect this building if the Highway Commission expects to purchase the right of way in the near future. However, if the Highway Commission does not intend to buy this property in the near future, he will proceed with the erection of the building at once. The matter is an urgent one, he said, because if Mr. Dayton accepts the offer of his tenant the building will have to be completed by June 15. He estimated the value of Mr. Dayton's property at \$5,600 and advised that Mr. Dayton is demanding the sum of \$6,000 for the same. He recommended purchase of this property now in order to avoid condemnation at a later date and the extra cost to purchase the building. After discussion the Commission by unanimous vote approved the recommendation.

In this connection it was pointed out that it will not be necessary to move Mr. Dayton's store building in the near future because it will be some time before the Commission is able to reconstruct the highway. The Attorney was instructed to arrange for the lease of this building by Mr. Dayton until the land is needed for highway purposes.

The Attorney also reported briefly on the status of securing right of way options for the proposed improvement of the Pacific Highway West, through the town of Tigard. He said that the securing of options has been very

slow and that it will probably require another six weeks to complete the negotiations; however, present indications are that right of way along the northwesterly route, which is the favored route, will cost about \$95,000. He was instructed by the Commission to secure options from some of the principal property owners within the next week, which will give the Commission an idea as to how much it will have to pay for all of the right of way, and will help the Commission in deciding the permanent route. He was also instructed to consult Mr. Thomas Tongue, Jr., Hillsboro, in regard thereto, and to inform Mr. Tongue that the Commission cannot seriously consider the northwesterly route for this highway unless the right of way for the same can be secured at reasonable expense.

The Engineer reported receipt of objections from the Bureau of Public Roads as to the alignment of the Heppner-Rhea Creek Section of the Wasco-Heppner Secondary State Highway, which the Commission plans to improve this summer. It appears that the alignment of the present road over the hill just out of Heppner is very crooked and in the opinion of the District Engineer of the Bureau of Public Roads should be improved. The Engineer advised that the moneys budgeted for this project are sufficient only to reconstruct a 5-mile section rather than the entire distance between Heppner and Rhea Creek, using the present alignment, and that the mileage would have to be shortened considerably if the Commission undertook to revise the alignment in accordance with the ideas of the Bureau of Public Roads. It was his thought that such an improvement would not be justified in view of the small amount of traffic that the road carries. The Commission concurred in the Engineer's viewpoint and instructed him to discuss the matter further with the Bureau officials.

The Attorney brought up for reconsideration the offer of Mr. Thomas Purdy, of Yachats, to either purchase or lease a small parcel of state-owned land situate adjacent to the Oregon Coast Highway at Bob Creek, in Lincoln County. He recalled that this matter has been before the Commission on two previous occasions when the Commission refused to either sell or lease the property to Mr. Purdy; but, he said, Mr. Purdy is quite insistent about the matter because he needs the extra area in connection with his service station and restaurant business and has now stated his willingness to deed to the state a strip of land for widening the highway right of way across his holdings if the state will deed to him the property that he needs. The Engineer advised that it would be necessary to acquire a 10-foot strip on each side of the present right of way in order to bring it to a standard uniform width. He recommended acceptance of Mr. Purdy's offer if he will deed such strips to the state. After further discussion the Commission instructed the Attorney to negotiate with Mr. Purdy for sufficient land to provide right of way 100 feet wide. Chairman Cabell volunteered to inspect the premises the next time he is in that vicinity, which he thought would be during the last week in May.

The Commission reconsidered the controversy with Mrs. Ida B. Hadley arising out of the reconstruction of the Pacific Highway West in front of her property near Newberg, but deferred final decision thereon pending further study by the Attorney. The Attorney was instructed to make a detailed review of the entire matter and report to the Commission at its next meeting.

The Secretary reported receipt of a letter from Mr. Lewis A. McArthur, Secretary of the Oregon Geographic Board, recommending the granting of the request of Mrs. Jennie Reeher, Forest Grove, that the bridge over the Wilson River on the Wilson River Highway, near the old Reeher homestead, be named "Reeher Bridge" in honor of the Reeher family, who were pioneers of this district. The Commission approved Mr. McArthur's recommendation by unanimous vote and instructed the Engineer to attach an appropriate plaque on this structure.

The matter of acquiring right of way for the proposed revision of the Umpqua Highway at the eastern city limits of Reedsport had the attention of the Commission. The Attorney presented an offer from the Umpqua Corporation to sell for the sum of \$3000 17½ acres of its property that is needed for this improvement, and recommended acceptance of the same now, so as to avoid complications later, it appearing that the company has plans for the immediate use of this land. In the discussion that followed it was pointed out that before the Commission can make this proposed change in the highway it will be necessary to hold a public hearing in Reedsport, as is required by law. The Commission by unanimous vote approved the amount of the Umpqua Corporation's offer but instructed the Attorney not to close the deal until such hearing has been held. The setting of a date for such hearing was deferred until the April 6th meeting.

The Secretary presented a letter from the State Capitol Reconstruction Commission requesting relief from the payment of its account with the Highway Commission for the cost of testing materials and furnishing prints for the use of the Capitol Commission, totaling \$127.98. The Engineer advised that the past policy of the Highway Commission, which is of long standing, has been to require other state departments to pay for services rendered. The Commission considered this policy sound and thereupon denied the request.

The Commission considered but deferred until its meeting on April 6 the setting of a date for a public hearing in Bend relative to the rerouting of Century Drive Secondary Highway in that city.

The Engineer requested authority to purchase the following equipment:

Equipment for Wolf Creek Highway

- | | |
|--|----------|
| 2 - large motor patrol graders suitable for construction work,
2 old graders to be traded in. Estimated net cost \$5,200
each, or a total of | \$10,400 |
| 6 - 4-yd. trucks, 6 old trucks to be traded in. Estimated
net cost \$3,600 each, or a total of | 21,600 |
| 1 - 12-yd. carry-all, an outright purchase. Estimated cost | 4,200 |
| 1 - RD8 tractor, an old tractor to be traded in. Estimated
net cost | 7,500 |

(Continued on next page)

MAR 21 1939

(Purchase of equipment for Wolf Creek Highway continued)

Brought forward \$43,700

- 1 - crushing plant, including a recrusher, vibrating screen and power unit, an outright purchase. Estimated cost 12,000

Estimated net total cost of equipment for Wolf Creek Highway \$55,700

Equipment for maintenance work

- 10 - power graders of the single-drive class, 10 old obsolete graders to be traded in. Estimated net cost, \$4000 each, or a total of \$40,000

- 10 - pull-type graders, 10 old pull-type graders to be traded in. Estimated net cost \$1000 each or a total of 10,000

Estimated net total cost of equipment for maintenance work \$50,000

After careful consideration the Commission by unanimous vote approved the purchase of such equipment through the State Purchasing Agent, in accordance with the usual practice. However, the Engineer was instructed to prepare the specifications for the tractor that is to be used on the Wolf Creek Highway so as to include the Cletrac Tractor as well as the RD8 Tractor.

The Engineer also requested authority to purchase one accounting machine for use in connection with the new accounting system that has been installed in the state highway shops at Salem. He presented quotations for 4 different machines; namely, Burroughs, at \$1,788.30; Sundstrand, at \$1,557.00; Monroe, at \$1,678.50; and National, at \$1,862.00, and recommended purchase of the Burroughs machine at \$1,788.30, it being the cheapest of the machines that are in common use under comparable conditions. The Commission approved the recommendation unanimously.

The Engineer reported the necessity to post the Prairie City-Unity Section of the John Day Highway for 50 per cent reduced load limit and recommended the adoption of an order to that effect. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the following road or highway has been designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to wit:

JOHN DAY HIGHWAY

AND WHEREAS, the said above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind

MAR 21 1939

and character of traffic which is damaging and injuring the said highway, and, in order to protect said highway against such damage and injury, it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced;

NCW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having, as a result of due investigation, found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road; and, by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging, and deteriorating the said road,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highway, to wit:

JOHN DAY HIGHWAY from Prairie City, in Grant County, to Unity, in Baker County,

shall be as follows: the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Chapter 360 of the laws of Oregon for 1931, shall be in full force and effect until modified, annulled, or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important crossroads on said highway so that said notice can be readily seen and read, which said notice shall state plainly the

MAR 21 1939

limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the County Clerk of each county in which any part of said highway is located, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

The Engineer also reported that the reduced load limit heretofore in effect on the following highways: The Dalles-California Highway, between Bend and its junction with the Fremont Highway, Central Oregon Highway from Bend to Burns, Fremont Highway from Silver Lake to Lakeview, Lakeview-Burns Highway from Valley Falls to its junction with the Central Oregon Highway, are no longer required because these sections are sufficiently dried out and stabilized to carry legal limit loads. He recommended the lifting of the reduced load limits on these sections. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 2nd day of March, 1939, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted resolutions reducing the maximum load limit on the following state highways:

CENTRAL OREGON HIGHWAY from Bend, in Deschutes County, to Burns, in Harney County;

FREMONT HIGHWAY from Silver Lake to Lakeview, in Lake County;

LAKEVIEW-BURNS HIGHWAY from Valley Falls, in Lake County, to the junction with the Central Oregon Highway, in Harney County;

THE DALLES-CALIFORNIA HIGHWAY from Bend, in Deschutes County, to Klamath Falls, in Klamath County;

AND

WHEREAS, subsequent to the passage of said resolutions conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limits set out in said resolutions on the said state highways;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

CENTRAL OREGON HIGHWAY from Bend, in Deschutes County, to Burns, in Harney County;

MAR 21 1939

FREMONT HIGHWAY from Silver Lake to Lakeview, in Lake County;

LAKEVIEW-BURNS HIGHWAY from Valley Falls, in Lake County, to the junction with the Central Oregon Highway, in Harney County;

and on that portion of

THE DALLES-CALIFORNIA HIGHWAY from Bend to the junction with the Fremont Highway, in Deschutes County (from said last-named point to Klamath Falls, in Klamath County, the load limit as fixed in said former resolution shall remain in full force and effect until removed by order of the State Highway Commission);

shall be and the same is hereby rescinded and cancelled as of this date, and the maximum load limit permissible on the said sections of the said highways hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which said highways are located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Engineer reported that, in conformance with authority previously given him by the Commission, he awarded to the Mountain States Construction Company, on March 15, the contract for the construction of the Noyes Ranch-Cove Section of Cove Secondary Highway, in Union County, bids for which were received by the Commission on March 2, 1939, that of the Mountain States Construction Company being low. The conditions of the award, he said, have been satisfied. The Commission by unanimous vote confirmed the award of this contract, as reported by the Engineer.

The Commission considered, and deferred for decision at its meeting on April 6, the matter of sending a representative to the Fifth Pacific Northwest Regional Planning Conference at Seattle, Washington, on April 27, 28, and 29, 1939.

The matter of revising the penalty for the overloading of trucks by log haulers, in view of the passage of House Bill No. 542 by the Oregon Legislature, just adjourned, had the attention of the Commission. The Commission decided to hold a conference on this subject before its next meeting on April 6 and instructed the Engineer to arrange for the same and to invite State Senators George H. Chaney, F. M. Franciscovich and U. S. Balentine, Public Utilities Commissioner N. G. Wallace, Superintendent of State Police Charles P. Pray, and other interested persons to be present at such conference.

MAR 21 1939

The Commission considered and denied a request from the Free Methodist Church of Hillsboro, to erect and maintain a sign on the Tualatin Valley Highway in Hillsboro indicating the location of that church.

Reconsideration was given by the Commission to the matter of instituting an appeal to the Supreme Court on the decision of the trial judge in the case of certain laborers against contractor Charles H. Leonard, arising out of the contract for the construction of the Brooks-Jordan Creek Section of the Wilson River Highway, in Tillamook County. The Engineer was instructed to contact Mr. Leonard and also the local chapter of the Associated General Contractors and ascertain their attitude with respect thereto, the Commission being reluctant to make such appeal unless it receives the cooperation of the contractor and the contractor's association.

The Commission adjourned at 12:40 o'clock p. m. and reconvened at 2:00 o'clock p. m. in the same room, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

A letter was presented from the Honorable Lyle D. Thomas, Representative from Polk County, requesting on behalf of Polk County citizens the redesignation of the Dallas-Coast Secondary Highway as a primary state highway, because they are of the belief that such designation will expedite the improvement of this road. The Commission denied the request in view of the fact that the mileage of secondary highways in Polk County is now excessive compared to the other counties of the state and the improvement of the road would not be expedited by such change. Furthermore, if the change were made, it would very likely establish an embarrassing precedent. The Engineer was instructed to call on Mr. Thomas, whose home is in West Salem, and explain the circumstances to him in person.

The Commission considered and ordered filed a letter from George Bidwell, Brightwaters, N. Y., urging the Commission to give consideration in its future deliberations to the construction of bicycle paths along state highway rights of way.

A letter was presented from the City of La Grande pointing out that Adams Avenue in that city, which is their main business street, is a state highway route, and requesting the Commission to assume the responsibility for the painting of automobile parking lanes thereon through the business district. The Engineer explained that it is the practice of the Highway Department at the present time to paint the parking lines in the first instance for the parking of cars parallel to the curb, so as to help the cities in establishing such method of parking, but the state has not assumed any responsibility for the repainting of such lines nor for the painting of lines for angular parking, it being considered that such responsibility rightly belongs to the cities. In the discussion of this matter the Commission considered the advisability of changing this practice and finally decided not only to paint the stripes at state expense in the first instance, but to repaint them at state expense thereafter, as occasion requires, provided the cities will comply with the state's requirements and will permit the painting of the areas for the parking of cars parallel with the curb. The Secretary was instructed to so inform the City of La Grande.

The Commission also considered a request from the City of Junction City for permission to paint stripes on 6th Street, the route of the Junction City-Eugene Secondary State Highway, through the business section of their town, for the angular parking of cars against the curb. The Engineer was instructed to inform the city officials of the Commission's new policy with respect to the painting of parking stripes and to advise the city that the state will assume the obligation of painting these stripes and will maintain them hereafter if the city will agree to the parking of cars parallel with the curb.

The Secretary presented a letter from P.A. Gent, Route 1, Eugene, requesting that the county road which connects the Pacific Highway and the Junction City-Eugene Secondary State Highway and passes through the towns of Irving and Santa Clara be named "Gent Drive, Avenue, Lane or Road", as preferred, and that appropriate signs be erected at each end thereof directing traffic to the Irving and Santa Clara districts. The Commission decided, inasmuch as the road under discussion is a county road, that the naming of the same is a function of the Lane County Court, which has jurisdiction, and instructed the Secretary to so inform Mr. Gent. The Engineer was instructed to investigate the matter of erecting signs pointing out Santa Clara and Irving and to erect such signs if it is in line with the Commission's policy with respect to such matters.

The Commission considered and referred to the Engineer for investigation and report letters from W. L. Grigsby, Newport, and Ce Lesta Knowles, Seal Rocks, protesting the removal of agate-bearing gravel from Oregon beaches.

The Commission discussed a letter from County Judge J. H. Allen, of Grant County, who inquires whether or not there is any possibility of Grant County securing federal funds to finance the improvement of feeder roads in that county, particularly roads connecting state highways with forest roads. He asked particularly whether or not it would be possible for the county to secure such funds for the improvement of the Monument-Long Creek County Road. The Commission decided that if the county wants to contribute county funds to augment state funds on some project in Grant County that is supervised by the state, that would be satisfactory, because it would provide a bigger project. However, in view of the fact that the program for 1940 Federal Aid Secondary Highway Funds has not yet been prepared and the amount of such funds that is to be spent in Grant County is not yet known, a definite reply cannot be given to Judge Allen at this time. The Commission decided to discuss the matter with him in person on Thursday of the following week when the Commission expects to be in Canyon City. The Secretary was instructed to so inform Mr. Allen.

A letter was presented from the Waldport City Council requesting the services of one of the State Highway Department engineers to act as consultant in a controversy between the city and the contractor who is making street improvements in that town. The Commission approved the request unanimously.

The Secretary presented a letter from Mr. C. D. Long, Business Representative, Klamath Falls Building Trades Council, requesting a conference with the Commission for discussion of matters pertaining to the establishment of basic wage rates for men employed on state highway construction work. He was instructed to invite Mr. Long to be present at the next regular meeting of the Commission, which is to be held in Portland on Thursday, April 6. In this connection the Commission considered the advisability of adopting a minimum wage

schedule which has been agreed upon by the American Federation of Labor and some of the contractors who are members of the contractors' association. The Engineer was instructed to ascertain what action has been taken by the highway departments of the adjoining states relative to such matter and report the same to Chairman Cabell, who was given full power to act for the Commission in this regard by Commissioners Aldrich and Tou Valle.

The Commission considered and denied the request of citizens of Malin, Klamath County, that The Dalles-California Highway from its junction with the Hatfield Secondary Highway, in Klamath County, to the California State line be designated as State Route No. 39 E, and that the Hatfield Secondary Highway from its junction with The Dalles-California Highway to the California State line be designated as State Route No 39 W, it being considered by the Commission that such numbering of alternate routes is undesirable from the traveling public's standpoint.

The Commission considered and ordered filed a letter from the Federation of Community Clubs of Multnomah County, requesting that lighting facilities similar to those that the Commission contemplates installing on Interstate Avenue, in Portland, be installed on Sandy Boulevard from Burnside Street to East 82nd Street, it being the thought of the Commission that it should dispose of the Interstate Avenue lighting project before it considers any other lighting project in Portland.

The Secretary presented a resolution adopted by the Redmond Kiwanis Club, the Redmond Chamber of Commerce, and bearing the signature of Ernest C. Parker, Mayor of Redmond, calling to the Commission's attention a dangerous condition which exists at the grade crossing of the Spokane, Portland and Seattle Railroad with the Ochoco Highway in Redmond, and urging the installation of a suitable and adequate signal system to warn automobile traffic approaching such crossing. The Secretary was instructed to inform the petitioners that the Commission has this project in mind and will give it due consideration in the formulation of its program for projects of this nature.

A letter was presented from the County Court of Hood River County requesting sidewalk construction along the Columbia River Highway from the town of Hood River to the Columbia River Gorge Hotel for the benefit of the many pedestrians residing in this vicinity. The letter was referred to the Engineer for investigation and report. He was particularly instructed to ascertain whether or not the American Association of State Highway Officials has rules and regulations covering matters of this kind.

The Engineer requested instructions relative to the oiling of the shoulders adjacent to the Pacific Highway through the town of West Linn. He recalled that he reported to the Commission on June 29, 1938, that such oiling work would cost approximately \$10,000 and that the Commission at that time disapproved the improvement because of lack of funds to finance it, but instructed him to keep the project in mind for consideration in the 1939 budget. The Commission ordered this project included with others for consideration in the formulation of the next program.

Similar action was taken by the Commission on the request of the City of Sheridan for the improvement of the McMinnville-Tillamook Highway through that city.

The Commission discussed the matter of opening the Wolf Creek Highway between Sunset Camp and Elsie for general public use. The Engineer advised that recent inspection of this road by Chairman Cabell and himself reveals that the first 4 miles west of Sunset Camp could be opened for travel by June 1, but the rest of the section probably cannot be opened until July 1 on account of slides that have occurred during the winter. The Commission approved the report and ordered that this information be given to the press because there are so many people who are anxiously awaiting the opening of this road.

The Engineer presented an offer from Braley and Graham, Inc., agents for the Buick automobile, Portland, to accept the Commission's 7-passenger Buick, 1936 model, as partial payment on Mr. Braley's personal 7-passenger Buick, 1938 model, which has been driven only 7,500 miles, and is in excellent condition. The Commission unanimously refused the offer, it being considered advisable to adhere to its present policy of purchasing new cars on a competitive bid basis.

The Commission discussed a letter from Mr. T. B. Watters, Chairman of the Highway Committee, Klamath Falls Chamber of Commerce, urging the reconstruction of a short section of the Klamath Falls-Lakeview Highway near the town of Dairy. The Engineer estimated the cost of this project at \$21,000. He pointed out that the Klamath Falls-Lakeview Highway is not a federal aid highway, so that, if the Commission decided to make this improvement, it would have to be financed entirely with state funds, of which, he said, there is a shortage at the present time. The question arose as to whether or not the Klamath Falls Chamber of Commerce would prefer this project to one of the others that are planned for the Klamath Falls district. After discussion, it was decided to talk this matter over with Mr. Watters, in person, when the Commission visits Klamath Falls on Wednesday, March 29. The Engineer was instructed to arrange a conference with Mr. Watters at that time.

The Engineer reported on the investigation that has been made of the complaint of County Commissioner William Baer, of Deschutes County, that a dangerous condition exists at the junction of the Tumalo-Deschutes Secondary Highway with The Dalles-California Highway north of Bend. He advised that such investigation reveals that the sight distance for traffic entering The Dalles-California Highway at this point is about 450 feet, which, in his estimation, is ample, particularly in view of the fact that very little traffic enters The Dalles-California Highway from this road. He further advised that the State Police Department has no record of any accident ever having occurred at this intersection. He estimated that it would cost about \$1000 to widen the highway at this point up to the right of way line. The Commission deferred its decision in this matter pending personal inspection of the project the next time it is in that vicinity.

MAR 21 1939

The Commission discussed a letter from Mr. J. L. Soule, Baker, Oregon, complaining that many traffic law violations are being committed on state highways in the vicinity of Baker by public carriers without any attention being paid to them by the state police officers, and as a result the carriers who do respect the law and comply with the rules and regulations are losing considerable business and revenue. He urged the Commission to make every effort to secure the conviction of the offenders. The Secretary was instructed to thank Mr. Soule for his interest in this matter and to advise him that the State Highway Commission does not have the necessary law enforcement facilities to correct this condition of which he complains.

The Commission discussed the advisability of naming one of the state parks in honor of Mr. H. B. Van Duser, Portland, former Chairman of the State Highway Commission. It seemed to the Commission that this would be a fitting way of honoring Mr. Van Duser and of recognizing the public service that he has heretofore rendered the state. The matter was referred to the State Parks Superintendent for suggestions.

The Commission discussed and referred to the Engineer a letter from Mr. L. C. Sanford, Newport, in which objection is offered to the solution heretofore recommended by the Commission for the disposal of his request for sidewalk construction along the Oregon Coast Highway in front of his premises in Newport, and for the utilization of the extra-width right of way at this location. The Commission gave the Engineer full power to act in this matter.

The Commission discussed at some length matters pertaining to the granting of right of access to the new highway up the Columbia River Gorge, and particularly letters from certain property owners who desire such right of access to this new highway. After discussion, the Commission reaffirmed its original decision to allow such rights of access only at a very limited number of places, because, in its opinion, the communities along this road are now served with adequate transportation facilities and the Commission is of the firm belief that the new highway should be built as a fast trunk route and its use as such should not be impaired by local roads entering it or crossing it at grade.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Acquisition of an addition to the Devils Elbow State Park at Heceta Head, in Lane County:- The Parks Superintendent recalled that the Commission at a previous meeting authorized acquisition of 58 acres at this location from Mr. Rufus C. Stonefield, but such tract does not entirely protect the state's interests at the north end of Cape Creek Bridge. To provide such protection, he said, would necessitate the acquisition of additional land from Mr. Stonefield, which he is willing to deed to the state if the state in turn will relinquish to him a small portion of the 58-acre tract that is not particularly needed for the park. He recommended such substitution of tracts as an advantage to the state. The Commission approved the same unanimously.

In this connection, the Parks Superintendent reported that a Mr.

MAR 21 1939

Eugene O. Hayward, of Astoria, owns 2.6 acres at this location that are entirely surrounded by the state park and that Mr. Hayward has agreed to sell the tract to the state for the sum of \$800, which he considers exorbitant. He strongly recommended purchase of the area but at a lesser figure. After discussion, the Commission decided to purchase the area and instructed the Attorney to condemn it if Mr. Hayward will not sell it for less than \$800.

Addition to Cape Lookout State Park, in Tillamook County:- The Parks Superintendent requested authority to purchase from the Crown Willamette Company a tract containing 119 acres in Section 36, T.2 S., R. 11 W., W. M. being an intervening area between two units of the present state park at this location. He advised that the tract is needed to complete the present park, and that the company is asking the sum of \$3,750 for the tract, based on timber stumpage at \$1.00 per M-FEM for hemlock, and \$3.00 per M-FEM for spruce and cedar, and \$56.00 for the land. He explained that the original park is a primitive area and that it is his intention to develop it as such, limiting access to it by trail only; but he must have the additional land in order to do so and to confine the trails to public property; also, that such development work must be completed within five years. Otherwise, the original park, consisting of 900 acres, will revert to the Federal Government, from which it was acquired. The Commission indicated a favorable attitude toward the purchase of this property but deferred a definite decision pending further negotiations with the owners to ascertain whether or not they will reduce their price for the spruce timber, it being the thought of the Commission that \$3.00 per M-FEM is too much to pay for such stumpage.

Request for permission to operate a crab pot in Silver Falls State Park:- The Parks Superintendent reported receipt of an application from L. E. Inman, Silverton, to maintain and operate a crab-cooking pot in this park. He gave as his thought that such facility is not essential for the public's enjoyment of the park and recommended denial of the request. The Commission approved the recommendation.

Continuance of C.C.C. camp in Jessie M. Honeyman State Park:- The Parks Superintendent advised that he has been in communication with the National Parks Service relative to the continuation of this C.C.C. camp, and, as a result, has been assured that a recommendation will be forwarded to Washington, D. C., this fall that this camp and others in Oregon be authorized for another period, provided there is special justification for the same. In order to justify these camps, he said, the National Parks Service must be furnished, among other things, with a financial statement to show the source and amount of funds that are to be used for park maintenance. After discussion, the Commission approved the report and instructed the Parks Superintendent to furnish such information, in view of the fact that Jessie M. Honeyman State Park in particular is an important one and it is highly desirable that the development work therein be carried on to completion at the earliest possible time.

Granting of grazing rights in Humbug State Park, Curry County:- The Parks Superintendent advised that for several years past sheepowners have been allowed to graze their sheep in this park without charge, but recently he has

been approached by several persons who want this privilege exclusively. He recommended, in order to be able to control the grazing and to avoid an embarrassing situation, the granting of such privilege to stipulated sheepowners upon the payment of a fee. The Commission approved the recommendation unanimously; however, cautioned the Parks Superintendent not to show any favoritism in the granting of the privilege.

Azalea State Park, in Curry County:- The Parks Superintendent recalled that the Commission at the previous meeting authorized the purchase of an addition to this park for the lump sum of \$329, \$289 of which amount represents the cost of the land at \$100 per acre, and the balance the cost of a survey of the tract that was made by the previous owner, Brookings Land and Townsite Company, for a prospective purchaser. It now develops, he said, that the company has included in the description 0.39 acre of the adjacent county road, but the owner insists upon the payment of the full amount previously agreed upon notwithstanding that the state is getting less land than it bargained for. He inquired whether or not he should pay the \$329 or should deduct therefrom \$39, representing the difference between the cost of 2.5 acres and 2.89 acres at the agreed unit price of \$100 per acre. He was instructed by the Commission to negotiate further with the owner in an endeavor to secure a reduction in the total amount.

Acquisition of property at the north end of the proposed bridge over Nehalem Bay, in Tillamook County:- The Parks Superintendent reported that he has obtained from Tillamook County practically all of the county-owned property on Nehalem Bay sandspit, but it has recently come to his attention that private parties are negotiating for the purchase of some land owned by the Hammond Lumber Company and M. L. White which it appears is needed as right of way for the approach to the proposed bridge across Nehalem Bay. This land, he said, has been acquired by the county under foreclosure proceedings for non-payment of taxes and he believed that he could acquire it from the county at reasonable cost if the Commission would authorize him to negotiate for the same. He recommended, therefore, the securing of options from the county. The Commission approved the recommendation unanimously.

The Commission had under discussion the request of contractor Carl Bahlburg for an extension of time from February 16 to February 24, 1939, within which to complete his contract for the construction of a car storage building at the state highway shops in Salem, being Contract No. 2132. Mr. Bahlburg advised that the contract was completed except for some outside painting work which could not be done until the weather was suitable. The Engineer advised that the reason given by the contractor for failure to complete the job within the specified time limit is correct; further, that with the exception of the exterior painting, all work was completed on January 21 and the building has been in use since that date. He recommended that the extension requested be granted without penalty. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2132 and 2150, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are

MAR 21 1939

now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2132, with Carl Bahlburg, for construction of a frame storage building at the east city limits of Salem. Completed February 24, 1939.

Contract No. 2150, with Clifton & Applegate, for furnishing crushed rock and crushed gravel for the Gilliam County Line-lone and Hermiston projects, in Morrow and Umatilla Counties. Completed March 14, 1939.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Southern Pacific Company relative to the maintenance of a rock wall on the railroad company's property adjacent to the Pacific Highway, near Comstock, in Douglas County.

Supplemental agreement with the O.W.R.R. & N. Company and the Union Pacific Railroad Company covering easement for the reconstruction of the Columbia River Highway between Troutdale and Warrendale, in Multnomah County.

Agreement with the Preston Company, whereby the Highway Commission grants to the company an easement for a roadway across the state park located in the S.E. $\frac{1}{4}$ of the S.E. $\frac{1}{2}$ of Section 6, T. 3 N., R. 10 W., W.M., Tillamook County.

Lease running from the State of Oregon to Hood River County covering quarry privileges in a rock quarry acquired by the state from Joseph D. Smullin.

Bargain and Sale Deed conveying unto Maud H. Campbell a small parcel of land lying in Lots 1 and 2 of Block 4, Stephens Addition to the City of Portland, as per agreement dated March 3, 1939, being Right of Way Transaction Nos. 2910 and 3282.

MAR 21 1939

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:30 o'clock p. m.

TABLE OF CONTENTS

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1939	
8748	Apr. 5	Log hauling. Conference relative to adoption of rules for disciplining log haulers for transporting overweight loads. Rules and regulations adopted.
8750		State police officers to differentiate between road types. Saturday afternoon hauling in Klamath County requested. Action deferred pending investigation.
		Pacific Highway West. Payment of additional sum of \$250 to Mrs. Ida B. Hadley for damage to her property approved.
8751		Wage rates. Revising schedule for labor employed on construction work discussed. Action deferred.
		Payment of \$1.00 per day for subsistence to hourly-rate employees on oiling, paving and striping crews approved.
		Tigard. Attorney to expedite matter of securing options for right of way for revision of Pacific Highway West.
8752		Pole line. Commission refuses to change ruling regarding location of poles of West Coast Power Company across state park acquired from Pratt interests at Lincoln-Lane County line.
	Apr. 6	Bids received on following projects:
8753		Eagle Creek-Wade Corner Section, grading, surfacing, oiling; Bunker Hill Section, grading and paving; Jericho Lane-Bloucher Section, grading, surfacing and oiling; Poe Valley Section, grading and surfacing; East Unit, Rhea Creek-Heppner Section, grading, surfacing and oiling;
8754		Falls City-Fern Corner Section, surfacing and oiling; Sale of building in Salem.
		Coos River Secondary Highway. Oiling between Eastside and Engren Ferry requested. Action deferred.
		Wilson River Highway. Gift of roadside strips near Glenwood from Consolidated Timber Company accepted.
		Lane County. Gift of 2-acre tract adjacent to Oregon Coast Highway, near China Creek, from J. C. Ponsler accepted.
		Cape Lookout State Park. Crown Willamette Company reduces price on property. Action deferred.
8755		Van Duzer Forest Corridor. Timber strips along Salmon River Highway named "Henry B. Van Duzer Forest Corridor".
		Fireguard station. Buildings to be erected within limits of Salmon River Highway timber strips by State Forester.
		Casey State Park. Mrs. Vern Van Dyke refuses to sell cabin and vacate park premises.
		Nehalem Sandspit. Purchase of 65.5 acres from Hammond Lumber Company approved. State to pay accumulated unpaid taxes.
8756		Devils Elbow State Park at Heceta Head. Settlement with Mr. and Mrs. Stonefield for purchase of 61-acre tract approved.
		Exchange of properties with Mr. and Mrs. Stonefield at north end of Cape Creek Bridge approved.
		Heceta Head. Purchase of small tract along Oregon Coast Highway from Eugene O. Hayward approved.

9005		Portland. Metropolitan Association requests reconstruction of Front Street as arterial route.
9006		Ocean beach. "No Motoring Beyond This Point" signs to be erected on beach between Newport and Agate Beach.
		Relief map. Acceptance of offer of Pacific Topographic Service to furnish scale relief map of Oregon deferred.
9007		Awards. Commission announces awards on projects for which bids were received during morning session. (See page 8978)
		Tillamook County. Loan of services of engineer requested by county to set line and grade stakes for county road extending from Oregon Coast Highway up Cook Creek.

Page Date

1939

Subject

9008 July 27

Lafayette Secondary Highway. Request for oiling of section from Amity Junction to Schroeder's place. Work to be done within next month.

Yamhill County. Designation requested, as state secondary highway, of county road extending from Lafayette Secondary Highway to point $1\frac{1}{2}$ miles south of Threemile Lane Secondary Highway.

Coos County. West Coast Power Company requests lease of state property in corner of park at north end of Coos Bay Bridge for substation site.

Columbia and Washington Counties. Delegation requests designation, as state secondary highway, of county road extending from Treharne to Sunset Camp.

9009

Wolf Creek Highway. Mr. & Mrs. L. Siegenthaler confer regarding settlement for right of way across their property.

Wolf Creek Highway. Edwin C. Gerber's contract for surfacing Necanicum-Nehalem River Section to be turned over to surety on bond for completion unless satisfactory progress shown.

9010

Group insurance. Oregon Mutual Life Insurance Company's plan for group insurance to highway department employees considered.

Tigard. Pacific Highway West. Construction of passage-way under railroad grade separation structure considered.

Forestry Department. Blanket authority to be granted Forestry Department for use of ocean beaches in Curry County as landing fields for department airplanes.

Seaside. Engineer to investigate situation at Seaside where beach is used for airplane landing field.

Wolf Creek Highway. Payment of \$3,500 for non-labor items for August authorized.

9011

Oregon City. Pacific Highway East. Request that new highway be opened between 14th and 5th Streets during Territorial Days Celebration, August 17 to 19, denied.

Date for next meeting set for August 31 and September 1, 1939.

Siuslaw Highway. Inspection to be made August 17, 1939.

Date for special meeting in Salem set for August 18, 1939.

Agreements, et cetera, signed as follows:

Jackson County, improvement of Butte Falls County Road;
Jackson County, maintenance of Butte Falls County Road;
Southern Pacific Company, easement for railroad encroachment near Shady Point south of Roseburg;

Leonard and Slate, extending contract for free ferry service across Willamette River at Wilsonville;

Union Pacific Company, construction of Troutdale-Corbett and Bridal Veil-Benson Park Sections, particularly railroad crossing at Corbett;

9012

A. A. Godwin, lease of state-owned property in Josephine Co.;
Southern Pacific Company, right to construct, operate, and maintain railroad wye track and appurtenances in Albany;
Bargain and sale deed conveying unto Hood River County land situate in Hood River County.

Portland, Oregon, April 5, 1939

The State Highway Commission met in regular session at 2:00 o'clock p. m. in Room 204, Benson Hotel, Portland. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission conferred with a delegation consisting of members of the legislature and representatives of the Public Utilities Commissioner, Department of State Police, and the logging industry, relative to the establishment of rules and regulations for the disciplining of log haulers who have been arrested for transporting over state highways loads weighing in excess of the weight limits specified in House Bill No. 542, which was enacted into law by the 1939 legislature, and which authorizes a 10 per cent tolerance on truck loads. Members of the delegation were State Senators F. M. Francisco-vich, Astoria, and U. S. Balentine, Klamath Falls; A. F. Harvey, representing the Public Utilities Commissioner; H. G. Maison, Deputy Superintendent of State Police; County Commissioners James Elliott and John Slotte, of Clatsop County; and Messrs. George Gray, M. L. Johnson, and L. A. Christenson, log haulers; and others; there being 22 in the delegation.

Chairman Cabell opened the discussion by explaining the purpose of the conference. He stated that the Highway Commission some time ago found it necessary, in order to protect the highways from severe damage by logging trucks, to promulgate rules and regulations for the disciplining of log haulers who transported excessive-weight loads, inasmuch as satisfactory results were not being secured by the arrest of the operators and the imposition of fines. Such rules, he said, provided for the arresting and fining of the violator if the weight of the load exceeded the statutory weight limit, and provided also an additional penalty if the weight exceeded the statutory axle-weight limit by more than 1500 pounds. He pointed out that the 1939 legislature enacted a new law which provided for a 10 per cent tolerance, because of the difficulty in weighing loads of logs at the loading point. It was his thought that if the operators will honestly endeavor to load their trucks so as not to exceed the axle-weight limit, the probabilities are that the 10 per cent tolerance will not be exceeded. The Highway Commission, he added, has given this matter considerable thought and has decided that an operator who is found to be transporting a load weighing in excess of the legal weight limit plus the 10 per cent tolerance, no matter how small the overload, should be arrested and required to pay such fine as the courts may prescribe, and should also be subject to an additional penalty yet to be determined.

He advised that the Commission has also given considerable thought to the matter of trucking logs out of a new timber district where the weight of timber has not been ascertained. In cases of this kind, he said, the Commission has it in mind to let the operators haul several loads to the nearest

APR 5 1939

scales, without fear of arrest for overloading, in order to determine approximately the unit weight of the timber from that particular district; but advance arrangements must be made with the state police for the weighing of such trial loads, and the operator must make an honest effort to load within the legal requirements. After the unit weight of the timber has been determined, he added, the operators will be arrested and fined for overloads in any amount. He then invited the members of the delegation to express themselves in regard to this subject.

Senator Franciscovich stated that the arrangement outlined by Chairman Cabell is considerably more lenient than that the log haulers had in mind; in fact, they are not asking for as much leeway as they would be given if this arrangement were carried out. It was his thought that the method of procedure for disciplining the log haulers heretofore in effect is quite fair with the exception that the arrests are made for overloads based upon axle weight, whereas, in his opinion, the overloads should have been based upon gross weight; also, that the penalty for the first violation should be the suspension of the equipment involved in the overload for a period of 5 days; for a second offense, 10 days; and for a third offense 15 days, rather than the present penalty of 10, 20, and 30 days for these offenses. He explained that the operators are pretty well able to tell by log scale the weight of the logs in the woods but it is extremely difficult to estimate the axle-weight after the logs have been loaded, and particularly as to whether or not the 10 per cent tolerance will be exceeded. He heartily approved the Chairman's suggestion of transporting a number of trial loads to determine the average weight of timber from new districts. However, he stressed the importance of notifying the state police in advance of such trial movements; otherwise, he said, every operator would endeavor to justify an overload from a new district by saying that it was a load to determine the average weight of timber from that district. He urged the Commission to modify its present rules by providing that the operation of the extreme penalty of suspension or cancellation of permit shall be based on gross weight rather than on axle weight, and advised that such modification will meet with the loggers' approval, at least those operating in the Clatsop County district, the same as if the weight of the logs were determined by log scale.

Chairman Cabell advised that the Commission does not especially care to be considered a law-enforcement agency and had it in mind simply to try out the new law for a period of six months or so without imposing any penalty on the operators other than the fines prescribed by the court; but, in view of Senator Franciscovich's remarks, the Commission will be pleased to give the matter further study. He invited comments on the suggestions made by Senator Franciscovich. No one responded, which indicated that all were in accord therewith.

The Commission then discussed the matter privately with the representatives of the Public Utilities Commissioner and the Department of State Police, following which Chairman Cabell announced that the Commission is inclined to agree with the suggestions made by Senator Franciscovich, because it believes that the operators will make an honest endeavor to load within the legal requirements and will not load their trucks in excess of the 10 per cent

tolerance permitted by law. He added that the old method of imposing a fine on all operators who transport loads weighing in excess of the statutory weight limits, including the 10 per cent tolerance, will be continued except that the overload will be based upon the gross load rather than on the axle load. If the gross overload exceeds the 10 per cent tolerance permitted by law, then, for a first offense, the equipment involved in such overload will be suspended from operation for a period of 5 days; for a second offense the period of suspension will be 10 days; and for a third offense, 15 days; and, where logs are hauled from a new district, no penalty will be imposed for overloads on the first six loads, provided arrangements have been made with the State Police beforehand for the weighing of such six loads. These rules and regulations, he added, will be published in printed form and will be distributed to all parties concerned at the earliest possible time. (See Circular Letter No. 119.)

The matter of determining the classification of hard-surfaced roads as compared with others was brought up for discussion and it was decided to let the State Police officers differentiate between the road types, as in the past.

Senator Balentine and Mr. Johnson asked the Commission to modify its present ruling with respect to log hauling on state highways in Klamath County so as to permit such hauling during Saturday afternoons, which practice is now prohibited. They were informed that the Commission must have full information on logging operations in this county before it can render a decision, and investigation will be made upon receipt of application for Saturday afternoon hauling in this county.

Mr. E. C. Newall, of Vancouver, Washington, was present in regard to the claim of his mother-in-law, Mrs. Ida B. Hadley, for damages that she alleges she incurred by reason of the reconstruction of the Pacific Highway West in front of her property near Newberg, in Yamhill County. Mr. Newall declared that Mrs. Hadley has received unfair treatment from the Highway Commission inasmuch as she donated right of way for this project with the understanding that there was to be no change in the grade line of the highway; whereas, the highway was actually lowered approximately 8 feet in front of her premises. Had Mrs. Hadley known that the grade was to be lowered, he said, she would never have donated the right of way. He demanded the sum of \$500 as settlement for the claim.

Chairman Cabell pointed out that negotiations with Mrs. Hadley for this right of way were completed a long time ago, apparently to the satisfaction of all parties concerned, and that the Commission is not disposed to reopen a case that has once been consummated. However, in view of the fact that there is a question as to just what Mrs. Hadley had in mind when she donated the right of way, the Commission is willing to pay her an additional amount of \$250 in order to definitely close the case. Such sum, he added, is absolutely the limit in the amount that the Commission will pay and if Mrs. Hadley is not satisfied she will have to take the matter to court. Mr. Newall said that he would present the offer to Mrs. Hadley and would advise later whether or not it is acceptable.

APR 5 1939

The Commission discussed at some length the advisability of revising its schedule of wages to be paid labor employed on state highway construction work but deferred definite action thereon until the next meeting.

The Engineer brought up for discussion the matter of adopting a minimum wage allowance for the hourly-rate employees on oiling, paving, and striping crews. He pointed out that these crews are sent into the field as early as possible in the spring in order to insure the completion of their assignments during the working season, and are subjected to frequent and considerable loss of employment because of wet weather conditions which in many instances prevent them from earning enough to pay their local grocery bills. He gave as his thought that such hourly-rate employees should be given a minimum wage allowance or guarantee for subsistence, and recommended an allowance of \$1.00 per day for such purpose. After discussion, the Commission approved the Engineer's recommendation and thereupon, by unanimous vote, authorized the payment of such minimum wage allowance subject to the following conditions:

1. The allowance shall be made only to hourly-rate employees on state force oiling crews, pavement patching crews and center-line striping crews.
2. The allowance shall be made only on days when wet weather conditions are the sole cause of the discontinuance of work. If prosecution of the work is prevented by breakdown of equipment, shortage of materials, moving of plant, or any cause other than wet weather, the allowance shall not be made, even though wet weather may occur concurrently.
3. The allowance shall be made only on regular working days, including Saturday, if Saturday or Saturday morning is regular working time for the crew. The allowance shall not be made on Sundays or holidays.
4. The allowance shall be made only for days on which the employee reports to the timekeeper and is on the job ready to work. No allowance is to be made to an employee who absents himself from the work or who fails to report to the timekeeper each day.
5. The amount of the allowance shall be \$1.00 for days on which the employee has no other earnings. If some pay time is worked by the employee on the day concerned, the amount of the allowance shall be only sufficient to bring the total earnings for the day to \$1.00. For instance, if an employee receiving \$0.55 per hour works one hour during the day, the amount of the allowance will be \$0.45.

The Assistant Attorney reported briefly the status of acquiring options for right of way needed for the proposed revision of the Pacific Highway West through the town of Tigard. He estimated that it would take about 30 days to complete the securing of such options. The Commission took no action

on this matter except to ask the Assistant Attorney to expedite the matter as much as possible.

The Attorney brought up for discussion a letter from the attorney for the West Coast Power Company relative to the construction of the Company's pole line across the state park that was acquired from the Pratt interests, adjacent to the Oregon Coast Highway, at the Lincoln-Lane County line. He advised that, as previously instructed by the Commission, he informed the power company that the Commission would not permit construction of the pole line along the highway because the poles would interfere with the scenic view, and, for similar reasons, would not allow such pole line to be constructed through the body of the park, although it would authorize the construction of the pole line at the extreme edge of the park where it would not interfere at all with the use of the park nor detract from the park's appearance. The company alleges, he said, that it will cost them about \$4,000 extra to build their pole line in the designated location, but, nevertheless, they are willing to build it in such location if the state will pay a portion of this extra cost, but not otherwise.

In the discussion of this matter it was pointed out that the company has already constructed its pole line at a considerable distance from the highway across property adjacent to this state park, which indicated to the Commission that it would be no more difficult or expensive for the company to construct its pole line at the extreme edge of the state's park, as designated. Furthermore, if the line were constructed in such location, it would then not be necessary to cut any timber to accommodate the company's poles or other facilities and would place the line in a position where it would not interfere at all with the use for which the park was acquired. The Commission thereupon, by unanimous vote, refused to make any change in its previous ruling with respect to this matter and indicated that it would be willing to try the matter out in court, if necessary.

The Commission adjourned at 6:00 o'clock p. m., to reconvene on the following morning in the auditorium of the Public Service Building.

Portland, Oregon, April 6, 1939

The State Highway Commission reconvened in regular session at 9:00 o'clock a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
E. B. Aldrich, Commissioner
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects and for the sale of a building at Salem were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts and sale of building would be made at 3:00 o'clock p.m. in the same room:

APR 6 1939

SALE OF BUILDING IN SALEM

BUILDING NO. 5786

Arthur S. Washburn	\$ 550.00
W. H. Grabenhorst & Company	205.00

Mr. L. A. Cutlip, Mayor, North Bend, was present and urged the Commission to oil the Coos River Secondary State Highway between the town of Eastside and the Enegren Ferry so as to eliminate the dust nuisance that prevails during the dry season. He said that this road carries as much traffic as any other secondary highway in the State of Oregon and from that standpoint he believes that the improvement requested is fully justified. The Commission deferred action on this request pending formulation of its next construction program for secondary funds. Chairman Cabell agreed to inspect the road in the near future.

The Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following state park matters:

Gift of the Consolidated Timber Company of roadside strips along the Wilson River Highway:- Mr. Boardman advised that the Consolidated Timber Company has offered to deed to the state as a gift a strip of land 400 feet wide and extending along this highway for a distance of about 6 miles from a point near Glenwood to the summit of the Coast Range, the only condition being that the company would like to maintain some camp buildings on the property for 25 years during the time that it is conducting logging operations on other property in this vicinity. The Commission accepted the gift and instructed the Secretary to acknowledge the same with an appropriate letter of thanks.

Gift of Mr. J. C. Ponsler, Florence, of a small tract of land, containing 2 acres, adjacent to the Oregon Coast Highway, in Lane County:- The Parks Superintendent advised that Mr. Ponsler owns a small tract of land overlooking the Pacific Ocean near China Creek and that he has expressed a desire to present this to the state as a gift in memory of his late wife, Muriel O. Ponsler, the only condition being that it be made available for public use at all times. The Commission accepted the gift by unanimous vote and ordered that the same be acknowledged with an appropriate letter of thanks.

Addition to Cape Lookout State Park, in Tillamook County:- The Parks Superintendent advised that, as instructed by the Commission at a

APR 6 1939

previous meeting, he has again contacted the Crown Willamette Company relative to the acquisition of this area and the company has agreed to reduce its price to \$2,130 under the condition that it will be allowed to cut the trees on certain portions. This amount, he says, is \$1,620 less than the price previously demanded and, as before, is based on timber stumpage. After considerable discussion Chairman Cabell gave as his thought that the price is satisfactory but that the records should show how it was arrived at. Commissioners Aldrich and Clough concurred and it was thereupon decided to defer final action until the next meeting, when the breakdown in the price is to be discussed.

Naming of a state park in honor of Mr. H. B. Van Duzer, former chairman of the State Highway Commission:- The State Parks Superintendent advised that he has consulted with Mr. Van Duzer relative to the naming of a state park in his honor, and, while Mr. Van Duzer was very reluctant to have this done, he finally consented and indicated that he would be much pleased and satisfied if his name were given to the timber strips along the Salmon River Highway. The Commission thereupon, by unanimous vote, approved the naming of such tracts "Henry B. Van Duzer Forest Corridor".

Request of State Forester to maintain a fireguard station with buildings within the limits of the Salmon River Highway timber strips:- The Parks Superintendent advised that the State Forester needs about 1.8 acres on which to maintain such fireguard station. The buildings to be erected, he said, would be of pleasing architecture and would be placed as far as possible away from the traveled portion of the road. It was his thought that the maintenance of a fireguard at this location would be a fine thing from the fire protection standpoint and he recommended that the request be approved. The Commission approved the recommendation unanimously, subject to the condition that the State Forester will construct buildings that meet with the Commission's approval and will maintain the premises in a satisfactory condition at its own cost and expense.

Request of Mrs. Vern Van Dyke to maintain a cabin in Casey State Park adjacent to the Crater Lake Highway, in Jackson County:- The Parks Superintendent advised that, as previously instructed by the Commission, he interviewed Mrs. Van Dyke relative to the purchase of her cabin, which is located in the state park, but Mrs. Van Dyke will not consider a price at all; in fact, she insists upon being allowed the use of the park for her private purposes. Furthermore, she has plans for the construction of a fence to enclose the portion of the park that she is now occupying. He requested instructions, in view of the Commission's order that she vacate the premises by June 1, 1939. The Commission deferred its decision until a future meeting.

Purchase of property owned by Hammond Lumber Company at Nehalem Sandspit, in Tillamook County:- The Parks Superintendent advised that the Hammond Lumber Company has agreed to accept the sum of \$250 for this property, which consists of some 65.5 acres, described as all of Government Lots 5 and 6, of Section 33, T. 3 N., R. 10 W., W. M., Tillamook County, including all tide lands fronting or abutting on said government lots; Lot 6 of Section 4, T. 2 N., R. 10 W., W. M.; and that portion of Lot 1 in Section 5, T. 2 N., R. 10 W., W. M., that is owned by the company. The company has agreed to accept

such sum for this property, he said, under the assumption that the state will pay the unpaid taxes that have accumulated against same. The Commission approved this purchase by unanimous vote.

Purchase of addition to Devils Elbow State Park at Heceta Head, in Lane County:- The Parks Superintendent advised that he has concluded satisfactory negotiations with Rufus C. and Rosa Stonefield for the purchase of this 61-acre tract, described as Lot 1 and the NW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 34, T. 16 S., R. 12 W., W. M., for the sum of \$3,500, which is the price that the Commission approved at its meeting on March 3, 1939. The Commission approved this settlement by unanimous vote.

Exchange of properties with Rufus C. and Rosa Stonefield at Devils Elbow State Park:- The Parks Superintendent advised that, in accordance with authority granted him by the Commission on March 21, 1939, he has effected a satisfactory exchange of properties with Rufus C. and Rosa Stonefield for the protection of the state's interests at the north end of the Cape Creek Bridge, whereby the Stonefields are to deed to the state a triangular-shaped tract containing one acre on the east side of the highway and the state is to deed to the Stonefields a rectangular tract containing two acres situate in the SE corner of Lot 1, Section 34, T. 16 S., R. 12 W., W. M. The Commission approved such exchange of properties.

Purchase from Eugene O. Hayward, Astoria, of a small area located adjacent to the Oregon Coast Highway at Heceta Head:- The Parks Superintendent advised that, as instructed by the Commission at the previous meeting, Mr. Hayward has again been contacted relative to the purchase of this property and feels that he cannot sell his property for less than \$800, which is the amount of his previous offer. The Assistant Attorney advised that he inspected this property and it is his opinion that the Commission is justified in paying as much as \$2,500, if necessary. He strongly recommended settlement with Mr. Hayward for \$800. The Parks Superintendent concurred therein. The Commission approved the recommendation by unanimous vote.

A delegation from Roseburg, representing the Roseburg Chamber of Commerce, and consisting of W. C. Harding, Secretary, A. C. Marsters, County Judge Morris C. Bowker, and Senator C. W. Clark, was present and conferred with the Commission relative to the following highway matters. Mr. Harding headed the group. They urged the early improvement of the Roseburg-Shady Point Section of the Pacific Highway and were informed that the Commission expects to receive bids for this project at its meeting which is scheduled to be held in May.

They also asked for the improvement of another section of the North Umpqua Highway extending about 1 $\frac{1}{2}$ miles east of the Mud Hollow Section, for which bids are to be received on the following day, and advised that Douglas County would acquire the right of way that may be needed for such project. Chairman Cabell explained the condition of the Commission's finances and advised that the Commission will be pleased to consider this project in the formulation of its construction program for 1940 federal aid secondary highway funds, although no definite promises or commitments can be made thereto at

APR 6 1939

this time. Further, that, even if the project is approved for such program, it probably will not be possible to contract the work until this fall or this winter, at the earliest.

Mr. Harding then extended to the Commission and its staff an invitation to be the guests of the Roseburg Chamber of Commerce for luncheon or dinner some time in the near future that would suit the convenience of the Commission. The Commission accepted the invitation with thanks and advised that a definite appointment would be made later.

The Commission had under discussion the matter of programming certain federal aid funds heretofore tentatively allocated, and the reallocation of federal aid secondary highway funds as follows:

\$70,000 of 1939 regular federal aid funds heretofore reserved for a project in Portland:- The Commission decided unanimously to use such funds to finance an additional project on Sandy Boulevard, Portland, and authorized the Engineer to prepare plans and specifications for the same and to advertise the project for bids as soon as the plans are ready.

\$55,000 of 1939 federal aid secondary highway funds heretofore allocated to finance a grading project on the county road between Oak Hill and Veneta, in Lane County:- The Commission decided, in view of the fact that the construction of this project is dependent upon the Government's action relative to the construction of the Fern Ridge Dam, which is indefinite at the present time, that it would be advisable to reallocate the funds to another project, and accordingly approved the transfer of such funds to finance a grading and paving project on the North River Road, Salem, particularly the Salem-Wheatland Junction Section, which is estimated to cost \$60,000. It was agreed that the Oak Hill-Veneta project should be given preference in the program for 1940 federal aid secondary highway funds.

\$45,000 of 1938 regular federal aid funds heretofore tentatively allocated to finance a lighting project on Interstate Avenue, Portland:- The Engineer explained the plans for this project in considerable detail and the results of conferences with City Commissioner Bean of Portland and officials of the Portland General Electric Company, which maintains pole lines along this thoroughfare. The Commission approved the Engineer's report and by unanimous vote authorized him to advertise this project for bids to be received at the next regular meeting of the Commission.

\$100,000 of accumulated balances in the construction program for 1938 regular federal aid funds:- The Engineer advised that these funds must be obligated and contracted before June or they will be lost to the State of Oregon. He suggested that they be allocated to finance the construction of the Picture Rock Pass-Harris Creek Section of the Fremont Highway, in Lake County, which is now included in the Commission's approved program for 1939 federal aid funds, thereby advancing this particular project one year. The Commission approved the suggestion by unanimous vote and authorized the Engineer to work up the plans and specifications for the same so that it may be advertised for bids to be received not later than the June meeting.

Mr. Millard Holbrook, Portland, came before the Commission in regard to a drainage problem on his dairy, which is located adjacent to the Lower Columbia River Highway, near Scappoose. It appears that when this highway was reconstructed a number of years ago it was built on new alignment across the Holbrook property and as part consideration for the right of way the state agreed to construct a small bridge over swampy ground so that stock could be driven from one pasture to another without using the highway. Further, that such bridge was constructed from timber salvaged from an old bridge but has now deteriorated to such an extent that it is no longer usable by cattle and as a consequence they have to be driven along the highway for a distance of about one-eighth of a mile, which creates a considerable hazard to highway traffic and is likewise dangerous for the cattle. Mr. Holbrook suggested that the logical thing to do is to replace the old bridge with a fill and agreed to see that that is done if the State Highway Commission will loan a truck to haul the material.

The Engineer gave as his thought that the suggestion offered by Mr. Holbrook for the solution of this problem is proper, but questioned the advisability of the state cooperating in the work, because of the previous settlement of the matter, which was apparently satisfactory to all concerned when it was made. He pointed out that it is contrary to the Commission's established policy to reopen cases of this kind that have been closed for such a long time.

The Attorney gave as his opinion that if the construction of the fill will eliminate the hazard created by cattle being driven on this heavily traveled highway for such a long distance, the Commission would be justified in cooperating in the project, regardless of the previous settlement. After considerable discussion Chairman Cabell stated that he would inspect the premises in the near future without making any commitments whatsoever as to whether or not the state would cooperate as requested. He added that this is simply a question of reopening a case that has once been satisfactorily settled, which the Commission is reluctant to do.

County Judge Guy Boyington, Clatsop County, came before the Commission relative to the selection of a site for the proposed new Columbia River ferry at Astoria. He was informed that the 8th Street site, which was previously suggested by the Clatsop County Court, has been inspected and does not appear to be satisfactory; but the site at the foot of 17th Street, which has also been inspected, will meet the requirements very nicely. Judge Boyington advised that, as far as the County Court is concerned, the 17th Street site would be satisfactory, although it might be objectionable from the city's standpoint because it would necessitate the operation of the ferry boats through the Astoria regatta grounds. The County Court suggested the 8th Street site, he said, simply because it would not interfere with the regatta activities; but if such location does not meet the state's requirements, then of course some other site will have to be found. He further advised that the County Court has received two offers to purchase county-owned property at the foot of 17th Street, but has deferred acceptance of either because it wants the state to have the first refusal of the same. He suggested, in view of the fact that the 17th Street site is within the city's recreational center,

that the State Highway Commission should start the proceedings by asking the county to deed the needed property at this location to the state, and the County Court in turn would confer with the city authorities relative thereto. This request, he added, (which should be in the form of a letter) should also state specifically that the proposed location at the foot of 8th Street will not meet the state's requirements for a ferry dock. After discussion the Commission approved Judge Boyington's suggestion and referred the matter to the Attorney for further handling.

Judge Boyington also inquired relative to the oiling of the Jewell-Mist Section of the Nehalem Secondary Highway and was informed that the Commission expects to advertise this project for bids to be received this fall. However, indications are that the \$70,000 that has been budgeted for this work will not finance more than the section between Jewell and Birkenfeld. Judge Boyington gave as his thought that it would cost the state considerably more to have rock manufactured during the winter season because of the nature of the material to be handled; at least, he said, that is the county's experience in this district. He suggested, in view thereof, that the contract for this material be awarded early enough so that the rock can be stockpiled before the winter season begins. The Commission, after discussion, referred this matter to the Engineer for investigation and report.

A delegation, consisting of Messrs. A. B. Harr, Theo. Arens, G. E. Kibbe, and H. A. Dick, representing the Portland Chapter of the Associated General Contractors of America, and Mr. E. A. Densmore, Secretary of the Allied Heavy Construction and Highway Crafts Union, appeared before the Commission relative to the adoption of individual wage scales for the different classes of labor employed on highway contract work. Mr. Harr headed the group. He asked the Commission to adopt the wage scale listed in the agreement between the American Federation of Labor Unions and certain highway contractors who are members of the contractors' association, so as to make it compulsory for all of the contractors bidding on state highway work to prepare their bids on the same basis in that regard.

Chairman Cabell stated that he personally is reluctant to include in the highway specifications clauses specifying specific wage rates for each class of employment because there is a question whether or not it would be to the best interests of the public as a general policy. He favored, rather, the present method of specifying minimum rates of pay for three classes of labor; viz., common, intermediate, and skilled. He also favored the settling of labor disputes by the collective bargaining method. He inquired whether or not the continuance of the present method of specifying minimum rates for such three classes of labor would be acceptable if the minimum rate for each were raised to compare favorably with the wages that are now being paid by most of the contractors.

Mr. Arens gave as his opinion that such method would solve their greatest difficulty, which is the minimum wage paid common labor. He suggested a minimum rate of 62½¢ per hour for such class of labor; 75¢ per hour for intermediate labor; and \$1.25 per hour for skilled labor.

After further discussion Chairman Cabell advised that, while the

Commission is not prepared to make a definite decision with respect to this matter today, it will do so a sufficient time in advance of its next regular meeting, which is scheduled to be held in the early part of May, so that the new rates, if any, can be used in connection with the jobs for which bids will be received at such meeting.

The Engineer then brought up for discussion a controversy between contractor Charles H. Leonard and laborers employed by him on his contract with the state for the construction of the Brooks-Jordan Creek Section of the Wilson River Highway, in Tillamook County. At his request the Attorney explained the results of a conference on the previous day with Mr. Leonard and officials of the contractors' association as to whether or not this case, which was decided adversely to the contractor by the trial judge, should be appealed to the Supreme Court. The Attorney advised that the contractor has carried the burden of this controversy from its inception and feels inclined to settle with the laborers for the amount of the judgment rendered, which is \$1,600; but, if the Highway Commission prefers that the case be appealed, then he is willing to cooperate to a certain extent.

He gave as his thought that the State Highway Commission is sufficiently interested to contribute state funds to pay the cost of this appeal in view of the fact that the trial judge's decision is bound to affect future highway contracts. The cost of the appeal, he said, would be approximately \$1,500, of which amount \$1,000 represents the cost of preparing the transcript of testimony, and the balance, miscellaneous expense, including expense of attorneys. He advised that the contractors' association and the contractor have indicated a willingness to assume the payment of \$500 of the total involved if the state will assume the balance, and recommended approval of such arrangement, particularly in view of the state's interest and the fact that it appeared to him unfair to ask the contractor to assume the entire expense of the appeal inasmuch as he has already paid out considerable money in connection with this case.

Mr. Arenz confirmed the statements made by the Attorney by stating that both the contractors' association and the contractor will agree to cooperate as outlined and the Associated General Contractors will provide an attorney to assist. After discussion the Commission approved such arrangement by unanimous vote.

The Commission adjourned at 12:00 o'clock noon and reconvened at 1:30 o'clock p. m. in the same room with the same persons present and participating.

The Engineer requested authority for Harold B. Say, Director of the Travel and Information Department, to make a trip into the State of California for the purpose of contacting newspapers, auto clubs, and travel bureaus and their branches, relative to the use of the highway department's travel literature and display material. He gave as his thought that Mr. Say would be out of Oregon for about two weeks and that his expense would amount to about \$100. The Commission approved the request by unanimous vote, subject to further approval by Governor Sprague.

APR 6 1939

The Engineer reported on the investigations made of the complaints of Mr. Will L. Grigsby, Newport, and Ce Lesta Knowles, Seal Rock, with reference to the removal of agate-bearing gravel from the Oregon beaches, with particular reference to the removal of such material from the beach in the vicinity of Newport. He said investigation reveals that there are a number of commercial aggregate plants located in this vicinity, which are amply and adequately able to take care of ordinary needs for such material, in view of which he recommended that the taking of gravel from the beach be prohibited and that appropriate signs to that effect be erected. The Commission approved the recommendation unanimously.

In the discussion of this matter, the Assistant State Highway Engineer pointed out that Contractors Kern & Kibbe, Portland, who have a contract for jetty construction at Newport, have been securing materials from the beach for such work. He was instructed by the Commission to ascertain whether or not materials suitable for such work are obtainable from other sources and if such investigation reveals that there are other sources of materials, then Kern & Kibbe are to be ordered to discontinue the taking of materials from the beach area. If, on the other hand, investigation reveals that suitable materials cannot be secured elsewhere at reasonable expense, then Kern & Kibbe are to be allowed to continue the taking of materials from the beach as in the past.

The Engineer brought up for discussion the matter of constructing asphaltic arrows within the parting strips on four-lane pavements. He advised that the strips that have been tried out for some time past on McLoughlin Boulevard, between Portland and Milwaukie, have proved very successful and are a great aid in keeping traffic on the proper side of the road. It was his thought, in view of the success of this experiment, that similar arrows should be installed in the parting strip on all four-lane pavements, and requested authority to do this. He estimated the cost at \$310 per mile, or a total of approximately \$9,641 for the 31.1 miles of four-lane pavement now constructed. The Commission approved the request by unanimous vote.

The Commission had under discussion a communication from the County Court of Marion County in which the Commission was asked to negotiate, in behalf of the county, for right of way as may be needed in connection with the reconstruction of the North River Road, Salem, which work is to be done by the state in the near future as a federal aid secondary highway project; also, in which the County Court authorized reimbursement to the state for sums advanced for this purpose from Marion County's share of the state gasoline and motor vehicle funds for the year 1940. The Attorney advised that all of the right of way agents are busily engaged on other assignments and it would not be possible for him to reassign any of these men without handicapping the work of acquiring right of way for strictly state jobs. In view of the Attorney's report and for the further reason that the granting of the request would establish an undesirable precedent, the Commission decided that it would be to the best interests of all concerned if the county would purchase its own right of way. The Attorney was instructed to convey such information to the County Court.

A delegation from Portland, representing the Hawthorne Commercial Club, came before the Commission and asked that Hawthorne Avenue be designated as a state highway route. The delegation consisted of the following members: J. A. Bradt, C. C. Hutchison, County Commissioner G. V. Badley, Carl Lowe, L. H. Sammons, Nick Corlisho, and L. M. Lepper, Director of the Eastside Commercial Club. They pointed out that this street is now one of the city's main thoroughfares, but it dead-ends at East 60th Street, and that their idea would be for it to be designated as a state highway route to approximately East 50th Street, then extend as such in a southeasterly direction to the intersection of Southeast 82nd Street and Powell Boulevard, both of which are now designated state routes.

Chairman Cabell pointed out that the State Highway Commission now has before it for consideration a large program of projects within the city of Portland, some of which are now under way. It was his thought that the present program should be brought nearer to completion before consideration is given to new projects; otherwise, it would not be possible to complete any of them within a reasonable length of time. The Hawthorne Avenue project, he said, is undoubtedly a meritorious one but, under the circumstances, the Commission does not feel that it should be given serious consideration at this time. It was his thought that the improvement is more of a city concern than of a state concern. Commissioners Aldrich and Clough concurred in Chairman Cabell's remarks.

A delegation from Harney County, consisting of County Judge Nelson B. Higgs, Senator Robert M. Duncan, George Beers, Federal Agent for the Taylor Grazing Act, Lew Miller, C. J. Girts, and H. C. Sauter, all of Burns, came before the Commission relative to the securing of a secondary state highway between Burns and the I.O.N. Secondary Highway, near Rome. Judge Higgs headed the group. It appears that, under the provisions of the Taylor Grazing Act, certain federal funds are available for road construction purposes and it is proposed to construct a road between Rome and Crane, using such funds along with certain state aid, to finance the work. Further, that the proposed road is to follow the location survey heretofore made by the State Highway Department for a road between these points. They advised that a C.C.C. camp has been established in this vicinity and that the men from this camp will be available to perform construction operations, but they would like to have the State Highway Commission cooperate in the project by furnishing culvert pipe, powder, and certain equipment consisting of a caterpillar tractor and grader.

Mr. Beers stated that the district served by this road is in the Taylor Grazing Act area and that the road would be administrative in character, which would permit government funds to be used for construction of the same. He also stated that there is urgent need for an early decision by the Commission because it is essential that the road be constructed at once so as to be available for use by June 1. He further stated that the road would be constructed on the location adopted by the State Highway Commission for a connecting state highway between the I.O.N. Highway and Crane and that they would grade the road to the state's profile grade line in so far as possible, although there are a few points that would have to be worked over when the state took over the project; however, all of the work that they propose to do could be used to good advantage when the standard road is constructed by the state.

APR 6 1939

Chairman Cabell pointed out that this proposed road is not on the state highway system either as a primary or secondary state highway, so the Commission is precluded from spending state money to construct the same until the road has been so designated. It was his thought that the road would properly be a secondary state highway, in which case the county courts of Harney and Malheur Counties would have to initiate the project by making a formal application for its designation as such.

After considerable discussion, the Commission indicated a willingness to cooperate in the building of this road by furnishing of culvert pipe, powder, and engineering service, but deferred a definite decision in regard thereto until its next meeting. The Engineer was instructed to investigate the project in the meantime and ascertain just what is needed and the costs involved, and to report his findings at the next meeting.

Judge Higgs stated that the Harney County Court would make formal application for the designation of Harney County's end of this road as a state secondary highway and that they would take up with Malheur County Court the matter of requesting such designation for the portion of the road within the borders of that county.

Judge Higgs then inquired as to the plans of the Commission for the completion of the oiling of the Central Oregon Highway east of Buchanan. He was informed that the Commission has tentatively allocated \$145,000 of regular federal aid funds for the oiling of the section between Juntura and Stinkingwater Creek but it does not appear likely that the contract for the work can be awarded until late this fall or this winter because the Commission wants to complete its program for the 1939 funds before it starts on a new program, there being insufficient funds to match the federal funds for both fiscal years.

Commissioner Aldrich brought up for discussion the matter of designating a location for the William Hanley oasis. He suggested that the C.C.C. Camp located adjacent to the Fremont Highway at Alkali Lake might meet the requirements. The members of the delegation endorsed this site unanimously. It was also approved by the State Highway Commission.

Judge Higgs then asked for better maintenance work on the Diamond Valley Secondary Highway and on the Frenchglen Secondary Highway so as to make these roads passable the year round. The Engineer advised that these roads are now being maintained in the best possible manner under existing conditions and that what is really needed is reconstruction of the roads. Judge Higgs pointed out that a portion of the Frenchglen Secondary Highway is subject to flood at certain seasons of the year and requested that this condition be remedied. Such project, he said, would be the county's first choice for secondary highway improvements. The Commission took no definite action on this request other than to state that the project would be kept in mind for future consideration.

Representative Harry R. Wiley, Albany, came before the Commission and requested the improvement of the Albany-Lyons Secondary Highway between

Crabtree corner and Scio. He alleged that this is a very important road to Linn County and carries a large volume of traffic, much of which is logging traffic that creates an unbearable dust condition which they would like remedied by construction of an oiled surface. He was informed that the Commission does not have funds available to finance this work this year because of allocations to other projects in Linn County, but the Commission will bear it in mind and will inspect the road the next time it is in that vicinity.

A delegation from Brookings, Curry County, headed by Mr. W. L. Crissey, was present in the interests of the reconstruction of the Oregon Coast Highway on permanent alignment through this town. Others in the delegation were James Harris, Elmer Bankus, Wilson Freeman, Ed. W. Miller, Manager of the Oregon Coast Highway Association, and C. P. Keyser, Superintendent of the City Parks, Portland. Mr. Miller presented the principal arguments.

They were informed by Chairman Cabell that the Commission is familiar with this project but has not been able to undertake it because of the shortage of funds with which to finance the work. He further advised that it does not seem possible now for the Commission to contract the work this year but it will be considered when the program for the 1940 fiscal year funds is arranged. He added, if the Commission is of the opinion at that time that this is a priority project, it will be placed on the program for construction next year, but that is about all the encouragement the Commission can give now.

Mr. Crissey then asked the Commission for the oiling of the road which leads from the Oregon Coast Highway to Azalea State Park, at Brookings. He said that they expect to dedicate this park with appropriate ceremonies on May 20 this year and would like, in the meantime, to secure the oiling of the road so that visitors to the park will not be discommoded by clouds of dust. He pointed out that most of the right of way for this road was presented to the state as a gift and that the road has been graded at no cost to the state, and gave as his thought that, because of such contributions, the state should surface and oil the road at state expense. Mr. Harris urged the improvement from the standpoint of the bus company, which, he said, has authorized its bus drivers to make a side trip into the state park during the time that the azaleas are in bloom, for the benefit of its Patrons.

Mr. Freeman stated that he has two or three trucks that he will loan for use in connection with this project, and that Curry County has two trucks which it will place on the work, and that drivers will be furnished with all of them, if the Commission will approve the project.

Mr. Keyser urged the project from the tourist standpoint. Azalea State Park, he said, is a tourist mecca, and, in his estimation, publicity concerning it should be stressed to the utmost. Chairman Cabell advised that the Commission is not in a position at the present time to make a definite commitment with respect to this project but will have it investigated as to cost, et cetera, and will make its decision as soon as possible. The Engineer was thereupon instructed to make such investigation and report to the Commission at the special meeting which is to be held in Salem sometime during the week of April 17, 1939.

APR 6 1939

Mr. Miller extended to the Commission and its staff an invitation to attend the semi-annual meeting of the Oregon Coast Highway Association which is to be held in Gold Beach on Sunday and Monday, April 23 and 24, 1939. The Commission accepted the invitation with thanks.

Messrs. Frank Seal, M. E. Kelley, and Dr. L. R. Pugh, representing the city of Port Orford, appeared before the Commission relative to a proposed road extending down the Illinois River from its crossing of the Redwood Highway, at Selma, to the town of Agness, at the confluence of the Illinois River and the Rogue River, thence to a connection with the Oregon Coast Highway. Mr. Seal headed the group. He advised that the United States Forest Service has already partially constructed a road between these points but they would like the survey of the unconstructed portion checked by the State Highway Department so as to make certain that it meets the state's requirements, inasmuch as they predict that this will be an important road on the state highway system at some future date. He presented a resolution from the County Court of Josephine County and a letter from the Grants Pass Chamber of Commerce, endorsing the project and his request.

Chairman Cabell explained that the Commission's first obligation in this district is to rebuild the Oregon Coast Highway; also, that the making of the survey requested would be a very costly undertaking because of the rough terrain through which it would extend. He gave as his thought that it would be much better to let the United States Forest Service continue with its improvements to completion and to let the state stay out of the picture until traffic develops. Commissioners Aldrich and Clough concurred in these remarks which concluded the conference.

At 3:30 o'clock p. m. Chairman Cabell announced the following awards of contracts and the sale of the building at Salem, for which bids were received at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Eagle Creek-Wade Corner Section of the Eagle Creek-Firwood County Road, in Clackamas County. 2.71 miles grading and 3.02 miles surfacing and oiling. 4 bids were received for this project, the low one being that of Fisher Bros., Oregon City, at \$38,379.00. based on the use of road oil. They did not submit a bid based on the use of tar. R. O. Dail & Warren Bros., Inc., Portland, submitted the second low bid of \$49,671.50, based on the use of tar, with no bid based on the use of road oil. C. J. Eldon, Portland, submitted the third low bid of \$52,625.50, based on the use of road oil and \$52,581.50, based on the use of tar. The Commission has awarded the contract to Fisher Bros. at their low bid of \$38,379.00, based on the use of road oil.

"Bunker Hill Section of the Oregon Coast Highway, in Coos County. 1.16 miles grading and paving. Roy L. Houck, Salem, submitted the low bid for this project at \$108,466.50. Jacobsen-Jensen Company, Portland, submitted the next low bid at \$110,879.50. There were 5 higher bidders. The Commission has awarded the contract to the low bidder, Roy L. Houck, at his bid of \$108,466.50.

"Jericho Lane-Bloucher Section of the Hood River Secondary Highway, in Hood River County. 1.57 miles grading and 2.6 miles surfacing and oiling; also furnish 2,000 cu. yds. crushed rock in stock piles. 6 bids were received for this project, the low one being that submitted by E. C. Hall Company, Eugene, at \$39,926.50. The second low bid was submitted by A. S. Wallace, Roseburg, at \$43,326.50. The Commission has awarded the contract to the low bidder, E. C. Hall Company, at its bid of \$39,926.50.

"Poe Valley Section of the Bonanza-Malin County Road, in Klamath County. 2.99 miles grading and surfacing. Only 2 bids were submitted for this project, the low one being that of E. L. Rigdon, Barlow, at \$20,235.00, and the other being that of Clifford A. Dunn, Klamath Falls, at \$24,562.50. The Commission has awarded the contract to E. L. Rigdon at his low bid of \$20,235.00.

"East Unit, Rhea Creek-Hepner Section of the Wasco-Hepner Secondary Highway, in Morrow County. 5.8 miles grading, surfacing and oiling; also, furnish 2,000 cu. yds. crushed rock in stock pile. Saxton, Looney & Risley, Oak Grove, submitted the low bid for this project at \$58,801.00. Warren Northwest, Inc., Portland, submitted the second low bid at \$59,550.00. There were 5 higher bidders. The Commission has awarded the contract to Saxton, Looney & Risley at their low bid of \$58,801.00.

"Falls City-Fern Corner Section of the Falls City County Road, in Polk County. 4.4 miles surfacing and oiling. 3 bids as follows were submitted on this project: Warren Northwest, Inc., Portland, low, at \$29,115.50, based on the use of tar but no bid based on the use of road oil; J. C. Compton, Saxton, Looney & Risley, McMinnville, second low, with a bid of \$29,510.00, based on the use of tar and no bid based on the use of road oil; R. O. Dail & Warren Bros., Inc., Portland, were the other bidders with a bid of \$29,696.00, based on the use of road oil and \$29,618.00, based on the use of tar. The Commission has awarded the contract to Warren Northwest, Inc., at its low bid of \$29,115.50, based on the use of tar."

Building at Salem:

"Building No. 5786, formerly owned by E. A. Jackson. 2 bids were received for this building, the high one being that submitted by Arthur S. Washburn, Salem, at \$550.00. The other bid was submitted by W. H. Grabenhorst & Company, Salem, at \$205.00. The Commission considers the offer of Arthur S. Washburn satisfactory and accordingly has sold the building to him at his bid of \$550.00."

A delegation from Astoria, headed by Mr. James O. Convill, City Manager, conferred with the Commission relative to the construction of the proposed Astor Street revision of the Oregon Coast Highway in Astoria. Other members of the delegation were: Otto Owen, Art Hilderbrand, Anton Sorenson, all city commissioners of Astoria; S. J. Halsan, J. C. Wright, A. S. Dempse

and Tom Cuning, representing the Astoria Chamber of Commerce. The delegation urged the Commission to construct the Astor Street revision, particularly the westerly end thereof so as to eliminate the Bond Street Hill section of the present route and to facilitate the development of private property that is affected by this change.

Chairman Cabell explained the condition of the Commission's finances which precludes the construction of this project this year. The Commission is endeavoring, he said, to complete the programs for the 1938 and 1939 federal aid moneys, of which no sum has been allocated to the Astor Street improvement, and does not contemplate the formulation of a program for the 1940 moneys until the other programs have been disposed of because there are not sufficient state funds available to match all of the federal moneys. The best hope the Commission can offer for this project, he added, is consideration in the 1940 program, but no promise with respect thereto can be made at this time.

Mr. Convill then urged the Commission to acquire the balance of the right of way for the project, stating that the property owners cannot develop their waterfront holdings until they know how much land the state intends to take for right of way and the limits defined. It was his thought that this right of way can be acquired now at considerably less expense than later on. He was informed by Chairman Cabell that the acquisition of right of way is dependent on cost and that the Commission does not consider it a good practice to acquire it too far in advance of construction. However, the Commission will have the matter investigated.

Mr. Convill also asked the Commission to build a temporary road on permanent alignment so as to allow the Columbia River Packers Association access to its cannery on Astor Street. He presented a letter from Mr. W. L. Thompson, Chairman of the Association, urgently requesting such improvement. The Commission referred this matter to the Engineer for investigation and report at its next meeting. The Attorney was instructed to render a report on the right of way situation at the same meeting.

A delegation consisting of Harold E. Eakin, Cleo Morelock, L. J. McCoy, Vinal T. Randall and C. S. Roberts, representing the South Lane-North Douglas 99 Highway Improvement Association, came before the Commission and urged the improvement of the Pacific Highway between Creswell and Drain and particularly the construction of the proposed revision through the town of Cottage Grove. They advised that the development of private property along the new location in Cottage Grove cannot proceed until the proposed improvement is made, and urged the Commission to give the project consideration for early construction.

Mr. Eakin filed with the Commission, in support of their oral request, resolutions from the Cottage Grove Chamber of Commerce, the South Lane-North Douglas 99 Highway Improvement Association, and the City of Cottage Grove and a petition signed by more than 500 members of the association who are particularly desirous for the immediate improvement of the Pacific Highway between Creswell and Drain.

Chairman Cabell explained the condition of the Commission's finances and advised that the earliest hope that can be given for this project is in the program for the fiscal year 1940 funds which the Commission hopes to place under contract sometime this fall or winter. He further advised that the Commission is sympathetic to the project but it is simply a question of funds, and, while the Commission will consider it in the 1940 program, it is not making any definite commitment or promises in regard thereto at the present time.

A delegation from Rainier, representing the Rainier Commercial Club and consisting of E. E. Rosebraugh and W. E. Proctor of Rainier, J. D. Perry of Deer Island, and Roy C. Avrit of Prescott, came before the Commission and urged the improvement of the Lower Columbia River Highway between Prescott and Rainier, particularly the Little Jack Falls Section. They suggested that it would be advantageous to start any further improvements on this highway at the Prescott end rather than at St. Helens, and work toward St. Helens.

Chairman Cabell explained the condition of the Commission's finances and advised that, while the Commission appreciates the necessity and desirability of the improvement of the highway in the vicinity of Little Jack Falls, it believes its first obligation is to provide a modern road between Portland and St. Helens because of the heavy volume of traffic between these places.

Messrs. C. D. Long, representing the Klamath Falls Building Trades Council, and John O'Neil, representing the Structural Iron Workers Union, Portland, came before the Commission relative to the adoption of standard wage rates for labor employed on state highway construction work. Mr. Long urged the Commission to adopt the wage schedule provided in the agreement between the American Federation of Labor Union and the Portland Branch of the Associated General Contractors of America, except that, where such rates are lower than the minimum now specified by the Commission in its contracts, the minimum rates specified by the Commission for such labor should be maintained.

Chairman Cabell advised that the Commission has not yet made a decision in regard to this matter but expects to do so within the near future; in fact, the matter will be decided so that the new rates, if any are adopted, will be inserted in the specifications for the work on which the Commission expects to receive bids at its next regular meeting in May.

Mr. Howard Merriam, President of the Oregon Pacific Highway Association, headed a delegation consisting of C. H. Demeray of Grants Pass; Paul Rynning, County Engineer of Jackson County; A. C. Marsters, Roseburg; and Carl Rynearson, Eugene, which appeared before the Commission as a matter of courtesy to thank the Commission for the improvements heretofore made on the Pacific Highway. Mr. Demeray asked particularly concerning the Commission's plans for the improvement of the Pacific Highway just south of Grants Pass. He stated that the deferment of this project by the Commission is handicapping the development of property in this district and urged the Commission to include it in its 1940 construction program. Chairman Cabell advised that, while the Commission cannot make any definite promises at the present time as to the 1940 program, the project referred to will be considered in the formulation of such program.

APR 6 1939

A delegation from Tigard, consisting of Mrs. Zelda Floeger, Mr. and Mrs. Claude I. Scoffins, Maude Scoffins, J. B. Beckham, John Schackla, Charles V. Wallace, S. P. Harris, Mrs. Julia Lower, Mrs. Carl Riverman, W. O. Jeffs, E. C. Hunsiker, Mrs. Thomas Hing, Mr. and Mrs. R. Forsman, and Mr. and Mrs. C. A. Anderson, came before the Commission and presented arguments in behalf of the adoption of what is known as the southern route for the proposed revision of the Pacific Highway West through the town of Tigard. Mr. Scoffins headed the group and introduced the speakers. They urged the adoption of the southern route from the standpoint of cheaper construction, straighter alignment, and safety to school children. It was their thought that the right of way for the southern route could be obtained much cheaper than that for the northern route; also, that the cost of constructing the southern route would be less than that for the northern route and that the alignment of such route would be much straighter than that of the other. They particularly protested against the adoption of the northern route because it would place the highway in such close proximity to their churches and public schools, thus creating a hazard for school children who would be required to cross the highway several times each day.

Mr. Hunsiker spoke in favor of the southern route as a member of the school board. He particularly pointed out the difficulties in keeping the school children off the highway during noontime and recreational periods.

Mrs. Floeger said that she has a selfish interest in securing the adoption of the southern route, but she does not blame the businessmen of Tigard for favoring the northern route, although, in her opinion, their businesses will not be hurt any more by the adoption of the southern route than they would be by the adoption of the other route. She declared that the noise created by traffic passing the public schools would be quite annoying to the pupils and gave as her thought that their minds would be less distracted from their studies if the highway were constructed farther away from the school building. She also said that there is a moral side to be considered in the question of highway location, which she believed would outweigh the financial side.

Several others spoke in behalf of the southern route, their remarks being endorsements of the arguments presented by the other speakers.

Chairman Cabell outlined the Commission's policy of selecting highway routes, stating that, where the general public is equally or nearly equally served by one route as by another but where one route is much more beneficial to local interests than the other, the Commission is inclined to favor the local interests; but, where the general traveling public is greatly inconvenienced by one route and local interests are not greatly injured by the adoption of the other route, then the Commission is inclined to favor the route which is more beneficial to the general public. He added that the expressions received from the proponents of both routes in Tigard indicate that most of the people who have existing investments there prefer the northern route; and, unless the benefits that the general traveling public would receive by the adoption of the southern route greatly outweigh the business interests, then it would seem that the Commission should favor the northern route. However, the Commission has not yet formulated an opinion on the

subject and is not in a position today to make a definite decision.

A delegation from Tigard, consisting of people who favor the adoption of the northern route for this highway, also appeared before the Commission at this time. This delegation was headed by Mr. Tom Tongue, Attorney, Hillsboro, and included A. R. Ritter, Leo Gray, Frank J. Twiss, H. P. Vermilye, A. P. Talent, Mr. and Mrs. F. E. Bolich, Peter Potwin, Dan Berdar, W. M. Evans, Emil A. Johnson, C. L. Chilson, C. A. Dornally, Leonard Gamrath, W. I. Lacey, and Albert Hoffarber. Mr. Tongue was spokesman for the group and reiterated arguments for the group in behalf of this route.

He particularly mentioned that people who are interested in the northern route have created values which they are trying to preserve, whereas people who are interested in the southern route do not have such values and are attempting to have these values created for them by the State Highway Commission. He alleged that most of the people who appeared in favor of the southern route have their business interests in Portland and merely reside in the town of Tigard as a matter of convenience because they have property there that they want to dispose of.

Chairman Cabell concluded the hearing by stating that the Commission regrets that the decision in this matter has been delayed so long, but, he explained, the Commission wants to be sure that the route that it selects is absolutely correct before adopting it, which takes time and careful study. He added that the question will be settled as quickly as possible and indications are that it will be a matter of weeks only, rather than months, before a decision is made.

Mr. Cecil Armitage, Midway, headed a delegation consisting of Julius Christenson, Frank O. Nelson, and Fred A. Nelson, of Midway, and Carl Russell of Hillsboro, which urged the Commission to oil the Scholls-Campbell's Bridge Section of the Hillsboro-Woodburn Secondary State Highway in Washington County. They asked the Commission for any kind of oil treatment that would allay the dust nuisance that now obtains during the dry season, and advised that this section is only about 5 miles in length and that the oiling of the same will provide them an oiled-surface road the entire distance into Hillsboro.

Chairman Cabell advised that it is the desire of the Commission to complete such gaps in state highways as soon as funds will permit and in this particular instance the Commission will instruct the Engineer to investigate the project and report to the Commission at its next regular meeting in May as to the probable cost to apply a light oil treatment. He added that if this report is favorable, the Commission may order the work done, although no definite commitment or promise can be made at this time.

Mr. Christenson then inquired as to whether or not it will be necessary to realign this highway. He explained that he is interested in securing electrical service for use on his farm, and that the Portland General Electric Company, which is to furnish such service to him, would like to install its poles in the proper location on the permanent highway alignment, regardless of when the highway is constructed, so as to avoid the expense of replacing them

APR 6 1939

at some future time. The Engineer was instructed to investigate this matter at the same time that he looks into the oiling project and report his findings to the Commission at the May meeting, such investigation to be made in company with Mr. Armitage and Mr. Russell.

The Commission adjourned at 6:00 o'clock p. m., to reconvene at 9:00 o'clock a. m. on the following day in the same room.

Portland, Oregon, April 7, 1939

The State Highway Commission reconvened at 9:00 o'clock a. m. in the auditorium of the Public Service Building with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present.

Bids as follows on highway construction projects were opened and read in conformance with previously published notice:

CAPE ARAGO SECONDARY HIGHWAY
CHARLESTON-SUNSET BAY SECTION - GRADING, SURFACING, OILING

Leonard & Slate	\$ 36,845.00
Coos Bay Dredging Company	36,923.25

NORTH UMPQUA COUNTY ROAD
DIXONVILLE-MUD HOLLOW SECTION - GRADING, SURFACING, OILING

Clifford A. Dunn	\$ 27,870.00

HURRICANE CREEK COUNTY ROAD
SCOTCH CREEK-CASTOR RANCH SECTION
GRADING, SURFACING, OILING, CRUSHED GRAVEL

Rogers Construction Company \$ 22,731.00

Chairman Cabell announced that awards of contracts would be made at 3:00 o'clock p. m. in the same room.

Mr. George Aiken, Mayor, Ontario, Oregon, came before the Commission relative to a proposed shortcut route for the Old Oregon Trail between Ontario and Olds Ferry. The Engineer advised that the reconnaissance survey of this section has been made but he wants to personally inspect the project on the ground before reporting same to the Commission. He gave as his thought that it would be advisable, in view of the scarcity of highway funds, to spend the state's money for the completion of the improvements that are planned for the present highway before starting on an entirely new project. Mr. Aiken concurred.

Mr. Aiken then inquired as to the Commission's plans for the completion of the oiling of the Central Oregon Highway and was informed that the Commission has this project in mind and contemplates giving it first consideration in the formulation of the program for the fiscal year 1940 funds, although, on account of costs involved, it may not be possible to do all of the work under one contract. The prediction was made that the Central Oregon Highway will be oiled in its entirety by the fall of 1941.

The Tillamook County Court, represented by County Judge Harland M. Woods and County Commissioners E. H. Lindsey and E. G. Anderson, came before the Commission relative to the improvement of the Little Nestucca Secondary Highway. They were accompanied by Mr. Tom Dolan, President of the Tillamook Chamber of Commerce, and Messrs. Jacob Reddicopp, H. B. Hamill, and S. D. Hammond, representing the Southern Tillamook County Chamber of Commerce; also a Mr. Muscott, a rancher who resides along this road.

The delegation was informed that the Commission had this matter under consideration at its previous meeting, at which time the Engineer reported on the cost to construct this highway to modern standards throughout and

APR 7 1939

to do a minimum amount of work to put the road in passable condition for local use. It was explained that to do a good job would cost about \$300,000, whereas a temporary job would cost about \$74,000; also, that in view of the high cost involved, the Commission considered that it could not finance either of these improvements, although an expenditure of about \$8,000 was authorized for the construction of three temporary bridges and for a small amount of grading work which it was thought would do as a temporary expedient.

Mr. Muscott urged a small amount of work along the road past his premises. He said that the present condition of the road is such that it is passable during the summertime only but could be made passable for all-year travel at small expense, probably not to exceed \$500. He urged such improvement, as did also County Commissioner Anderson. Mr. Anderson stated that Tillamook County would cooperate by assisting in getting out the rock when the bridges are completed. After further discussion the Commission authorized an expenditure of \$10,000 this year for the improvement of this road as far as such amount will go. Chairman Cabell advised that if Tillamook County will agree to assist in this work, as was mentioned by Commissioner Anderson, then the state might spend a little more than \$10,000 for this purpose, although the Commission is not making any promise to that effect at this time. A definite decision in this regard, he said, will be given after the bridges are completed and the Commission has had an opportunity to inspect the project.

Mr. Dolan brought up for discussion the matter of routing the Wilson River Highway into the city of Tillamook, and the improvement of such route. He gave as his thought that the Commission should give this matter serious consideration now, inasmuch as this highway will probably be completed within the next two or three years and will carry a large amount of traffic which will be greatly inconvenienced unless the present routing is changed. He suggested that the work be done as a P.W.A. project if the Commission cannot finance it in some other manner. County Commissioner Lindsey urged the working up of a definite plan, at least, so that private property can be developed in accordance therewith. They were informed by Chairman Cabell that the Highway Commission is now concentrating on the construction of the highway toward Glenwood and it appears to the Commission that this portion of the work should be completed before the entrance into Tillamook is started, in view of the fact that the present route is passable and adequate to take care of present-day traffic. However, the Commission will be pleased to keep this project in mind for consideration at the proper time.

Commissioner Lindsey also asked for the surfacing and oiling of the completed portion of the Wilson River Highway. He advised that present indications are that the grade up to the summit will be completed by this fall and, in his estimation, it would be desirable to have the surfacing and oiling work done at the earliest possible time. He also asked for the construction of a bridge over Wilson River at the third crossing, east of Tillamook, and pointed out that extensive logging operations are being carried on in this district and a new bridge is essential at this point. He declared that an emergency exists because the timber that is being removed is that which was burned in the forest fire of 1933 and must be taken out within a comparatively short time. He was informed that there are no funds budgeted in the 1939 program

for this structure but that it would be considered in the program for the 1940 fiscal year federal aid funds, which program will probably be arranged some time this fall or winter. He was also informed that the Commission would inspect this project the next time it is in the vicinity of Tillamook, which will probably be soon, but in the meantime the Commission would like to have a letter from the Tillamook County Court stating the reasons why a new bridge is needed now, the idea being that the Commission would give this matter special consideration in the event a real emergency exists.

A delegation from Reedsport, consisting of Messrs. William Lovelace, William Burdick, and Frank Taylor, came before the Commission in regard to the improvement of the Umpqua Highway through Reedsport, particularly the section between 12th Street and 15th Street. Mr. Lovelace headed the group. He stated that the city is particularly anxious to have this section constructed to modern standards as soon as possible and to that end is willing to cooperate by constructing curbs and sidewalks if the state will establish grades and set stakes. The delegation was informed that the Commission considers this a meritorious project but is unable, on account of lack of funds, to construct it this year, although it will be considered in the formulation of the construction program for the 1940 funds. The Assistant Attorney advised that right of way for this project has all been acquired with the exception of that which involves the remodeling of a concrete garage building and one other small tract. After discussion, the Commission instructed the Engineer to investigate the project and render a complete report thereon at the next meeting.

The matter of installing a floodlight at the crossing of the highway with the Southern Pacific Railroad in Reedsport was also discussed. It was explained that the Commission has already authorized the installation of such floodlight, provided the city will pay the cost of the electricity to operate the same, which is estimated at \$5.00 per month. Mr. Lovelace advised that he is not in a position to commit the city in this matter but would take it up with the city council upon his return and would let the Commission know within a few days what the city would do.

Following the appearance of this delegation the Engineer reported on the cost to pave the Umpqua Highway in Reedsport between 12th Street and 15th Street. He estimated the cost of the type B-2 bituminous macadam at \$14,100 and for paving with concrete pavement at \$27,800. He recommended the adoption of the concrete-type pavement, notwithstanding that it is more expensive. The Commission approved the recommendation.

The Commission had under consideration the following requests for the installation of traffic lights at certain highway intersections:

Request of the city of Seaside for the installation of a flashing beacon at the intersection of the Oregon Coast Highway with Broadway Street in Seaside. The Commission approved this installation, which the Engineer estimated would cost about \$200.

Installation of a floodlight at the intersection of the Umpqua Highway and the Southern Pacific Company's tracks in Reedsport, estimated to cost

APR 7 1939

\$200. The Commission approved this installation subject to the condition that the city of Reedsport will pay the cost of the electrical energy required to operate the same.

Request of the city of Carlton for the installation of an overhead flashing beacon at the intersections of the Pacific Highway West with Pine Street and with Yamhill Street in that town. The Engineer estimated the cost of these installations at \$400 and recommended approval of the same. The Commission approved the recommendation unanimously.

Request of the city of Rainier for the installation of an overhead flashing beacon at the intersection of the Columbia River Highway with "B" Street in that town. The Engineer recommended such installation, which he estimated would cost \$200. The Commission approved the recommendation unanimously.

Request of the Roseburg Chamber of Commerce for the installation of a traffic light at the intersection of the Pacific Highway with the Garden Valley County Road, just north of Roseburg. The Engineer advised that to properly safeguard this intersection would require a flashing beacon and a floodlight, which he estimated would cost \$350. He recommended against the installation for the time being. The Commission approved the recommendation unanimously.

The Commission also discussed the matter of paying for the electrical current needed for operating the floodlight which has already been installed at the crossing of the Pacific Highway with the Southern Pacific Railroad, in Roseburg. The Assistant Attorney pointed out that the city council, during the Public Utilities Commissioner's hearing with respect to this railroad grade crossing, agreed to pay for the operation of the light, in view of which the Public Utilities Commissioner imposed such obligation upon the city, but the city has continuously refused to pay this account. After discussion, the Commission instructed the Attorney to keep a record of the electrical bills for the operation of this light and present them to the city of Roseburg at some future date, through the Roseburg Chamber of Commerce.

The Engineer requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with the prices that he recommended be paid for each. After careful consideration, the Commission approved the request and, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which

options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Assistant Attorney reported an offer from Mr. G. S. Smith, Portland, to purchase certain state-owned property adjacent to Interstate Avenue, in Portland. In the discussion of this matter it was pointed out that throughout the state there are many small parcels of land adjacent to state highway

rights of way that are of no particular value for highway purposes. It was the Commission's thought that these parcels should be sold so as get them back on the tax rolls, and that such sales should be given considerable publicity as are highway construction projects and the sale of buildings. While the Commission appeared inclined to favor the adoption of such procedure as a general policy to be followed in such matters, definite action to that effect was deferred until a future date. The offer of Mr. Smith for the Portland tract was thereupon declined.

The Attorney reported difficulties in acquiring the following parcels of land that are needed for highway improvements:

Right of way needed from H. E. McGraw for the improvement of the Buxton-Manning Section of the Wolf Creek Highway, right of way transaction No. 6254:- He estimated the value of this property at \$3,476 and advised that the owner is demanding \$4,000 for the same and that the state pay one-half the cost of building a certain fence. The Commission instructed the Attorney to limit his offer to \$4,000 and to condemn the same if the offer is refused.

Right of way needed for the Charleston-Cape Arago Section of the Cape Arago Secondary Highway, in Coos County, across the land of the First National Bank of Portland and W. J. Conrad, right of way transaction No. 6732, and across the land of the Nick Bastendorff heirs, right of way transaction No. 6730:- He said that the First National Bank is demanding \$1,000 per lot for its property, which price, in his estimation, is exorbitant. He recommended payment not to exceed \$250 per lot or that the property be acquired by condemnation. Mr. Bastendorff, he said, is asking \$1,000 for the 3/4 acre that the state is taking from him. He suggested payment of not to exceed \$500 and that the state construct a fence in addition thereto; otherwise, that the property be acquired by condemnation. The Commission by unanimous vote approved such offers and authorized condemnation in the event the offers are refused.

The Attorney also reported that it is necessary to institute condemnation proceedings to clear title to right of way that is needed for the improvement of the John Day-Prairie City Section of the John Day Highway, in Grant County, across land owned by the heirs of the Ruth Hiatt estate. The Commission authorized such condemnation proceedings.

The following resolution authorizing the Attorney to condemn the properties hereinabove discussed was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

APR 7 1939

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Charleston-Cape Arago Section of the Cape Arago Highway
Buxton-Manning Section of the Wolf Creek Highway
John Day-Prairie City Section of the John Day Highway

land and property owned by or in possession of the following parties and/or persons, to wit:

Charleston-Cape Arago Section of the Cape Arago Highway
6732-First National Bank of Portland and W.J. Conrad
6730-Nick Eastendorff heirs (Bennett Swanton and
Georgeana Rozell, Trustees)
Buxton-Manning Section of the Wolf Creek Highway
6254-H. E. McGraw
John Day-Prairie City Section of the John Day Highway
4883-Ruth Hiatt heirs

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Commission adjourned at 12:00 o'clock noon and reconvened at 1:30 o'clock p. m. in the same room, with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

The Engineer reported on the cost to improve the Territorial Secondary Highway between Ferguson and Cheshire, in Lane County, which project has been requested by the Long Tom Grange No. 866, of Junction City. He advised that this improvement is 4.8 miles in length and that it would cost approximately \$127,000 to finance it. The Commission considered this too costly a project to consider at this time, in view of the shortage of funds.

The Engineer reported the results of a hearing with respect to the claim of W. H. Kellogg, who seeks extra compensation for overtime employment with the State Highway Department. He advised that as a result of this hearing Mr. Kellogg agreed to withdraw his claim in the amount of \$95.20 for alleged overtime in connection with his employment on the Road Use Survey and has also agreed to reduce his claim for overtime while employed as a material checker from \$418.59 to \$389.43. He recommended settlement with Mr. Kellogg on such basis, in view of the fact that the state received actual financial benefit because of the overtime work, provided Mr. Kellogg will sign a statement releasing the state in full from further obligation. The Commission approved the recommendation unanimously.

The Engineer reported that, in conformance with instructions previously given him by the Commission, he contacted the County Court of Benton County relative to the improvement of one of Benton County's roads in lieu of the designation as a secondary state highway, and oiling, of the Corvallis Golf Club road, and as a result the County Court has agreed to oil this road and suggests that the state improve, as a federal aid secondary highway, the county road which extends from North Albany to the Polk County line south of Buena Vista. He gave as his thought that this road will qualify as a federal aid secondary

APR 7 1939

highway and recommended the oiling of the same in the federal aid secondary highway program because it will connect with the federal aid secondary road from Independence through Buena Vista which was improved with an oil mat surface treatment last year. The Commission approved the report and ordered that this project be listed with others for consideration in the formulation of the construction program for 1940 federal aid secondary highway funds.

The Engineer also reported on his investigation of the request of the Union High School District of Estacada for the improvement of the secondary state highway in front of the high school grounds at Estacada. He advised that this project requires about 1,350 feet of 13" pipe, which would cost approximately \$2,025; 3 catch basins at \$60; 400 cubic yards of excavation at \$4.00; and 350 cubic yards of crushed rock or gravel at \$7.00; or a total of \$3,185. He also advised that he explained to the school authorities the status of the Commission's finances, which he did not think would permit the Commission to finance a project costing so much at this time, and suggested that they endeavor to have the work done as a W.P.A. project, the possibilities of which they agreed to investigate. After discussion, the Commission decided not to make this improvement because of the cost involved. A decision as to whether or not the Commission would cooperate with the school authorities in a W. P. A. Project was deferred until later.

A petition was presented from 421 taxpayers of Central Oregon, in which the State Highway Commission was urged to complete the reconstruction of the Sherman Highway between Shaniko and The Dalles-California Highway junction at the earliest possible time. The Engineer advised that this project is about 10 miles in length and that the work will cost approximately \$140,000. The Commission ordered the project kept in mind for consideration in the formulation of the 1940 budget.

A letter was presented from Mr. W. T. Putnam, Hillsboro, urging the oiling of the Farmington Secondary Highway from Hazeldale to a connection with the Hillsboro-Woodburn Secondary Highway, in Washington County. The Commission ordered this project included in the list of those to be considered in the formulation of the 1940 program.

The Commission had under discussion the scheduling of public hearings in Reedsport, Bend, and Prineville, as required by law, to secure expressions from the people in those towns relative to the proposed rerouting of state highways. The Commission deferred the setting of a date for the Reedsport hearing but decided to hold hearings in Prineville and Bend on Wednesday, May 17, 1939, that in Prineville to be held at 9:00 o'clock a. m. and that in Bend at 11:00 o'clock a. m., which would give the Commission sufficient time to return to Portland the same day. The Secretary was instructed to send official notification of such hearings to the city councils of Prineville and Bend.

The Commission by unanimous vote authorized the State Highway Engineer to attend the Fifth Pacific Northwest Regional Planning Conference which is to be held in Seattle, Washington, on April 27, 28, and 29, 1939, subject to approval by Governor Sprague.

APR 7 1939

The Engineer reported that the following highways have sufficiently dried out to permit the transportation thereover of legal weight loads, and recommended the lifting of the reduced load limits heretofore in effect:

Crater Lake Highway, from Medford to the west boundary of Crater Lake National Park;

The Dalles-California Highway, from Crater Lake Highway junction to Klamath Falls;

Klamath Falls-Lakeview Highway, from Klamath Falls to Lakeview;

Mt. Hood Highway, from the junction with the road to Cloud Cap Inn to the junction with the Columbia River Highway.

The Commission approved his recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 2nd day of March, 1939, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted resolutions reducing the maximum load limit on the following state highways:

CRATER LAKE HIGHWAY from Medford, in Jackson County, to the west boundary of Crater Lake National Park, in Jackson County;

KLAMATH FALLS-LAKEVIEW HIGHWAY from the junction with The Dalles-California Highway, to Lakeview, in Klamath and Lake Counties;

MT. HOOD HIGHWAY from Hood River, in Hood River County, to Cloud Cap Inn, in Hood River County;

THE DALLES-CALIFORNIA HIGHWAY from Bend, in Deschutes County, to Klamath Falls, in Klamath County;

and

WHEREAS, subsequent to the passage of said resolutions, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limits set out in said resolutions on the said state highways;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

CRATER LAKE HIGHWAY from Medford, in Jackson County, to the west boundary of Crater Lake National Park, in Jackson County;

APR 7 1939

KLAMATH FALLS-LAKEVIEW HIGHWAY from the junction with The Dalles-California Highway, to Lakeview, in Klamath and Lake Counties;

MT. HOOD HIGHWAY from Hood River to Cloud Cap Inn Road, in Hood River County;

and on that portion of

THE DALLES-CALIFORNIA HIGHWAY from the junction with the Crater Lake Highway at Fort Klamath to Klamath Falls, in Klamath County (from Ft. Klamath to the junction with the Fremont Highway the load limit as fixed in said former resolution shall remain in full force and effect until removed by order of the State Highway Commission);

be and the same is hereby rescinded and cancelled as of this date, and the maximum load limit permissible on the said sections of the said highways hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which said highways are located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Commission also approved the posting of the Cottonwood Bridge over the John Day River, between Sherman and Gilliam Counties, for a reduced load limit of 5 tons in view of the fact that high water has torn out the temporary timber supports beneath this structure. The Engineer was instructed to replace these supports as soon as possible and when that is done to restore the 10-ton load limit heretofore in effect.

The Commission considered and approved an additional authorization for the W.P.A. beautification project on the Canyon Road, Portland, involving a total expenditure of \$30,000, of which amount the state's share is approximately \$5,300.

The Engineer brought up for discussion the matter of constructing maintenance buildings for the accommodation of men working out of the Government Camp and Hogg Pass headquarters. He explained that the present headquarters at Government Camp are not adequate and will have to be enlarged some time in the future although that is not an immediate necessity; however, with the opening of the North and South Santiam Highways this year for general public use, provision must be made to keep these roads open during the winter season and that cannot be done unless facilities are provided for housing the men and equipment at a convenient point, which, in his estimation, would be at the summit at Hogg Pass. He estimated the cost of appropriate facilities to accommodate about 36 men at Government Camp and approximately 20 men at Hogg Pass at between \$50,000 and \$60,000 each. This matter was discussed at

APR 7 1939

considerable length but a decision in regard thereto was deferred until a future meeting.

Messrs. Earl J. Knutson and Glenn D. McNeilly, of the California Western States Life Insurance Company, came before the Commission relative to the furnishing of group insurance for highway department employees who are paid on an hourly basis. Mr. Knutson explained that, as a result of a previous conference with the Commission on this subject, he contacted 625 highway department employees to determine whether or not they would be interested in a proposition of this kind, and as a result of such solicitation he has received applications from 573 of such employees, which indicates that there is a strong demand for insurance of this kind. He explained that these applications were secured upon only 10 days' solicitation on his part, covering only a portion of the state, and it was his belief that many others would take advantage of this offer if they were given an opportunity. In support of his oral statements he exhibited signed applications from the 573 employees. In view of this showing, the Engineer recommended the acceptance of the company's offer to write this group insurance, premiums for which are to be deducted monthly from the highway department pay rolls. The Commission by unanimous vote approved the recommendation and authorized the making of such deductions from the monthly pay rolls, subject to the condition that the entire matter be covered by appropriate agreement and with the understanding that other companies which write similar insurance be given the same privilege.

Messrs. Morris D. Parks, Mayor of the town of Dundee, and W. S. Allan, former County Commissioner of Yamhill County, came before the Commission in regard to the improvement of the Pacific Highway West through the town of Dundee. Mr. Allan, who was spokesman, recalled that the Commission tentatively approved this improvement about a year ago for 1939 construction, and stated that they are simply appearing before the Commission at this time to urge that the work be done this year if possible. Chairman Cabell explained the status of the Commission's finances and advised that it does not now appear possible to contract this project until fall because of shortage of state funds to match the federal moneys with which the project is to be financed. He assured Mr. Allan that the project is definitely in the construction program for 1939 funds but the question of contracting of the work simply depends upon when there are sufficient state funds available to match the federal moneys.

Messrs. Burke and Walter Kanne, of Milwaukie, Oregon, came before the Commission and urged additional improvements on the 82nd Street Highway (Cascade Secondary Highway) south from Portland. They were advised by Chairman Cabell of the status of the Commission's finances and that on account of the shortage of funds it will not be possible to do any more work on this road this year. Further, that the first available money will be that which the Commission expects to receive from the Federal Government for the fiscal year 1940; and, while this project is not on the priority list, it will be given consideration by the Commission in the formulation of the construction program for such funds, although no promise or commitment can be made at the present time.

The Engineer requested instructions relative to disposal of two

APR 7 1939

small houses located on the right of way of the Corvallis-Newport Highway about 2 miles east of Toledo. He said that these buildings are not of much value and are worthless from the State Highway Department's standpoint and that he has received an offer from a prospective purchaser who is willing to pay \$20 for them. He inquired whether or not he should accept this offer or advertise the buildings for sale in the regular manner. The Commission took the view that the sale of the buildings should not be made upon receipt of only one offer, and, if the buildings are not advertised for sale in the usual manner through the newspapers, at least signs should be posted on the property for a reasonable length of time notifying the general public that the buildings are for sale. The Attorney was thereupon instructed to post such notices on the property under discussion and report the offers received at a future meeting of the Commission.

The Attorney also requested instructions relative to the sale of a 5-room house located on right of way acquired for the West Portland-Hubbard Secondary Highway, in Washington County, which house was formerly owned by one George S. Smith. He was instructed by the Commission to advertise this building for sale through the local newspapers.

The Attorney brought up for discussion a proposed change in the plans for the construction of the East Portland-Oregon City Highway in front of property owned by the Hawley Paper Company and Bessie Fudge at 11th Street, in Oregon City. It appears that the private property in question is somewhat lower than the grade of the highway and that present plans call for the construction of a retaining wall to prevent the highway fill from sliding beyond the right of way limits. However, the owners of the adjacent property want their properties filled in to a level with the highway and have stated a willingness to let the state do this at no expense, which will eliminate the necessity of the retaining wall. The Engineer gave as his thought that this is a good offer, and recommended acceptance of the same, which, he said, would save the state some \$2,000 for the retaining wall. The Commission approved the recommendation unanimously and referred the matter to the Engineer to work out the necessary details.

A delegation from Multnomah County, consisting of the Board of County Commissioners, Messrs. O. V. Bailey, C. A. Bigelow, and F. L. Shull; Paul M. Ruder, Albert S. Hall, William Eberhart, Ben Howell, W. S. Copeland, Omar C. Spencer, and Kenneth L. Cooper, came before the Commission in regard to the construction of a bridge over Multnomah Channel of the Willamette River, connecting Sauvie Island, below Linnton, with the mainland. Mr. Howell advised that Sauvie Island is now connected to the mainland by ferry only, which at certain times is overtaxed by traffic, and that a bridge at this location is an absolute necessity. He pointed out that a reclamation project is now under way to reclaim some 12,000 acres of land on this island and when completed will emphasize the need for a bridge. He advised that their mission before the Highway Commission today is sponsored by the Multnomah Grange and that they have already secured a permit from the U. S. War Department for a bridge at this location. Others speaking on behalf of this project were Messrs. Spencer, Cooper, and County Commissioners Shull and Bigelow.

Chairman Cabell advised that the road to Sauvies Island is not on the state highway system, so the Commission has no legal authority to spend state money to improve it; also, that the Commission is under great pressure to construct projects that are now on such system, so is reluctant to assume any new obligation. He added that the Commission does not want to deny this project flatly without investigation, but, on the other hand, it does not wish to give too much encouragement, because it does not seem possible now for the Commission to take this road over as a state highway. Commissioner Bigelow advised that their immediate concern is for an investigation and survey of the project and he urged the Commission to do this. After further discussion, the Commission authorized the State Highway Engineer to make such preliminary investigation as soon as possible, to determine whether or not the site proposed for the bridge is proper, and approximately what the project will cost.

At 3:00 o'clock p. m. Chairman Cabell announced the following awards of contracts for which bids were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Charleston-Sunset Bay Section of the Cape Arago Secondary Highway, in Coos County. 1.05 miles grading and surfacing, 2.54 miles oiling. Leonard & Slate, Multnomah, were the low bidders on this job with their bid of \$36,845.00. Coos Bay Dredging Company, Marshfield, were the second low and only other bidders at \$36,923.25. The Commission has referred both bids to the Engineer with authority to award the contract to the low bidder, Leonard & Slate, when certain conditions have been fulfilled.

"Dixonville-Mud Hollow Section of the North Umpqua County Road, in Douglas County. 1.43 miles grading, 1.02 miles surfacing, and 3.22 miles oiling. The only bid received for this project was that of Clifford A. Dunn, Klamath Falls, at \$27,870.00. The Commission has referred this bid to the Engineer with power to award the contract to Mr. Dunn when certain conditions have been fulfilled.

"Baker Gulch-Lick Creek Section of the Little Butte Secondary Highway, in Jackson County. 0.81 mile grade widening, 3.3 miles surfacing and oiling; also furnishing approximately 1,160 cu. yds. crushed rock in stock piles. The low bid received for this project was that of Clifford A. Dunn, Klamath Falls, at \$27,829.00. The next low bid was submitted by R. I. Stuart & Sons, Medford, at \$31,417.00. There was one other bidder. The Commission has awarded this contract to the low bidder, Clifford A. Dunn, at his bid of \$27,829.00.

"Hooker Creek-Jordan Valley Section of the Jordan Valley Secondary Highway, in Malheur County. 5.24 miles grading. H. L. O'Neil & Son, Jordan Valley, submitted the low bid for this project at \$21,988.00. The next low bid was submitted by Leonard & Slate, Multnomah, at \$25,848.00. There were 3 higher bidders. This job has been awarded to H. L. O'Neil & Son at their low bid of \$21,988.00.

APR 7 1939

"Tillamook County Oiling Project on three county roads in the vicinity of Tillamook, in Tillamook County. 0.7 mile grading and 4.71 miles surfacing and oiling. The low bid received for this project was that of J. C. Compton, McMinnville, at \$26,591.20, based on the use of tar. He submitted no bid based on the use of asphalt. Warren Northwest, Inc., Portland, submitted the second low bid at \$26,623.50, also based on the use of tar. This firm did not submit a bid based on the use of asphalt. There was one higher bidder. The Commission has awarded this contract to J. C. Compton at his low bid of \$26,591.20, using tar.

"Mills Bridge Section of the Wilson River Highway, in Tillamook County. Construction of a bridge over Wilson River and grading, surfacing, and oiling approaches thereto. Jacobsen-Jensen Company of Portland submitted the low bid of \$67,552.50, based on the use of tar. Mountain States Construction Company of Eugene submitted the second low bid of \$69,692.00, also based on the use of tar. Neither of these firms submitted a bid based on the use of road oil. There were 5 higher bidders. The Commission has awarded this contract to the low bidder, Jacobsen-Jensen Company, at their bid of \$67,552.50, using tar.

"Scotch Creek-Castor Ranch Section of the Hurricane Creek County Road, in Wallowa County. 2.0 miles grading, surfacing, and oiling; also, furnish approximately 2,000 cu. yds. crushed gravel in stock pile. The only bid submitted for this project was that of the Rogers Construction Company, Dayton, Washington, at \$22,731.00. The Commission awards this contract to the Rogers Construction Company at their bid of \$22,731.00."

Mr. Roy Bowman of Florence, Oregon, came before the Commission in regard to the oiling of a number of city streets in Florence. He advised that the city would like to have about 6,700 lineal feet of oiling work done on its streets this year and inquired whether or not it would be possible to secure the services of the State Highway Department's oiling crew to do this work if the city will pay the costs involved and will deposit a certified check in advance for an amount equal to the estimated cost of the work. Chairman Cabell gave as his thought that this job is of such magnitude that it really belongs in the contract class, although, he added, he would be inclined to favor the state doing the work if the estimated cost does not exceed \$2000, which is the limit to which the state can go without taking bids. He suggested that it might be advisable for the city to contact some of the highway contractors who do work of this kind, and also the Lane County Court, which, he believed, is equipped to do oiling work. Commissioners Aldrich and Clough concurred in the Chairman's remarks, whereupon the Engineer was authorized and instructed to make an investigation of the project and determine the estimated cost of the same.

The Engineer brought up for discussion the matter of landscaping the north approach to the Yaquina Bay Bridge at Newport. He submitted a plan for such project which, he advised, has been approved by the Newport City

Council. He recommended approval of the project and that it be financed with federal aid funds that must be expended for landscaping purposes. The Commission approved the recommendation by unanimous vote and instructed the Engineer to submit this project to the Bureau of Public Roads for approval.

The Commission had under discussion the offer of Albert Myers, of Mehama, to sell to the state for \$1,200 a tract of land containing approximately 30 acres located in the N.W. $\frac{1}{4}$ of the S.E. $\frac{1}{4}$ of Sec. 14, T. 9 S., R. 1 E., W. M., about 1 $\frac{1}{2}$ miles west of Mehama, Marion County. The Engineer advised that the North Santiam Secondary Highway location cuts across the corner of this property for about 450 feet, and eventually, when construction is undertaken, it will be necessary to acquire some of Mr. Myers's land; also, that the property in question contains a very valuable deposit of gravel which can be used to good advantage when the highway is constructed. He questioned the advisability of purchasing the property at this time, in view of the fact that it likely will be 5 years or more before the road is built on the permanent alignment. The Commission concurred in the viewpoint of the Engineer and thereupon refused Mr. Myers's offer.

The Engineer reported that the Bureau of Reclamation has served notice that it intends to install a 36-inch concrete drain across the right of way of the Vale-Adrian Secondary Highway, Malheur County, under authority reserved by the Government when the right of way for this highway was acquired by the state, which will necessitate the cutting of the traveled roadway. The cost of this installation, he said, will be paid by the Federal Government, but they are asking the state to re-oil the road because the Reclamation Service does not have the necessary facilities to do that type of work. He recommended approval of the request and that the cost of such oiling work, which he estimated at \$10.00, be assumed by the state, it being his belief that such arrangement would help considerably in the settling of the controversy that now exists with the Reclamation Service relative to the installation of drainage pipes and structures across state highways. The Commission approved the recommendation unanimously.

The Engineer reported that contractor Roy L. Houck has purchased some new roadbuilding equipment which not only exceeds the statutory limits as to dimension but also is considerably overweight, even when unloaded, and that Mr. Houck has asked for permission to move this equipment over state highways from one job to another. He gave as his thought that it would be inadvisable to grant such permit to Mr. Houck, in view of the fact that this equipment is so much heavier than the law allows and for the further reason that it would have a damaging effect on the highways and the highway bridges. He further advised that he refused Mr. Houck's request. The Commission by unanimous vote confirmed the Engineer's action in this matter.

The Commission had under discussion a request from the city of Lakeview for certain city street improvements; viz., the widening and grading of a prospective state highway route and the application of a seal coat on existing city street pavements. The Engineer estimated the cost of the first of these projects at \$7,236, and that of the seal coat work at \$1,228. The Commission decided not to do the street widening work because it would necessitate

APR 7 1939

the rerouting of the highway, which the Commission does not believe is the proper thing to do at this time, and which would involve the holding of a public hearing in the town of Lakeview. Furthermore, the cost of the project is far in excess of the limit which the Commission can spend for any project without advertising the same for bids. The Commission approved construction of a seal coat project subject to the condition that the city of Lakeview will pay the costs involved and will deposit in advance a certified check in an amount equal to the estimated cost of the work.

The Engineer reported the cost to rebuild the Kings Valley Secondary Highway, in Polk County, from its junction with the Pacific Highway West to its junction with the Dallas-Kings Valley Secondary Highway. He advised that to grade, surface, and construct an oil mat treatment on this section, which is $6\frac{1}{4}$ miles in length, will cost approximately \$165,000. The Commission decided not to approve this project because of the cost involved and the shortage of available funds with which to finance it. The Engineer was instructed to convey such information to Senator Dean H. Walker.

The Engineer requested instructions relative to the payment of salaries or wages of highway department employees who are required to be absent from their regular duties in order to serve as jurors in any state or federal court. After discussion, the Commission by unanimous vote approved the payment of salaries and wages of employees while absent for such service in accordance with the following schedule:

Absence for jury duty (with pay) shall not exceed eleven (11) working days in any one year, unless a longer absence is previously authorized by the State Highway Engineer. No absence for jury duty (with pay) will be allowed an employee whose employment with the Highway Department during the calendar year in which the absence is to occur is not expected to total at least six (6) months.

From the amount earned by the employee while absent on jury duty there shall be deducted an amount equal to the amount of "per diem fees" collected (or collectible) for the jury service rendered, it being understood that the per diem fees are as follows:

Justice Court Jury	\$1.50
Grand Jury	3.00
Circuit Court Jury:	
(a) While awaiting assignment to panel	2.00
(b) While serving on panel	3.00

The deduction shall be made at the rate of \$3.00 per day (Sundays and holidays excepted) unless the pay roll on which the absent time is shown is accompanied by a written statement from the employee setting forth the exact rates and amounts received for the service.

The Engineer reported that the Olalla Creek-Toledo Section of the Corvallis-Newport Highway has been reconstructed on new alignment and

that certain portions of the old road are no longer of any value for state highway purposes, although other portions can be used to good advantage as stock pile sites, et cetera. He submitted a map disclosing the several parcels and recommended that the Commission take formal action abandoning the portions of the old road that are of no use for public purposes and retaining the portions that are of value for such purposes. After discussion the Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Highway Commission found it necessary to relocate portions of the Corvallis-Newport Highway in Lincoln County; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway there have been eliminated from the main travelled portion of said highway certain sections or fragments of land, which said sections or fragments of land are more specifically hereinafter defined and described in this resolution and are reflected on a blueprint, marked "Exhibit A", a copy of which is attached hereto and made a part hereof; and

WHEREAS, while certain portions of the eliminated sections are not required for use as parts of the main or travelled section of the highway, nevertheless the same are required, can be used, and are essential for other public uses in connection with said highway; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to preserve for public use in connection with said highway the fragments or parcels of land hereinafter described as the parcels to be retained and shown in yellow on the attached print; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission the purpose and plan of the Commission to abandon as parts of the state highway system certain portions of the highway eliminated from the main travelled portion of said highway, which sections are made unnecessary as a part of the completed highway and are shown in red on the attached print;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the parcels of land shown shaded in yellow on the attached print, which heretofore were within the right of way proper of the Corvallis-Newport Highway but which by reason of the relocation or realignment of said highway are now without the area improved

APR 7 1939

and used by the traveling public but are adjacent to and abut upon the said right of way and are needed for public use, shall be preserved by the Highway Commission in connection with the construction, improvement and maintenance of said highway or the use of the same, which said parcels are described as follows:

Those certain sections of the old right of way of the Olalla Creek-Toledo Section of the Corvallis-Newport Highway lying on each side of the reconstructed center line of said highway, the beginning and ending points of which with reference to Engineer's Stations of the said reconstructed center line are as follows:

On the westerly side from Station 2461+80 to Station 2466+60
 On the easterly side from Station 2484+50 to Station 2489+00
 On the westerly side from Station 2519+70 to Station 2526+25
 On the westerly side from Station 2535+10 to Station 2539+90
 On the easterly side from Station 2540+00 to Station 2541+70

2. That the fragments of land confined within the areas hereinafter described and designated as the parcels of land to be abandoned, which fragments were formerly within the limits of the right of way of the Corvallis-Newport Highway, and which parcels are shaded in red on the attached blueprint, be and said fragments of land are abandoned as parts of the right of way of said highway and said fragments of right of way are, so far as control and supervision of this Commission are concerned, left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Lincoln County. The fragments to be abandoned are described as follows:

Those certain sections of the old right of way of the Olalla Creek-Toledo Section of the Corvallis-Newport Highway lying on each side of the reconstructed center line of said highway, the beginning and ending points of which with reference to Engineer's Stations of the said reconstructed center line are as follows:

On the westerly side from Station 2493+60 to Station 2517+70
 On the easterly side from Station 2526+20 to Station 2533+60
 On the westerly side from Station 2546+25 to Station 2549+50
 On the easterly side from Station 2549+52 to Station 2554+10

3. In addition to the foregoing descriptions of said fragments or parcels of land there is attached hereto a blueprint marked Exhibit A", which by this reference is made a part hereof, and upon which map there is shown shaded in yellow the parcels of land to be preserved for public purposes, and upon which map there is shown shaded in red the abandoned sections of said right of way. Said exhibit for identification purposes bears the signatures of Paul Van Scoy, Acting Division Engineer, H. G. Smith, Construction Engineer,

and R. H. Baldock, State Highway Engineer, and bears date of March 1, 1939. *

4. In the event there remains any physical connection between any portions of said abandoned right of way and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portions of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to the said old or abandoned sections, then the State Highway Engineer hereby is authorized and directed to erect such barricades or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said state highway.

5. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Lincoln County, together with a copy of said exhibit for such action as the County Court may desire to take with respect to the fragments of land to be abandoned, and should said abandoned portions of the right of way of said Corvallis-Newport Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Lincoln County and beyond any responsibility or supervision by the State Highway Commission.

6. The Engineer hereby is instructed to properly and completely mark on the ground the boundaries of the fragments of land to be retained for right of way and other purposes by the Highway Commission by erecting and maintaining thereon proper monuments or posts upon which shall be inscribed the words "State Property".

The Secretary presented a letter from Mr. Ed W. Miller, Manager of the Oregon Coast Highway Association, inviting the Commission and its staff to attend the semi-annual meeting of the Association, which is to be held in Gold Beach on April 23 and 24, 1939. The Commission accepted the invitation with thanks.

The Commission considered and referred to the Engineer for investigation a letter from County Judge Earl B. Day, of Jackson County, on behalf of certain stockmen who desire permission to construct fences along the Sams Valley Secondary State Highway in the vicinity of Sams Valley.

The Secretary presented a letter from City Manager E. H. Ford, of La Grande, stating that, owing to limited parking space on Adams Avenue, in La Grande (state highway route), the city officials feel that they cannot comply with the Commission's requirements for the parallel parking of cars on this

Map filed in Right of Way Abandonment and Retention File - No. 62

APR 7 1939

street but have modified their present city ordinance to reduce the method of angle parking from 45 degrees to 35 degrees, which they trust will meet the requirements to the extent that the Commission will authorize the painting and maintaining of stripes for such method of parking at state expense. The Engineer was instructed to inform Mr. Ford that the Commission's policy in this regard requires the city to adopt the parallel system of parking cars, and unless the city will provide for such method of parking, the state will neither paint nor maintain the parking stripes.

The Commission considered a letter from County Judge Clinton Hurd, of Lane County, stating that the County Court has no objection to the naming of the county road which connects the Pacific Highway and the Junction City Secondary Highway, through Irving, either "Gent Drive" or "Gent Road". The Commission decided to take no action on this matter, it being considered that this is a county obligation.

The Commission considered and denied the request from Mrs. Wm. M. Dale, Portland, on behalf of the United Daughters of the Confederacy, for permission to erect a "Jefferson Davis" marker on the Pacific Highway near the south end of the Interstate Bridge, in Multnomah County.

A letter was presented from W. J. Kyle, Mayor of Florence, recommending the sale of certain state-owned property in Florence to Mr. Roy Swenson, mill operator and home owner of Swisshome, Oregon, who plans to use this property in connection with a tourist camp and park which he proposes to construct at this place. The Commission decided not to sell this property, it being needed for highway purposes.

A letter from the American Red Cross, Linn County, relative to securing some of the brick that was salvaged from the old brewery building at Albany, for use of a widow with six children whose home was recently burned, the brick being needed for the construction of a chimney, was considered. The Commission refused to give the brick to the widow, it being strictly contrary to the Commission's established policy to give state property to private individuals, but authorized the Engineer to let the Red Cross, which is a public organization, have enough brick to construct the chimney.

The Commission considered and denied the request from the Devils Lake Regatta Association for permission to maintain two signs over the Oregon Coast Highway, advertising the Sixth Annual Regatta at Devils Lake on June 24 and 25, 1939, it being strictly contrary to the Commission's established policy to permit such signs over state highway rights of way.

A letter was presented from P. M. Morse, County Engineer, Lane County, transmitting a petition from Lane County citizens who desire to secure materials from state-owned property adjacent to the McKenzie Highway, near Thurston, for use in connection with the construction of a county road which extends north from the McKenzie Highway to the old state highway a short distance east of Thurston. The Commission referred this matter to the Engineer for investigation.

The Engineer reported that, in accordance with authority previously granted by the Commission, he has ordered certain surveys since the last meeting. He submitted a list of such surveys and asked the Commission to approve them. After due consideration, Commissioner Aldrich moved that the State Highway Engineer be authorized and instructed to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Reconn. - - - 204-2823 - Fishhawk Falls-Ranger Station, County Road between Nehalem and Wolf Creek 1st authorization - \$550.00

Plans - - - 18-2824 - Lapine-W.Forest Boundary Section, Fremont Highway.
1st authorization - \$1,000.00

Plans - - - 117-2809 - Provolt-Williams Section, Williams Secondary Highway.
2nd authorization - \$900.00
Total to date - \$1,000.00

Plans - - - 224-2822 - Salem-Little Pudding River Section, Salem-Silverton County Road.
1st authorization - \$900.00

Plans - - - 19-2810 - Forest Boundary-Lakeview Section, Klamath Falls-Lakeview Highway.
2nd authorization - \$1000.00
Total to date - \$7,000.00

Plans - - - 26-2832 - Sandy Boulevard Section, Columbia River Highway.
2nd authorization - \$1,800.00
Total to date - \$4,000.00

Plans - - - 228-2806 - Hay Canyon Section - Moro-Hay Canyon County Road.
1st authorization - \$750.00

Plans - - - 30-2824 - Milton Section - Oregon-Washington Highway.
1st authorization - \$500.00

Quarry & - - - 33-2815 - Seufert-Dufur Section - The Dalles-California Highway
Stock Pile 1st authorization - \$250.00

Plans - - - 233-2816 - Petersburg Section, Fifteen Mile Road, Wasco County.
1st authorization - \$1,000.00

Right of Way- 36-2822 - Sheridan-Willamina Section, McMinnville-Tillamook Hwy.
1st authorization - \$125.00

Plans - - - 136-2823 - Amity-Hopewell Section, Bellevue -Hopewell Road.
1st authorization - \$100.00

The motion was duly seconded by Commissioner Clough and was declared by Chairman Cabell to have carried by the unanimous vote of the Commission.

APR 7 1939

The Commission had under discussion a letter from Contractor Henry C. Nelson requesting an extension of time of 26 days, from February 16 to May 13, 1939, within which to complete his contract for the construction of maintenance buildings at Suntex Junction and Brothers on the Central Oregon Highway, in Harney and Deschutes Counties. He attributed his failure to complete the project within the specified time limit to bad weather conditions and the performance of extra work in connection with this job. The Engineer advised that the reasons given by Mr. Nelson for failure to complete this project on time are correct. He recommended, in view of the circumstances, that the extension requested be granted without penalty and submitted in support thereof a letter from the Acting Regional Director of the Public Works Administration concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Contract No. 2099 for the construction of a bridge over Catching Slough on the Coos River Secondary State Highway, in Coos County, was completed by Contractor J. W. & J. R. Hillstrom on March 30, 1939, according to the requirements of the contract or modifications thereof and that said job is now ready for acceptance. The following resolution accepting this project was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that State Highway Contract No. 2099 with J. W. & J. R. Hillstrom for the construction of a bridge over Catching Slough on the Coos River Secondary Highway, in Coos County, has been completed according to the terms and provisions of the contract and that said job is now ready for acceptance;

THEREFORE, BE IT RESOLVED that the work covered by said state highway contract for the construction of said state highway bridge be declared completed according to the terms of the contract and that said job is hereby accepted and final payment in connection therewith is hereby authorized.

The Commission discussed the matter of a date for its next regular meeting for the receiving of bids and decided to hold such meeting in Portland on May 18 and 19, 1939. The Secretary was instructed to make the usual arrangements for the use of the auditorium in the Public Service Building. The Commission also decided to hold a special meeting of the Commission in the office of the State Highway Engineer, Salem, on Friday afternoon, April 21, 1939, to dispose of routine matters.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Tillamook County providing for county maintenance of the Fairview-Clemmens Corner County Road after improvement of the same by the state as a federal aid secondary highway project.

APR 1 1939

Agreement with Tillamook County providing for county maintenance of the Tillamook-Netarts County Road after improvement of the same by the state as a federal aid secondary highway project.

Agreement with Tillamook County providing for county maintenance of the Wilson River Loop County Road after improvement of the same by the state as a federal aid secondary highway project.

Agreement with Clackamas County providing for county maintenance of the Eagle Creek-Firwood County Road after improvement of the same by the state as a federal aid secondary highway project.

Agreement with Polk County providing for county maintenance of the Falls City County Road after improvement of the same by the state as a federal aid secondary highway project.

Agreement with City of Falls City providing for maintenance of North Main Street, in Falls City, after improvement of the same by the state as a federal aid secondary highway project.

Agreement with Douglas County providing for county maintenance of the North Umpqua County Road after improvement of the same by the state as a federal aid secondary highway project.

Agreement with Wallowa County providing for county maintenance of the Hurricane Creek County Road after improvement of the same by the state as a federal aid secondary highway project.

Supplemental agreement with Southern Pacific Company and the City of Klamath Falls covering additional work on the Main Street Undercrossing Project in Klamath Falls.

Agreement with Nicolai-Neppach Company providing for the acquisition of certain property in Tillamook County for park purposes.

Agreement with Ginn Coleman & Company providing for the lease of property for the storage of highway equipment in the town of Moro, Oregon.

Easement granting to George E. Huntly permission to truck-haul logs across state property in Tillamook County.

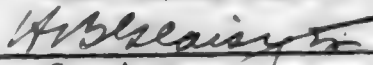

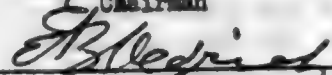

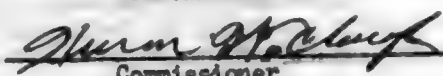

Permit granting the City of Sweet Home authority to construct and maintain sidewalk on Santiam Highway in Sweet Home.

Application for right of way across tribal lands in Warm Springs Indian Reservation.

Bargain and Sale Deed conveying unto L. V. Roake 2,250 sq.ft. of land situate in Lots 6 and 7, Block 4, Oregon City, being right of way transactions Nos. 3055 and 6468.

APR 7 1939

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:30 o'clock p. m.

 <u>State Highway Engineer</u>	 <u>Chairman</u>
 <u>Secretary</u>	 <u>Commissioner</u>
	 <u>Commissioner</u>

Salem, Oregon, April 21, 1939

The State Highway Commission met in special session at 2:00 o'clock p. m. in the office of the State Highway Engineer, Room 325, State Office Building. Present were:

Henry F. Cabell, Chairman
 E. B. Aldrich, Commissioner
 Huron W. Clough, Commissioner
 R. H. Baldock, State Highway Engineer
 J. M. Devers, Attorney
 H. B. Glaisyer, Secretary

Also present were W. H. Lynch, District Engineer, and T. M. Davis, Highway Engineer, representing the U. S. Bureau of Public Roads.

Mr. C. H. Lake, Salem, came before the Commission relative to the servicing of automobiles on the highway right of way at his service station just south of Salem. It appears that Mr. Lake's service station has been built too close to the highway to allow the servicing of cars entirely off the highway right of way and he has been notified to discontinue servicing cars in such location, which is in conformance with the Commission's established policy. Mr. Lake stated that he is not the owner of the buildings, being simply a renter, and that he did not know at the time that he leased the property that the servicing of cars on the highway was prohibited. He asked the Commission to modify its rulings in this particular instance so as to allow the servicing of cars on the highway during the lifetime of his lease, which, he said, expires in about 3 years, when he will make other arrangements. After considerable discussion the Engineer suggested, in view of the fact that the owner of this service station misrepresented conditions to Mr. Lake at the time the property was leased, that it might be advisable to allow Mr. Lake to continue the servicing of cars on the highway right of way as a temporary proposition until his lease expires. He further suggested, as a safeguard to other traffic, the construction of a landscaped area, enclosed by concrete curbs, between the driveway to Mr. Lake's pumps and the traveled portion of the highway. The Commission approved the suggestion by

APR 21 1939

unanimous vote subject to the condition that the matter be covered by appropriate agreement. In this connection the Engineer requested authority to construct such landscaped areas or islands, with curbs, as a general proposition where entrance and exit driveways are provided at service stations or other places of business adjacent to state highways. It was his thought that such islands would not only add to the attractiveness of the highway but would also act as a safeguard for traffic. The Commission approved the suggestion unanimously.

A delegation from East Woodburn, headed by Mr. J. F. Lawrence, and consisting of C. W. Smith, S. W. Maupin, Harris Nelson, and J. L. Klamp, came before the Commission and requested the following improvements: (1) Filling in of the ditches on both sides of the Pacific Highway through East Woodburn and the oiling of the shoulders full width of the highway right of way; (2) Painting of safety lanes across the intersection of the Pacific Highway with Young Street and with Cleveland Street; (3) Installation of a "stop" and "go" signal at the intersection of the Pacific Highway with Young Street.

They declared that the highway ditches as now maintained are traffic hazards and are the frequent cause of traffic accidents, and that the oiling of the shoulders is a necessity in order to eliminate the dust nuisance that obtains during the dry season in front of the business establishments in this part of Woodburn. They also declared that the painting of safety lanes across the Pacific Highway at Young Street and at Cleveland Street will be of great assistance in safeguarding the pedestrians who are obliged to cross the Pacific Highway at these points, particularly the cannery workers, of whom there is a great number. Mr. Lawrence alleged that the flashing beacons that have already been installed over the highway at Woodburn are not satisfactory because they do not slow down traffic to any appreciable extent, which is the reason they would like to have "stop" and "go" signals substituted. He said that they would raise sufficient money by popular subscription to pay one-half the cost of such installation, which, he understood, was a requirement of the Commission. Mr. Lawrence filed petitions signed by 57 residents of Woodburn in support of their oral requests.

The delegation was informed that the Commission is not in a position today to act on its request, but investigation would be made and it would be advised later as to what it could expect. The matter was thereupon referred by the Commission to the Engineer for such investigation and report.

The County Court of Marion County, consisting of County Judge J. C. Siegmund and County Commissioners Roy S. Nelson and Jim E. Smith, and County Engineer N. C. Hubbs, came before the Commission relative to the improvement of the Salem-Silverton County Road. They were informed that the Commission has budgeted \$37,000 of federal aid secondary highway funds for the improvement of this road and had planned to select a project at the Silverton end, but it appears that difficulties have been encountered in securing the needed right of way, so there is a question whether or not the Commission should proceed with its plans for the improvement of such section or should spend its money for improving the section at the Salem end of this highway where only a very small amount of extra right of way is needed. The Engineer advised

APR 21 1939

that this work must be contracted not later than June if the improvement, which is to consist of oiling work, is to be completed this year. Also, that he is ready to proceed with the survey but must know which section to prepare.

Judge Siegmund stated that the County Court was at first in favor of improving the Silverton end of this road, provided the people of Silverton would secure the needed right of way, which they agreed to do. However, the city did not acquire all of it and a goodly portion of that which was acquired was contingent upon so many conditions that it was unsatisfactory. It is now too late, he said, for the county to do anything about it, so the County Court has decided to recommend the improvement of the Salem end of the road. The Engineer advised that the plans for this section provide for the routing of traffic over the street that was oiled for use as a detour when the Salem North Section was improved a few years ago rather than over the present road past the State Fair grounds, which involves a railroad grade crossing in North Salem. This detour road, he said, is 50-feet wide and he believed that it would meet the federal requirements in that respect which would preclude the necessity to purchase additional right of way at this point.

Mr. Lynch stated that the Bureau of Public Roads would approve a right of way 50 feet wide for such improvement. After considerable discussion Chairman Cabell announced that the State Highway Commission is inclined to favor the County Court's request for the improvement of the Salem end of this road but must defer a decision in regard thereto pending a conference with a delegation from Silverton which is to appear before the Commission at this meeting. He added, however, that the Commission will improve such westerly end unless the Silverton delegation presents arguments strong enough to alter the Commission's present attitude with respect to this project. The Chairman's statements were confirmed by Commissioners Aldrich and Clough.

Reconsideration was given by the Commission to the matter of adopting new wage rates for labor employed on state contract work. After discussion, it was decided unanimously to continue the three classifications of labor as in the past; namely, common labor, intermediate labor, and skilled labor, and to prescribe minimum wage rates of 60 cents per hour for common labor which is a 10-cent-per-hour increase over the present rate; 75 cents per hour for intermediate labor; and \$1.20 per hour for skilled labor. The Engineer was instructed to specify such minimum rates in the specifications for the jobs on which the Commission will receive bids at its meeting on May 18 and 19, 1939. He also was instructed to notify the Portland Chapter of the Associated General Contractors of America, and Mr. C. D. Long, Business Representative of the Klamath Falls Building Trades Council, of the action taken.

Mr. W. H. Lynch, District Engineer, Bureau of Public Roads, was present and brought up for discussion the construction of the uncompleted portion of the I.O.N. Secondary Highway, in Malheur County, about 18 miles in length. He advised that inquiry has been made by the Chief of the Bureau of Public Roads as to the possibility of contracting this work this fall so as to expedite the completion of the entire highway. He pointed out that this would necessitate the allocation of all of the 1940 federal lands moneys for this work and the advancement of state funds to make up the difference in the total

estimated cost of the work across the public lands, there being insufficient federal lands funds available in the 1940 allotment to pay for all of the work across such sections. He explained that, if the Commission will agree to do this, arrangements would be made in the programming of the fiscal year 1941 federal lands funds to allocate a sufficient amount of such funds to the I.O.N. Highway to cover the amount advanced by the state, so that, in the end, the financial status of the project will be the same as if the work were done in units from year to year as federal funds are available. This arrangement is suggested, he said, in order to expedite the completion of this road in Oregon.

After considerable discussion, the Commission by unanimous vote approved Mr. Lynch's suggestion and authorized the Engineer to prepare this 18-mile section for contracting later in the year. The Commission also, by unanimous vote, approved the following telegram prepared by Mr. Lynch covering the matter:

"Following is resume of agreement concerning allotment of 1940 fiscal year public lands funds. State will allot all 1940 fiscal year public lands funds to ION with understanding sufficient 1941 public lands funds will be allotted to it when available to make up full share of federal obligation. They will let contract this fall for eighteen mile section. The state's estimate for this section is \$133,000 of which approximately \$76,000 chargeable to public lands funds. State also insists that when 1941 public lands funds are programmed \$80,000 will be allotted to project for Warm Springs Indian Reservation. According to our figures there is no balance of public lands funds from 1939 but a deficit of about \$10,000 because project 2D in Warm Springs Indian Reservation included in program not contracted. State expects to provide sufficient state funds to carry out 1939 program as they feel this project must be built on account promise to people."

A delegation from Silverton, consisting of Dr. P. A. Loar, John Porter, T. T. Leonard, and John Goplerude, came before the Commission in regard to the improvement of the Salem-Silverton County Road as a federal aid secondary highway project. Dr. Loar headed the group. They stated that when this project first came up for discussion the Marion County Court apparently was in favor of the improvement of the east or Silverton end of this road and asked the people of Silverton to acquire needed right of way, which they endeavored to do, although no definite agreement covering the matter was consummated. They further stated that they arranged for all of the right of way with the exception of two parcels which could not be financed, and discontinued negotiations for the same when they learned that the County Court had changed its attitude toward the project and now intended to recommend the improvement of the westerly or Salem end of the road. They urged the Commission to adhere to its present plan and reconstruct the Silverton Section.

Chairman Cabell advised that it does not appear possible to construct the easterly end of this road under the present program because of the right of way difficulties, and for the further reason that it is now too late for the county to do the grading work which it planned to do as a W. P. A.

APR 21 1939

project. He explained that the Commission budgeted \$37,000 to finance this improvement but such amount was not sufficient to pay for all of the work involved, so the Marion County Court agreed to cooperate by constructing the grade, which it intended to do as a W.P.A. project. He further explained that due to delays, the grading work could not possibly be done early enough to insure the completion of the surfacing and oiling this season, so it appears that the state will lose this money entirely for this year's construction unless it is used to finance the Salem Section. He added that the Commission will be pleased to give consideration to a project at the east end if and when additional federal aid secondary highway funds are provided by the Government. Commissioners Aldrich and Clough confirmed Chairman Cabell's remarks. The members of the delegation also approved the solution as outlined, which, they stated, they much prefer to losing the money altogether.

Messrs. James Convill and G. T. McClean, City Manager and City Engineer, respectively, of Astoria, came before the Commission in regard to the narrowing of Taylor Avenue (present route of the Oregon Coast Highway) between Columbia Street and Hamburg Street, in Astoria. They advised that originally this street was dedicated 120 feet in width, but a number of years ago an understanding was had between certain people of Astoria and the City Council to the effect that the street would be narrowed to an 80-foot width, such narrowing to be done on the east side of the street, although there appears to be no record of the adoption of an ordinance to that effect and no record of any kind to indicate that the agreement was a fact. Buildings constructed along this street in recent years, they said, have been built so as to encroach on the street in accordance with this understanding, and there are a number of new buildings proposed but the owners do not care to proceed with construction until the narrowing of the street has been approved and officially adopted by the City Council. Mr. Convill exhibited a map showing the present encroachments and inquired whether or not the Commission had any objection to the City Council taking appropriate action to effect the narrowing of this street to 80 feet in width.

The Engineer explained the Commission's requirements for right of way widths and gave as his thought that a right of way at least 100 feet wide should be provided along Taylor Avenue because of anticipated traffic conditions, but he requested time to give the matter further study before definitely committing himself in regard thereto.

Chairman Cabell advised that the Commission is not ready today to say how wide the right of way should be at this point and is reluctant to approve an 80-foot width because it believes that future traffic will demand a wider section, however, further investigation will be made to ascertain the minimum width that is needed and the City will be advised of the findings. He further stated that, if the City of Astoria feels that it must reduce the present width of Taylor Street in order to satisfy the adjacent property owners and to carry out the City's previous oral understanding with them, then the Commission will not object thereto if that can be done without causing traffic congestion. Commissioners Aldrich and Clough confirmed Chairman Cabell's statements whereupon the Engineer was instructed to investigate further and render a report thereon as soon as possible.

Mr. Conwill also urged the Commission to acquire the balance of the right of way for the proposed Astor Street project. He said that the City of Astoria owns a number of lots that will be needed for this right of way and has received several offers for the same but does not want to sell until they know whether or not the state needs them, so as to avoid repetition of the case of the sale of certain lots to the Associated Oil Company which has constructed a service station thereon. In this connection he pointed out that it will be necessary now for the state to purchase from the oil company not only the lots but also the buildings, and suggested that the state could save considerable money in this particular transaction by acquiring from the city Lots 5 and 6 of Block 132, at the site of the proposed ferry dock at 17th Street, a portion of which will probably be needed for right of way for the Astor Street improvement. Such location for the oil station, he said, will be ideal, because it will not only front on the highway but will also front on the road leading to the ferry.

Chairman Cabell advised that the Commission does not have funds available to finance the Astor Street improvement at this time and hesitates to give the people of Astoria any false hopes for the early construction of this project by acquiring right of way now. The first moneys available for this work, he said, are the 1940 funds, for which a program has not yet been arranged, and the Commission is not in a position at this time to definitely commit them. The Assistant Attorney recommended approval of Mr. Conwill's suggestion relative to the acquisition of Lots 5 and 6, Block 132. He also suggested that it would be advisable to at least make an attempt to secure quitclaim deeds from the owners of other properties that are needed for this right of way, which properties are now being foreclosed by the county for non-payment of taxes, rather than to wait until February of next year when the rights of redemption expire. There are three or four parcels, he said, in this category which he believed could be acquired by quitclaim deed upon payment of not to exceed \$50 each.

After considerable discussion, the Commission approved the Assistant Attorney's suggestion and authorized Mr. Conwill to consult with the property owners on such basis. The Commission also, by unanimous vote, approved securing a deed from the City of Astoria for Lots 5 and 6 of Block 132, it being understood that the state will deed back to the city such portion of these lots as are not actually needed for right of way or for trading purposes in securing other right of way for this project.

The Engineer brought up for discussion the proposed agreement with Contractor Roy L. Houck altering somewhat the provisions of his contract No. 2159 for grading the approaches to the Albany overcrossing structure on the Pacific Highway, in Linn County. It appears that when this contract was awarded it was intended that Mr. Houck should secure embankment materials from a pit located about $1\frac{1}{2}$ miles north of the job, which would necessitate the construction of a hauling road across private property. However, since then Mr. Houck has purchased new equipment that will reduce materially the unit cost of his work; but, in order to use this equipment, it will be necessary for him to utilize a hauling road constructed on the new highway location north of the limits of his project, which section it was not proposed to place under contract until later in the year. The Engineer advises that Mr. Houck wants

APR 21 1939

the state to acquire the right of way for this section now and let him construct a hauling road thereover, which would not only be of benefit to him but would also be of benefit to the state later on by reducing the cost of construction of this particular section. Not only will Mr. Houck make a saving in cost, he said, but the state will also benefit by reason of the change. He read aloud the provisions of the proposed agreement, the salient features of which follow, and recommended approval of the same:

THINGS TO BE DONE BY STATE:

1. State, at its own expense, shall acquire the right of way for the revised location of the Pacific Highway East between Engineer's Station 349+75 and Engineer's Station 388+80 and shall render the same, or so much thereof as may be necessary for hauling road purposes, available to Contractor by not later than May 20, 1939, and thereafter shall permit and allow Contractor to conduct hauling operations thereover in lieu of the routes stated and set out in the said Contract No. 2159.

THINGS TO BE DONE BY CONTRACTOR:

1. Contractor shall expend the sum of \$6,600.05 in the construction of a highway roadbed between Engineer's Station 345 and Engineer's Station 390, including clearing and grubbing, roadbed, embankment, drainage structures, and selected road topping. The expenditure of the said sum of \$6,600.05 shall be computed upon the basis of the schedule of items, quantities, and unit prices hereinafter set out:

Item	Unit	Unit Price	Net Quantity	Allowance	Total Cost
Clearing and Grubbing	All		All		All \$ 500.00
Trench Excavation	Cu. Yd.	1.00	368	30	398 398.00
Exc. Single Classification	Cu. Yd.	0.20	13614	1386	15000 3,000.00
Truck Haul	Yd. Mi.	0.06	3298	202	3500 210.00
Finishing Roadbeds and Slopes	Mile	200.00	0.86		0.86 172.00
12" Concrete Pipe	Lin. Ft.	0.80	135	6	141 112.80
18" Concrete Pipe	Lin. Ft.	1.45	516	9	525 761.25
24" Concrete Pipe	Lin. Ft.	3.00	39	3	42 126.00
Selected Road Topping 4"	Cu. Yd.	0.44	2527	473	3000 1,320.00
Total Amount					\$6,600.05

In the event that in the final computation of the value of work done the total over-runs in the tabulation hereinabove given should exceed the total under-runs, State shall reimburse Contractor to the extent of the excess of the over-runs over the under-runs, based upon the unit items and the unit prices set out in the said tabulation. In the event that the total computed under-runs should exceed the total computed over-runs the State shall have the right to extend the work to be done easterly from Station 343+45 for a sufficient distance to absorb the difference, based upon the unit items and unit prices hereinabove stated.

2. The work to be done by Contractor shall be in accordance with the highway plans and roadbed sections shown by the State Highway Department standard plans, consisting of three sheets, entitled Albany Overcrossing Section, Pacific Highway East, Sheet No. 1, Sheet No. 2, and Sheet No. 3.

3. All work to be done shall be in accordance with the specifications and special provisions set out in the said Contract No. 2159 and shall be subject to the same engineering supervision and approval as the other work to be done under the said contract.

4. Contractor shall maintain the said highway roadbed and surfacing during his hauling operations thereover, and at the conclusion of the said operations shall turn the same over to State smoothed and finished in accordance with the standards for acceptance of new work as set out in said Contract No. 2159.

5. It is understood that the bridge on the project located approximately at Station 351 will not be constructed and that at this point the Contractor, at his own cost and expense, shall provide a temporary detour road around the location of the said future structure. The Contractor will, however, be required to construct the road embankment and gravel sub-base up to points on each side of the structure, as directed by the engineer, which will not interfere with the future construction thereof.

It is specifically understood and agreed that this agreement is collateral to and is not in derogation of any of the terms, conditions, and agreements of the said Contract No. 2159, except as to the route or routes for hauling materials set out in said contract.

It is further understood and agreed that Contractor shall make arrangements with Great American Indemnity

APR 21 1939

Company to the end that the work to be done hereunder shall come under the protection of the bond heretofore given in connection with the said Contract No. 2159 to the same effect and to the same extent and purpose as though the work herein set out had been included in full in said contract.

After considerable discussion, Chairman Cabell expressed himself as satisfied with the agreement if it is legal and will be approved by the Bureau of Public Roads, which is cooperating in this work. It was his thought that this is about as good a deal as the state can get covering the matter and that it should be accepted. Commissioners Aldrich and Clough concurred, making the decision unanimous. The Commission thereupon signed the agreement with Mr. Howk and authorized the Attorney to proceed with the taking of options for the extra right of way, which is estimated to cost approximately \$12,000, as soon as this arrangement has been approved by the Bureau of Public Roads.

The Commission had under discussion the matter of the sale of three houses in Pendleton that were acquired in connection with the acquisition of right of way for the Pendleton Overcrossing Section of the Old Oregon Trail, which buildings were moved from this right of way to state property adjacent to the Pendleton maintenance building. The Engineer advised that one of these houses is now rented to an employee of the State Highway Department and the other two to outside parties; also, that this year's budget contains an item of \$640 for house repair and maintenance. He questioned the advisability of continuing on the present basis of renting the houses because so much time is taken to investigate petty complaints and requests for improvements by the renters. He suggested that it would be better to sell the houses, or at least to hire someone to handle the renting of the same, which would relieve the state's employees of such duty. Commissioner Aldrich advised that, regardless of what the Commission decides about the houses, in his estimation the land on which the houses are located should be retained by the state because it is valuable property. After discussion, the Commission referred the matter to the Attorney for investigation and recommendation.

The Commission discussed and approved a form letter providing a procedure for the disciplining of log haulers who are arrested for transporting over state highways loads weighing in excess of the statutory weight limits, such letter having been prepared as a result of a conference with Senators F. M. Franciscovich and U. S. Balentine, representatives of the Department of State Police and Public Utilities Commissioner, and members of the logging industry, at a meeting held in the Benson Hotel on April 5, 1939. (See Circular Letter No. 119, dated May 5, 1939.)

The Commission had under discussion the designation of holidays during which log-hauling operations shall not be allowed on state highways, and decided to prohibit such hauling on the following holidays: New Year's Day, January 1; Memorial Day, May 30; Independence Day, July 4; Labor Day, first Monday in September; Armistice Day, November 11; Christmas Day, December 25.

Also, any holiday that is designated by the President of the United States or the Governor of the State of Oregon; also, the Monday immediately following the above-mentioned holidays that happen to fall on Sunday.

The Engineer reported that of April 12 he awarded to Clifford A. Dunn of Klamath Falls the contract covering the grading, surfacing, and oiling of the Dixonville-Mud Hollow Section of the North Umpqua County Road, in Douglas County, Mr. Dunn being the low bidder on this project, for which bids were taken on April 7, and the conditions of the award having been satisfied. The Commission approved the award of this contract, as reported, by unanimous vote.

The Secretary presented a letter from the County Treasurer of Deschutes County, requesting an advance to Deschutes County of a portion of the county's share of the motor vehicle and gasoline tax license fees which will be distributed on July 15, 1939, to enable the county to pay off certain road bonded indebtedness due on May 1, 1939. He also presented a certificate from said County Treasurer, advising that Deschutes County has road bonds maturing in the amount of \$5,000 on May 1, with interest amounting to \$1,385, and that the county has only \$1,427.32 on hand in its sinking fund to take care of such obligation; and a resolution from the Deschutes County Court requesting an advance of \$4,957.68 to take care of this expense. The Attorney advised that this request meets the legal requirements. The Commission thereupon by unanimous vote approved the request and signed a letter directed to the Secretary of State authorizing him to advance such sum to Deschutes County and requesting that a deduction of like amount be made from the next payment or allocation due Deschutes County from the state highway fund.

The Engineer requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties, together with the prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

APR 21 1939

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Boulton-Scappoose Section - Columbia River Highway</u>

The Attorney requested instructions relative to the sale of an old building in Albany, located on the new state highway right of way. He said that the building is an old structure of not much value and advised that it is quite important that it be disposed of and removed from the right of way before the Commission meeting on May 18. He was authorized by the Commission to advertise the building for sale in the Albany newspaper for bids to be received at the Attorney's office, in Salem, on May 10, 1939.

The Attorney requested authority to condemn 4 parcels of real property in Albany, that are needed for right of way for the improvement of the Pacific Highway East, in that city, as follows:

APR 21 1939

Transaction No. 5849, with E. L. Dickson and Mildred Dickson, recommended offer \$50.00; Transaction No. 5878, with Verna H. Crofton, recommended offer \$525.00; Transaction No. 5882, with Max and Inez Brown, recommended offer \$1,083; Transaction No. 5883, with Clarence Cox, recommended offer \$5,000. The Commission approved the request and the amounts of the respective offers and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, designate, construct, improve, and maintain a system of state highways in the State of Oregon, and to acquire rights of way and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary and will be of advantage to the State of Oregon and there is need that the State acquire for right of way purposes in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Main Street-Airport Road Section of the Pacific Highway East

land and property owned by or in possession of the following parties and/or persons, to wit:

5849-E. L. Dickson and Mildred Dickson
5878-Verna H. Crofton
5882-Max Brown and Inez Brown
5883-Clarence Cox

as their respective interests may appear, and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, construct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

APR 21 1939

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Commission considered and approved the payment of \$290.00 to A. Van Lydegraf, representing extra payment in connection with the rehabilitating of an auto camp in the Bunker Hill District, Marshfield, occasioned by the reconstruction of the Oregon Coast Highway at this point.

The Commission reconsidered, but deferred action on, the claim of Ben Hur Lampman, Portland, to a section of the old right of way on the Oregon Coast Highway in front of his premises near Nelscott, in Lincoln County, which was abandoned several years ago when this highway was reconstructed on new alignment at this place, there being some question as to whether or not Mr. Lampman is really entitled to this abandoned road. The matter was referred to the Attorney for further study.

The State Parks Superintendent, Mr. S. H. Boardman, was present and presented a request for a \$50,000 increase in the park budget for 1939. The Commission took the matter under advisement.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Douglas National Bank, Roseburg, covering the

APR 21 1939

matter of the removal of slides from the bank's property adjacent to the Oregon Coast Highway, in Douglas County.

Agreement with the heirs of the Pusey Estate, providing for the depositing of excavated materials on the Estate's property in Oregon City.

Agreement with Beatrice Decker, Portland, relative to right of way for the Lombard-Killingsworth Section of the Northeast Portland Secondary Highway.

Agreement with Cunningham Sheep Company, Pendleton, providing for the lease of 0.35 acre of land situate in the N.E. $\frac{1}{4}$ of the N.E. $\frac{1}{4}$ of Section 29, T. 3 S., R. 31 E., W. M., Umatilla County, for a period of 50 years, from March 14, 1939.

Agreement with Chessel Mills and Mamie S. Mills, husband and wife, providing for right of way for a detour road around the Wilson River Bridge situate in the N.W. $\frac{1}{4}$ of Section 24, T. 1 S., R. 9 W., W.M., Tillamook County.

Agreement with Fred Wyss, cancelling the lease of a gravel bar situate in the Miami River adjacent to Mr. Wyss's property, in Tillamook County.

Agreement with the City of Portland covering the construction of a lighting system on Interstate Avenue, Portland.

Agreement with the City of Portland providing for the maintenance and operation of the proposed Interstate Avenue lighting system.

Bargain and Sale Deed conveying unto Albert C. Jensen and wife 2,210 square feet of land situate in Lots 1 and 2 of Block 39, Hackleman's Second Addition to Albany, Linn County.

Bargain and Sale Deed conveying unto C. F. Howard and wife 15,195 square feet of land situate in Lots 7, 8, 9, 10, 11, and 12, of Block 1, Georgetown (St. Helens), Columbia County.

The Commission adjourned at 6:30 o'clock p. m., to reconvene on the following morning in the same room.

APR 21 1939

Salem, Oregon, April 22, 1939

The State Highway Commission reconvened at 9:00 o'clock a. m. in the office of the State Highway Engineer, Room 325, State Office Building, with Chairman Henry F. Cabell and Commissioner Huron W. Clough present and participating. Commissioner Aldrich was excused from attending this meeting.

The Engineer brought up for discussion the matter of increasing the amount of deductions to be made by contractors for subsistence of men employed by them on state highway construction work. He explained that, according to the present specifications, contractors are allowed to make a deduction of \$1.00 per day for each man, which amount, in his estimation, is not enough to pay the contractors' costs on this account. He recommended increasing the amount of the deduction to \$1.20 per day. The Commission approved the recommendation unanimously.

The Commission discussed at considerable length the bids received by the State Board of Control for the furnishing of power patrol graders. It appears that the bids were received on April 17 for two of such graders and were referred to the State Highway Department for recommendation in view of the fact that the low bidder did not submit an affidavit certifying that the equipment bid upon fully complied with the specifications as written. It also appears that, because of this technicality, the Board of Control did not award this business to the low bidder, although it was the thought of the Board that this technicality could be waived.
